On March 22, 2017, researchers from each of the STAIRSTEP disciplines went to Memorial High School in Port Arthur to a STEM meeting. There were several teachers, students, and parents in attendance. Each discipline represented each of their respective fields and stayed after to answer any questions that any attendees had. With respect to Computer Science, nearly a dozen parents, teachers, and students came by to view the LEAP motion demonstration that was set up, and at least three students had shown interest in the Lamar Computer Science Department and/or computer science with STAIRSTEP.
