On April 13, 2017, STAIRSTEP was invited to the Ozen Math Induction event to help increase high school student’s interest in perusing a college education in a STEM field. Diego Fernandez and Ethan Hall presented their robotics and machine learning research in the form of a poster and allowed students to come and ask questions about the research or a STEM major. Around 25 students attended the event, and the STAIRSTEP members that attended were able to make an education in STEM appealing to the high schoolers.
