The Biology and Environmental Science STAIRSTEP Team conducted outreach visits to Lamar State College - Orange and Lee College in April 2016. Datron Brown led a slide presentation that covered information on the STAIRSTEP program, the Lamar University Biology Degree Programs, career opportunities in the life sciences, undergraduate research and study abroad. At Lamar State College – Orange the team presented to 8 students in Dr Matthew McClure’s General Biology for science majors course (BIOL 1406) and at Lee College they presented to 18 students in Dr. Tia Hall’s Environmental Science course (GEOL 1405). The professors were also interested and kind enough to provide encouraging feedback for future presentations.
