Tim and Alex’s Trip to Lee College

Timothy Holcombe and Alex Strong visited the Lee Community College to give the students some information on the opportunities available for furthering their education at Lamar University on April 15th 2014. We brought with us some handouts containing information on scholarships and research opportunities. Alex and I spoke for just a little over 20 minutes and it was well received. We spoke to Mrs. McClure’s Programming Fundamentals I class of around eight students and for sure two of them are coming to Lamar in the fall for computer science. This trip really helped to get some information to these students on their opportunities on Lamar’s campus as well as what to expect when they arrive. It also helped to get the Stair Step name as a whole and enforced our relationship with the community college.
