STAIRSTEP Week of Welcome

Event Name: Week of Welcome

Date: 8/26/2014

Timothy Holcombe

A total of six students were present for the Week of Welcome event. Timothy Holcombe, Alex Strong, and Hannah Leleux from the Computer Science department, Keelie from the physics department, and Brittany Cashi and Audrene from the math department. The event went well and allowed us as a group to become better known among the student community. We had twenty three visitors total and several of them left contact info and expressed interest in our program and what we are doing.

STAIRSTEP had a table set up in the Setzer center with information about its various branches. We had a pretty representation of our departments as at least one student from each branch was present to answer questions and provide insight into what they were doing. Overall I think it went very well and it helped to make our program better known in the student body.
