Your Future

Construction managers ensure construction projects are completed on time and on budget, without sacrificing the quality of work or the safety of their workers. From design to completion, construction managers work through the entire process of turning a blueprint into reality.

Let Us Help You Pay
Students in the CM Program qualify for many scholarships. Let us help you with your college education. Apply for business scholarships after acceptance to gain additional financial support.

Gain Experience
Our program puts you in the field, learning career-relevant tasks as early as your first Construction Management class. Plus, all students must complete an internship before graduating, ensuring your wealth of knowledge expands beyond the classroom.

Take Advantage of Our Connections
The CM Program partners with construction executives through an industry advisory council. These influential professionals share advice and connect current students to career opportunities, leading to a 100% job placement rate for CM students. Meet them at our annual Construction Career Forum, or attend guest lectures hosted throughout the semester.

I want to have that feeling of satisfaction when I look at a building and tell myself I was part of the team that made that happen.
—Leoany Alvarez, student
