Many of you know my background lies in computational physics. For nearly 40 years, I’ve been fascinated by things that are too small, too large or too fast to be directly observed, like the atom, the universe or the behavior of photons (particles of light). Computational physics allows us to create simulations of the things we can’t see, revealing their surprising beauty or complexity.

This yearning to understand the world at a new level—isn’t that what links science and art? At its core, higher education fosters this very curiosity. In any field, critical thinking is fundamental. The scientist thrives by testing established theories and the artist by pressing a different point of view upon a conventional way of seeing. This constant search for new angles of understanding is what fuels discovery and innovation in all disciplines.

Take John Alexander, a 1968 alumus, whose story (and paintings) are featured in this issue of Cardinal Cadence. His art ranges from landscapes to social and political satire. The contrast is jarring but instructive. His work makes us question what we think we see in the world around us. Then there’s Keith Carter ’70, a master photographer who captures Southeast Texas in a way that throws off our first impressions. He shoots familiar scenes from unique angles or in unusual, mystic lighting. The animals, the people, the objects, the Texas landscape itself—they’re all there, but something’s off. And it’s that otherworldliness that helps us see something new.

As Distinguished Alumni of Lamar University, both John Alexander and Keith Carter are just two examples of the amazing artists Lamar University has nurtured and whose passion for their craft has captivated audiences far and wide. Their journeys began here, fueled by our talented faculty and a vibrant artistic environment. Their success is a testament to both their own talent and Lamar’s commitment to fostering creativity in all its forms.

As you read through this issue, please take a moment to appreciate the incredible artistic talent Lamar University helps to cultivate. From established masters to up-and-coming artists to donors and curators, you’ll see the power of art to inspire, challenge and make us think in new ways.

Lamar thrives because of its diverse group of talented individuals. We may not all speak the same language, but we share a passion for excellence, where all forms of creativity and discovery can flourish.

With Cardinal Pride,

Jaime R. Taylor, President

Cardinal Love Stories
Lamar University’s public art collection recently increased its holdings of art by over 30 percent with a generous gift of artwork from Houston art dealer Betty Moody. This impressive gift of art is the largest given to the collection that was started in 2014. Betty Moody, an icon in the Texas art world, is highly respected by artists, collectors, museum curators and her peers. She has been recognized with Lifetime Achievement Awards by the Houston Art League in 2019 and the Center for the Advancement and Study of Early Texas Art in 2021, and she received a Legend Award from the Dallas Visual Art Center in 2000.
Moody founded her eponymous gallery in 1975 with a focus on artists living and working in Texas. Her business acumen, attention to detail and ability to connect clients with art is unsurpassed. Moody’s brilliant smile and welcoming demeanor make every visitor to her gallery feel like the most important person in the room. She has a discerning eye for art and can talk about it in a way that makes it accessible to everyone. As testament to her expertise, most of the artists she has represented over the years have had their work placed in prestigious museum and public art collections throughout the state and beyond.

Moody is drawn to artists who have creative personal visions and a commitment to their practice of making art. “The materials that they use to make art really don’t matter to me. I work with artists who paint, photograph, sculpt, draw, make art with found objects or commercially made materials, make videos—essentially any materials—as long as the artist makes it well and the art has soul and meaning,” she said. “I also look for a personal connection—I need to be able to talk honestly about the art with the artist.” In reflecting on the evolution of her career, Moody stated, “I was an art major, primarily art history, in college, moved to Houston in 1968, worked in galleries, opened my own gallery in 1975, and, over the years, I have learned to trust my instincts.”

Moody’s connection to Beaumont runs deep. Many of her artists have been selected for exhibition at the Art Museum of Southeast Texas (AMSET). The museum has also purchased work from Moody Gallery, as has Lamar’s Public Art Committee. In fact, the first purchase for Lamar’s public art collection came from Moody Gallery. In 2014 Lamar’s newly formed art committee, composed at the time of Nancy Evans, Kim Steinhagen and Donna Meeks, visited the gallery to see an exhibition of Michael Kennaugh’s new paintings. Moody recalled of the acquisition, “Michael graduated from Lamar University so it was only fitting that his painting be the first to be purchased for this new collection.” Moody was intrigued by Nancy Evans’ vision to enhance campus life with a public art collection and with her ability to identify sites that would be appropriate for art. Moody said of the Public Art Committee co-chairs, “Nancy’s vision and Kim’s knowledge and curatorial skills were the perfect combination to select and begin to form a stunning public art collection. After Nancy passed away in 018, Kim has continued to carry on her legacy with vision, curatorial knowledge, scholarship and professional leadership.”

Most of the works in the recent Moody gift to Lamar came from the estate of her close friend Clint Willour, longtime curator of the Galveston Art Center. Willour had a major impact on the careers of Texas artists and organized over 1,000 exhibitions in his lifetime. Willour toured Lamar’s public art collection with Moody in 2019 and was so impressed that he offered to donate some art from his personal collection. Willour passed away in 2021 and Moody did not forget his wishes. When Willour’s husband Reid Mitchell died the following year, Moody inherited the full collection of art owned by the couple. Moody explained, “Clint Willour and Reid Mitchell were very dear friends of mine for 45 years. They left all the art to me and, following what I know Clint would have done, I am giving it all away to institutions who will be excellent stewards. Clint was the epitome of philanthropy—he gave to major museums and universities throughout Texas.”

Moody has dispersed works to the Menil Collection, the Museum of Fine Arts Houston, AMSET and Lamar University. She is enthusiastic about the continued growth and direction of the LU Public Art Collection and commented that it “is recognized...
as one the best university collections in Texas. It is curated and has become a role model for other university collecting.” She wanted to give works to Lamar because Clint “had great respect for the collection that had been assembled at Lamar University. He knew the art would be placed in appropriate public and private areas (nothing stored) so that the work could be seen by students and faculty and visitors for all to enjoy.”

Steinhagen and her committee selected 20 works by 13 artists from the options available. In addition, Moody gave two pieces from her own personal collection: a Keith Carter photograph of Walden Pond and a large landscape painting by Houston artist Bob Camblin. Some of the highlights of the gift from the Willour/Mitchell estate include two whimsical, welded steel sculptures by New York artist Peter Reginato, a playful drawing by abstract expressionist Robert Natkin, a carved and painted wooden totem by Texas artist Otis Jones and a classic Earl Staley acrylic on canvas painted in Italy after Staley won the coveted Prix de Rome prize in 1981. In addition, Lamar now owns a second Michael Kennaugh painting from his 2015 Locus in Quo exhibition. The gift also includes a number of unframed works for which Steinhagen plans to raise framing funds. These wonderful works of art will be placed in various buildings throughout the campus to be enjoyed by students, faculty and visitors to campus. Details about each work soon may be found at lamar.edu/publicart.
"A whirlwind" is how Tezeno describes the last few years of creating intricate, bright-colored collages; exhibitions; international sales; interviews; meeting collectors including Paulette and Denzel Washington; and receiving a 2023 Guggenheim Foundation Fellowship in Fine Arts.

Tezeno is one of the artists whose work was chosen for "Multiplicity. Blackness in Contemporary Collage," recently exhibited at the Museum of Fine Arts, Houston.

Her story
Born and raised in Port Arthur, Texas, Tezeno remembers telling her parents that she wanted to be an artist at age five. She won her first art award in third grade.

She talked about her family, which included accomplished seamstresses and quilters. "I grew up surrounded by love, positivity and encouragement," Tezeno recalled. The artist’s multimedia work celebrates many childhood memories, which she calls "making memories tangible."

"I quilt with paper. That’s what quilting is, laying different patterns together to see if they work." Tezeno related in her recent feature article in Vogue. The results are portraits of enduring moments and storytellers with wide, welcoming eyes.

A 1984 graduate of Lamar with a bachelor’s degree in graphic design, she recalled "a lot of cut and paste in those days" and taking professor Robert O’Neill’s print-making classes. Tezeno said she held onto the words of her graphic arts professor. “Mr. [Phil] Fitzpatrick encouraged me to never give up on my dream.”

She remarked that later after moving to Dallas, she earned a living as a self-taught vegetarian chef and caterer while continuing to practice her art. “Cooking came naturally and I love it.” So which artists from the past would she have at a dinner party? “Romare Bearden, Elizabeth Catlett, William H. Johnson and Thelma Burke—my inspirations.”

Turning points
Meeting Frank Frazier. “He’s the godfather of the Dallas art community who took undiscovered Black artists and our art to meet with gallery owners. Frank opened doors for many of us.”

The dream. “In 1998, I felt my work was stagnant, needing change. I prayed about it and one night dreamed that an angel knocked on my door and showed me sketches of the work I now create.”

Instagram. “It introduced my art to the world…Luis De Jesus Los Angeles contacted me and became my representative…My first solo exhibition with his gallery was sold out.”

Tezeno recounted another first. She was the first woman commissioned by the New Orleans Jazz & Heritage Festival to create its Congo Square poster. How does this artist define success? “Not by what you do but how you feel…To me, it’s a million tons of happiness.”

“I’m just a simple woman from the South who loves life. I want to share my experiences and my joy,” Tezeno said in an April 20, 2023, feature in Vogue.

Discover more at evitatezeno.com. In January 2025, LU’s Dishman Art Museum will host an exhibition of her art. "We are all bits and pieces of different things…I’m the fabric of culture, diversity, love and happiness."

–Evita Tezeno ‘84 from the video “Our Common Bond - Artists Talk”
In Texas’ rich cultural tapestry, there is a leading light whose passion for art transcends mere appreciation—it defines a legacy. William “Bill” Colburn, an accomplished alumnus of the Class of 1973, has forged a lifelong odyssey steeped in the vibrant hues and profound depths of Texas artistry. From his humble beginnings in Houston to his status today as a collector and custodian of culture, Colburn’s journey is a testament to the transformative power of art.

Colburn’s narrative unfolds against the backdrop of his academic pursuits as a business student. Equipped with an accounting degree, he embarked on a professional journey that eventually led him to Hines Interests LP. Joining the firm in 1979, his tenure spanned more than three decades, culminating in his role as vice president and controller. His contributions to the firm’s Ownership Accounting Group underscored not only his financial acumen but also his unwavering commitment to excellence.
Yet, amidst the demands of his corporate career, Colburn’s soul found solace in the world of art—a passion kindled in his youth. Raised in a household where music was revered, Colburn’s appreciation for artistic expression blossomed under the influence of his mother, a soloist in their church choir. It was here, amidst the resplendent beauty of Catholic iconography, that his love affair with art began to take root.

The spark that ignited Colburn’s fervor for art blazed forth during a pilgrimage to the 1977 King Tut exhibit in New Orleans, a seminal experience that would shape his artistic trajectory. “The importance of seeing that blockbuster King Tut exhibit,” Colburn said, “is that it got me interested in visiting art museums and buying the art posters that I began to have framed and hung on my walls.”

Fueled by this newfound passion, he embarked on a soul-stirring journey across Europe in 1985, armed with nothing but a backpack and a Eurail train pass. For four weeks he traversed the continent, immersing himself in the timeless treasures of artistic expression—from the ethereal beauty of Renaissance masterpieces to the avant-garde innovations of contemporary artists.

His thirst for artistic enlightenment unquenched, Colburn returned to Europe in 1987, this time setting his sights on the venerable galleries of London, enriching his understanding of artistic diversity and cultural heritage.

“Before 1987 the only thing I had on my walls were art posters,” Colburn recalled. “However in 1987, I attended a fundraiser that had a silent auction from which I successfully bid on a piece by Robert Camblin, one of the artists in the 1985 MFAH [Museum of Fine Arts, Houston] ‘Fresh Paint’ exhibit.” He still owns that acquisition.

As the years unfolded, Colburn’s gaze turned homeward, drawn irresistibly to the luminous landscapes and vibrant colors produced by Texas artists. Through study, he cultivated a singular expertise in their works—a testament to his boundless curiosity and abiding passion.

Central to Colburn’s journey is his role as a collector, tasking himself with helping to preserve the legacies of Texas’s artists. His approach to collecting is imbued with a profound reverence for creative accomplishment—a sentiment echoed in his meticulous selection process and commitment to his collection.

“Looking back on it, my collection began with that acquisition, though I had not consciously decided to form a collection at that point. However what I had decided was to start replacing those art posters with works by established artists. It was that “Fresh Paint” exhibit that really piqued my interest in artists living and working in Texas,” Colburn said.

His preferred genre, abstract art, serves as a canvas for his imagination and aesthetic sensibilities. Yet, amidst the variety of artists he has studied, one reigns supreme in Colburn’s pantheon of Texas favorites: Nic Nicosia. Renowned for his evocative photographic works, Nicosia’s ability to capture the essence of human emotion resonates deeply with Colburn, a sentiment mirrored in his admiration for the sculptural skill of fellow Texan James Surls.

Amidst the myriad treasures he has gathered, one piece stands out as a testament to Colburn’s faith and spirituality: And Then He Fell Once More by San Antonio native Vincent Valdez. Part of a larger series titled Stations, this poignant masterpiece depicts a boxer’s struggle for redemption, allegorically reminiscent of the Stations of the Cross—a metaphor for the eternal struggle of the human spirit. For Colburn, a devout Catholic, this piece serves as a poignant reminder of the enduring power of faith and resilience.

Today, Colburn’s three-story home in Houston stands as a testament to his boundless passion for art, a sanctuary where nearly every inch of wall space bears witness to his admiration of artistic expression. Stepping into his home is akin to embarking on a journey through the annals of art history, a breathtaking odyssey that inspires a sense of transcending time and space.

Yet, amidst the splendor of his carefully curated private collection, Colburn’s heart hearkens back to his alma mater, Lamar University. In a gesture of profound generosity, Colburn has pledged in his estate plan to donate his collection to the Dishman Art Museum, ensuring that future generations of students will have the opportunity to admire and learn from the legacy of several Texas artists.

In the chronicles of Texas’ cultural heritage, Bill Colburn’s name shines brightly as a beacon of artistic enlightenment whose passion and dedication will continue to inspire generations to come. As his legacy finds a home within the walls of the Dishman Art Museum at Lamar University, Colburn’s love for art will live on—a timeless tribute to the transformative power of creativity and expression.
Faggards are a dual-artist family

by Darragh Castillo
There was wine in Albert Faggard’s past. Perhaps roses, too, but there were definitely cattle and lots of paint.

Living at the beach and painting a decade or so ago, an artist friend asked if he was making out all right. Was he making enough money to cover canvas and paint expenses? When Albert responded that he bought his supplies in bulk, the friend realized that he had “made it” as an artist.

Countless canvases later and now a tenured instructor at Lamar State College Port Arthur, the Beaumont native can share anecdotes of his wide range of experiences. He has raised cattle and wildlife in the Texas Hill Country and retired from Beringer Vineyards. Indeed, all his endeavors have exposed him to the natural beauty he shares in paintings.

Now Albert '03 lives in Southeast Texas with his wife, Amy Tolbert-Faggard '94, '13. This widely known artistic couple often are seen around the area as they support the arts community. Their paintings are on display throughout Southeast Texas and submitted to contests around the country. The Faggards have painted a lifestyle they love, with a Mid-County home offering studio space for each of them. What could be more cozy?

And the fact that this husband and wife can critique each other’s work? That’s an art in itself. They say they learn from each other and are willing to share encouragement and support those continuing to improve their art. She’s a morning painter, and it’s his turn in the evenings, after coming home from Lamar State College Port Arthur.

Supporting the arts

Albert Faggard and Amy Tolbert-Faggard each have warm and welcoming personalities that seem to glow with positivity. This comes out as they reflect on the area’s entities and artists who propel the movement.

“You know the arts community is a good thing. It’s just a good thing,” Albert said. “You have to support the arts or no one else will.” The two have exhibited locally and Amy is especially prolific, entering competitions around the country. This propels her to create on a regular basis. Landscapes and still life are her preference. “You’re only as good as your last painting,” she said.

With effortless enthusiasm, they preach that “keeping at it,” keeping the ideas flowing, is the way to keep progressing—and loving—putting paint to canvas. “The more you do it, the better you’re going to be. You can improve every day. The more you give it, the better you’re going to be,” Albert encouraged.

He’s known for natural, realistic portrayals of birds, nature, and so on. Albert works in oils, and his second favorite medium is egg tempera. “I haven’t done that in years and want to get back to it,” he said.

Amy’s morning studio time is currently inspired by gardens and baskets from the world of flowers.

Art into time and space

Morning painting sessions motivate Amy. She says the time passes quickly when she’s working, “You lose yourself doing it,” Amy said. “You lose yourself easily. You do it because you love to do it.”

She’s loved art since her school days and says student artists have good direction and support locally. “Lamar University has a really great art department. They work with you so you won’t be discouraged,” Amy said.

Blending a palate of experience

Both Amy and Albert are Lamar alumni. Albert earned a Master of Arts in visual art in 2003, and Amy holds a B.S. in interdisciplinary studies and an 2013 M.A. in visual arts. Albert’s noted naturalist father, known as BoBo, was a 1948 graduate of Lamar who also was well known for his gardening. Five of Albert’s seven siblings are alumni as well.

Albert’s instructors included Jerry Newman at LU and John Alexander ’68 at University of Houston, both eminent in the arts world. Admiring Albert’s natural affinity for nature, Ducks Unlimited, Safari Club International and Coast Conservation Association are groups that have exhibited his work.

Amy’s 2013 honors include being part of the After School Special Alumni Art Exhibition.

Any advice for those who see beauty and long to capture it? Do it and do it again and again. “Keeping at it” comes with satisfaction, Albert advised. But there is a caveat. “Have fun. No one makes art to have a bad time. God gave us the gift of creativity,” Albert said.

More information is available at amyfaggard.com and AlbertFaggard@proton.me
Our lives can take countless paths. But, sometimes, all it takes is one person to change everything. One person to inspire you. One person to believe in you. One person to guide you onto the path that was destined for you.

When Michael Kennaugh ’86 began his freshman year at Lamar University, he had never taken a formal art class before and certainly had never considered a career as an artist despite having a lifelong love and aptitude for drawing.

“All through high school, I was always drawing and was known as that kid that could draw,” Kennaugh said. “I didn’t really think much of it until I got to Lamar.”

Initially, Kennaugh enrolled at Lamar to pursue the path of many animal lovers—veterinary medicine—but quickly realized that wasn’t the right fit. Eager to help guide their son, his parents suggested alternatives such as dentistry—an immediate “no” for Kennaugh—and
commercial art, which seemed like a logical choice with his passion and talent for drawing.

“| I had never met a fine artist before, | he said. | “I only knew art in the terms of comic books and advertisements, and I thought | I could do that, so I switched over to the School of Arts at Lamar.” |

After changing majors, Kennaugh met Lamar Art Department professor Jerry Newman, taking both a drawing and painting course from him. Newman quickly saw Kennaugh’s artistic talent and helped secure Kennaugh a commercial art internship the summer after his freshman year.

“I just sat there [working on an ad campaign], and nothing came to mind. And then I just thought, ‘I really hate this,’ recalled Kennaugh. That kind of worried me because I thought now my path of life was even more questionable. If this isn’t what I want to do, what else is there?”

When he returned to school to tell Newman, the professor was unsurprised.

“I think at the time he saw that I was a painter when I didn’t even realize it myself. Sometimes it feels like when you look in the mirror, the way you perceive yourself is probably not an accurate measurement of yourself because you’re too close. But to have someone look at you and say you might have a chance—and for it to be him, it was the confidence boost I needed for sure.”

With Newman’s encouragement and support, Kennaugh picked a new path: becoming a fine artist. Newman cautioned him the path would not be easy and would require serious commitment with no guarantee of success.

Kennaugh poured himself into becoming a fine artist, devoting countless hours to honing his craft and learning what it would take to be a true working artist from icons like Newman and fellow Lamar alumnus and painter Paul Manes ’83. Many of Kennaugh’s days and nights over the next few years earning his Bachelor of Fine Arts degree at Lamar would be spent putting paint on canvas.

“I would paint all day. Newman gave us keys to the department, and we would kind of break in on the weekends and paint all weekend. We painted seven days a week, me and maybe two other students who saw what we wanted to do in this world. You couldn’t just paint for an hour and a half or two in class. You would never get there.”

After graduating from LU with his B.F.A. in 1986, Kennaugh went on to pursue his master’s degree, earning his M.F.A. in painting from the University of North Texas in 1990. He also attended the American College of Switzerland in Leysin in 1990 and completed a residency at The William Flanagan Memorial Creative Persons Center in Montauk, N.Y., in 1996.

Once his education was complete, Kennaugh eagerly took off on his path to becoming a successful working artist and “finding his own voice” in his work. Today, he is known for abstract paintings, sculptures and, of course, drawings.

“Newman told me, ‘Just keep working. Don’t worry about sales. Don’t worry about recognition. Just make the work.’ That was our mantra at Lamar. It has stayed with me my entire life, and there’s nothing more true than that.”

For the past two decades, he has been represented by the well-respected Moody Gallery in Houston. Never wanting to be far from art, Kennaugh also has worked at The Museum of Fine Arts Houston since 1993, where he currently oversees the installation of art exhibitions. In 2005, he designed and built his own home and studio near downtown Houston.

“The essence of my work: I would say it’s a journal. I love living with my work. Something about it becomes part of your consciousness. It becomes so deeply ingrained in your life that your work becomes somewhat inseparable from yourself.”

Kennaugh’s works can be found in the permanent collections of The Museum of Fine Arts Houston, Art Museum of Southeast Texas, Lamar University, Tyler Museum of Art, Mobile Museum of Art, and in private collections both nationally and internationally.

Numerous exhibitions of his work have been held at the Moody Gallery, as well as The Houston Museum of Fine Arts. Dishman Art Museum, Beeville Art Museum, Stephen F. Austin University, Albright Knox Gallery (Buffalo, N.Y.), Hong Kong Visual Arts Center (Hong Kong, China) and Kouros Gallery (New York, N.Y.) among others. His next showing will be Sept. 12, 2024, at Target Texas, a five-artist exhibition at the Museum of South Texas in Corpus Christi, and his 11th showing at Moody Gallery is set for 2026.

This past year, Kennaugh was featured in the Dishman’s joint exhibition, “Our Back Pages,” which highlighted work by distinguished Lamar alumni including Kennaugh, Marvin Hayes ’63, Paul Manes, and Allie “Bill” Skelton III ’65. Kennaugh was happy to return to his alma mater to speak to aspiring young artists and reminisce on the place—and the people—who set him on his path.

“I had artistic inclinations, but I never knew my life would shape up like this. When I bought in to be an artist, everything at Lamar was there in place...waiting for me. And once I devoted myself, it all just started to happen. I am very blessed being an artist. It’s an honor to do this.”

More information is available through moodygallery.com
Renowned artist Paul Manes ’72, ’82, believes that inspiration can come from anywhere and at any time. In creating his art, Manes said that continual practice helps him “create a flow, which opens up opportunities for synchronistic events to occur.”

“Sometimes the universe is just on your side,” he explained.

To expand his creativity, Manes follows best-selling author Malcolm Gladwell’s popular school of thought that practice is more important than natural aptitude. Based on research suggesting that 10,000 hours of focused practice is needed to achieve greatness, Gladwell’s theory indicates that practice is the essence of achievement. Manes applies this to his art, which has been showcased both around the country and internationally.

“Gladwell’s ten-thousand-hour referral allows for focused attention and enjoyment in creating whatever you create,” Manes elaborated. “To aspiring artists, I say draw until your fingers bleed. Examine the art of the past, as well as the present. Read anything and learn to synthesize information so you can use it in your work. Go out on a limb. The further out you go, the clearer the view. You’re here for only a moment, so make all you can of it.”

Manes has certainly made the most of his moments, exerting an influence on the art world for more than 30 years. He is well known for his large-scale imagery, focusing on surface, scale, space, light and form. He has never felt pressure to conform to current trends in the art world but has found success following his own vision.

“You don’t forget where you come from,” Manes explains. “Beaumont, Texas, is surrounded by swamps and marshes. These are the wonderful places I used to explore as a youth. Alligators, 12-foot palmettos, otters and snakes, perch and smallmouth bass abound. My hope is that humans can come together and address issues and inequities before it is too late. We’re all from the same cloth and could use a little more love and compassion. These things I try to address in my paintings. It’s an ongoing process.”

Born in 1948 in Austin, Manes grew up in Beaumont and graduated from Beaumont High School. Attending Lamar as an undergraduate was a natural progression in his educational journey. He originally studied business and graduated with a Bachelor of Business Administration in marketing in 1972. But the business world was not where Manes was destined to make an impact.

Manes began painting at age 30, and quickly knew it was the path he wished to take. He once again returned to Lamar, this time studying art. He earned a Bachelor of Fine Arts in 1982 and went on to study at Hunter College in New York City.

“My painting teacher at Lamar, Jerry Newman, was a great teacher and a great man. I learned how to draw from him. He was a mentor. He and his wife Pattee became great friends,” he recalls. “My art history teacher, Lynne Lokensgard, was brilliant and taught me about the beauties of the Italian Renaissance. She was a great friend as well.”
His work has been exhibited across the United States, as well as internationally in Italy, Spain, France, Monaco, Germany and Belgium. Most recently, his exhibition “Everyone is an Artist” was featured at ART BASE in Basalt, Colo. An exhibit will be on display in September at the Redbud Arts Center in Houston, and another in November at Cris Worley Fine Arts in Dallas. Past exhibitions have been featured at the Museum of Biblical Art (Dallas), Grace Museum (Abilene, Texas), Dishman Art Museum (Lamar University), Galerie Simonne Stern (New Orleans) and many more.

His work is also included in the permanent collections of the Solomon R. Guggenheim Museum (New York City), the Metropolitan Museum of Art (New York City), the Detroit Institute of Art (Michigan), Rutgers University Art Museum (New Jersey), the Tucson Museum of Art (Arizona), The Museum of Fine Arts (Houston), The Art Museum of Southeast Texas (Beaumont) and in the private collections of Yoko Ono and Emeril Lagasse. His monumental work, *The Entry of Christ into New York*, is on view at the Centro de Arte Moderno y Contemporáneo de Castilla-Mancha in Toledo, Spain.

“Living in New York was a lot of fun,” he says. “I showed at Kouros Gallery for years. There were many memorable shows in different cities in the U.S. and in Europe. I particularly enjoyed showing in Brussels, Malaga and Caserta, Italy, along with other artists involved with ‘Painting After Post Modernism,’ an exhibit orchestrated by Roberto Polo and Barbara Rose. The paintings featured in those exhibits I believe are among my best.”

Manes currently lives in Basalt, Colo., with his wife Brenda, and continues to paint in his studio in Carbondale, Colo. He is currently working on an ongoing sculpture project in Italy.

“After living in Texas and New York, I now live in the mountains of Colorado. Not much change in activities, just a different atmosphere,” he concludes. “A lifetime spent producing art has been enormously rewarding. There is no end or retirement from it. The best is yet to come!”

*For more information, visit paulmanes.art.*
Sunni Forcier '15 began demonstrating her artistic instinct at a young age. As a child, she would “spend hours at the coffee table, cutting, gluing and coloring.” She even chose to be an artist for a career day when she was in second grade, donning an oversized white shirt that had paint all over it and carrying a palette in hand. Even as a seven-year-old, it seemed that Forcier knew that she was destined to become an artist.

A native of Beaumont, Sunni initially chose to attend Lamar because it kept her close to her family. But she quickly found that LU’s art program was “a hidden gem.” She appreciated the small class sizes and the program’s diverse course offerings. She also enjoyed the way art history was incorporated into her education. Her time at Lamar helped expose her to different kinds of artistic technique and enabled her to develop her “artistic voice.” But perhaps her most important takeaway from the many hours she spent earning her degree wasn’t the lessons she learned as much as it was the people with whom she learned them.

After reflecting upon her Cardinal experience, Forcier said, “I hope that students in the art department now are able to find a dependable group like I was privileged to have, classmates who will grow and learn with them.” She credits this community for the work she was able to create while attending Lamar, and she still maintains those close relationships to this day.

Upon graduating from LU with her bachelor’s degree in fine arts in the spring of 2015, Forcier later attended the University of Houston where she earned her master’s degree in fine arts in 2019. Though Forcier returned to Beaumont to be closer to her family, some of her work is on display at the Hooks-Epstein Galleries in Houston. Kim Steinhagen, co-chair of LU’s Public Art Committee and development officer for the College of Fine Arts and Communication, saw Forcier’s work and recognized her as “a talented artist.” She admired the novelty and intricacy of her art and said that it is significant that her work is featured at Hooks-Epstein Galleries because of its long history and prestige in the Houston area.

Forcier now teaches art at Lumberton High School and serves as an adjunct faculty member at Lamar where she teaches evening classes. When she isn’t teaching art, she dedicates a lot of her time to developing her own techniques and expanding her creativity.

If she isn’t working or focusing on some of her personal projects, she enjoys spending time with her family and dog. She says that her family plays a very important role in her life, and one friend described her as “most comfortable” when she is watching her nieces and nephews run around the family living room.

Forcier’s tendency toward curiosity, her patience and her attention to detail all have contributed toward her success. She noted that some of her own personal experiences have led her to “explore themes of impermanence, time and memory” in her work. She concentrates primarily on photography and printmaking. Some of her pictures capture timeless and intimate moments with family members while others display the beauty that can be found in the mundane.

Forcier’s impact is not limited to her classrooms. This summer, she will lead a camp for seventh to tenth graders at LU’s campus for the month of June. She looks forward to teaching these students more about camera-less images and linoleum prints. As for her own projects and goals, she stays busy and continues to express herself in unique ways. In her own words, she is “always working on something.”

Sunni Forcier’s portfolio may be found at sunniforcier.com
From an early age, Jason Robichau '02 was obsessed with sports, a devotion that had a profound impact in some of his earliest memories. However, it would be during his freshman year at Lamar that an act of thoughtfulness and generosity turned him onto what would be his career path.

Robichau saw a story on ESPN about Buffalo Bills quarterback Jim Kelly's son Hunter and his battle with Krabbe Leukodystrophy, a rare genetic neurological disorder. The story told of the efforts of Hunter’s Hope Foundation, founded to bring awareness and funding for research of the disease.

“I saw that the Kelly family was raising money for Hunter’s Hope Foundation, and I called the organization and asked if I could paint a picture of Jim for an auction they were having,” Robichau said. “I hadn’t really done any significant art outside of my high school work, but I really wanted to help because I was moved by the Kelly family’s story.”

The foundation accepted the offer. and a few months later Robichau was in Buffalo, N.Y., presenting the painting to Jim Kelly and the foundation. The rest, some might say, has become Robichau’s history. That act of compassion was the kickoff to his career.

“I feel like I have a blessing from God for my ability, and it gives me the ability to be able to pass blessings on in the best way I know how,” he said.

Robichau and his wife Robbie (Waters) '04 live in College Station, but his works are literally a Who’s Who of Hall of Fame athletes and entertainers—Michael Jordan, Peyton Manning, Yao Ming, and Jason’s celebrity crush Faith Hill, just to name a few. Robichau’s creations are made from photographs or sometimes from life.

Robichau said he has had great experiences working with so many personalities, but some stand out a little more than others. For example, one of the most rewarding and special memories was working with Muhammad Ali’s foundation.

“I love Muhammad Ali’s the best,” he said. “I don’t think I’ve ever found a bad picture. I worked for Muhammad Ali’s foundation for 10 years and did at least one or two paintings every year. And he’s by far the best to paint; he’s just amazing. Jordan is the same way. You know, there’s not a bad picture of Jordan. To work anytime with someone like that, you just kind of know you’re painting greatness.”

Working in an illusionist style, Robichau’s technique captures a subject through tiny hand-painted squares of bright color and metallic gold and bronze paint that meld from collage to image as the viewer moves away from the painting. His work has been shown at the National Art Museum of Sport (Indianapolis, Ind.), American Sports Art Museum and Archives (Daphne, Ala.), George Krevsky Gallery (San Francisco, Calif.), Xanadu Gallery (Scottsdale, Ariz.) and Image Gallery (Edmond, Okla.).

ARTIST JIM RICHARD:
Reflections on college, creativity & career

by Brooke Barnett
When acclaimed artist Jim Richard ’65 first came to Lamar State College of Technology in the early 1960s, he originally dreamed of becoming a cartoonist. Pursuing a career in fine art wasn’t his focus, but Lamar ultimately would become a springboard that helped him find his true talent and calling. Richard reflected back on a successful career as an award-winning painter, and explained how his time at Lamar helped set him on a pathway that has allowed his art to be showcased around the world.

As one of Lamar’s most widely recognized and influential alumni artists, Richard’s work has been showcased in numerous prestigious galleries during his more than 50-year career. While he currently lives and works in New Orleans, La., his story began with his Southeast Texas roots.

“I was the first in my family to attend college,” Richard explained. “There was really no thought of me going away to school. It was assumed that when I graduated from high school that I would continue my studies at Lamar like so many other Golden Triangle youngsters.”

Richard entered Lamar in 1961, and earned a Bachelor of Science in commercial art in 1965. His time at Lamar allowed him to explore more deeply the world of fine art, which quickly became his passion. He bonded with several other undergraduates who were interested in pursuing careers in art, and he spent the majority of his time on campus in Lamar’s art department. He fondly recalled the studio faculty who helped nurture his growing interest and talent.

“I appreciated my daily connection with studio faculty like Mr. [Robert] Madden, Mr. [Jerry] Newman, and Mr. [Robert] O’Neill. It became far more than ‘school,’” he remembered. “It was where I wanted to be and what I wanted to do. I got a very solid grounding in painting at Lamar. It never really crossed my mind at the time that I should be anywhere else.”

Lamar provided his first experiences in learning about important artists who would influence him greatly throughout his career, including the Fauves and other French painters, the German expressionists, the abstract expressionists and other more contemporary artists. After finishing his undergraduate degree, he began to consider options for graduate studies.

“It was only when I began to apply to graduate schools that I started to wonder if my application would be competitive. The only studio degree available from Lamar’s art department at that time was a B.S. in commercial art, which I knew was unlikely to impress the MFA programs to which I was applying,” he admits. “I was delighted and relieved when I began to receive acceptances from very good schools. I started to allow myself to feel that the paintings I did at Lamar could be well-received in competitive environments.”

Richard was offered a fellowship at the University of Colorado, where he went on to earn a Master of Fine Arts degree in 1968.

“I was working with students from major universities and painting faculty who had New York galleries. I was learning something new and
“For aspiring artists who are looking into an education at Lamar, I would tell them to put their preconceptions on hold and be open to new and challenging outlooks. Once they are truly committed to being an artist, no one will be able to talk them out of it.”

challenging every day, but I was happy to discover that my Lamar background had prepared me to hold my own and be taken seriously,” he reflected.

During Richard’s early career, he had shows in New York City art institutions including the Whitney Museum, the Guggenheim Museum and the Drawing Center. He was also featured in an international show in a castle in Cagnes-sur-Mer in the south of France, which allowed him to travel abroad for the first time and explore the art world in Europe.

“This experience allowed me to see myself as part of a much bigger picture in a way I hadn’t done before,” he said. “Probably the most important mainstay of my art life when it comes to exhibiting has been my consistent relationships with excellent galleries. Most of my opportunities to exhibit in major art venues or to become included in museum collections have come as a result of those relationships.”

Looking back on his career, Richard recalled being deeply influenced by the move his family made in 1950 from downtown Port Arthur to the outskirts of town. The outskirts soon turned into suburbs, and he recalls being fascinated by a similar pattern across the nation.

“I became interested in the quest for an ideal that drove it,” he explained. “I was fascinated with the search for the utopian backyard paradise, but I craved the messiness and cultural opportunities that downtown offered. My art in one way or another throughout my life has dealt with these obvious, but layered, issues.”

Richard has an extensive exhibition record that includes the Arthur Roger Gallery, Galerie Simonne Stern and the New Orleans Museum of Art in New Orleans; the Inman Gallery, Watson/DeNagy Gallery and Museum of Fine Arts in Houston; the Jeff Bailey Gallery and Oliver Kamm Gallery in New York; and the Rebecca Cooper Gallery in Washington, D.C. He received a Joan Mitchell Foundation Award in 2004 and a Pollack-Krasner Foundation Award in 2006.

Richard lives and works out of New Orleans, where he also served as a professor in the School of Fine Arts at the University of New Orleans. Hurricane Katrina brought a life-changing experience when his studio had to be torn down and rebuilt after being flooded with more than nine feet of water.

“The terrible result was that I lost a lot of my art and my history, but it also allowed me to see things with fresh eyes and a sense of a new beginning,” he said. “I built a new home and studio on the same site and began making new work with an irrepressible vigor. I spent so many years making art that poked around at the notion of a suburban, backyard ideal, and now this new urban studio, built to my needs, may just be my own version of that ideal.”

At 81 years of age, Richard still enjoys being in the studio every day. He currently is preparing for a show at the Arthur Roger Gallery in New Orleans while also creating new work for Houston’s Inman Gallery as they expand into a new, larger venue. He continues to visit New York City each year, connecting with local artists and visiting the city’s galleries and museums. His process of choice is still painting, but he keeps his creativity alive and growing by experimenting with other mediums.

“I am currently using Flashe paint, a French vinyl paint that predates acrylics. For my works on paper, I have been experimenting with drawing and painting on YUPO, a high-tech ‘paper’ that is non-absorbent,” he adds. “I also have a history of doing collages.”

Richard looks back fondly on his time at Lamar and the impact it has had on his career.

“For aspiring artists who are looking into an education at Lamar, I would tell them to put their preconceptions on hold and be open to new and challenging outlooks. Once they are truly committed to being an artist, no one will be able to talk them out of it.”

Richard is living proof of that.

What do you do when you have hundreds of gourds growing across your farm? If you’re like Lamar University alum Roy Cavarretta, you turn them into works of art!

The 1973 graduate earned a degree in art education, but it would be years before he learned about carving and transforming Lagenaria spp. hard-shell gourds. These particular species have thick bodies to support carving and burning.

“I got a degree in art education, but had trouble finding a job,” Cavarretta said. “I ended up with a career in the corporate world.”

After retiring from a sales position in Houston with Federal Express, Cavarretta and his wife, Blanche, left the hectic city life behind and moved to a farm in Hallettsville, Texas.

When Cavarretta was a student, his favorite medium was pen and ink. Carving dried gourds came about almost out of necessity. “It all started when our daughter gave us a bunch of pumpkin and gourd seeds,” he said. “Pretty soon we had hundreds growing all over the farm. We thought, ‘What are we going to do with all these gourds?’”

So, Cavarretta started making birdhouses from dried and hollowed-out gourds, but soon he was carving, burning and painting the gourds in beautiful colors and elaborate designs. The finished products look more like finely made pots and vases than dried vegetables.

“If you ever told me there was a thing as ‘gourd art’, I wouldn’t have believed it,” Cavarretta said. He took courses and learned as much as he could about the ancient tradition of decorating them.

“They are made all over the world: the American Southwest, South America, even China,” he said. Historical accounts trace the appearance of gourd art as far back as the Tang Dynasty from 618 to 907. “It’s an ancient yet unknown art form. Each one is different, each is a unique canvas.”

He has won several awards including Best In Show and had his work published in western art magazines. “It’s not a hobby now; it’s a passion,” he said.

His wife has joined him in that passion, although she never considered herself an artist before. She had retired from the corporate world, but when her husband started making gourd art, she wanted to give it a try too. “Now she’s very good and has received awards of her own,” he said. “Our work is different from each other. Sometimes we collaborate, but we each have our own style. She has a good eye and is very creative.” Both have become master gourd artists.

Cavarretta said they attend at least six major shows a year in places like Ruidoso and Las Cruces in New Mexico and Kerrville and Lubbock in Texas. “We like going to shows and meeting the other artists and meeting the people that are buying our art,” he said. “It’s very rewarding.”

Last fall, the couple was delighted when they were a featured segment on Texas Country Reporter, the weekly television series that chronicles the state’s people and culture.

“I owe so much to Lamar,” Cavarretta said. “Instructors like Jerry Newman and Robert Rogan really taught us to think outside of the box.” Or in this case, the gourd . . .

“THE POETRY ALL AROUND US”

Keith Carter on *Ghostlight*, swamp cosmos and magical accidents

“KEITH CARTER HAS THE GIFT OF TAKING THINGS WE HAVE SEEN ALL OUR LIVES — A WATERMELON STAND, A [COUNTRY CHURCH OR STORE], A GRAVEYARD, A CLOTHESLINE WITH CHICKENS UNDERNEATH... AND GIVING THEM ANOTHER DIMENSION, A BEAUTY YOU CAN’T EASILY BE RID OF.”

—HORTON FOOTE, AMERICAN SCREENWRITER AND PLAYWRIGHT

by Casey Ford
If we thought he might be done after half a century making provocative art, we have another think coming. Five years on, Keith Carter ’70 has followed his career-spanning book 50 Years with Ghostlight. This latest book, with all its saturation and deep shadow, feels wholly new while also retrospective in its homage to the otherworld in our southern gulf wetlands. The aesthetic of tenderness in this collection is familiar; it comforts us as we wade through these unsettling images of a strange universe of dark water and gnarled cypress groves.

“How up a glass of that [swamp] water to the light,” Carter said, “and see it is a cosmos.” Like William Blake and his attention to the world in a grain of sand, in Ghostlight, Beaumont’s own “poet of the ordinary” beckons us to follow his line of sight into that shrouded space of emotional and visual density, where everything is happening all at once, from before birth to after death. Each allegorical image conjures a presence beyond itself, the haunted and life-sustaining eternity of the baygall.

The artist has been wading these waters since his family came to Texas in the early 1950s, and though he has traveled the world and unlocked celebrity-level renown—his iconic face and signature aesthetic featured over decades in pages from Texas Monthly to the New Yorker and beyond—Carter, a 2004 LU Distinguished Alumnus, has never left home. His splendid home studio, delicately camouflaged in Beaumont’s historic midtown oaks, evokes this duality. A visit there offers a sense of elsewhere and of rootedness with the grand trees on the grounds. It also whispers, “Patricia.”

When Carter talks about his late wife Pat, she feels so present, you might think she’ll come from around the kitchen corner with tea. His first monograph, From Uncertain to Blue, contains images from their travels in the late 1980s to obscure Texas towns with intriguing names. Pat is the reason we have his most famous photo, Fireflies. Carter recalls the moment in detail for Robert Keiner of Professional Photographer in 2021. He says he saw a flaw at first, but Pat saw “the blur,” and Carter says it changed his whole life. Together they had discovered what would become the thing that etches his art on our hearts: the haunted light and complicated textures of this place we move around in.

In the December 2018 issue of Texas Monthly, Mai Schotz said of his work, “Carter’s photographs provide a vision of Texas as we all want to imagine it to be: a hot-as-hell oasis where people lead picturesque yet complex lives, imbued with a sense of calm that can only be felt when an endless landscape extends in all
directions.” Some of us might struggle to be inspired by the muddy landscapes of our area, but Carter, whose sight literally was altered many years ago by an eye cancer, sees wonder there and holds it out for us. He suggests it does not take an altered vision to love and capture the beauty here—our eyes simply need to be opened to see layers of mystery in the mundane. “Perfection is overrated,” he says. Like our imperfect home, he says, “art can be sloppy and confused, and that might be where it is most brave, most vulnerable.”

Including the images in *Ghostlight*, Carter’s body of work has heavily studied landscape, but he has also always been interested in faces. The stories and spirituality of Southeast Texas luminesce in his photographs of its children, its rural and urban citizens, its blue-collar pillars. His loving study of faces emerged at the earliest part of his career. His mother, Jane, was a portrait photographer, and she saw the potential in some of his first photos of fishermen on the banks of the Neches River. With her encouragement, Carter set out on a quite different path than was typical for a new graduate of the LU College of Business. However his art career may have diverted him to exotic locales, the good news for us all is that he has always found his way home. Carter calls his career as a faculty member in Lamar University’s Department of Art and Design “a most magical accident,” but his legacy of mentoring and teaching here seems preordained. It has kept him close to our students and communities for almost half his life. On “field trips and walkabouts,” he encourages students to perceive the world with their own unique vision and to embrace “the loveliness of the evocative over the definable.” He passes on his unanswerable questions to them, the questions that live in his art: What is it to be human? What is it to see?

Since 1989, Carter holds the endowed Walles Chair in Fine Arts, and during his prolific academic career he has received the University’s highest teaching honors: the Regents’ Professor Award, the University Professor Award and Distinguished Faculty Lecturer. His world-class oeuvre and wise-but-affable personality have built LU’s prestigious art photography program, and he has helped the University recruit, mentor and produce many talented young artists, curators, teachers and leaders into the discipline.

He teaches away from home, too, in workshops around the country, and even a casual conversation with Carter inspires one to do whatever she must to sustain a creative life, which he suggests is easy in a place like Southeast Texas, a place he has described as a “gumbo culture”—murky, mysterious and, in the case of the Big Thicket, like living on another planet. Not only nature, but people and things in everyday moments, as Carter said to Wes Ferguson in a 2018 *Texas Highways* interview, “the secret…is to resist intelligence, to intuitively and instinctively feel the value in a small gesture, in the light, in the poetry all around us.”

We can experience Keith Carter’s multiple-award-winning photography exhibited around the country: the National Portrait Gallery, The Smithsonian American Art Museum, the Getty, and even in the collections of presidents, movie stars and rock icons. The closest venues to home, though, are the Art Museum of Southeast Texas, Lamar University’s own Dishman Art Museum and LU’s Public Art Collection on campus. *Ghostlight* and other monographs by Carter are available through the University of Texas Press.

Keith Carter’s work may be found at Stephen L. Clark Gallery (Austin), Etherton Gallery (Tucson), PDNB (Dallas), Redbud Arts Center (Houston), PhotoEye Gallery (Santa Fe) and A Gallery for Fine Photography (New Orleans).
Lamar University alum Mary Welborn, 1970, is using her art degree to create not only beautiful paintings of flowers and plants but also to promote a larger appreciation of the natural world.

Each page features a native Texas plant, flower or animal in a detailed and vivid watercolor plus a brief written statement about its uses or lore.

“I worked on them during the pandemic,” Mary said. “I was able to do a lot of research about the plants.”

One entry in the book tells readers that “the dried fruit of the Mission Cactus sustained many tribes during the winter months when game was sparse.”

The artist lives in Burnet on Lake Buchanan, an area brimming with the varied beauty of Texas flora and fauna, but she spent most of her professional career as a commercial artist.

“I was the first in my family to go to college, and my parents could not believe I was getting a degree in art,” she said. “But the art department at Lamar was special, the teachers showed us the possibilities.”

Mary counts herself lucky for having faculty members like Jerry Newman, Bob Willis and Robert Madden as art teachers.

With a commercial art degree in hand, Mary embarked on a successful career in advertising for several big agencies in Texas. She also did freelance work in Los Angeles and did design work for clients like Hilton Hotels.

When she’s making art, Mary uses acrylics, mixed media, assemblages and watercolors. She recently painted a beach mural in a hospital radiation lab in Newport News, Va., to provide a calming scene for patients.

Her interest in nature grew when she began volunteering at The University of Texas at Austin’s Lady Bird Johnson Wildflower Center, an organization dedicated to the conservation of native plants through its gardens, research and education.

Environmental awareness hit close to home after her step-granddaughter died from leukemia, which some research suggests can be caused by toxins in the air and water.

“We need to reduce carcinogens in our environment,” she said. “There is no need for chemical pesticides. Our land is being consumed. I thought, ‘what can I do?’”

Soon Mary was doing what she calls a “fight against cancer series.”

And while it’s a serious subject, her project is lively and humorous, and written for “regular people,” she said. “I’m trying to say ‘come on folks, we can all do better!’”

Mary said her life in the Texas Hill Country is the result of a successful career made possible by hard work and a degree from LU.

“I’m proud to have a degree from Lamar,” she declared. “What a gift it is for the community!”

More information is available at the Mary Welborn Studio, (512) 715-8438, and facebook.com/maryart/about
Juan Zabala ’07, vice president of university advancement, and John Alexander ’68
As is evident throughout this issue of *Cadence*, Lamar University has produced an abundance of artistic talent over its century of existence. However, perhaps no Lamar-educated artist has achieved more national and global acclaim, nor been as widely celebrated and renowned, as John Alexander ’68, whose paintings can be seen in some of the world’s finest museums, galleries and private collections, as well as across the Lamar University campus. The many books and articles written about Alexander over a career that has spanned more than 50 years explain how his roots in Southeast Texas—his upbringing in the pine thickets and bayous of the region—have influenced his work, but Lamar University was just as vital to his development as an artist and, he emphasizes, as a man. “I attribute so much of my social education as well as my artistic and academic education to Lamar,” Alexander noted, adding that it made him “a different person: I matured. And I owe that to the University.”

His childhood, though, shaped Alexander’s future in ways he could not have imagined while growing up in a modest house on San Jacinto Street in Beaumont. The artist’s father, John E. Alexander Sr. was born in 1878, making him 68 years old when young John was born. “He was very healthy and robust,” recalled Alexander of his father, “and he had a deep passion and knowledge of the landscape and the land.” The father shared that passion with his son, along with an intimate appreciation for the flora and fauna of Southeast Texas, which would go on to influence and inform Alexander’s landscape painting even now. “The work I’m doing still comes directly out of those East Texas woods,” Alexander said. “To see nature with a man from the 19th century who literally grew up on the land,” he continued, “taught me a passionate love for that particular nature.”

Along with that connection to nature, Alexander’s parents—his mother, Zeila, was a native of Alabama who was 35 years younger than her husband—encouraged and supported their only son’s artistic pursuits. “My parents gave me a painting kit for my birthday,” Alexander recalled, “so at eight years old I had a baseball glove and a football and a bicycle, but I also had paints and brushes and little palettes and canvases.” He always enjoyed drawing and joked that his classroom failures in classes like algebra were a direct result of his constant drawing and doodling. It was his art classes in school, though, that helped Alexander hone his skills and help him begin to realize that art could be more than just a pastime. “I’m very fortunate because in those days you took art in school.” He is quick to credit, along with his parents, his grade school and high school teachers, like Miss Fanny Jones at David Crockett Junior High School, for much of his artistic development, describing Miss Jones as “an unbelievable art teacher. She was so encouraging and made me feel like an artist; she made me excited to make art.” Alexander’s high school art teachers, first at Beaumont High and then at South Park, were equally encouraging; he described them as “marvelous.”

Alexander enrolled at Lamar University as a freshman in the fall of 1964. Immediately, he found himself in a completely different environment from his grade school days. He always liked art but, as he put it, “when I got to Lamar, I didn’t know what I was going to do. I didn’t know there was even a possibility that I would ever be a successful artist—I thought I might be an illustrator or something, but I didn’t know anything about the professional side of art.” Beyond his art education, which at the time at Lamar took place in what was known as the Department of Commercial Art, Alexander was facing many life changes. “I was at a very difficult place in my life, because being a teenager in Beaumont in the early 1960s was not an easy time,” he recalled. “It was a time of great, tumultuous upheaval.” He recalled that this was a time when headlines were filled with names and events like Emmitt Till, Rosa Parks, bus boycotts and lunch counters, and it was in that environment in a highly segregated Beaumont where young John was trying to find his own way. On top of all that, his beloved father died in May of 1965, at the end of young John’s freshman year, at the age of 87. This was, as Alexander remembered, “paramount in my transition from my bucolic childhood in the woods,” causing him to be “very confused and
traumatized, and somewhat lost."

Into that breach, fortuitously for the budding artist, stepped a "legend," in Alexander's words. "I signed up for the beginning [art] courses at Lamar," explained Alexander, "and my teacher in one or two of the classes was Jerry Newman." Alexander remembered Newman as a great painter but perhaps an even better teacher—very academic and a strict disciplinarian, but more like "a tough football coach." Newman, fewer than 12 years older than Alexander, told him soon after the death of John Sr., as Alexander recalled, "You have to learn discipline. You're going to have to listen. You've got to take this seriously." It was "a real stern talking-to," and it changed Alexander's life. He became a more serious student, not only in his art classes, but in his minor—geology, which he selected because of his love of the land and nature—and in the sociology courses he came to enjoy as well. "Jerry took me under his wing and mentored me, because he saw something in me, and we remained very close until he died" in 2008, said Alexander. He also was quick to acknowledge the great positive impact other Lamar faculty members had on him and his life and career, including geology professor William Matthews; sociology professor Ray Drenan; and art faculty Robert O'Neill, Robert Madden, Robert Rogan, and Ryan Howard.

The social climate of what was then Lamar State College of Technology in the mid-1960s shaped Alexander's character and career at least as much as the natural beauty of the surrounding area, as anyone familiar with his more politically charged, satirical work can attest. One seminal event in Alexander's Lamar experience involved the racial integration of the student union, in which he directly participated. "What Lamar taught me was tolerance," he emphasized. "It taught me to be open-minded, it taught me a new way of looking at life." It also taught him to succeed on his own. About the time Alexander graduated from Lamar Tech in the spring of 1968, then-president Lyndon Johnson announced that draft deferments would no longer be available for students in graduate schools other than medical school. Alexander had been accepted into several graduate schools for art, including Tulane, the University of Florida and SMU, which he chose thanks to their offer of a full scholarship. The loss of grad-school deferments, though, changed his trajectory yet again: he jumped at the opportunity to teach art at Port Neches-Groves High School—"they assured me that [it came with a deferment], and I literally signed the contract on the spot"—which he did with pleasure for two years before enrolling at SMU. While studying in Dallas, Alexander was introduced by one of his professors to legendary Houston art dealer and gallery owner Meredith Long. Long was impressed by the young graduate student's work and promptly put on several exhibitions of Alexander's work in the early 1970s, launching him into the successful career he has enjoyed ever since.

Although he now calls New York home, with a home and studio on the eastern reaches of Long Island plus the time he spends in Manhattan after relocating there from Texas permanently in 1979, Alexander maintains many close ties to Lamar. He frequently has employed Lamar graduates as assistants, including Rick Lewis '88, Paul Manes '72 (an accomplished professional artist himself), and his current assistant, Mackenzie "Mac" Cumpian '20, who is helping Alexander catalogue and compile his many papers and letters that he has bequeathed to Lamar University. His lifelong generosity to Lamar University also includes the establishment of the Zeila Alexander Memorial Scholarship in Art, in his mother's memory. Alexander tries to visit campus anytime he is in the area, often attending arts events like Le Grand Bal and speaking to art students about his work and his career, as he did most recently in March 2024. The advice he shared with those students who are now in the place he occupied nearly six decades ago neatly summarizes his artistic philosophy. "You have to learn your craft," he urged them. "Art has to have a human connection; the painting is a part of you. Learn your craft, learn how to make paint work. Painting isn't much different from, say, refrigerator repair: it's just a set of rules that work."

"I will say it loud and clear," Alexander concluded, "Lamar was a very, very important part of not just my academic education, but educating me to be a better citizen and a much different man. I can look back with absolute clarity and thank Lamar for so much of who I am. I've had shows in New Orleans, Dallas, Fort Worth, the Museum of Fine Arts in Houston, many bigger museums, and all of that success I attribute to those four years I spent at Lamar University." John Alexander's art reflects and portrays the Southeast Texas he knew and the Lamar University he honors and loves to this day.
New degree programs offered, including a Texas first

Lamar University has established two new degree programs, one undergraduate and one at the graduate level.

**B.S. in Computer Engineering** The Phillip M. Drayer Department of Electrical and Computer Engineering has created a new Bachelor of Science program in Computer Engineering that covers a broad spectrum of topics: devices and circuits, communication systems, control and instrumentation, power systems, renewable and green energy, signal processing, and photonics, optics and electromagnetics. Students can also explore embedded hardware and software systems, network engineering and cybersecurity, robotics and artificial intelligence, and microchips.

Students enrolled in the program can expect hands-on experience through state-of-the-art laboratories and collaborative projects.

**M.S. in Strategic Communication-Online** The College of Fine Arts and Communication now offers an online Master of Science in Strategic Communication for individuals seeking advanced expertise in the field. It is the only master of science program in strategic communication in Texas and one of few nationwide.

Eight-week courses enable completion in one year so the program is accessible for working professionals. The courses cover advanced concepts in public relations, advertising, marketing communication, corporate communication, health communication, political communication and other fast-growing areas of communication.

Counseling student writes book to help people cope with the loss of a spouse

For five years, graduate counseling student Heidi Dixon has facilitated a grief support group for spouses, called Until We Meet Again. During a Monday session, she used a knitted potholder as a reference with the hopes of better understanding what the people around her were going through. She explained that it seemed like grief resembled the cut potholder—every separate strand, raw and aching for its former connection. This metaphor led to her recently published book, *My Little Blue House*—a publication targeted at helping people cope with the loss of a spouse.

From an early age, Dixon knew she wanted to pursue a career in clinical work. When she was 16, she took on the role of caregiver when her mother became paralyzed from the chest down in a car accident. As a current hospice chaplain, with a background in clinical pastoral education, Dixon is currently working on her master’s degree in marriage, couple and family counseling.

In helping people move on at their own pace, Dixon said she hopes to alleviate the pressures that come with grief that can often cause depression, disappointment, frustration, and disillusionment. “My ultimate goal for the book is to offer my love and encouragement to those who are grieving—starting with those who inspired it. I hope it will acknowledge and validate their lived grief experience, fuel their hope, and encourage connection,” Dixon said. “For those who are not grieving, I hope it will increase awareness of and compassion for those living little-blue-house-life and increase their gratitude for the time they have with people they love.”

White receives national mentorship award . . . The National Council on Family Relations recognized Janeal White ’03, ’11, assistant professor of family studies, at its November 2023 conference with the organization’s Emerging Mentor/Teacher Award for her exceptional efforts in teaching and mentorship. The tradition of strong mentorship within family studies dates back to when White was a Lamar student herself. She credits Kim Wallet, associate professor of family studies, for noticing her potential during her time as a graduate student. “I am thankful that she took an active role in encouraging me to explore academia as a career option,” White said . . . TJEA inducts Condit into Hall of Fame . . . Professor of Music and Director of Jazz Ensembles Rick Condit has earned a spot in the Texas Jazz Educators Association Hall of Fame for his significant contributions towards jazz education. Condit’s extensive career, spanning 25 countries on five continents, is marked by teaching and performing. His career highlights include membership in the first Monterey Jazz Festival All-Star High School Band, serving as a tenor sax soloist with the Stan Kenton Orchestra, and contributing to the UNT One O’Clock Lab Band. He has also been recognized as a Fulbright Senior Scholar and Kennedy Center Jazz Ambassador . . . Troxclair elected president . . . Debbie Troxclair, associate professor of educational leadership, has been elected president of the Association for Gifted & Talented Students-Louisiana for 2024-2025. Her experience with AGTS-Louisiana began in the late 1980s when she taught a pull-out class for gifted learners in St. Tammany Parish Public Schools. At that time, the organization provided crucial professional and personal support to educators and parents of gifted and talented children. “This organization provided me with so much support as a new teacher and parent of a gifted and artistically talented son in Louisiana from the 1980s to 2000,” Troxclair said. Although she relocated to Texas in 2001 and became involved in various organizations at the state, national and international levels, Troxclair rediscovered AGTS in late 2021. “It is my goal to keep up the momentum and resurgence of this group of gifted educators moving forward in their efforts of supporting gifted education in Louisiana, as leaders in their field of passion, as advocates for gifted learners and their education, and in helping the association in networking with other educational organizations in Louisiana.”
Msengi publishes memoir

In a memoir titled Spared, Clementine Msengi ’12, visiting assistant professor on the faculty at the Center for Doctoral Studies in Educational Leadership, recounts her harrowing escape from one of the darkest chapters in human history—the Rwandan genocide. The memoir follows Msengi’s journey from surviving the genocide against the Tutsi, which claimed the lives of over one million people, to her ultimate success as an American citizen, an award-winning community leader and a respected academic. Spared not only serves as a testament to the resilience of the human spirit, but also provides a roadmap for newcomers seeking to overcome obstacles and achieve their dreams in the land of opportunity.

Msengi highlighted the profound lessons embedded in her narrative, emphasizing the importance of learning from the tragic events in Rwanda. “There are many lessons we can learn from what happened in Rwanda. My narrative opens doors for discussions on these and associated issues stemming from this abhorrent event in world history,” Msengi said. “I believe readers will be drawn to timeless themes of hope, triumph over hate, faith, forgiveness and resilience, leading to a better awareness of how our universal experiences can unite us.” The book is receiving acclaim for capturing the essence of the American spirit and portraying the journey of overcoming challenges to pursue one’s dreams.

Professor Emerita Sandra Harris said, “Clementine is an ordinary girl who grew up in Rwanda during the genocide. Yet in the midst of horrifying experiences, she tells an extraordinary story of how the human spirit can achieve the seemingly impossible. In ‘Spared’, Clementine reminds us that one’s dreams must not be consumed by tragedy. Instead, she encourages us to fuel our dreams with hard work and courage for the future.”

Texas Academy excels at Model UN

Fourteen Texas Academy students showcased their abilities at The Woodlands High School Model United Nations Conference, with three receiving awards. Model United Nations, an academic simulation of the United Nations, provides students with a unique platform to delve into the realms of diplomacy and international relations. “The Texas Academy MUN team hit the ground running to prepare for this conference. The team meets weekly to strategize, conduct research, and write draft position papers,” said Ariel Burgess, Texas Academy coordinator and student success coach. “While the students may be on different committees, the team works together to hold practice sessions on what it will be like the day of the conference.”

Among the standout performers from the Texas Academy were junior Sidra Ganni, senior Joanne Yi, and junior Chloe Doyle, who earned accolades for their exemplary contributions at the conference. Ganni secured an Honorable Mention for her representation of David Lloyd George on the Crisis Committee. Yi earned Outstanding Position Paper for her portrayal of the country Gambia in the General Assembly Committee, and Doyle was awarded Best Delegate while representing Germany on the General Assembly Committee.

Ed.D. program secures spot

Lamar University has once again achieved recognition for its commitment to excellence in education as it joins The Princeton Review’s 2024 Best Online Ed.D Programs list. The Princeton Review compiles its annual list based on valuable feedback from real students. LU’s accelerated Doctor of Education program is designed to accommodate the busy schedules of full-time educators and working professionals, offering flexibility without compromising academic rigor.

Reaud Honors College launches leadership institute

With the generous support of Beaumont attorney and philanthropist, Wayne A. Reaud, Lamar University and the Reaud Honors College have launched the Reaud Leadership Institute with an accompanying honors studies minor. In its inaugural year, students participating in the institute are the first ever Reaud Fellows. As such, students will engage in challenging and unique professional opportunities designed to cultivate and enhance critical thinking and leadership skills among Lamar’s best and brightest.

The rigorous academic nature of the institute begins in the student’s first year when they engage in an Honors Seminar on Leadership. Fellows participate in an intense book study on “The 21 Indispensable Qualities of a Leader” and then apply what they learn at all leadership events. Also, Reaud Fellows join in the Honors Leadership Community where they develop ePortfolios and identify their research goals, academic goals and “why” statements to guide their collegiate endeavors.

“In just the past year, the RLI Fellows have partnered with university stakeholders across campus, including the LU Office of Alumni Affairs and the Honors Student Association Executive Team. These opportunities have included teambuilding development workshops, as well as a formal event that included etiquette training, ballroom dancing, a multi-course dinner and tips for polite conversation,” said Tony Kemerly, associate dean of the Reaud Honors College.

“Academically, fellows of the RLI will have access to incredible opportunities through the minor in honors studies, as well as the chance to engage with Lamar faculty in undergraduate research or creative works,” Kemerly said. “Participating in research gives students a greater depth of understanding of their chosen field of study. Through research, they will be empowered to solve real-world problems, develop meaningful mentoring relationships and gain a competitive edge in industry.”

A wide variety of volunteer opportunities, such as the Stepping Up Civic Leadership program, are also available throughout the Southeast Texas community. These volunteer experiences, in areas as diverse as local historical restoration, crime and safety, health, and environmental consciousness give the Reaud Fellows an unmatched experience in civic leadership and volunteerism.
We hope you enjoy reading about former classmates. If you have news to share—a position announcement, milestone, achievement, wedding, baby—or know the whereabouts of a lost alumnus, we want to hear from you.

Congratulations to Grace (Richard) Theriot ’23, B.S. exercise science, on her marriage to Caleb. They live in Groves.

Lizbeth Trujillo ’23, B.S. computer game development, is software development engineer at Amazon. She lives in Beaumont.
Evan (Weathington) ’14 and Steven Hoffman Jr. ’16
We met in the University Theater’s paint shop in 2010. Since we both were theatre majors, we worked closely with one another for years, acting in shows and attending classes together as friends. Steven directed and I did the costume design for one of our last shows, A View from the Bridge, which allowed us to get to know each other better. I asked him out to lunch at Which Wich and the rest is history. Steven proposed in March of 2014 and on Valentine’s Day of 2015, we were married in a Renaissance-themed costume wedding. After six years of marriage, we discovered we were expecting, and on Nov. 10, 2021, we welcomed our first baby, Octavia, into the world.

Juliana (Ocampo Andrade) ’19 and Eduardo Trevino ’20
We met at college while we both worked at the Rec Center. We realized we had a lot of things in common, one of them being the love of sports. Juliana was a business student and part of the soccer team at Lamar, and I was a mechanical engineering student and very engaged with my engineering fraternity as well. We became very close and decided to start a relationship that now has us as husband and wife after four years. We are from different countries and currently facing the distance since Juliana had to leave for her home country after her student visa expired. However, our love transcends the miles and we continue our relationship with the hope to be reunited together and start our family and work for our dreams. We consider ourselves a team and always support each other on everything.

Keli (Wells) ’21 and Ryan Lee ’21
Although we were both students at the time, Ryan and I didn’t meet that way. Ryan is from Illinois and took a job at Lamar University in the early spring of 2019 and I, a native of Southeast Texas, was already an employee on campus. We met when he was a part of the panel in my interview for a job opportunity in the Financial Aid department. The moment our eyes met for the first time, he looked away, but I knew he was special. I eventually got the position (I was their second choice), and we became casual working friends. We joked, we enjoyed each other’s company, and we encouraged each other. Eventually, we noticed that we both were ready to take a step to expand our working relationship outside of the office. After dating for a while, we ran off to Arkansas in June 2021, eloped and never looked back. We both graduated in the summer and fall that year, he with his MBA and I with a BAAS. Ryan is a wonderful stepdad to my kids from a previous marriage, and we welcomed our sweet girl, Cora Jade, in May 2022. Without Lamar University, our paths would have never crossed.
Jamerica (Malbrough) ’15 and Morgan Bacon ’15
Jamerica and I met each other sometime between 2013 and 2015. Our first conversation was in the BSM [Baptist Student Ministry] after a bible study. She asked my perspective on a tattoo that’s located on the back of her arm. She specifically asked was the tattoo a leaf or a feather. Afterwards our acquaintances were at best “hi and bye.” It wasn’t until Feb. 5, 2021, that an unction from the Holy Spirit caused me to inquire of her relationship status through a gentle Instagram dm [direct message]. And from a series of conversations, I knew—and she confirmed—that she is the one. We began seriously dating April 8, 2021. We got engaged May 7, 2022. We were married Nov 6, 2022. And now we have a son, Kenneth Elijah, born in 2023.

Cheryl (Boyd) ’79, ’84, and Garland “Walker” Linscomb ’77, ’81
Walker and I met during first summer session in a graduate class in 1980. Our first date was a picnic on July 4th at my friend’s lake in Liberty. Our love quickly grew, and we were married two months and two days later on Sept. 6. Last year, we celebrated our 43rd anniversary. We’re blessed to have two wonderful daughters, a son in love and two amazing grand blessings. We will be forever thankful that LU brought us together.

Brenda (Schaefer) ’74 and Phil Caletka ’75
I met Phil at the Foxy Lady in October 1973. I did not like him at first but went out with him anyway. I guess you could say the rest is history. We were married in November of 1975 and had two children less than a year apart. I taught high school for 35-1/2 years. He worked in air conditioning construction for 40+ years. Phil died in October of 2019, one month short of our 44th anniversary.
For more than a decade, Pairings has been one of Lamar University’s most successful events, providing both vital funding for the Dishman Art Museum and an unforgettable evening of exceptional food, wine and entertainment for guests.

“We wouldn’t be able to do what we do without Pairings,” Dishman Art Museum Director Dennis Kiel said as he proudly showed off the Dishman’s current exhibition, a collaborative showcase with The Art Studio Inc. celebrating both organizations’ 40th anniversaries with artwork by Maudee Carron and Lynn Sweat, two innovative artists with strong ties to the Dishman and The Art Studio.

“See the size of these paintings. We never would have been able to bring this here [without Pairings]. You have to use a professional art transportation company to get the works here safely, and it costs a lot of money. Because of Pairings, we were able to bring this show in and all the other shows that come from far away.”

Each year, Pairings generates substantial funding that provides the Dishman with the means to safely and securely bring in quality exhibitions from across the country, host lectures with an array of talented artists and other public speakers, and purchase necessary equipment for the building like benches and window screens to protect light-sensitive artwork.

Kiel says much of Pairings’ continued success is thanks to the creativity and hard work of the event’s creators, Kim and Roy Steinhagen.

“Everything we do [at the Dishman] is literally from Pairings,” Kiel said. “Without [the Steinhagens], we wouldn’t be able to do Pairings, and without Pairings, we wouldn’t be able to do anything. So I always thank them.”

When efforts to reinvigorate the Dishman’s previous fundraiser, La Dolce Vita, began in 2013, the Steinhagens were tapped to bring that vision to life. Inspired by Roy’s travels to Napa Valley, Calif., and their passion for fine wine, the Steinhagens envisioned a fresh format to “breathe new life” into the important museum fundraiser: a five-course dinner paired with the wines of a single winery.

From the start, Pairings was a highly sought after event, selling out because of its limited size and unique offerings of “cult” wines. It continues to be one of the most popular events in the area through unparalleled donor support including many repeat underwriters, its dedicated annual event chairs, and the continued involvement of the Steinhagens, particularly Kim, who joined the Lamar staff as a development officer in 2014. As part of her duties at Lamar, Kim oversees all aspects of putting on Pairings each year.

“Before this event, the Dishman had no budget at all,” Kim Steinhagen said. “There was no money to be spent on exhibitions. [Pairings] allowed the Dishman to have exhibitions for the first time: really quality exhibitions that are brought in from around the state and even out of the state. Dennis Kiel has really put our museum on the map with these exhibitions he’s organized. It’s amazing. What’s happening is that we’re bringing this quality artwork to campus, and we’re making a name for the Dishman and for Lamar and the art world.”
