

STAN Keeps You Informed

STAN, the Southeast Texas Alerting Network, is a messaging and notification system that keeps the communities of Southeast Texas informed about emergencies and other important events in the area. Through STAN, industrial companies and emergency management officials can quickly notify you about emergencies, industry or weather events occurring in Southeast Texas.

You Can Contact STAN

Call **1-877-THE-STAN** (1-877-843-7826) toll-free, anytime to receive updates regarding emergencies, plant operations, traffic and weather information or other outreach from emergency management. All notifications STAN sends to the public are posted to the STAN line. You can also read the most current postings on the STAN website at www.thestan.com.

STAN Can Contact You

Local emergency management uses STAN to send two types of messages to the public:

- **Emergency messages:** In the case of an event that warrants public action, local emergency management can send emergency messages describing what actions need to be taken in response to the emergency.
- **Outreach messages:** Additionally, emergency management uses STAN to send local notifications, or outreach messages, to the community, such as water outages, street closures or traffic notices.

Are You Prepared?

Part of being prepared is making sure you will be notified in the event of an emergency. When an emergency occurs, STAN will call residential and commercial telephones in the affected areas. Since you're not always at home, you can register your cell phone to make sure you receive notifications no matter where you are. That way, if you're at work and something happens near your home, you'll know about it.

Go to www.thestan.com to sign up for cell phone notifications via voice or text, or to sign up for email notifications. You can also check the STAN website anytime for the most recent notifications.

STAN Features

- Delivers emergency messages to the residential and commercial telephones in affected areas.
- Delivers emergency messages to registered cell phones via phone, text or email.
- Delivers outreach messages, if requested, to registered cell phones via phone, text or email.
- Allows the public to call into the system and listen to messages placed there by emergency management and industry.
- Updates the STAN website with the most current notifications.
- Automatically notifies the media when an emergency occurs.

STAN is a messaging and notification system that gives industrial companies and emergency management officials the ability to inform the community quickly with information about emergencies, plant operations or weather events occurring in Southeast Texas.

Partners

STAN was developed by the Local Emergency Planning Committees of Jefferson, Orange and Hardin Counties, in partnership with the Industry of Southeast Texas, the Southeast Texas Regional Planning Commission and local media.
