

No HW, just study for the exam and
 read Ch. 12 on fractions.

$$\begin{array}{r} \\ \\ \\ \end{array}$$

$$\begin{array}{r} \\ \\ \\ \end{array}$$

$$\begin{array}{r} \\ \\ \\ \end{array}$$

$$\begin{array}{r} \\ \\ \\ \end{array}$$

$$\begin{array}{r} \\ \\ \\ \end{array}$$

$$\begin{array}{r} \\ \\ \\ \end{array}$$

$$\begin{array}{r} \\ \\ \\ \end{array}$$

$$\begin{array}{r} \\ \\ \\ \end{array}$$

$$\begin{array}{r} \\ \\ \\ \end{array}$$

$$\begin{array}{r} \\ \\ \\ \end{array}$$

$$\begin{array}{r} \\ \\ \\ \end{array}$$

must be 1 b/c anything larger would mean an extra box on the 2nd row!

Worksheet for Ch 7

Let's count with the symbols 0, 1, 2, 3, 4, 5. Here is a grid to help:

00	01	02	03	04	05
10	11	12	13	14	15
20	21	22	23	24	25
30	31	32	33	34	35
40	41	42	43	44	45
50	51	52	53	54	55

Compute the following divisions-with-remainder, using the standard algorithm. Write your answer in the form $a = q \times d + r$, with $0 \leq r < d$.

1. 123 divided by 5 (Here, you'll write $123 = q \times 5 + r$.)

2. 10101 divided by 4

$$\begin{array}{r}
 1313 \\
 4 \overline{) 10101} \\
 \underline{-4} \\
 21 \\
 \underline{-20} \\
 10 \\
 \underline{-8} \\
 21 \\
 \underline{-20} \\
 1
 \end{array}$$

$10101 = 1313 \times 4 + 1$

3. 555 divided by 2

$$\begin{array}{r}
 255 \\
 2 \overline{) 555} \\
 \underline{-4} \\
 15 \\
 \underline{-14} \\
 15 \\
 \underline{-14} \\
 1
 \end{array}$$

$555 = 255 \times 2 + 1$

4. 5555 divided by 3

$$\begin{array}{r}
 1555 \\
 3 \overline{) 5555} \\
 \underline{-3} \\
 25 \\
 \underline{-23} \\
 25 \\
 \underline{-23} \\
 25 \\
 \underline{-23} \\
 2
 \end{array}$$

$5555 = 1555 \times 3 + 2$

Fill in the missing digits (using Hindu-Arabic, i.e. base 10)

$$\begin{array}{r}
 174 \\
 3 \overline{) 524} \\
 \underline{- 36} \\
 22 \\
 \underline{- 21} \\
 14 \\
 \underline{- 12} \\
 2
 \end{array}$$

$$\begin{array}{r}
 \cancel{8} \cancel{7} \cancel{2} \cancel{2} \\
 \hline
 7 \) \ \cancel{6} \ \cancel{1} \ \cancel{0} \ \cancel{5} \ \cancel{4} \\
 - \ 5 \ 6 \ \downarrow \ \downarrow \ \downarrow \\
 \hline
 \ 5 \ 0 \ \downarrow \ \downarrow \\
 - \ 4 \ 9 \ \downarrow \ \downarrow \\
 \hline
 \ 1 \ 5 \ \downarrow \ \downarrow \\
 - \ 1 \ 4 \ \downarrow \ \downarrow \\
 \hline
 \ 1 \ 9 \ \downarrow \\
 - \ 1 \ 4 \ \downarrow \\
 \hline
 \ 5
 \end{array}$$

$$\begin{array}{r}
 \cancel{1} \cancel{0} \cancel{1} \cancel{1} \\
 \hline
 5 \) \ \cancel{6} \ \cancel{0} \ \cancel{8} \ \cancel{9} \ \cancel{4} \\
 - \ 5 \ \downarrow \ \downarrow \ \downarrow \ \downarrow \\
 \hline
 \ 1 \ 0 \ \downarrow \ \downarrow \\
 - \ 1 \ 0 \ \downarrow \ \downarrow \\
 \hline
 \ 0 \ 8 \ \downarrow \ \downarrow \\
 - \ 5 \ \downarrow \ \downarrow \\
 \hline
 \ 3 \ 9 \ \downarrow \ \downarrow \\
 - \ 3 \ 5 \ \downarrow \ \downarrow \\
 \hline
 \ 4 \ 9 \ \downarrow \\
 - \ 4 \ 5 \ \downarrow \\
 \hline
 \ 4
 \end{array}$$

Exam 2 Content

- Def'n of multiplication
- multiplication and division algorithms } including other bases!
- explanation of division using $\$100, \$10, + \$1$ } definitely base 6.
- Find missing digits

$$3 \times 7 = 7 + 7 + 7 = 21$$

$$3 \times 0 = 0 + 0 + 0 = 0$$

$$0 \times 3 = 0$$

Worksheet #1

$$\begin{array}{r} 014 \\ 5 \overline{) 123} \\ \underline{-05} \\ 33 \\ \underline{-32} \\ 1 \end{array}$$

Base 6

00	01	02	03	04	05
10	11	12	13	14	15
20	21	22	23	24	25

$$123 = 14 \times 5 + 1$$

Fractions

Fractions are essential for algebra. So, ensuring your students understand fractions is of paramount importance!

$\frac{1}{2}$ ^{→ solidus}

Vinculum

Sequence of $3^{rd}s$

There is no mathematical reason to simplify fractions.

$\frac{6}{8}$ is a good answer. It is just as valid as $\frac{3}{4}$.

$\frac{63}{51}$ Is this simplified?

No, $\frac{63}{51} = \frac{\cancel{3} \times 3 \times 7}{17 \times \cancel{3}} = \frac{21}{17}$ This is hard.

$$\frac{1}{\sqrt{2}} + \frac{\sqrt{5}}{7} = \frac{7}{\sqrt{2} \times 7} + \frac{\sqrt{10}}{\sqrt{2} \times 7}$$

$$\frac{1}{2} + \frac{3}{5} \neq \frac{1+3}{2+5}$$

This symbolizes a confusion that these 2 #'s are on a different sequence.

A sequence that contains both $\frac{1}{2}$ + $\frac{3}{5}$ would be the sequence of 10ths.
