Quiz

Scatter plot

Bivariate data - 2 variates

Plots points (explanatory, response).

More about regression.

1.

2. \[ y = 1.5555x + 169.51 \]
   \[ x = \text{explanatory variable} = \text{angle off bat} \]
   \[ y = \text{response variable} = \text{distance} \]

3. \[ R^2 = 0.2627 \]

4. Model explains 26% of the variation.

5. \[ y = 1.5555x + 169.51 \]

7.
