

COLLEGE OF BUSINESS **LAMAR UNIVERSITY** MBA

5 year B.S. Electrical Engineering/Master of Business Administration

The five year B.S. in Electrical Engineering/MBA allows Electrical Engineering students to obtain both their undergraduate and MBA degree and within five years after the beginning of her/her study at Lamar University. By utilizing two electives for the B.S. in Electrical Engineering degree, students can get an early start on their MBA studies.

Students can take up to nine graduate hours before their undergraduate degree is conferred. Six of the nine hours of MBA courses can be counted as ELEN elective hours. Courses chosen must be from MBA leveling or MBA core and must be approved by the MBA Office.

Part of the general studies core course requirement is INEN 2373. This course will satisfy the leveling requirement for FINC 5300.

Business courses will only count toward the B. S. Electrical Engineering if the MBA is granted.

Options for MBA Leveling Courses

ACCT 5315

ECON 5300

FINC 5300 (Satisfied by INEN 2373, Engineering Economics)

Options for MBA Core Courses

MGMT 5340

BUAL 5380

MISY 5340

MKTG 5310
