

C.6 Indirect Assessment Measures

The Reese Construction Management Program implements four distinctive measures for indirect measurement of program quality and its improvement. The indirect measures are:

Senior Exit Interview

Alumni Survey

Industry Survey

Course Evaluation

C.6.1 Senior Exit Interview (Volume I – 9.1.3.6)

The results of Exit Interview – 2018, along with the form, follow on the next page. The interview was conducted at the end of Spring 2018 semester. This interview is conducted annually.

Summary of Exit Interviews with Spring 2018 Graduates

By Henry Venta, Ph. D., Interim Director & Dean of CoB

Eleven interviews were conducted by Henry Venta, Dean of the College of Business and Interim Director of the Reese Construction Management Program.

- All but one of the students stated that if they had “the chance to do it again” they would still come to Lamar University and major in Construction Management.
- All students expressed satisfaction with the faculty; all had different strengths and together provided balance across the program
- All students complemented the program on the role that Christina Trujillo plays
- All students complemented the program for their “hands-on” projects
- All students complemented the program on courses with labs
- Most students complemented the program on the required internship
- Most students indicated that the most important part of the program was scheduling and estimating. Students feel that more time should be devoted to those subjects; students thought that the 9 credit hour sequence of Statics, Structures 1 and 2, could be reduced to make more time available for estimating and scheduling.
- Students uniformly recommended separating the online courses into graduate and undergraduate sections.
- Several students suggested improving the coverage of technical writing in the curriculum
- Several students suggested improving the physical space
- Some students would like to see increased coverage of “Heavy Bid” prior to the capstone class
- Some students mentioned wanting to take a conversational Spanish course because of the labor force that they face

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 ☒ 8 ☐ 9 ☐ 10

2. What element or aspect of the Program are done well, that should not be changed?

I love the aspect of the "hybrid" class schedule - I think having a good mix of online classes and evening/night classes really allows students to learn from a potential employer in the industry, and learn from their professors in the CMGT classes.

3. What element or aspect of the Program seem to be the greatest disappointment to you? Anything you would like to see added to the Program?

1) I believe the program should prepare everybody for an entry level position in construction - project engineer/coordinator, asst. superintendent, asst. project manager, etc. I believe that this can be done by studying more on submittals, rfi's, and other basic project control items.

2) Estimating & Scheduling - I feel that these classes should be taught face-to-face to allow students to better comprehend the software being used.

4. Suggestions for improving those aspects of your education that were disappointing? How do we get from a (answer from #1) to a 10?

I have only had an issue in one class, Structural Behavior I. I believe that this class was not shown a lot of mathematical examples, and the class is really math based. That is my only disappointment, and this is partial to my performance. I do not regret anything that has happened in this program, and I love everything that all of the professors, administrative staff, etc. has done for me. Overall, I think the program is headed in the right direction. I am very thankful for Dr. McCrary, Dr. Hwang, Dr. Safa, Professor Waddell, Mrs. Trujillo, and Dr. Venta. I am proud to tell others that I am a part of the Reese CMGT Program.

5A. In addition, considering all the required classes you took at LU, in which two class did you learn the most?

I felt that I learned the most in any course taught by Dr. McCrary. The course load is heavier, but he does a good job of ensuring that students get the most information possible.

5B. Are there classes in your LU experience that seem mostly irrelevant or much less useful? If so, please list them.

I don't think any class is irrelevant, but I would recommend more business classes if at all possible. The construction industry, especially in project management/controls, is very business/numbers oriented.

6. Suggestions for improving courses of least value.

Consider making classes like estimating and scheduling classes face-to-face, and consider making lower level classes available online or hybrid.

I would also like to see more "business oriented" classes involved within the program. This industry is very business driven - whether it is numbers, management, marketing, etc. All general business classes could benefit.

7. Think about the students in the CM Program with you. If you asked faculty outside the Program to assess the quality of CM majors, what two words do you think they would use to describe your classmates. Why?

Hard Working and Eager to Learn.

This is seen with the graduation rate, program growth from the time I started, and the number of students landing good jobs within the industry during their time in the program. All students seem to be mindful of their grades and work ethic in the program, while keeping all doors open to opportunity within the industry.

Considering that your education is to prepare you for an entry level management position related to construction, how do you rate yourself concerning the following? Choose the appropriate number. Use a scale of 1 to 5 as follows:

Program Evaluation

1A. On a scale of 1 to 10, 10 being best, how would you rank the CM Program at LU?

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☒ 6 ☐ 7 ☐ 8 ☐ 9 ☐ 10

1B. On a scale of 1 to 10, 10 being best, did you feel prepared to work during the Internship?

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 ☐ 8 ☐ 9 ☒ 10

2. What element or aspect of the Program are done well, that should not be changed?

Internship Program

3. What element or aspect of the Program seem to be the greatest disappointment to you? Anything you would like to see added to the Program?

The constant change throughout the classes from how the course was presented to different professors. There were no options/choices on how or when to take a course. Legal, Scheduling and Estimating courses should not be taught as an 8 week course or as a strictly online course.

4. Suggestions for improving those aspects of your education that were disappointing? How do we get from a (answer from #1) to a 10?

Get more student feedback on schedules and course types. Offer more consistent curriculum. Even if the professor changes, students should still receive the same education.

5A. In addition, considering all the required classes you took at LU, in which two class did you learn the most?

Scheduling, Structures I and II, Intro to Construction Management

5B. Are there classes in your LU experience that seem mostly irrelevant or much less useful? If so, please list them.

Statics
Electrical and Mechanical
BIM/Computer Graphics

6. Suggestions for improving courses of least value.

This is a management degree and these courses are entirely too detailed. They should be more of an overview on interpreting different construction drawings and specifications and leave the detailed information to on-the-job training or offered as an elective.

7. Think about the students in the CM Program with you. If you asked faculty outside the Program to assess the quality of CM majors, what two words do you think they would use to describe your classmates. Why?

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 ☒ 8 ☐ 9 ☐ 10

2. What element or aspect of the Program are done well, that should not be changed?

The program was done well overall.

3. What element or aspect of the Program seem to be the greatest disappointment to you? Anything you would like to see added to the Program?

Looking back now, I was disappointed that the program did not have certain paths one could follow. For example, if I was going into the Heavy/Highway side of the construction industry, then I would have liked to take more classes geared toward my exact career path.

4. Suggestions for improving those aspects of your education that were disappointing? How do we get from a (answer from #1) to a 10?

Add more specialization classes.

5A. In addition, considering all the required classes you took at LU, in which two class did you learn the most?

I learned the most in the intro construction management class and the management class.

5B. Are there classes in your LU experience that seem mostly irrelevant or much less useful? If so, please list them.

Statics and Soils are less useful to me.

6. Suggestions for improving courses of least value.

Eliminate the statics class altogether or allocate it to a different department like Engineering or Physics. Eliminate Soils.

7. Think about the students in the CM Program with you. If you asked faculty outside the Program to assess the quality of CM majors, what two words do you think they would use to describe your classmates. Why?

Professional and realistic. I use these two words because of the nature of our program. We are always in contact with industry professionals and after we graduate, most of us have jobs. This fact alone makes the CM program professional and realistic.

Considering that your education is to prepare you for an entry level management position related to construction, how do you rate yourself concerning the following? Choose the appropriate number. Use a scale of 1 to 5 as follows:

1 Disagree strongly 2 Disagree 3 Mixed feelings/Neutral 4 Agree 5 Agree Strongly

32. For 30 and 31, whether yes or no, please tell why?

While the program is good, it is general and more locally focused. If my friend is going to be living in Beaumont and working in the plant, then I would recommend this program.

33. How would you change this form?

I would add this question: "Which classes did you find to be most difficult and why?"

Program Evaluation

1A. On a scale of 1 to 10, 10 being best, how would you rank the CM Program at LU?

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☒ 5 ☐ 6 ☐ 7 ☐ 8 ☐ 9 ☐ 10

1B. On a scale of 1 to 10, 10 being best, did you feel prepared to work during the Internship?

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☒ 5 ☐ 6 ☐ 7 ☐ 8 ☐ 9 ☐ 10

2. What element or aspect of the Program are done well, that should not be changed?

Hands on projects

3. What element or aspect of the Program seem to be the greatest disappointment to you? Anything you would like to see added to the Program?

Not enough focus on courses such as estimating, scheduling, safety, industrial and project management. Can be improved for future students.

4. Suggestions for improving those aspects of your education that were disappointing? How do we get from a (answer from #1) to a 10?

More focus on courses that will highly affect the students entry level experience. Estimating and scheduling are top two in my opinion.

5A. In addition, considering all the required classes you took at LU, in which two class did you learn the most?

Capstone

5B. Are there classes in your LU experience that seem mostly irrelevant or much less useful? If so, please list them.

Statics

6. Suggestions for improving courses of least value.

N/A

7. Think about the students in the CM Program with you. If you asked faculty outside the Program to assess the quality of CM majors, what two words do you think they would use to describe your classmates. Why?

The future

☐ 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐ 7 ☒ 8 ☐ 9 ☐ 10

2. What element or aspect of the Program are done well, that should not be changed?

Some of the teaching is done very well in the program. The way that we are able to actually get our hands on things and do work in the lab and work on different projects allows us to be able to see how the work we learn in class is done in real life.

3. What element or aspect of the Program seem to be the greatest disappointment to you? Anything you would like to see added to the Program?

Scheduling, Estimating. These two aspects of the program really let me down. Also, we live around the refineries and most of the work that we will all probably be involved with will revolve around that industry but we do not go into any depth with the classes to allow us the chance to learn about the environment around where we live and learn.

4. Suggestions for improving those aspects of your education that were disappointing? How do we get from a (answer from #1) to a 10?

As far as the scheduling and estimating go, they should not be Online classes. Those two classes are what most of us want to use to help ourselves in the future and them being 8 weeks and Online does nothing but hurt us in the long run. I think it would be helpful if more of the classes in the program would begin to integrate some of aspects that have to do with the industry we live around. For the most part we just touch some of the topics, but we do not really get to learn much about them.

5A. In addition, considering all the required classes you took at LU, in which two class did you learn the most?

Surveying and Industrial Mechanical

5B. Are there classes in your LU experience that seem mostly irrelevant or much less useful? If so, please list them.

the structures classes 1 and 2. And Electrical systems.

6. Suggestions for improving courses of least value.

I know it is important to understand some of the things in those classes, but those classes are not the role of a project manager, they are that of an engineer. It'd be nice to be able to learn more of things in our area of work.

7. Think about the students in the CM Program with you. If you asked faculty outside the Program to assess the quality of CM majors, what two words do you think they would use to describe your classmates. Why?

Determined. Reliable.

2. What element or aspect of the Program are done well, that should not be changed?

The projects we get to do in classes.

3. What element or aspect of the Program seem to be the greatest disappointment to you? Anything you would like to see added to the Program?

Having 8 week online classes, specifically the classes that are currently online.

4. Suggestions for improving those aspects of your education that were disappointing? How do we get from a (answer from #1) to a 10?

I do not have much to go off of but the classes that are online should either be longer than an 8 week course or not online at all. As far as being ready for my internship, the classes are very broad and i didn't know what exactly I was going to be doing there.

5A. In addition, considering all the required classes you took at LU, in which two class did you learn the most?

Industrial Mechanical and Surveying

5B. Are there classes in your LU experience that seem mostly irrelevant or much less useful? If so, please list them.

6. Suggestions for improving courses of least value.

7. Think about the students in the CM Program with you. If you asked faculty outside the Program to assess the quality of CM majors, what two words do you think they would use to describe your classmates. Why?

Hard working. I chose this because many of the students in the program also have full time jobs as well and are also able to go to school full time.
