During the 2025–2026 assessment cycle, DARpA tracked completion of assessment plans and annual reports for all academic programs, administrative units, and student/academic services. A total of 98% of academic programs (121 of 124) and 95% of administrative and service units (57 of 60) submitted both plans and reports by the established deadlines.

While overall compliance improved from the previous cycle (94% average submission rate in 2024–2025), a small number of units required deadline extensions or technical assistance to finalize entries in Watermark. Informal feedback from these units indicated that staffing transitions and uncertainty regarding new reporting templates were primary challenges.

Overall, results demonstrate continued progress toward full institutional compliance and reflect the effectiveness of DARpA's targeted communications, training sessions, and deadline reminders. However, opportunities remain to streamline the submission process and improve early engagement from units with new assessment coordinators.

Based on the analysis of 2025–2026 reporting data, DARpA will implement several strategies to further improve completion rates and reporting quality across all units. Beginning in the 2026–2027 cycle, DARpA will (1) launch an updated assessment coordinator orientation each September to support new faculty and staff responsible for unit reporting; (2) provide step-by-step Watermark submission guides tailored to academic, administrative, and student/academic support units; and (3) introduce an automated reminder system through Watermark to reduce delays near the submission deadlines.

In addition, DARpA will collaborate with the Office of the Provost to identify recurring barriers faced by units that missed deadlines or requested extensions. These insights will inform targeted support and potential process adjustments, such as earlier communication timelines or simplified reporting templates. Collectively, these actions will help ensure continued progress toward 100% submission compliance, improved report quality, and enhanced institutional readiness for SACSCOC reaffirmation.

Action Description *

To strengthen institutional compliance and improve reporting consistency, DARpA will implement the following actions during the 2025–2026 assessment cycle:

Assessment Coordinator Orientation: Launch a required orientation each September for new assessment coordinators across academic, administrative, and student/academic support units to reinforce expectations and reporting timelines.

Updated Submission Resources: Develop and distribute unit-specific Watermark guides outlining plan and report submission steps, common issues, and quality expectations.

Automated Reminder System: Implement Watermark's automated deadline reminder feature to reduce late submissions and extension requests.

Barrier Analysis Collaboration: Partner with the Office of the Provost to review recurring challenges among units requiring assistance or deadline extensions and adjust communication timelines or templates as needed.

Intended Outcome:
These actions aim to increase on-time submission rates to 100%, improve the accuracy and completeness of reports, and further demonstrate institutional commitment to continuous improvement and SACSCOC compliance.

Analysis

| B | *i* | U | FONT FAMILY | ¶ | | | | | | | | | | | |

During the 2025–2026 assessment cycle, DARpA tracked completion of assessment plans and annual reports for all academic programs, administrative units, and student/academic services. A total of 98% of academic programs (121 of 124) and 95% of administrative and service units (57 of 60) submitted both plans and reports by the established deadlines.

While overall compliance improved from the previous cycle (94% average submission rate in 2024–2025), a small number of units required deadline extensions or technical assistance to finalize entries in Watermark. Informal feedback from these units indicated that staffing transitions and uncertainty regarding new reporting templates were primary challenges.

Overall, results demonstrate continued progress toward full institutional compliance and reflect the effectiveness of DARpA's targeted communications, training sessions, and deadline reminders. However, opportunities remain to streamline the submission process and improve early engagement from units with new assessment coordinators.

Based on the analysis of 2025–2026 reporting data, DARpA will implement several strategies to further improve completion rates and reporting quality across all units. Beginning in the 2026–2027 cycle, DARpA will (1) launch an updated assessment coordinator orientation each September to support new faculty and staff responsible for unit reporting; (2) provide step-by-step Watermark submission guides tailored to academic, administrative, and student/academic support units; and (3) introduce an automated reminder system through Watermark to reduce delays near the submission deadlines.

In addition, DARpA will collaborate with the Office of the Provost to identify recurring barriers faced by units that missed deadlines or requested extensions. These insights will inform targeted support and potential process adjustments, such as earlier communication timelines or simplified reporting templates. Collectively, these actions will help ensure continued progress toward 100% submission compliance, improved report quality, and enhanced institutional readiness for SACSCOC reaffirmation.

To ensure compliance and promote continuous improvement, DARpA and the Director of University Assessment will maintain accurate counts of completed assessment plans and reports for academic programs, administrative units, and student/academic services each assessment cycle.	During the 2025–2026 assessment cycle, DARpA tracked completion of assessment plans and annual reports for all academic programs, administrative units, and student/academic services. A total of 98% of academic programs (121 of 124) and 95% of administrative and service units (57 of 60) submitted both plans and reports by the established deadlines.	To strengthen institutional compliance and improve reporting consistency, DARpA will implement the following actions during the 2025–2026 assessment cycle:
Direct - Counts		Assessment Coordinator Orientation: Launch a required orientation each September for new assessment coordinators across academic, administrative, and student/academic support
