The College of Engineering would like to keep track of you and your success stories with other College of Engineering alumni. If you have news to share, please send it to Deidra.Mayer@lamar.edu. If you know a student who is interested in Engineering and would be a good match for Lamar University, we invite them to refer a Cardinal by contacting Deidra Mayer, Director of Engineering Marketing at 409-880-8789 or by emailing her at Deidra.Mayer@lamar.edu.

Congratulations to Dr. Helen Lou, a professor in the Department of Chemical Engineering. The Phillip M. Drayer Scholarship Donor Recognition Dinner on Thursday, April 18 included the presentation of the Phillip M. Drayer Scholarship to Dr. Helen Lou, who is pursuing a master’s degree in electrical engineering.

Congratulations to Dr. Alberto Marquez, assistant professor of industrial engineering. Alberto Marquez, Weihang Zhu and Julia Yoo. During the conference, Quijano highlighted the impact of the Panama Canal expansion on the U.S. Gulf ports, focusing on those that could benefit from the increased capacity. Quijano emphasized the importance of the Panama Canal for the U.S. Gulf ports and the potential for increased trade. Quijano also discussed the role of the Panama Canal in the global economy and the potential for increased trade through the expanded canal.

Congratulations to Ph.D. Chemical Engineering students, Jie Fu and Qiang Xu. Congratulations to Ph.D. Chemical Engineering students, Jie Fu and Qiang Xu. Congratulations to Ph.D. Chemical Engineering students, Jie Fu and Qiang Xu. The Dan F. Smith Engineering Dean, Dr. Jack Hopper, announced the winner of the 2013 Distinguished Alumni Award and the 2013 Distinguished Faculty Award.

Congratulations to Robert S. Jones, ’73 B.S. Civil Engineering 2013 Distinguished Alumnus. A native of Port Arthur, Bob Jones graduated in 1973 with a B.S. in civil engineering with dual concentrations in structural and transportation and later earned his master of engineering degrees from UT in Austin. The Texas Water Quality Board hired him in July 1973. Jones advanced at the state, eventually becoming chief engineer of the Construction Grants and Water Quality Planning Division. In 1976, Bob met and married Beth, his wife of 37 years. The couple has two children. Recognizing the opportunity to leave the government industry and local government and deal with the ever-increasing volume on a greater environmental regulation, Jones left the state in 1982 with another engineer and formed the consulting company, Jones and Neuse.
