Lamar University

1975-76 College of Technical Arts Bulletin
Vol. 25 NO. 4 MARCH 1975
TWENTY-FIRST ANNUAL CATALOG ISSUE
With Announcements for 1975-76

Founded in 1923, and established as a four-year coeducational state-supported college on September 1, 1951.

The courses, tuition and fees and all other conditions and policies set forth in this catalog issue shall be subject to change without notification.

Lamar University is an equal opportunity/affirmative action educational institution and employer. Students, faculty and staff members are selected without regard to their race, color, creed, sex, or national origin, consistent with the Assurance of Compliance with Title VI of the Civil Rights Act of 1964, and Executive Order 11246 as issued and amended.

The Campus

Lamar University's campus has expanded rapidly during the past decade and now encompasses some 200 acres.

Under construction are a new Speech and Hearing Clinic and the eight-story Mary and John E. Gray Library, named for the president of Lamar University and his wife. The Grays began their association with the University as students in 1923 when the school first opened as a junior college.

Guidelines for future expansion of the campus are included in a conceptual master plan which will guide development into the year 2000. Architects have described the
future campus image and character as possessing “a feeling of quality, warmth and dignity appropriate to a university.” A large portion of the master plan already has been approved by the University’s Board of Regents.

Architects have placed a strong emphasis upon developing a feeling of “monumentality and dignity.” The Library will become the dominant focus of the campus. A number of high-rise buildings or towers also are planned. Landscaping will become a major objective under the master plan both on the campus and along greenbelts surrounding it. Plazas, courtyards, outdoor furniture and paving will unify and enrich the inner campus. A 4,500-seat auditorium and a 12,000-seat coliseum also are under consideration.
1975-76 Calendar

FALL SEMESTER

AUGUST 1975

24 Dormitories open.
Dining halls open.
25 Faculty and staff meeting.
Department and College meetings.
Registration begins.
26 Registration.
27 Registration.
28 Classes begin.
No adds/drops of sections on first class day.
29 Adds/drops for sections. Section revisions.

SEPTEMBER

1 Campus closed. Labor Day holiday.
2 Adds/drops for sections. Section revisions.
3 Adds/drops for sections. Section revisions.
4 Last date for registration and/or course schedule revisions.
15 Twelfth class day.

OCTOBER

17 TSTA Conference. No classes on campus.
20-24 Mid-semester week.
28 Unsatisfactory grades due in Admissions and Records Office by noon. This applies to all freshmen in 100-level courses.

NOVEMBER

5 Last day for dropping courses or withdrawing without penalty.
7 Last day for approval of December graduation.
Last day to reserve caps and gowns for December graduation.
26 Thanksgiving holidays begin at 10 p.m.
Dining halls and dormitories close.
20 Dining halls and dormitories open.

DECEMBER

1 Classes resume at 8 a.m.
5 Last date for dropping courses or for withdrawing—subject to penalty.
11-18 Final examinations.
20 Graduation.
22 All grades due in Office of Admissions and Records by noon.
23 Campus closed.
SPRING SEMESTER

JANUARY 1976
13 Dining hall and dormitories open.
14 Registration.
15 Registration.
16 Registration closes at noon.
19 Classes begin. No adds/drops of sections on first class day.
20 Adds/drops for sections. Schedule revisions.
21 Adds/drops for sections. Schedule revisions.
22 Last date for registration and/or course schedule revisions.

FEBRUARY
3 Twelfth class day.

MARCH
8-12 Mid-semester week.
17 Unsatisfactory grades due in Admissions and Records Office by noon. This applies to all freshman 100-level courses.
24 Last date for dropping courses or withdrawing without penalty.

APRIL
9 Last day for approval of May graduation.
Dining halls and dormitories close at 10 p.m. Spring holidays begin at 10 p.m.
Last day to reserve caps and gowns for May graduation.
19 Dormitories open at noon.
20 Dining halls open. Classes resume at 8 a.m.
30 Last date for dropping courses or for withdrawing—subject to penalty.

MAY
6-13 Final Exams.
14 All grades due in Office of Admissions and Records for graduating seniors by 9 a.m.
15 Commencement exercises.
18 All grades due in Office of Admissions and Records by noon.
19 Campus closed.
SUMMER SESSION

FIRST TERM

MAY

31 Registration. Dining halls open.

JUNE

1 Classes begin 8 a.m. No adds/drops.
2 Last day for registration or adding courses.
4 Fourth class day.
15 Last day for dropping courses or for withdrawing without penalty.

JULY

2 Last day for dropping courses or for withdrawing—subject to penalty.
5 Holiday—campus closed.
7 Last class day of term.
9 Term grades due in Office of Admissions and Records by noon.

SUMMER SESSION

SECOND TERM

JULY

8 Registration.
9 Classes begin 8 a.m. No adds/drops.
12 Last day for registration or adding courses.
14 Fourth class day.
29 Last day for dropping courses or withdrawing without penalty.

AUGUST

9 Last day for dropping courses subject to penalty.
13 Last class day.
Final date for reporting grades of graduating seniors to Office of Admissions and Records by 8:30 a.m.
14 Commencement exercises.
Final date for submitting grades, other than for graduating seniors, to Office of Admissions and Records by noon.
15 Campus closes.

1974-75 Directory

Officers of Administration

GENERAL
JOHN E. GRAY, LL.D., President
H.C. GALLOWAY, JR., M.Ed., Vice-President for Finance
ANDREW J. JOHNSON, Ph.D., Vice-President for Administration
DAVID D. GEDDES, Ph.D., Vice-President for Academic Affairs
NORRIS H. KELTON, M.A., Dean of Admissions and Records
OSCAR K. BAXLEY, B.B.A., Business Manager
GEORGE E. McLoughlin, B.S., Dean of Student Affairs
ROBERT BLAINE THOMAS, Ph.D., Director of Library Services

COLLEGES
E.B. BLACKBURN, JR., Ed.D., Dean, College of Graduate Students
W. BROCK BENTLINGER, Ph.D., Dean, College of Fine and Applied Arts
BETTY JO HADLEY, Ph.D., Dean, College of Health Sciences
J.D. LANDES, Ph.D., Dean, College of Business
ROBERT A. McALLISTER, Ph.D., Dean, College of Engineering
M.L. McLoughlin, Ed.D., Dean, College of Education
KENNETH E. SHIPPER, Ph.D., Dean, College of Technical Arts
PRESTON B. WILLIAMS, Ph.D., Dean, College of Liberal Arts
ROBERT E. YERICK, Ph.D., Dean, College of Sciences

COLLEGE OF TECHNICAL ARTS
KENNETH E. SHIPPER, Ph.D., Dean
NORMAN E. LOWERY, Supervisor, Adult Training Programs
JOSEPH D. REHO, M.Ed., Director of Continuing Education
HARRY L. WILLIAMS, M.Ed., Vocational Counselor
MRS. WILLA V. NEWTON, Senior Secretary
NEVA A. GARRETT, Secretary
1974-75 Faculty

EMMETT S. BLACK, Instructor II of Machine Tools, 1964, 1970
B.S., Lamar University

ROBERT F. BERARD, Instructor I of Law Enforcement, 1974
B.S., Lamar University

EUGENE G. BROUSSARD, Instructor I of Industrial Electricity and Electronics Technology, 1969, 1970
B.S., Lamar University

MRS. ALICE W. CATER, Instructor II of Real Estate, 1974
B.B.A., Southern Methodist University
M.B.A., The University of Texas

TOM M. CHRISTIAN, Instructor II of Drafting Technology, 1970
B.S., Georgia Institute of Technology
Registered Professional Engineer

LYNNWOOD M. CLARK, Instructor I of Business Data Processing, 1972
B.S., Lamar University

TARLTON J. DAIGLE, Instructor III of Industrial Electricity and Electronics Technology, 1951, 1971
B.S., University of Southwestern Louisiana

MRS. IRIS S. DROODY, Instructor II of Drafting Technology, 1970, 1974

MARCIA L. GREEN, Instructor I of Related Arts, 1972
B.A., Bishop College
M.A., Stephen F. Austin State University

DONALD R. GRUBBS, Lecturer of welding, 1974
B.S., Lamar University

WILLIAM H. HARTFORD, Instructor III of Job Relations, 1947, 1971

MARVIN H. HOGAN, Instructor II of Industrial Electricity and Electronics Technology, 1970, 1974

JOSEPH C. JAMES, Instructor I of Drafting Technology, 1974

BEN M. JARRELL, Instructor I of Refrigeration and Air Conditioning Technology, 1973

JOE I. JUAREZ, Instructor II of Basic Communications, Head, Related Arts Department 1968, 1974
B.F.A., University of Houston
B.S., Lamar University
M.Ed., University of Texas

OTTO A. KRIEGEL, Instructor I of Machine Tools, 1973

NICHOLAS V. LAMPSON, Instructor I of Related Arts, 1971
B.S., M.Ed., Lamar University

ROBERT J. LAWRENCE, Instructor III of Industrial Electricity and Electronics Technology, Head, Technical Department, 1958, 1971

NORMAN E. LOWREY, Supervisor, Adult Training Programs, 1967, 1970

SAM LUCIA, Instructor IV of Diesel Mechanics, 1954, 1970
Regents’ Instructor

RONALD I. MARBLE, Instructor II of Welding, 1967, 1973
C.C., Lamar University
RALPH K. MOCK, Instructor III of Drafting Technology, 1966, 1971
JERRY B. MOSELEY, Instructor I of Basic Communications, 1970
   B.S., M.Ed., Lamar University
MYRON M. MYRICK, Instructor II of Drafting Technology, 1967, 1971
   Certified Engineering Technician
EDWARD L. PARKER, Instructor II of Law Enforcement, 1971
   B.S., M.Ed., Lamar University
M. PAUL ROY, Instructor IV of Machine Tools, Head, Industrial Department,
   1963, 1974
JOEL C. SHANKLES, Instructor III of Welding, 1952, 1971
   Regents' Instructor
KENNETH E. SHIPPER, Dean, College of Technical Arts, 1971
   B.S., Sam Houston State University
   M.A., Ph.D., The University of Texas
LENOX L. SIGLER, Instructor II of Industrial Electricity and Electronics
   Technology, 1965, 1970
JAMES H. SMITH, Instructor II of Diesel Mechanics, 1968, 1973
   A.A.S., Lamar University
MAX K. SNIFFEN, Instructor II of Mid-Management, 1972
   B.S., B.A., Ohio State University
   M.B.A., Lamar University
JAMES D. SPENCER, Coordinator of Continuing Education, 1970
   B.S., M.Ed., Texas A&M University
DEANNA K. STAHL, Instructor II of Technical Mathematics, 1972
   B.A., M.S., Lamar University
HYMAN K. TAYLOR, Instructor I of Drafting Technology, 1973
ELLIS THOMPSON, Instructor III of Refrigeration and Air Conditioning
   Technology, 1956, 1971
CAREY B. WESLEY, Instructor II of Welding, 1966, 1970
   A.A.S., Lamar University
HARRY L. WILLIAMS, Vocational Counselor, 1968, 1972
   B.B.A., Stephen F. Austin State University
   M.Ed., Lamar University
JERRY L. WILSON, Instructor II of Industrial Electricity and Electronics
   Technology, 1970
   B.S., M.S., Lamar University

Part-Time Faculty

LEO G. BABEL, Lecturer of Plant Maintenance, 1974
L. DON BATTLE, Lecturer of Drafting Technology, 1972
FRANCIS L. BARGA, Lecturer of Industrial Supervision, 1971
BRUCE W. BAXTER, Lecturer of Drafting Technology, 1974
HERMAN W. BLANTON, Lecturer of Real Estate, 1965
ROY W. CLARK, Lecturer of Business Data Processing, 1974
OTTIS CRENSHAW, Lecturer of Industrial Electricity and Electronics Technology, 1972
JOHN C. DANNA, Lecturer of Drafting Technology, 1971
JOHN J. DORGAN, Lecturer of Industrial Supervision, 1970
LAIRON W. DOWDEN, Lecturer of Refrigeration and Air Conditioning Technology, 1974
STEPHEN M. FITZGERALD, Lecturer of Related Arts, 1974
  B.S., M.S., Lamar University
WILLARD J. HALL, Lecturer of Real Estate, 1955
JESSE W. HARRELL, JR., Lecturer of Plant Maintenance, 1973
PAUL N. HAY, Lecturer of Drafting Technology, 1972
  B.S., Louisiana State University
HOWARD G. HOLLINGSHEAD, Lecturer of Refrigeration and Air Conditioning Technology, 1974
  B.S., Lamar University
CHARLES N. ISLER, Lecturer of Industrial Supervision, 1972
  B.A., M.Ed., University of Pittsburgh
JOHN A. LIGHT, Lecturer of Industrial Electricity and Electronics Technology, 1973
BOBBY G. MARSHALL, Lecturer of Diesel Mechanics, 1971
THOMAS A. MARTINDALE, Lecturer of Welding, 1971
CALVIN J. McKAY, Lecturer of Industrial Supervision, 1966
  B.S., University of Southwestern Louisiana
JESSE T. PEOPLES, Lecturer of Refrigeration and Air Conditioning Technology, 1974
WILLIAM C. PETERS, Lecturer of Business Data Processing, 1967
JOHN C. READ, Lecturer of Refrigeration and Air Conditioning Technology, 1972
MRS. EDA M. RICHARDSON, Lecturer of Nurse Assistant, 1973
  B.S., Marymount College
  M.S., Kansas State College
RAYMOND D. ROBERTSON, Lecturer of Plant Maintenance, 1974
JAMES S. TEMPLE, Lecturer of Machine Tools, 1971
  C.C., Lamar University
THOMAS W. TERRILE, Lecturer of Plant Maintenance, 1973
MAX V. TRENCX, SR., Lecturer of Industrial Supervision, 1952
LESLIE G. WELLEY, Lecturer of Industrial Electricity and Electronics Technology, 1970
WILBUR O. WEBSTER, Lecturer of Related Arts, 1972
  B.S., University of Southwestern Louisiana
THOMAS R. WHIDDON, Lecturer of Industrial Supervision, 1972
  B.B.A., University of Texas
MRS. ANITA J. WOODS, Lecturer of Related Arts, 1971
  B.A., Sam Houston State University
College of Technical Arts

The College of Technical Arts is one of nine colleges at Lamar University and has provided technical and industrial education for thousands of Texas men and women. It is housed in a modern plant with five buildings having more than 80,000 square feet of space. Modern facilities are provided for instruction in the following degree and diploma programs: business data processing, diesel mechanics, drafting technology, industrial electricity and electronics technology, machine tools, mid-management, refrigeration and air conditioning technology, and welding. A Certificate of Completion is offered in the following Adult Training Programs: industrial supervision, law enforcement training, nurse assistant, plant maintenance and operations, and real estate.
General Information

LOCATION
Lamar University, a state-supported institution, is located in Beaumont, the center of industrial Southeast Texas. The campus is adjacent to the Port Arthur Highway (Spur 380) in southeastern Beaumont.

The city features modern schools, churches and shopping districts to serve the industrial community of approximately 120,000 persons. Principal industries in the area are oil refining, shipping, shipbuilding, rubber manufacturing and chemical production. Surrounding the urban communities are ranches and rice farms.

Within the metropolitan area are the cities of Port Arthur, Orange, Vidor, Port Neches, Nederland and Groves. All lie within 25 miles of Beaumont and form the heart of the upper Gulf Coast area with a population of more than 350,000.

HISTORY
South Park Junior College was established in 1923 and was controlled by the South Park Independent School District. Classes were conducted in the South Park High School building. An initial enrollment of about 125 students in 1923 had increased to 300 by 1931.

In 1932, the name of the institution was changed to Lamar College. At this time, separate facilities were provided, additional equipment was purchased and new policies instituted. By 1939, enrollment was approximately 640.

Lamar Union Junior College District was created in 1940, and Lamar College was separated from the South Park Independent School District. Bonds were approved and new facilities were constructed on the site of the present main campus.

A movement to expand Lamar College into a four-year state-supported school culminated in the creation of Lamar State College of Technology on September 1, 1951. Since that time, enrollment has increased to more than 11,000 students, and the curriculum has been expanded to include many areas of study. Graduate work in specified fields began in the academic year of 1960-61, and extension work became an integral part of the educational program in 1964. A doctoral program in engineering was added in 1971. Lamar University at Orange, offering first and second year courses, opened in 1969 as an extension center. The University also owns 36 acres on Pleasure Island in Port Arthur and has requested legislative funding for courses to be offered at facilities of Port Arthur College.

The institution's status as a university became official on August 23, 1971, when the name was changed to Lamar University.

Vocational subjects were among the first courses offered by Lamar and have played an important role in the development of Lamar University. A Division of Vocations was established in 1946 and became the Lamar School of Vocations in 1955. In 1970, the name was changed to the School of Technical Arts and in 1972, it became the College of Technical Arts. During 1971, the College began awarding Associate of Applied Science degrees in certain two-year programs. The College offers the Applied Science diploma in eight two-year programs and the Certificate of Completion in programs of one year or less in duration.

GOVERNMENT
The government of the University is vested in a board of nine regents appointed by the Governor and approved by the Senate for terms of six years. The Board of Regents delegates the direction of academic affairs to the President, administrative officers and faculty.
ACCRREDITATION
Lamar University is accredited by the Association of Texas Colleges and Universities and the Southern Association of Colleges and Schools. It is approved by the Texas Education Agency and for the training of veterans under all classifications. Several departments have been accredited by professional agencies. In the College of Engineering, the departments of Chemical, Civil, Electrical, Industrial and Mechanical Engineering are accredited by the Engineers' Council for Professional Development. Other accreditations include the Department of Chemistry by the American Chemical Society; Department of Music by the National Association of Schools of Music; and the Departments of Elementary and Secondary Education by the National Council for the Accreditation of Teacher Education.

The University also is a member of a number of academic councils, societies, associations and other such organizations.

OBJECTIVES
The basic objective of the College of Technical Arts is to help students equip themselves for effective living and for responsible citizenship in our society by offering educational programs and training which will extend their basic knowledge, encourage their continued development, and give them marketable skills. In working toward this goal, the College encourages students to assume a major share of the responsibility for the development of their potentialities and for utilization of their abilities, for their own purposes and for the good of society.

In order to stimulate students to have open minds, emphasis is placed upon the development of creative and scientific thinking for the solution of problems in the social and physical environment of their time. An effort is also made to provide guidance which will encourage the students to reach mature and responsible decisions, whatever the nature of the problems they may encounter.

The College of Technical Arts recognizes its obligation to make available to the community all the opportunities implicit in its function as a part of Lamar University. In an effort to achieve this goal, the specific objectives of the college are:

1. To provide guidance services that will assist each student in making an appropriate vocational choice.
2. To provide certificate, diploma and degree programs designed to prepare students for employment in various fields.
3. To provide education and training which allows the graduate to advance rapidly in his chosen field.
4. To instill in the student the desire to learn which will guide his growth in his profession.
5. To provide in-service training to persons currently employed in Southeast Texas.

ENTERING DATES
Courses and schedules have been arranged so that students may enter Lamar four times each year. The current University Calendar contains information regarding registration periods and exact entering dates.

EXTENDED DAY CLASSES
For administrative purposes, classes offered after 5 p.m. are referred to as Extended Day Classes. With few exceptions, both day and Extended Day classes are taught by the regular faculty and educational facilities are the same. A person employed during the hours of regular classes may attend classes in the evening and work to obtain a degree or to expand his knowledge in a special field of interest.
Courses offered in the evening make possible continual progress toward a degree objective. The program of study outlined in the catalog should be followed and should be approved by the department head concerned with the training objective of the student.

Facilities

BUILDINGS AND GROUNDS

Located on a campus of approximately 200 acres and valued at approximately $50,000,000, the Lamar University plant includes many new and functional buildings of modern design. These structures include:

The Richard W. Setzer Student Center, opened in 1971, represents an investment of $2,800,000 in expansion, renovation and furnishing of the former Student Union Building. A new Speech and Hearing Center and the Mary and John E. Gray Library are due to be completed in late 1975.

On-campus dormitories include Brooks Hall, Gentry Hall and Gray Hall for women; Campbell Hall, Combs Hall, Morris Hall, Plummer Hall and Shivers Hall for men. Also, three apartment buildings for upperclassmen and married couples are included in the residence hall system. Campbell, Combs, Gray, Morris and the apartments have undergone extensive remodeling.

Also located on the campus are a football stadium seating 17,150, Cardinal baseball field, athletic practice fields, Olympic-size swimming pool, indoor swimming pool, 14 tennis courts, handball courts, track and field stadium, a four-building maintenance complex, ROTC Building, Home Management House, Nursery School, and homes for the president and director of the physical plant.

THE LIBRARY

The Lamar Library has developed a strong collection of over 310,000 volumes in support of continuously expanding academic programs. Approximately 25,000 volumes are added annually to the present collection and over 3,000 periodicals are received. Library resources are further enriched by some 40,000 state and federal documents and microform materials. Additional resources are available to faculty, graduate students and advanced research students through the Library’s membership in a statewide teletype network. Construction of a new, eight-story Mary and John E. Gray Library began in the fall of 1973.

HEALTH CENTER

The University maintains a Health Center for the use of students during the long term or Summer Session.

Two types of service are available: (1) out-patient service for those who have minor ailments but who do not require constant supervision, and (2) infirmary service for those who are in need of the continued attention of the University physician or of nursing care.
It is not possible for the University to provide unlimited medical service. Special medicines, examinations, treatments, X-rays and laboratory tests are not furnished. No charge is made, however, for up to 10 days care each semester in the Health Center. A small fee for drugs, supplies and special services may be charged students required to remain in the Health Center for more than 10 days.

The Health Center, located on East Virginia St. near Combs Hall, is adequately staffed and equipped for treating illnesses and injuries. The Center does not provide care for students requiring surgery or the services of specialists. In these cases, every effort will be made by the physician or nurse to notify the parents or guardians of the student’s needs. The University assumes no responsibility for continued medical care for students having chronic diseases. These students should arrange for the care of a private physician located in or near Beaumont.

In the event the Health Center is filled to capacity, the University is not under obligation to provide hospital services elsewhere. However, the Health Center has a sufficient number of beds for all normal needs.

Students who are ill should report promptly to the Center for diagnosis and treatment. They will not be treated in the dormitory or in rooming houses.

BOOKSTORE
For the convenience of faculty and students, the University operates a Bookstore where supplies and books, new and used, may be purchased.

Used books, which are currently approved, may be sold to the Bookstore. Books which must be discontinued are not purchased by the Bookstore except at a salvage price.

The Bookstore reserves the right to require the seller to prove ownership.

DINING HALLS
A dining hall is located on the main campus (see map on page 4) and in Brooks-Shivers Hall. Owned by the University, the food service is operated by ARA-Slater, a national catering firm.

Provision is made for special diets and work or class schedules which conflict with serving hours. A schedule of serving hours may be obtained from the Housing Office.

Two snack bars are located in the Setzer Student Center and provide sandwiches, soft drinks and light lunches. Commuter students also may use the snack bars and the main dining hall.

In addition to the snack bars located in the Setzer Student Center, the College of Technical Arts provides facilities where sandwiches, soft drinks and light lunches are available.

HOUSING
Eight dormitories for women and men are located on the campus. The University also owns and operates three apartment buildings for upperclassmen students and married couples. For additional information regarding housing, see the Fees and Expenses section of this Bulletin.

COMPUTER CENTER
The University operates a Computer Center as a service to faculty, administration, students, researchers and others. The computer center has modern, high-speed digital and analog equipment valued in excess of $750,000.
SCHOLARSHIPS
Lamar University offers a scholarship to the highest ranking graduate of each fully accredited high school of Texas. Each scholarship exempts the holder from payment of $50 tuition per semester. Other scholarships supported by industries, organizations and individuals are available upon application for Technical Arts students. Further information may be obtained from the Student Financial Aid Office or the Vocational Counselor.

STUDENTS WITH PHYSICAL HANDICAPS
The Texas Rehabilitation Commission offers assistance for tuition and nonrefundable fees to students who have certain disabling conditions, provided their vocational objectives have been approved by a TRC Counselor. Examples of such conditions are orthopedic deformities, emotional disorders, diabetes, epilepsy, heart conditions, etc. Other services also are available to assist the handicapped student to become employable. Application for such service should be made at the Texas Rehabilitation Commission, Beaumont District Office, 1110 Goodhue Building, Beaumont, Texas 77701.

VETERANS’ EDUCATION
Lamar holds a contract for educating veterans under the Vocational Rehabilitation Law, known as Public Law Number 16, and is an approved university for veterans under Public Law Number 346 and Public Law Number 350. The vocational training has been especially prepared for those who wish to establish themselves in business and industry in the Sabine-Neches area.

Veterans who are interested in continuing their education under federal laws providing such training are directed to secure approval from the Office of Veterans Affairs, Student Affairs Building. Advice on program and training opportunities, academic assistance and counseling is available from this office or by writing to Box 10017, LU Station.

PART-TIME EMPLOYMENT
The University, as well as many local businesses and industries, provides a number of part-time jobs which enable worthy students to earn part or all of their expenses. Applicants should contact the Director of Financial Aid.

CAMPUS POST OFFICE
The campus Post Office, a contract facility operated by the University, is officially designated as Lamar University Station 77710. Full postal services are offered.

Each student may make application for a box at the Post Office by completing necessary forms. The charge is $3 per semester and $1.50 per Summer Session. Three students are allowed to share the same box.

Mail may be picked up at the general delivery window by those students who do not choose to reserve boxes at the Post Office.

TESTING AND PLACEMENT CENTER
The Testing and Placement Center is located in the Educational Services Center and is open 8 a.m. to 5 p.m. Monday through Friday.

This Center provides testing service for entering students and for others. Non-students desiring this service pay a fee dependent upon the program used.

Placement service also is provided at this Center and is available to all students, faculty and former students.
OFFICE OF CONTINUING EDUCATION
The Office of Continuing Education conducts instructional programs, both extension and on campus, for credit and noncredit interest, with emphasis on adult education. Coordinating its programs with the College of Technical Arts, the Office of Continuing Education presents a broad spectrum of vocational and academic courses.

FINANCIAL AID AND AWARDS
Financial assistance in the form of scholarships, grants, loans and employment is available to a number of qualified students. Complete information about financial aid is published annually in the bulletin of Financial Aid and Awards. Copies are available from the Office of Public Information or the Director of Student Financial Aid. The Financial Aid office is located in the Student Affairs Building. Students also are encouraged to contact the Vocational Counselor about special awards which are restricted to full-time Technical Arts students.
Admission Requirements

Applicants seeking admission to the College of Technical Arts must satisfy the admission requirements of the program of study which they desire to enter. The applicant should be aware that there are different admission requirements for degree, diploma and certificate programs. Requests for application forms or admission information may be directed to the Office of Admissions and Records, Lamar University, Lamar University Station, Box 10009, Beaumont, Texas 77710.

ADMISSION REQUIREMENTS FOR DEGREE PROGRAMS
Mid-Management, Real Estate, Fire Science Technology
Students who desire to enter one of the degree programs must satisfy the following admission requirements:
1. File an application for admission. (Form attached to back of this catalog.)
2. Take the College Entrance Examination Board's (CEEB) Scholastic Aptitude Test (SAT) or the American College Test (ACT) and designate Lamar University to receive the scores. (October, November or December test dates are preferred.)
3. Submit the official health data form executed by a physician (health form attached to back of this catalog).
4. Have transcript of high school grades sent directly to the Dean of Admissions and Records, Lamar University. Students transferring from another institution must submit official transcripts from each college previously attended. This requirement applies regardless of the length of time in attendance and regardless of whether credit was earned or is desired. Further information concerning transfer students may be found in the "Admissions" section of the general university bulletin.
5. One of these prerequisites must be met:
   a. Graduation from an accredited high school, or
   b. Transfer with transcript from an accredited post-secondary vocational-technical school, or
   c. Individual approval from the Dean of Admissions and Records for persons 18 years of age or older who do not meet either of the two preceding requirements. (Students wishing to enter under this prerequisite should first contact the Dean of the College of Technical Arts.)

ADMISSION REQUIREMENTS FOR DIPLOMA PROGRAMS

Students who desire to enter one of the diploma programs must satisfy the following admission requirements.
1. File an application for admission. (Form attached to back of this catalog.)
2. Submit the official health data form executed by a physician (health form attached to back of this catalog).
3. Have transcript of high school grades sent directly to the Dean of Admissions and Records, Lamar University. Students transferring from another institution must

*New degree programs in these areas are being planned and when approved, students must meet these admission requirements.
submit official transcripts from each college previously attended. This requirement applies regardless of the length of time in attendance and regardless of whether credit was earned or is desired. Further information concerning transfer students may be found in the "Admissions" section of the general university bulletin.

4. One of these prerequisites must be met:
   a. Graduation from an accredited high school, or
   b. Transfer with transcript from an accredited post-secondary vocational-technical school, or
   c. Individual approval from the Dean of Admissions and Records for persons 18 years of age or older who do not meet either of the two preceding requirements. (Students wishing to enter under this prerequisite should first contact the Dean of the College of Technical Arts.)

**ADMISSION REQUIREMENTS FOR CERTIFICATE PROGRAMS**

Industrial Supervision, Plant Maintenance and Operations, Law Enforcement, Nurse Assistant and Real Estate.

Students who desire to enter into one of the certificate programs must satisfy the following admission requirements.

1. File an application for admission. (Form attached to back of this catalog.)
2. Have transcript of high school grades sent directly to the Dean of Admissions and Records, Lamar University. Students transferring from another institution must submit official transcripts from each college previously attended. This requirement applies regardless of the length of time in attendance and regardless of whether credit was earned or is desired. Further information concerning transfer students may be found in the "Admissions" section of the general university bulletin.

3. Submit the official immunization record executed by a physician as required by State Law. The immunization record is a part of the health form attached to the back of this catalog.

**ENTRANCE EXAMINATION**

Those students who are required to take an entrance examination may submit either SAT or ACT scores in fulfillment of this requirement. Both tests are given several times each year at test centers throughout the United States and in many foreign countries. It is recommended that summer and fall applicants take one of these tests early in the senior year and, if possible, no later than February. Location of test centers, test dates, fees, test application forms, sample question booklets, etc. may be obtained without charge from high school counselors or by writing to the testing agency. SAT inquiries should be directed to the College Entrance Examination Board, Box 1025, Berkeley, California 94704. ACT inquiries should be directed to the American College Testing Program, Box 168, Iowa City, Iowa 52240.

**WHERE TO APPLY**

All required admission forms should be addressed to the Office of Admissions and Records, Lamar University, Lamar University Station, Box 10009, Beaumont, Texas 77710.

**READMISSION**

Persons who attended the College of Technical Arts in past years, but who are not enrolled currently, should submit an application and indicate that they have attended Lamar previously. Students who currently are enrolled should follow the procedures for pre-registration as described by their advisors or instructors.
Fees and Expenses

PAYMENT OF FEES
Lamar University reserves the right to change fees in keeping with acts of the Texas Legislature and the University’s Board of Regents.

A student is not registered until all his fees are paid in full. Payment may be made by check, money order or currency. Checks and money orders, not in excess of total fees, should be made payable to Lamar University and will be accepted subject to final payment. Checks and drafts deposited with Federal Reserve banks cannot be handled through regular bank collection channels if received without the magnetic ink (MICR) transit number. The new electronic processing demands such magnetic ink encoding. The University will not accept counter checks or “changed” checks.

SUMMARY OF REGISTRATION EXPENSES
Each student must plan his budget carefully. It is possible to attend Lamar on a modest sum and yet participate in most phases of the university program. To assist in planning registration expenses, the following estimate is furnished as a guide:

Texas residents taking a 15 hour academic work load*:

<table>

The tuition and general use fees vary with the semester hours carried so that the total may differ from this estimate, according to the schedule shown in the section “Summary of Fees.”

TUITION AND FEES
Tuition is based upon the number of hours for which the student registers, and is determined by the student’s classification as a Texas resident; a nonresident U.S.

*Tuition for Texas residents taking 12 hours or less is $50 per semester. Each additional semester hour is $4 per hour. A full-time student is one who takes 12 or more semester hours of course work.
citizen; or nonresident who is a citizen of another country.*
Each student pays a Student Services Fee of $2.50 per semester hour, with a maximum of $30 in a long session.

**SUMMARY OF FEES**
Additional fees and charges which are applied on a selective basis are listed following the Summary of Fees.

Code: A. Texas residents; B. nonresidents who are U.S. citizens; and C. nonresidents who are citizens of another country.

**Laboratory Fees**
A laboratory fee of $2 is charged for each semester for all courses in which the combined credit of lecture and laboratory is from one to three semester hours. For such courses in which the credit is four semester hours or more, the laboratory fee is $4 per semester.

* Determination of legal residence for tuition purposes is made on the basis of statutes of the State of Texas. See page 27.
Private Lessons in Voice and Instrumental Music
One half-hour lesson per week ...................... $18
Two half-hour lessons per week..................... 36

Parking Fee
Charges for parking on campus are made at the time a student is registered. In each instance, a student’s parking fee is honored up to the end of Summer Session II.
Registration of an automobile in August is $10 and the January fee is $6. A student registering for the first Summer Session is charged $4, and for the second Summer Session the fee is $2. Only one registration is required for one school year.

Health and Accident Insurance
Additional health and accident coverage providing protection over and beyond that given by the Health Center is available at registration for students carrying nine or more semester hours. The fee is $35 (estimated). For their protection and welfare this (or similar) insurance is required of all foreign students.

Special Fees
For courses in which special plans must be prepared and for which specialists must be secured as instructors, fees will be set by the University administration subject to the approval of the president.

Exemption 1—Scholarships to High School Honor Graduates
The highest ranking student in the graduating class of a fully accredited Texas high school will be entitled to a scholarship valued at $100. This scholarship must be used during the long session immediately following graduation.

Exemption 2—Veterans
Lamar is approved for educational training under all of the Veterans Educational Assistance programs for veterans of the U.S. Armed Forces.
Citizens of Texas, at the time of entry into the Armed Forces, who served in World War I, World War II, the Korean Conflict or the Vietnam War, and were honorably discharged and who are no longer eligible for educational benefits provided for veterans of the United States, are exempt from tuition and laboratory fees, but not from other fees. To obtain this exemption, necessary papers must be presented and approval obtained from the Office of Veterans’ Affairs prior to registration. The above exemption also extends to wives, children and dependents of members of the Armed Forces who were killed in action or died while in the service in World War II, the Korean Conflict or the Vietnam War.
Students who expect to attend under some veteran’s benefit plan should contact the Office of Veterans’ Affairs 60 to 90 days prior to registration, if possible. The Office of Veterans’ Affairs advises veterans on program and training opportunities, academic assistance and counseling. Veterans interested in information in these areas should report to this office in the Student Affairs Building.

Refund of Fees
Any student officially withdrawing will receive a refund on tuition, Setzer Center, student service, laboratory, building and general use and private lesson fees according to the following schedule:
Long Session
1. During the first two weeks of the semester, 80 per cent.
2. During the third week of the semester, 60 per cent.
3. During the fourth week of the semester, 40 per cent.
4. During the fifth week of the semester, 20 per cent.

Summer Session
1. During the first week of the semester, 60 per cent.
2. After the first week no refund.

No refunds are made when dropping courses.

Application for refund must be made to the Vice-President for Finance after the student has officially withdrawn, but not later than the end of the current semester or Summer Session. It takes about 30 days to process these refunds.

Returned Check Fees
If a check is returned unpaid, the student is automatically suspended from the University. He may re-enter upon redemption of the check plus payment of the returned check fee of $2.

Miscellaneous Fees
Associate Diploma/Degree ............................................. $7.50
Certificate of Completion ............................................ 7.50
Bachelor’s Diploma ..................................................... 7.50
Bachelor’s Cap and Gown Rental .................................. 7.00
Late Registration ....................................................... 5.00
Returned Checks ....................................................... 2.00
Re-entry Fee ............................................................. 5.00
Transcript Fee .......................................................... .50
Advanced Standing Examination (per course) .................... 5.00
Photo Identification ................................................... 2.00
Swimming Pools (suits and towels) .................................. 8.00

Fine and Breakage Loss
Library fines, charges for breakage or loss of equipment, or other charges must be paid before a transcript of credit or a permit to re-enter the University will be issued.

The University reserves the right to make a special assessment against any student guilty of inexcusable breakage or loss of instructional equipment or other university property.

STUDENT RESPONSIBILITY FOR RESIDENCE CLASSIFICATION

The responsibility of registering under the proper residence classification is that of the student. If there is any possible question of his right of classification as a resident of Texas, it is his obligation, prior to or at the time of his registration, to raise the question with the Dean of Admissions and Records and have his status officially determined.

Every student who is classified as a resident student who becomes a nonresident at any time by virtue of a change of legal residence by his own action or by the person controlling his domicile, is required to notify the Dean of Admissions and Records.

Students failing to comply with the residence provisions of the state tuition bill (Art. 2645c, V.C.S. as amended 1957) are subject to penalties as set forth in the law and/or appropriate disciplinary action.
RULES AND REGULATIONS FOR DETERMINING RESIDENCE STATUS

See the general catalog for complete information on how residence status is determined, or consult the Coordinating Board, Texas College and University System "Rules and Regulations for Determining Residence Status" as revised, July 16, 1974. The latter publication is available at the Admissions and Records Office.
Student Housing

The student housing program at Lamar is designed to supplement the academic program of instruction. It provides opportunities for social and intellectual development and recreation in a pleasant living environment.

University residence halls can economically provide the proper atmosphere for out-of-class activities of an educational nature, as well as the proper environment for academic preparation and study.

Four of Lamar's residence halls have been renovated and are among the most modern campus living facilities in Texas. Residents not only have modern living accommodations, but also have the opportunity of living-learning experiences within each hall.

It is realized that the facilities and programs of Lamar's residence halls will not fulfill the desired life-style of all students. For this reason, students who do not feel that the residence hall program meets their personal needs may elect to find living accommodations off-campus.

The adjustment from high school to college frequently is difficult for the first-year student. Therefore, it is recommended that freshmen who do not live with parents or other relatives reside on the campus. Here they will have ready access to the Library, and to contacts with upperclassmen in their major fields and to professional counseling.

Questions concerning the housing system, its policies, room and board rates, should be directed to the Student Housing Office, Lamar University Station, Box 10041, Beaumont, Texas 77710.

RESERVATIONS AND ASSIGNMENTS

Reservations

To reserve a room in the residence halls or an apartment, write to the Housing Office, Lamar University, P.O. Box 10041, Lamar University Station, Beaumont, Texas 77710. A check or money order for $30 must accompany the reservation request. Reservations may be cancelled with full refund until three weeks prior to the first day of classes. No refunds will be issued on cancellations received after this date.

All unclaimed rooms will be declared vacant and the deposit forfeited at 6 p.m. on the last day of registration unless the student gives the Student Housing Office written instructions to hold the room for a longer period. Residents will be refunded deposits, less any breakage or cleaning charges, at the end of a semester on proper withdrawal from the housing unit. The deposit will not be refunded if the student moves from the housing system prior to the end of a semester.

Assignments

Permanent assignments cannot be made until the student reports for check-in. The University reserves the right to assign students to specific apartments, dormitories and rooms. Students may request certain apartments, dormitories and rooms, and all possible consideration will be given each request. Students already living in university-owned housing units have the first choice of rooms and apartments the following semester.

For additional information and application forms, write to the Student Housing Office, Lamar University Station, Box 10041, Beaumont, Texas 77710.
Academic Regulations

COURSE NUMBERING
Each course has an individual alpha-numeric code (such as DFT 131). The alpha part indicates the subject area. Each number contains three or more figures. The first digit indicates the rank of the course: 1 means that it is for freshmen; 2, for sophomores; 3, for juniors; and 4, for seniors. The second figure indicates the number of semester hours credit. The third figure (or figures) indicates the order in which the course is taken. The letter a, b, c, or d following course numbers indicates partial credit in each case; full credit for such numbered courses will be granted only when the series is complete.
Exceptions to the preceding course numbering system occur in the Adult Training Programs where four digits are used to identify courses in these programs.

Semester Hour
The unit of measure for credit purposes is the semester hour which means one hour of recitation (or equivalent in laboratory work) each week for one semester. For each classroom hour, two hours of study are expected. Two or more hours of laboratory work are counted equivalent to one classroom hour. For laboratory work which requires reports to be written outside of class, two clock hours are usually counted as one semester hour. The amount of credit awarded for clinical practice and internships varies and does not follow the two for one ratio.

Admission to Class
The only way to become a member of a class is to register for it through the regular registration procedure.

REGISTRATION
Registration is not complete until all tuition and fees have been paid and all necessary transcripts are on file in the Office of Admissions and Records.
No one may register for credit after the last date for registration as shown on the official calendar. The official calendar is maintained by the Vice-President for Administration.

CLASS ATTENDANCE AND ABSENCES
Regular and punctual attendance in classes and laboratories is expected of all students. Instructors should maintain attendance records and adhere to attendance policies formulated by their departments.
In general, the individual instructor approves absences. Absences approved because of engagement in a university activity are published in the academic bulletin. An approved absence allows the student to make-up examinations and written assignments without penalty. Although the student must make up the work missed, additional laboratory time is not granted the student.
All instructors should announce these policies concerning unexcused absences at the beginning of each semester.
Students who miss classwork to the extent that their laboratory performance may be unsafe or that they have no reasonable chance to pass the course may be dropped from that course by the department head. The department head must notify the student prior to this action.
Course Load

In May 1974, the Board of Regents established the following definition of course load for the university system. "The maximum credit hours per semester for which a student may enroll at Lamar University is 12 semester credit hours, without special approval. The President of the University is authorized to designate an officer or officers of the University to approve additional semester hours above the established maximum load."

Overloads

The Dean of the College of Technical Arts must approve all overloads. In general, the student must demonstrate that he is capable of maintaining a high performance level in all classes.

CHANGING SCHEDULES

Students may not add, change or drop courses without the permission of their department head. Usually a course may not be added after the first week of the semester (first two days of a Summer Session).

DROPPING COURSES

A student may drop a course without penalty during the first weeks of the semester. The last date for dropping a course without penalty is published in the official University calendar. Students wishing to drop a course should see the head of their department.

A student may not drop a course the last three days prior to the beginning of semester examinations.

For drops after this penalty free period, grades are recorded as Q or F indicating that the student was passing or failing at the time of the drop.

WITHDRAWALS

A student wishing to withdraw for the remainder of the semester or summer term, should fill out a Withdrawal Petition in triplicate in the office of his department head. He must clear all financial obligations and return all uniforms, books, laboratory equipment and other materials to the point of original issue.

Three copies of the withdrawal form signed by the Dean of Technical Arts, the Director of Library Services and an Associate Dean of Students, are presented to the Office of Admissions and Records by the student.

The Finance Office, on application before the end of the semester of Summer Session, will return such fees as are returnable according to the schedule shown under the "Fees" section of the bulletin. This refund is made only to persons withdrawing and only if requested before the end of the current semester of Summer Session.

If a withdrawal is made before the end of the tenth week (third week of summer term), or if the student is passing at the time of withdrawal, a grade of W is issued for each course so affected. A grade of F is issued for all courses not being passed at time of withdrawal after this penalty-free period.

A student may not withdraw within three days of the beginning of final exam week.

A student who leaves without an official withdrawal will receive a grade of F in all courses and forfeit all returnable fees.

ENFORCED WITHDRAWAL BECAUSE OF ILLNESS

The Director of the Health Center and the Dean of Student Affairs, on the advice of competent medical personnel, may require withdrawal or deny admission of a student for health reasons (mental or physical).
ACADEMIC REGULATIONS

ACADEMIC PROGRESS

Classification of Students

Students are classified as freshmen, sophomores, juniors, seniors and special. For the purpose of determining eligibility to hold certain offices and for other reasons, officially enrolled students are classified as follows:

Freshman: has met all entrance requirements but has completed fewer than 30 semester hours.

Sophomore: has completed a minimum of 30 semester hours with 60 grade points.

Junior: has completed a minimum of 60 semester hours with 120 grade points.

Senior: has completed a minimum of 90 semester hours with 180 grade points.

Special Student: must meet all entrance requirements.

Full-Time Student: a student taking 12 or more semester hours (four or more in a summer term) is classified as a full-time student.

Grading System

A—Excellent
B—Good
C—Satisfactory
D—Passing
F—Failure
I—Incomplete
W—Withdrawn
Q—Course was dropped
S—Credit
U—Unsatisfactory; no credit
NG—No grade

The grade of W or Q is given if the withdrawal or drop is made before the penalty date or if the student is passing at the time of withdrawal or drop.

The grade of I is given when any requirement of the course, including the final examination, is not completed. Incomplete work must be finished during the next long semester or the Office of Admissions and Records must change the I grade to the grade of F. The course must then be repeated if credit is desired.

The instructor may record the grade of F for a student who is absent from the final examination and is not passing the course.

Semester grades are filed with the Office of Admissions and Records. A grade may not be recorded for a student not officially enrolled in a course during the semester covered. A grade may not be corrected or changed without the written authorization of the instructor giving the grade. The written instruction for a grade change should be accompanied by a statement explaining the reason for the change.

Grade Points

For the purpose of computing grade averages, grade points are assigned as follows: to the grade of A, 4 points; to B, 3 points; to C, 2 points; to D, 1 point, and F, 0 points.

A grade, once earned and entered upon a student’s record, cannot be removed. If a student repeats a course which may not be taken for additional credit, the last grade received is the official grade and is the only one used in figuring GPA or a grade point deficiency. This applies only if the course is repeated at the same institution.

The repetition of a Lamar University course at another institution, in residence or by correspondence, will not remove a “grade” from the GPA computation of Lamar University courses.

It is the responsibility of the student, after repeating a course, to file a special request form in the Office of Admissions and Records so that the adjustment in his GPA can be made.

A student’s grade point average is obtained by multiplying the number of semester credit hours of each grade by the grade points assigned to the grade and dividing the sum
of these by the total number of semester hours of all work taken, whether passed or failed, if not repeated.
Credit for a course in which the grade of S is given is not included in computation of the grade point average. A student is not given credit for the grades of NG or U nor are the semester hours used in computing the grade point average.

Reports
Reports on grades are mailed at the end of each semester or summer term. Reports on student work are sent at mid-semester. Upon written request to the Office of Admissions and Records, married students may have grades sent directly to them.

Scholastic Probation and Suspension
Students are expected to make acceptable scholastic progress toward their degree objective. Students who fail to make such progress and accumulate grade point deficiencies may be placed on scholastic probation or suspension.
All students with a grade point deficiency at the end of any regular semester shall be placed on scholastic probation and continued on probation as long as a deficiency exists.
All students with a grade point deficiency of 25 or more grade points at the end of a Spring Semester shall be suspended for the following Fall Semester provided that no student shall be suspended at the end of his first regular semester of attendance.
Students suspended by this action may attend the Summer Session on probation.
Students with a grade point deficiency below 25 at the close of the Summer Session may continue to register for the following Fall Semester.
A student returning from an academic suspension must continue to reduce his grade point deficiency every semester of enrollment until the deficiency is eliminated. Should he fail to reduce his deficiency in any one semester, he will be suspended.
The first academic suspension shall be for one long semester; the second for two long semesters; and the third for four long semesters and readmission only with special permission of the Vice-President for Academic Affairs.
Students who enter the College of Technical Arts with grade point deficiencies in their university work are advised not to take more than 15 hours in a semester.

Removal of Scholastic Probation and Suspension
1. Students on scholastic probation cannot:
   a. Represent the University in any extracurricular activity.
   b. Hold collegiate or university office.
   c. Participate in trips or tours except when required as class projects.
2. Warning — Each student is responsible for knowing his academic status and the regulations which apply. A student who does not abide by the regulations governing his particular status may be required to reduce his academic load or withdraw from the University without special consideration.

ACADEMIC RECORDS AND TRANSCRIPTS
Academic records are in the permanent custody of the Admissions and Records Office. Transcripts of academic records may be secured by an individual personally, or will be released on the student's written authorization. Transcripts are 50 cents per copy.
Copies of transcripts from other institutions, on file in the Office of Admissions and Records for evaluation purposes, will not be released. Copies of these records must be obtained from the issuing college.
Graduation Requirements

ASSOCIATE OF APPLIED SCIENCE
Generally, a student is eligible for graduation when he has completed an approved program of study. Specifically, a student must:
1. Satisfy all admission requirements.
2. Complete an approved degree plan.
3. Have at least a 2.0 grade point average on all work submitted on the degree plan and a 2.0 on all courses in the major field submitted on the degree plan.
4. Complete 24 semester hours of major work at Lamar with 12 hours being in 200 level courses.
5. Make final application for graduation and pay all fees by the deadline date as stated in the current catalog.
6. Attend the official graduation exercise or receive prior written permission from the Dean of the College of Technical Arts to be absent.

APPLIED SCIENCE DIPLOMA
1. Satisfy all admission requirements.
2. Complete an approved diploma plan.
3. Have at least a 2.0 grade point average on all work submitted on the diploma plan and at least a 2.0 on all courses in the major field submitted on the diploma plan.
4. Complete 24 semester hours of major work at Lamar with 12 hours being in 200 level courses.
5. Make final application for graduation and pay all fees by the deadline date as stated in the current catalog.
6. Attend the official graduation exercise or receive prior written permission from the Dean of the College of Technical Arts to be absent.

CERTIFICATE OF COMPLETION
Generally a student is eligible for graduation when he has completed an approved program of study. Specifically, a student must:
1. Satisfy all admission requirements.
2. Complete an approved certificate plan.
3. Have at least a 2.0 grade point average on all work submitted on the certificate plan.
4. Make application for certification to the person responsible for the program.
General Regulations

NEW COURSES
In order to meet changing educational requirements, the University reserves the right to add any needed courses at any time without regard to the listing of such courses in the catalog. It is expected that a listing of these courses will appear in the next catalog issue.

Minimum Class Enrollment
The University reserves the right not to offer any courses listed in this catalog if fewer than 12 students register for the course.

OFFICIAL SUMMONS
An official summons takes precedence over other university activities of the student and should be answered promptly on the day and hour designated. Failure to heed an official summons may subject the student to serious disciplinary action.

DISCIPLINE
Students of Lamar University are expected to conduct themselves in a mature manner, conforming to values and moral standards of good society. They are expected to obey the laws of the land and the regulations of the University. They are further expected to assume full responsibility for the consequences of their actions. Students should be aware of these expectations when they choose to enroll at Lamar University.

Disciplinary procedures, specific rules and regulations, and statements of student rights and responsibilities are published each year in the Guide to Student Services, available in the Student Affairs Office.

Disciplinary Probation
A student may be placed on disciplinary probation for unacceptable behavior at any time or place. The Dean of Student Affairs may classify behavior as unacceptable and may set the period of probation. The student has the privilege of appealing the decision to the Disciplinary Committee of the University. This appeal is made through the office of the Dean of Student Affairs.

Hazing
Lamar University is opposed to hazing in all of its various forms and will discipline all offenders in the spirit of the statutes governing this offense, as set forth in Chapter 4-A of Title 15 of Vernon’s Statutes in the State of Texas.

Penalty for False Statements
A student who makes a false statement to any University official or on an official form submitted to the University is subject to immediate dismissal.

ELIGIBILITY FOR EXTRACURRICULAR ACTIVITIES
An extracurricular activity is understood to be any activity representing the student body, any student organization, any department or division organization or any activity representing the University.

Any full-time student not on disciplinary or scholastic probation who is officially registered is eligible to become a candidate and/or to hold student office or to represent the University in any extracurricular activity provided such student has a grade point average of at least 2.0 for both the whole of his work completed at Lamar and that of the preceding semester.
For the purpose of establishing eligibility, two six-week summer terms may count as one semester. Transfer students have the same eligibility as freshman students until completion of one semester at Lamar.

PARKING REGULATIONS
Each student who pays the necessary fee is issued a car decal which permits parking on the campus. This decal is numbered and is to be displayed as instructed in official parking and traffic regulations, which are issued when automobiles are registered. Strict observance of traffic and parking regulations is necessary for the safe, orderly flow of vehicles in the campus area.

CHANGE OF ADDRESS OR NAME
Students are responsible for all communications addressed to them at the address on file in the Student Affairs Office and in the Office of Admissions and Records. Any student who moves during a semester must immediately register his change of address in the office of the Dean of Student Affairs and in the office of Admissions and Records. A student who lives in University owned housing and who desires to change his address must get prior approval from the Dean of Student Affairs. Change of address forms are available in the Office of Admissions and Records.

Change of name due to marriage, or correction of name because of spelling errors may be made by completing a name change card at the Admissions and Records Office. All name changes must be accompanied by a copy of the legal document making the name change official. This document will be kept on file in the student’s confidential folder.

STUDENT DEBTS
The University is not responsible for debts contracted by individual students or student organizations and will not act as a collection agency for organizations, firms or individuals to whom students may owe bills.

Students and student organizations are expected to honor contractual obligations promptly, but in case of flagrant disregard of such obligations the Dean of Student Affairs will take appropriate action.

Penalty for failure to clear up these obligations may be: a) no readmission; b) withholding of grades and transcripts; c) withholding of degree.

TELEPHONE SERVICE
Public telephone pay stations have been installed in all academic classroom buildings, the Library and the Setzer Student Center. Students are expected to use these telephones for their personal calls. Office telephones are for the use of faculty and administrative personnel. Incoming telephone calls for students are transmitted to the students only in case of emergency.
Student Activities

Student life at the University includes many activities in addition to those connected with the courses of study. Some students find an opportunity for the development of their interests in clubs and social affairs. Others participate in athletics and physical activities, such as intercollegiate and intramural sports. Still others may be interested in dramatics, music, publications, student government or religious life, in all of which there are opportunities for participation under faculty guidance and cooperation.

STUDENT GOVERNMENT ASSOCIATION

All full-time students automatically are members of the Student Association of Lamar University. Officers of the Association and representatives are elected annually and make up the Association's executive body known as the Student Government Association. The Association offers the student an opportunity to promote and to participate in self government and to participate in the management of a well-rounded program of student activities.

PUBLICATIONS

The University Press, the official University newspaper, is published weekly by students organized by a staff advisor. The publication serves both as a medium of training and as a source of information. Any student is eligible to become a staff member.

The Cardinal is the official yearbook of Lamar University. Any full-time student is eligible to become a staff member. Those interested are urged to apply.

A Guide to Student Services is published primarily for the benefit of new students. Information concerning the University and student activities is given in this publication.

A Student Directory is published annually by the University. It contains a listing of the names, addresses and telephone numbers of students, the faculty and administration.

Pulse, a student literary magazine, is published each semester by a student staff supervised by a faculty sponsor for the English Department. Any currently enrolled student may submit manuscripts for possible publication.

The Lamar Engineer is published quarterly by the undergraduate students in the College of Engineering.

ARTIST SERIES

The Fine Arts Committee of the Setzer Student Center is made up of students and faculty. The committee annually arranges for the presentation of a number of programs by professional artists and entertainers. Outstanding personalities, musicians, artists and companies have been presented under the sponsorship of the committee.

SETZER STUDENT CENTER

The Richard W. Setzer Student Center provides facilities for leisure time recreation and is the campus center for many extracurricular activities. Completed in 1971 at a cost of $2,800,000, the Center includes lounges, snack bars, recreation areas, bookstore, ballroom, meeting rooms and facilities for student organizations. Offices are located there for Student Government, Setzer Student Center Council, activities program counselors and the Center director.

STUDENT ORGANIZATIONS

More than 160 student organizations currently active on the campus offer membership in one or more service, professional, religious, social and mutual interest
clubs. For further information, consult the Guide to Student Services.

College of Technical Arts students are encouraged to join and participate in the local chapter of V.I.C.A., Vocational and Industrial Clubs of America. This organization contributes to the individual student's awareness of the pride in his chosen field.

**INTRAMURAL SPORTS PROGRAM**

Under the supervision of the directors of intramural sports, the Departments of Health and Physical Education for Men and Women offer intramural programs with opportunities for participation in recreational activities. Participation is voluntary and open to all full-time students. Technical Arts students are urged to become involved in intramural sports.

**RELIGIOUS CENTERS**

Several denominations provide a full-time ministry to the campus and have established student centers adjacent to the campus.

In addition to credit Bible courses, the centers offer opportunities for worship, noncredit study and counseling to aid the student in developing a meaningful context for his university years.

**DEVELOPMENTAL LEARNING LABORATORY**

Each Fall and Spring Semester, the Dean of Student Affairs' Office sponsors the Developmental Learning Laboratory (DLL). It is designed to concentrate on two primary skill areas: developmental reading and study skills.

The goal of the DLL is to offer assistance to any student who may be having difficulty in study habits or reading skills. Complete individualization is emphasized. Students work through a developmental program at their own speed. Success has been shown in increased vocabulary, reading comprehension, reading rate and a higher degree of proficiency in the basic study skills. The laboratory tries to diagnose deficiencies before they become problem areas. Students who feel they could benefit from this program or who desire more information should contact the Office of Student Development, Room 116, Student Affairs Building.

**EX-STUDENTS ASSOCIATION**

This association of former students of Lamar, including graduates and ex-students, is active on a year-around basis. The Executive Secretary of the Association maintains an office in the Student Affairs Building.
College of Technical Arts

DIPLOMA PROGRAMS
The College of Technical Arts offers career-oriented education in seven diploma programs in two of the three departments in the College. The seven programs that lead to the Applied Science diploma are:

Industrial Department:
- Diesel Mechanics
- Machine Tools
- Refrigeration and Air Conditioning Technology
- Welding

Technical Department:
- Business Data Processing
- Drafting Technology
- Industrial Electricity and Electronics Technology

All of the above are two-year programs designed to give the student training prior to his entry into an occupation. Successful completion of one of these programs should provide the student with sufficient knowledge, skill and confidence to enter and advance rapidly in his selected field.

The curriculum of each program is designed to allow a student to enter in any semester and is arranged so that a student can take his supporting work in either the College of Technical Arts or in other colleges in the University.

ASSOCIATE PROGRAMS
The College of Technical Arts offers career-oriented education in:

Related Arts Department
- Mid-Management

The above program is two years in length and leads to an Associate of Applied Science degree. The curriculum for this program contains general education courses and theory courses designed to prepare students for careers in management. Other Associate degree programs being planned include real estate and fire science technology.

CERTIFICATE PROGRAMS
In addition to the above degree and diploma programs, the College of Technical Arts offers Certificates of Completion in five Adult Training Programs.

The five Adult Training Programs include industrial supervision, law enforcement, nurse assistant, plant maintenance and operations, and real estate.

LAMAR UNIVERSITY AT ORANGE
Beginning in 1969, the university system offered, as an extension center service, courses in Orange, Texas. With the provision of facilities by the Lamar University—Orange Capital Foundation, this program expanded to offer first and second year courses in all principal fields of the University in addition to expanded vocational courses, such as drafting technology. Real estate, drafting technology,
industrial supervision, mid-management and other career-oriented courses are offered during the extended day hours.

LAMAR UNIVERSITY—PORT ARTHUR

Lamar University authorized a merger with Port Arthur College for August 1975, and applied for legislative appropriation for the funding of instructional programs at the first and second year level. Lamar University-Port Arthur courses are offered on the same basis as courses authorized for the university system in the principal areas of business, education, liberal arts, as well as vocational and technical arts programs.
Health Services Department

Programs in the Department of Health Services, previously listed in the Technical Arts Bulletin, have been transferred to the new College of Health Sciences. Students should obtain the 1975-76 undergraduate bulletin to receive current information concerning dental hygiene, radiologic technology, respiratory technology and vocational nursing.
Industrial Department

Diesel Mechanics

Diesel Mechanics is a course of study designed to prepare the student for a career in the operation, repair and maintenance of diesel engines.

Objectives of the program are to provide the student with the technical background in the design and construction of diesel engines, and to offer experiences which will develop skills in their operation, repair and maintenance.

A graduate of this two-year instructional program is awarded the Applied Science diploma.

Machine Tools

Machine Tools is a two-year program designed to train students in the proper use of metal-removing machine tools in the modern machine shop. The curriculum is designed to develop those skills, abilities and perceptions needed to permit the graduate to advance in the industrial complex as a competent craftsman.
Objectives of the program include the promotion of desirable attitudes and the development of needed manipulative skills. Students are consistently encouraged to develop a sense of responsibility and self-reliance. A graduate of this two-year instructional program is awarded the Applied Science diploma.

**Refrigeration and Air Conditioning Technology**

Refrigeration and Air Conditioning Technology is a two-year program planned to afford the student the skills and knowledge required to install, repair and maintain environmental control equipment. Students also receive practice in trouble-shooting inoperative equipment and performing preventive maintenance on air conditioning and refrigeration equipment. The graduate of this instructional program is awarded the Applied Science diploma.

### Welding

Welding is a program designed to prepare the student for a career in the fields of industrial or construction welding, either as a competent welder or in a position which requires knowledge of welding, welding equipment or supplies.

Objectives of the program include the development of skills required in modern welding techniques. Safety and proper work habits also are stressed.

A graduate of this two-year instructional program is awarded the Applied Science diploma.

DIESEL MECHANICS (DM)

131—Introduction to Diesel Mechanics. General description and construction of engines, diesel engine principles, frames, cylinders, heads, and pistons. Class: 3 hours. Credit: 3 semester hours.

132—Diesel Cycle Application. The diesel cycle, its advantages and applications. The basic problems of operation and the design and construction of diesel engines are studied. Class: 3 hours. Credit: 3 semester hours.

133—Small Engines. The operation and repair of small internal combustion engines. Diagnosis and troubleshooting will be emphasized. Class: 3 hours. Credit: 3 semester hours.

134—Related Systems. Engine cooling, air intake systems, exhaust systems, and starting systems. Prerequisite: DM 131 and 132. Class: 3 hours. Credit: 3 semester hours.

135—Maintenance & Repair Problems. Maintenance and repair problems of the diesel engine. The checking of bearing clearances and the installation of piston rings are stressed. Prerequisite: DM 131 and 132. Class: 3 hours. Credit: 3 semester hours.

136—Basic Shop Procedures. Installation, operation, maintenance, and repair of diesel engines, hand tools and precision instruments, shop safety, fastening devices and tubing fabrication. Laboratory: 7 hours. Credit: 3 semester hours.

137—Precision Instrument Application. Installation, operation, maintenance, and repair of diesel engines, disassembly, measuring, checking for wear, proper assembly, correct use of taps and dies, flaring tools and torque wrenches. Laboratory: 7 hours. Credit: 3 semester hours.

138—Tune-up and Repair. Valve reconditioning, cylinder head repairs, engine operation and testing, diesel engine operation, shop safety, engine adjustments, cylinder and piston reconditioning. Prerequisite: DM 136 and 137. Laboratory: 7 hours. Credit: 3 semester hours.

139—Accessory Servicing. Repair of water pumps, oil pumps, fuel pumps, blowers, and minor engine tune-up, valve and turbocharger repair. Prerequisite: DM 136 and 137. Laboratory: 7 hours. Credit: 3 semester hours.

231—Ignition and Combustion Principles. Electrical systems, governors, fuels and combustion, and fuel systems. Prerequisite: DM 131 and 132. Class: 3 hours. Credit: 3 semester hours.
232—Diesel Fuel and Lubrication. A comprehensive study of diesel fuel and lubricating oils. Basic electricity, electrical and gasoline starting systems are also stressed. Prerequisite: DM 131 and 132. Class: 3 hours. Credit: 3 semester hours.

234—Overhaul Procedures. Engine overhauling, special repairs, salvaging, hydraulics, and terms used in diesel engineering. Prerequisite: DM 231 and 232 or DM 134 and 135. Class: 3 hours. Credit: 3 semester hours.

236—Troubleshooting and Installation. Installation, operation, maintenance, and repair of diesel engines, electrical systems, generators, alternators, cranking motors, regulators, governors, steering clutches, final drives, track and roller frames. Prerequisite: DM 138 and 139 or DM 136 and 137. Laboratory: 7 hours. Credit: 3 semester hours.

237—Advanced Diesel Engine Maintenance. Installation, operation, maintenance, and repair of diesel engines, fuel systems, oil pumps, filters, oil pressure regulators, natural gas carburetors, natural gas regulators, and preventive maintenance. Prerequisite: DM 138 and 139 or DM 136 and 137. Laboratory: 7 hours. Credit: 3 semester hours.

238—Dynamometer Operation and Analysis. Installation, operation, maintenance, and repair of diesel engines, fuel injection systems, fuel injection pumps, injector nozzles, unit injectors, engine performance, testing and engine dynamometer. Prerequisite: DM 236 and 237 or DM 138 and 139. Laboratory: 7 hours. Credit: 3 semester hours.

239—Diesel Engine Hydraulics. Installation, operation, maintenance, and repair of diesel engines, hydraulic pumps, hydraulic controls, hydraulic power applications, advanced engine overhaul, special repairs, diagnosing, and tune-up. Prerequisite: DM 236 and 237 or DM 138 and 139. Laboratory: 7 hours. Credit: 3 semester hours.

MACHINE TOOLS (MT)

131—Introduction to Hand and Machine Tools. A study of the hand and machine tools used in the modern machine shop with emphasis on safety, measuring tools, lathe, layout, drill press and the physics of metal cutting. The course includes blueprints and sketches as they apply to machine work. Class: 3 hours. Credit: 3 semester hours.

133—Machine Shop. Practice in the use of hand and machine tools of the modern machine shop. Class: 3 hours. Laboratory: 1-3 hours. Credit: 3 semester hours.

134—Milling Machines. Various types of milling machines and their diverse operations. Principles with emphasis on safety and setups. Blueprint reading advanced. Class: 3 hours. Credit: 3 semester hours.

136—Basic Drill Press and Lathe. A laboratory study with use of various hand and machine tools. Special emphasis is placed on safety, bench work, the lathe, and drill press. Laboratory: 7 hours. Credit: 3 semester hours.
137—Bench Tools and Layout. A continuation of the development of manipulative skills with bench tools, gauges, layout, and setups common to the drill press, lathe, and shaper. Laboratory: 7 hours. Credit: 3 semester hours.

138—Milling Processes. Typical processes, jobs and setups are employed to further develop skills and understanding of the machining process. Additional projects are aimed at gaining experience with companion machine tools. Laboratory: 7 hours. Credit: 3 semester hours.

139—Milling and Grinding Procedures. Additional emphasis is placed on implementation of different types of mills and their attachments. The association of the grinder with the mill is introduced. Laboratory: 7 hours. Credit: 3 semester hours.

231—Advanced Lathe and Drill Press. Lathe, drill press and details of layout, setup and operations are extended. Continued emphasis on blueprint interpretations. Prerequisite: MT 131 and 132. Class: 3 hours. Credit: 3 semester hours.

232—Applications of Lathe and Drill Press. Problems encountered in diverse applications of lathes and drill presses. Precision measuring and gauging instruments. Further blueprint study. Prerequisite: MT 131 and 132. Class: 3 hours. Credit: 3 semester hours.

236—Multi-Machine Projects. Jobs and processes involving the use of various machine tools with close tolerances throughout. Stress is placed on improving time consumption. Prerequisite: MT 136 and 137. Laboratory: 7 hours. Credit: 3 semester hours.

237—Gauges and Inspection. A continuation of the development of manipulative skills with additional practice in close tolerance measuring and inspection. Prerequisite: MT 136 and 137. Laboratory: 7 hours. Credit: 3 semester hours.

238—Layout and Setup for Mills and Grinders. Laboratory practice in the proper procedures and methods for layout and setup. Tool and cutter grinding is treated. Time utilization and accuracy are pronounced. Prerequisite: MT 138 and 139. Laboratory: 7 hours. Credit: 3 semester hours.

239—Machine Design and Maintenance. Maintenance and repair of laboratory machine tools is implemented to expand ability and manipulative skills. Assembly projects which involve several machine tools are promoted. Prerequisite: MT 138 and 139. Laboratory: 7 hours. Credit: 3 semester hours.

REFRIGERATION AND AIR CONDITIONING TECHNOLOGY (RAC)

131—Basic Refrigeration Principles. The history of refrigeration, theory of heat, compression cycle, metering devices, and components of the refrigeration cycle. Class: 3 hours. Credit: 3 semester hours.

132—Basic Electricity and Electrical Devices. Servicing commercial refrigeration, heat loads, defrosting, basic electric control, and wiring diagrams, capacitors and relays. Class: 3 hours. Credit: 3 semester hours.
134—Refrigeration Theory. Related knowledge necessary in chemistry for refrigeration, cooling coil and condenser design, refrigerant flow controls, electrical control requirements, manufacturers’ tables, charts, diagrams, and engineering specification sheets, safety to be used in refrigeration work. Prerequisite: RAC 131 and 132. Class: 3 hours. Credit: 3 semester hours.

135—Commercial Refrigeration. Introduction to and history of commercial refrigeration trade, knowledge necessary in servicing and repairing electrical motors, motor controllers, measuring power in electrical circuits, calculating compressor tonnage capacities, steps in the systematic analysis of refrigeration circuits, and applications of commercial refrigeration. Prerequisite: RAC 131 and 132. Class: 3 hours. Credit: 3 semester hours.

136—Basic Refrigeration. Methods of cutting, flaring and bending copper tubing, soldering (hard and soft), leak testing, evacuating, and charging of reciprocating equipment. Gauges installation, removal, and calibration. Laboratory: 7 hours. Credit: 3 semester hours.

137—Basic Electrical Wiring and Testing Procedure. Electric motors, controls and transformers. Finding common start and run on sealed units, changing motor starting switches, testing and wiring single phase and shaded pole motors. Laboratory: 7 hours. Credit: 3 semester hours.

138—Basic Refrigeration and Service Procedure. Adding and removal of refrigerant, repair of domestic refrigerators and freezers. Tracing and installation of refrigeration circuits, leak testing, evacuating and system charging. Prerequisite: RAC 136 and 137. Laboratory: 7 hours. Credit: 3 semester hours.

139—Basic Electrical Wiring and Control Systems. Commercial refrigeration. Installation of time clocks, automatic defrosting, and pressure defrost. Wiring of low pressure controls, magnetic starters and temperature controls. Prerequisite: RAC 136 and 137. Laboratory: 7 hours. Credit: 3 semester hours.

231—Principles of Air Conditioning. Refrigeration for summer comfort cooling systems, air cycles, properties of air, psychrometric processes, application of warm air heating systems, sizing and balancing air ducts, and application and selection of humidification equipment. Prerequisite: RAC 134 and 135. Class: 3 hours. Credit: 3 semester hours.

232—Load Estimation—Heating and Cooling. Estimation of summer cooling loads, winter heat loss, refrigeration for comfort cooling air conditioning, automatic controls for heating and cooling systems, and interpretation of electrical wiring schematics. Prerequisite: RAC 134 and 135. Class: 3 hours. Credit: 3 semester hours.

234—Advanced Air Conditioning. Air conditioning survey for commercial and/or residential system design, cost estimates, codes, calculations for condition air supply, fan types, room air conditioning and heat pumps. Prerequisite: RAC 231 and 232. Class: 3 hours. Credit: 3 semester hours.

235—Cooling Towers. Selecting, sizing, and installing cooling towers, piping and pumps. Central station equipment, water chillers, boilers, absorption refrigeration, refrigerant piping data, steam lines, electrical data and tools of the estimator. Prerequisite: RAC 231 and 232. Class: 3 hours. Credit: 3 semester hours.

236—Forced Air Heating and Cooling. Skills in the correct use of instruments, fitting and installing ducts, service of limit switches, fan controls, blowers and filters. Setting and checking oil failure switches. Prerequisite: RAC 138 and 139. Laboratory: 7 hours. Credit: 3 semester hours.

237—Air Cooled Heating and Cooling Systems. Installation and service of residential and commercial cooling and heating systems. Electronic air cleaners. Humidification
equipment. Capacity testing by refrigeration and air methods. Prerequisite: RAC 138 and 139. Laboratory: 7 hours. Credit: 3 semester hours.

238—**Advanced Air Conditioning.** Sizing, installing and checking small tonnage commercial air conditioning systems. Design and installation of primary and secondary electrical circuits. Sizing, installation and capacity testing water pumps and water circuits for air conditioning systems. Capacity testing refrigerant circuits. Acidizing condensers. Prerequisite: RAC 236 and 237. Laboratory: 7 hours. Credit: 3 semester hours.

239—**Heat Pumps and Absorption Systems.** Installation, operation, maintenance and repair of natural gas systems. Total electric heating and cooling systems, electrical circuits, electronic instruments, three phase motors and controls. Prerequisite: RAC 236 and 237. Laboratory: 7 hours. Credit: 3 semester hours.

**WELDING (Wld)**

131—**Study of Tools, Materials, and Processes.** A study of welding tools and materials and their relation to the welding process. Blueprint reading and sketching are initiated. Class: 3 hours. Credit: 3 semester hours.

132—**Principles of Flame Cutting and Arc Welding Equipment.** Study of tools, safety flame cutting, and arc welding equipment and processes. Blueprint reading is also studied. Class: 3 hours. Credit: 3 semester hours.

133—**Welding.** Arc welding, acetylene welding and cutting. Class: 3 hours. Laboratory: 1-3 hours. Credit: 3 semester hours.

134—**Processes Related to Welding.** Tools, materials, and processes as related to welding is continued. Emphasis on blueprint reading and sketching. Prerequisite: 131 and 132. Class: 3 hours. Credit: 3 semester hours.

135—**A.C. and D.C. Supplies.** Study of AC and DC arc welding supplies. Various arc cutting processes studied. Layout work along with blueprint reading will be stressed. Prerequisite: Wld 131 and 132. Class: 3 hours. Credit: 3 semester hours.

136—**Operation of Welding Tools.** Operation and use of arc welding tools and equipment; acetylene welding tools and equipment. Emphasis on safety. Laboratory: 7 hours. Credit: 3 semester hours.

137—**Welding & Cutting.** Continuation of arc welding in horizontal, vertical, and overhead positions. Gas welding in horizontal position. Cutting straight lines. Laboratory: 7 hours. Credit: 3 semester hours.

138—**Test Qualifications.** Butt plate welding and test qualifications. Flat and vertical welds on Vee groove plate. Prerequisite: 136 and 137. Laboratory: 7 hours. Credit: 3 semester hours.

139—**Welding and Brazing.** Welding Vee groove plate in all positions. Testing for qualification in all positions. Cutting and gas welding. Introduction to brazing. Prerequisite: 136 and 137. Laboratory: 7 hours. Credit: 3 semester hours.

231—**Ferrous and Nonferrous Metals.** Special welding techniques for ferrous and nonferrous metals. Testing procedures. Pipe layout sketching and blueprint interpretation. Prerequisite: Wld 131, 132. Class: 3 hours. Credit: 3 semester hours.

233—Advanced Metallurgy. A study of the effects of heat on the exotic metals. Specific application of metals is also covered. A study of corrosion, machining, and foundry operations and materials testing included in the course of study. Prerequisite: Wld 235. Class: 3 hours. Credit: 3 semester hours.

234—Special Welding Application. Special welding applications, brazing, soldering and resistance welding will be studied in this course. Continuation of blueprint reading and layout. Prerequisite: Wld 134 and 135 or Wld 231 and 232. Class: 3 hours. Credit: 3 semester hours.

236—Ferrous Metals and Pipe. Introduction to heliarc process used with ferrous and nonferrous metals. Emphasis on arc welding ferrous metals and pipe. Safety precautions stressed. Prerequisite: Wld 136 and Wld 137. Laboratory: 7 hours. Credit: 3 semester hours.

237—Layout and Fabrication. Thorough instruction in layout, fabrication, and welding pipe installations. Precision flame cutting. Advanced heliarc welding of aluminum, stainless steel and alloys. Prerequisite: Wld 136 and 137. Laboratory: 7 hours. Credit: 3 semester hours.

Related Arts Department

**Basic Communications, Technical Mathematics, and Job Relations**

These courses are designed to relate to and complement the various programs offered in the College of Technical Arts. The objectives are to develop student competence in the areas of reading, applied grammar and public speaking; to develop student competence in applied mathematics; and to develop student understanding of job and human relations.

**Mid-Management**

Mid-Management is a program in business and supervisory management designed to develop the fundamental skills, knowledge, attitudes and experience which will enable men and women to function in decision-making positions as supervisors or junior executives. All new students must be counseled by a mid-management coordinator before registering.

A graduate of this two-year instructional program is awarded the Associate of Applied Science degree.

BASIC COMMUNICATIONS (BC)

131—Basic Communications. The objectives of this course are to develop student competence in speaking and writing and to increase student competence in the use of the Library for research in his major field. Class: 3 hours. Credit: 3 semester hours.

132—Business Communications. The preparation of specifications, inventories, orders for supplies, tools and equipment, and the basic elements of business letters and report writing through the use of practice letters and case studies. Class: 3 hours. Credit: 3 semester hours.

135—Developmental Reading for University Students. This course is designed to help students improve their reading skills, vocabulary, and study skills. Individualized instruction is provided to help the students achieve these skills. Class: 3 hours. Credit: 3 semester hours.

231—Technical Writing. A study of the techniques of technical writing and its application to the individual student's major field. Prerequisite: Students must have taken BC 131 and 132 or its academic equivalent. Class: 3 hours. Credit: 3 semester hours.

MATHEMATICS (TM)

111—Slide Rule. Slide rule operation; use of certain special scales; and application. Class: 1 hour. Credit: 1 semester hour.

131—Fundamentals of Mathematics I. Review and application of the fundamentals of mathematics. Fractions, decimals, per cent, ratio and proportion, weights and measures, introduction to algebra. Class: 3 hours. Credit: 3 semester hours.

132—Fundamentals of Mathematics II. Introduction to algebra, polynomials, exponents, powers and roots, solutions of linear and quadratic equations, introduction to trigonometry. Prerequisite: TM 131 or the equivalent. Class: 3 hours. Credit: 3 semester hours.

133—Applied Trigonometry. Introduction to trigonometry, trigonometric functions, use of trig tables, relations between trigonometric functions, solutions of the right triangle, radian measure, periodic functions, vectors and phasors, and polar coordinates. Prerequisite: TM 132 or the equivalent. Class: 3 hours. Credit: 3 semester hours.

134—Business Mathematics. A comprehensive course in basic business mathematics. Presenting work in interest, payrolls, taxes, financial statements, and special problems for the mid-manager. Prerequisite: TM 131 or the equivalent. Class: 3 hours. Credit: 3 semester hours.

231—Applied Geometry. Introduction to geometry, areas of polygons, triangles, circles, prisms, cylinders, pyramids, cones, frustrums, spheres, and special solids. Prerequisite: TM 132 or the equivalent. Class: 3 hours. Credit: 3 semester hours.

232—Industrial Mathematics. Introduction to trigonometry; logarithms; slide rules; strength of materials; work and power problems; and speed ratios of pulleys and gear. Prerequisite: TM 231. Class: 3 hours. Credit: 3 semester hours.

JOB RELATIONS (JR)

231—Job Relations. The purpose of this course is to present and analyze the roles of the worker and management. Included in the course will be a presentation of labor-management reactions, the evolution and growth of the American labor
movement, the development and structure of American business, communicative channels, state and federal legislation that affects the worker and management, and personnel problems encountered in association with employers and employees. Class: 3 hours. Credit: 3 semester hours.

232—Human Relations. The purpose of this course is to survey the social sciences that help explain human behavior and motivation. This course will include such topics as: maturation, deviant behavior, cultural and social problems, and interpersonal relationships in the job situation. These topics are designed to help individuals better understand themselves and society. Class: 3 hours. Credit: 3 semester hours.

MID-MANAGEMENT (MM)

111, 112, 211, 212—Mid-Management Seminar. A one-hour seminar is held in conjunction with the internship. Class: 1 hour. Credit: 1 semester hour.

131—Introduction to Business. Survey of the functional areas of business and their interrelationships. Economics of industry; ownership and organization; marketing; production; personnel; finance; business controls. Class: 3 hours. Credit: 3 semester hours.

132—Basic Economics. A practical application of economic theory to business situations, emphasizing problems most frequently faced today. Class: 3 hours. Credit: 3 semester hours.

133—Principles of Selling. Precepts of effective selling in the American economy. Sales process; prospecting; presentation; objectives; close. Class: 3 hours. Credit: 3 semester hours.

141, 142, 241, 242—Mid-Management Internship. The student who plans to earn a degree in Mid-Management must have at least 15 hours per week of approved supervised employment toward his career plan. Laboratory: 15 hours. Credit: 4 semester hours.

231—Small Business Management. A practical view of the problems of initiating and operating a small business. Should clarify some questions of career choice and decision-making in business. Class: 3 hours. Credit: 3 semester hours.

232—Personnel and Labor Problems. An elementary and practical approach to the problems with employees as individuals and groups, including those represented by unions. Class: 3 hours. Credit: 3 semester hours.

233—Fundamentals of Supervision. Methods and techniques of supervision; included are basic skills for the beginning supervisor as well as new ideas and broader concepts for the more experienced. Topics include are new employees, interviewing, job methods, training, safety, human relations, grievances, motivation, and discipline. Class: 3 hours. Credit: 3 semester hours.

237—Retailing. The development, organization, methods, policies of operation, and problems in the marketing structure. Class: 3 hours. Credit: 3 semester hours.
Technical Department

Business Data Processing

The objective of this course of study is to prepare the student for a career in computer programming within the field of business data processing. Each Business Data Processing student will be assisted in the preparation of a program of study that combines the proper balance of programming theory and application with supervised operation of Lamar University's modern high-speed computer. While this program has no admission restrictions, students are advised to examine their aptitude in this field before enrolling.

A graduate of this two-year instructional program is awarded the Applied Science diploma.

†By approval.

Drafting Technology

This program is designed to provide basic technical information required for entry into the occupation of drafting. Engineering draftsmen prepare precise drawings and specifications from sketches, field notes and other information furnished by an engineer or designer. The majority of draftsmen specialize in some particular field of work such as piping, structural, architectural or machine manufacturing.

A graduate of this two-year instructional program is awarded the Applied Science diploma.

**Industrial Electricity and Electronics Technology**

This program is designed to provide the student with an opportunity to develop the necessary skills involved in the repair and maintenance of industrial electrical and electronics equipment.

The objective of this program is to develop an understanding of the underlying theories, technical information, safety factors and related occupational information to assure sound judgments and proper procedures needed for an electronics technician. Graduates will be prepared to enter one of the many specialized fields associated with the electronics trade.

A graduate of this two-year instructional program is awarded the Applied Science diploma.

**BUSINESS DATA PROCESSING (BDP)**

131—**Elementary Accounting.** Double-entry accounting practices and procedures applied to special journals, working papers, subsidiary records, and the preparation of financial statements for a sole proprietorship with an introduction to partnerships. Class: 3 hours. Credit: 3 semester hours.

132—**Elementary Cost Accounting.** Accounting for material, labor, and overhead under job cost, process cost, and standard cost systems. Prerequisite: BDP 131 or consent of the instructor. Class: 3 hours. Credit: 3 semester hours.

141—**Introduction to Business Data Processing.** A survey of data processing from its beginning. Introduction to internal data representation, file concepts, record layouts, unit record equipment, and an overview of the programming languages to be encountered in later courses. Class: 3 hours. Laboratory: 2 hours. Credit: 4 semester hours.

142—**Fortran.** A study of the Fortran programming language. Progressive techniques are developed through problem definition, flowcharting, coding, documentation, and execution. Class: 3 hours. Laboratory: 2 hours. Credit: 4 semester hours.

143—**Compass.** An introduction to the Compass language using (1) computer registers, (2) opcode interpretation/execution, and (3) assembled program structure. Class: 3 hours. Laboratory: 2 hours. Credit: 4 semester hours.
144—Cobol I. A study of the Cobol programming language. Progressive techniques are developed through problem definition, flowcharting, coding, documentation, and program execution. Class: 3 hours. Laboratory: 2 hours. Credit: 4 semester hours.

231—System Design. Fundamentals of system design analysis and documentation. Problems in designing, analyzing, changing and existing system, and implementation. Class: 3 hours. Credit: 3 semester hours.

232—RPG. A study of the RPG language. Progressive techniques are developed through problem definition, flowcharting, and coding. Class: 3 hours. Credit: 3 semester hours.

235—Seminar. A seminar class which promotes advanced study in programming. Students work on special projects which increase their skill in writing and correcting programs. Prerequisite: Consent of instructor. Class: 3 hours. Credit: 3 semester hours.

241—Cobol II. A continuation of BDP 144 with emphasis on table handling and disk file processing. Corequisite: BDP 144. Class: 3 hours. Laboratory: 2 hours. Credit: 4 semester hours.

242—Operating Systems. A study of operating systems and their use in third generation computers. Utilities, sorts, and merges will also be covered. Prerequisite: Consent of the instructor. Class: 3 hours. Laboratory: 2 hours. Credit: 4 semester hours.

243—Advanced Fortran. The application of Fortran to business and numerical problems. Prerequisite: BDP 142. Class: 3 hours. Laboratory: 2 hours. Credit: 4 semester hours.

DRAFTING TECHNOLOGY (Dft)

131—Drafting Instruments. The proper use of all drafting instruments, the construction of freehand and mechanical lettering, dimensioning, multiview projection, and geometrical construction. Class: 3 hours. Credit: 3 semester hours.

132—Fundamentals of Drafting. Instruments and materials of the professional draftsman. The course will include geometric constructions, orthographic projections, sections, conventions, various methods of pictorial drawing and other technology as required in the profession. Class: 3 hours. Credit: 3 semester hours.

133—Introduction to Drafting. A course designed to develop illustrative and graphic communication skills, with emphasis on presenting information effectively by using diagrams, drawings, prints, sketches, graphs, and charts drawn freehand and employing commonly available drawing aids such as straight edges, squared and graph paper, and similar aids. Class: 1 hour. Laboratory: 4 hours. Credit: 3 semester hours.

134—Architecture Drafting. Architecture, covering FHA specifications, drafting techniques, rendering techniques, elevations, building codes, architectural styles, and history. Prerequisite: Dft 131 and 132. Class: 3 hours. Credit: 3 semester hours.

135—Architecture Drafting Techniques. Architecture drafting, floor plans, sectional views, electrical plans, theory of design, cost analysis, plumbing, specification and pictorial drawings. Prerequisite: Dft 131 and 132. Class: 3 hours. Credit: 3 semester hours.

136—Basic Drafting Laboratory I. This is the first in a series of four courses in the use of drafting instruments, freehand and mechanical lettering, conventional signs and symbols, orthographic projection and pictorial drawing. This is a comprehensive
laboratory course in basic drafting procedures and skills and is planned as a preparation for the three succeeding courses which will provide practice in the skills required in specialized types of drafting. Laboratory: 6 hours. Credit: 3 semester hours.

137—Basic Drafting Laboratory II. This course is a continuation of Dft 136. Laboratory: 6 hours. Credit: 3 semester hours.

138—Architectural Drafting Laboratory I. Drafting of plans for construction in wood, metals and masonry. The course will include foundations, floor and roof plans, window and door sections, and other details of construction. Prerequisite: Dft 136 and 137. Laboratory: 6 hours. Credit: 3 semester hours.

139—Architectural Drafting Laboratory II. This is a continuation of Dft 138. Prerequisite: Dft 136 and 137. Laboratory: 6 hours. Credit: 3 semester hours.

1311—Blueprint Reading. A study of lines, views, symbols and dimensions involved in reading blueprint and shop sketches. Practice in making freehand sketches of simple objects. Class: 3 hours. Credit: 3 semester hours.

230—Smoley's Fundamentals. Introduction and use of Smoley's Tables by the professional draftsman. Prerequisite: TM 133. Class: 3 hours. Credit: 3 semester hours.

231—A.S.M. Standards, Pipe and Fitting Designs. A study of pipe and fittings, designs, symbols, and specifications, sizing process lines and process symbols. Drafting of flow diagrams, vessels, heat exchangers, pumps, instruments, compressors, and mechanical equipment. Prerequisite: Dft 131 and 132. Class: 3 hours. Credit: 3 semester hours.

232—Process Pipe Drafting. Process pipe drafting covering nomenclature, plans, elevations, details, and process equipment. Prerequisite: Dft 131 and 132. Class: 3 hours. Credit: 3 semester hours.

233—Application of Smoley's Tables. Use and application of Smoley's Tables by the professional structural draftsman. Prerequisite: Dft 230. Class: 3 hours. Credit: 3 semester hours.

235—Structural Design. Structural steel, completion of column details, brace details, skewed connections, moment connections, seated connections, erection drawings, stair, and miscellaneous details, design using A.I.S.C. standards of beams and columns working with kip loads. Prerequisite: Dft 131 and 132. Class: 3 hours. Credit: 3 semester hours.

236—Systems Drafting Laboratory I. A study of pipe and fittings, designs, symbols and specifications, sizing process lines and process symbols. Drafting of flow diagram, vessels, heat exchangers, pumps, instruments, compressors, and mechanical equipment. Prerequisite: Dft 136 and 137. Laboratory: 6 hours. Credit: 3 semester hours.

237—Systems Drafting Laboratory II. This course is a continuation of Dft 236. Prerequisite: Dft 136 and 137. Laboratory: 6 hours. Credit: 3 semester hours.

238—Structural Design Laboratory I. Drafting of plans, sections, and details and A.I.S.C. specifications for industrial structures which will include structural steel, pipe and concrete reinforcing rods. Prerequisite: Dft 136 and 137. Laboratory: 6 hours. Credit: 3 semester hours.

239—Structural Design Laboratory II. This course is a continuation of Dft 238. Prerequisite: Dft 136 and 137. Laboratory: 6 hours. Credit: 3 semester hours.

261—Design Project Seminar. This course designed to stimulate and develop the design drawing skills of the student. The course will include one major design project
which includes a scale model and complete set of working drawings, selected by the student and approved by the instructor. Prerequisite: consent of instructor. Class: 1 hour. Laboratory: 10 hours. Credit: 6 semester hours.

332—Machine Tools Design. Drawings associated with machine shop operation; threads, keys, rivets, fasteners, springs, jigs, gears, and cams. Symbols, abbreviation, charts, graphs and diagrams for the machine shop. Class: 3 hours. Credit: 3 semester hours.

337—Machine Tools Design Laboratory. The actual drawings of machine parts and the use of drawing instruments that are used by machine design draftsmen. Laboratory: 6 hours. Credit: 3 semester hours.

431—Advanced Reproductive Drafting Techniques. Reproduction techniques, such as microfilming, blueprinting, directo-printing, photo-copying, and other methods, will be studied. Class: 3 hours. Credit: 3 semester hours.

437—Individual Project Laboratory. A seminar project laboratory in which the student makes a scale or full-size model complete with working drawing of a design project selected by the student and approved by the instructor. Class: 3 hours. Credit: 3 semester hours.

INDUSTRIAL ELECTRICITY AND ELECTRONICS TECHNOLOGY (IEE)

132—AC Theory. Electromagnetism, generation and characteristics of alternating voltage and current, inductance transformers, inductive reactance capacitance, and capacitive reactance. Class: 3 hours. Credit: 3 semester hours.

133—Basic Electricity. Introduction to the field of electricity and electronics. Class: 3 hours. Credit: 3 semester hours.

134—AC and DC Circuit Analysis. Complex numbers for AC circuits, simple RL and RC circuits, series and parallel RLC circuits, series and parallel resonance, and network theorems. Class: 3 hours. Credit: 3 semester hours.

135—Vacuum Tube Amplifiers. Principles and characteristics of vacuum tubes, vacuum tube power supplies, audio and RF amplifiers and circuits, and basic oscillators. Class: 3 hours. Credit: 3 semester hours.

136—Basic DC Electronic Laboratory. Basic electronic component and symbol familiarization; wiring techniques for DC series, parallel, and combination circuits; voltmeter, ohmmeter, and ammeter hookup and reading techniques; and DC power supply use and operation. Laboratory: 6 hours. Credit: 3 semester hours.

137—Basic AC Electronics Laboratory. Familiarization with VTM, osciloscope, and audio generator; experimentation and analysis of the characteristics of series and
parallel inductance and capacitance, and transformers. Laboratory: 6 hours. Credit: 3 semester hours.

138—AC and DC Laboratory Analysis. Familiarization with the RF generator; construction and analysis of AC circuits containing resistance, inductance, and capacitance; series and parallel resonance. Laboratory: 6 hours. Credit: 3 semester hours.

139—Vacuum Tube Circuit Analysis. Construction and analysis of half-wave and full-wave power supplies, voltage doubler, and bridge circuits; triode tube characteristics, audio voltage and power amplifier circuits; RF amplifier and oscillator circuits. Laboratory: 6 hours. Credit: 3 semester hours.

230—Introduction to Digital Logic. Binary octal, and hexadecimal number systems; logic symbols and gating functions; truth tables; implementing and deriving logical expressions; Boolean laws; use of Boolean laws and Veitch diagrams to simplify logical expressions. Class: 3 hours. Credit: 3 semester hours.

231—The Theory and Operation of Vacuum Tubes. The diode, half and full wave rectification, power supply regulation, the audio amplifier and volume controls, tuned RF amplifiers and oscillators. Prerequisite: IEE 134 and 135. Class: 3 hours. Credit: 3 semester hours.

232—The Theory and Operation of Transmitters and Receivers. Transmitter circuits, antennas, transmission lines, TRF and superheterodyne receivers, mixer and detector circuits. Prerequisite: IEE 134 and 135. Class: 3 hours. Credit: 3 semester hours.

233—Logarithms. The common system of logs, operation with logarithms, exponential and logarithmic equations, application to RL and RC circuits, application to amplifiers, and application to transmission lines. Prerequisite: IEE 230. Class: 3 hours. Credit: 3 semester hours.

234—Atomic Structure of Semi-Conductive Devices. Semi-conductor materials, junction diodes and transistors, characteristics curves, transistor circuits, common emitter, base and collector configurations. Prerequisite: IEE 231 and 232. Class: 3 hours. Credit: 3 semester hours.

235—Transistor and Integrated Circuit Analysis. Analysis using the direct current and graphical methods, linear circuits, oscillators, temperature consideration and transistor power supplies. Prerequisite: IEE 231 and 232. Class: 3 hours. Credit: 3 semester hours.

236—Power Supplies. Experimentation and analysis of power supplies, triode vacuum tube characteristics and the triode as a DC and AC amplifier. Prerequisite: IEE 138 and 139. Laboratory: 6 hours. Credit: 3 semester hours.

237—Amplifiers. Audio, voltage and power amplifiers, transistor familiarization, and basic transistor circuit arrangements. Prerequisite: IEE 138 and 139. Laboratory: 6 hours. Credit: 3 semester hours.

238—Solid State Devices. Laboratory experiments in the construction of circuitry using solid state devices. AF and RF amplifiers and oscillators using transistors, diodes and discrete components. Prerequisite: IEE 236 and 237. Laboratory: 6 hours. Credit: 3 semester hours.

239—Integrated Circuity. Experimentation with IC's as linear amplifiers, logic (RTL) circuits, nor logic, ramp function generators, and various trigger circuits. Prerequisite: IEE 236 and 237. Laboratory: 6 hours. Credit: 3 semester hours.

331—Synthesis of Transistor Amplifiers I. The review and expansion of transistor amplifiers, volt-ampeere characteristics, bias circuits and stability, cascaded and feedback amplifiers, frequency response, and amplifier design. Class: 3 hours. Credit: 3 semester hours.
332—Synthesis of Transistor Amplifiers II. A continuation of IEE 331. Class: 3 hours. Credit: 3 semester hours.

336—Transistor Circuit Measurements. The advanced study of the practical operations of basic network analysis, transistor circuit configurations, and desired circuit characteristics. Laboratory: 6 hours. Credit: 3 semester hours.

337—Transistor Circuit Analysis. A continuation of the principles developed in IEE 336. Laboratory: 6 hours. Credit: 3 semester hours.

431—Introductory Microwave Techniques. The introduction to transmission theory, measurements of microwave quantities, microwave propagation, common wave guide components, microwave antennas, and microwave electronic circuits. Class: 3 hours. Credit: 3 semester hours.

432—Telemetering Devices and Analysis. The remote control of devices through the use of microwaves: RPM, liquid level, and gaseous content monitoring. Communication links using telemetering will also be studied. Class: 3 hours. Credit: 3 semester hours.
Bachelor of Science Degree

Bachelor of Science in Industrial Technology

In 1973-74, the College of Technical Arts offered a Bachelor of Science degree in Industrial Technology to students who successfully completed an approved program of study. *This program has been suspended.* Students who are enrolled in the four year program will be allowed to complete their degree as long as they are enrolled at Lamar University. Should a student fail to enroll for a Fall or Spring Semester, he will be dropped from the program. Students may submit, in writing prior to the beginning of a semester, a request to skip a semester without being dropped from the program.

Advanced Technical Arts courses will be offered when sufficient student enrollment develops. Students accepted in the program may substitute engineering courses for advanced Technical Arts courses that are required in the Industrial Technology degree.
Adult Training Programs

Industrial Supervision

This adult education series of courses is planned for supervisory personnel employed in business and industry. A supervisory or leadership position in this field is a prerequisite for admission to the program. Content of the program covers the entire range of supervisory responsibilities. Each class meeting is carefully planned to be of maximum usefulness to the student's job assignment.

A person who successfully completes 24 semester hours of industrial supervision or supervisory related courses is awarded a Certificate of Completion in Industrial Supervision.

The following 15 semester hours of course work are required for the Certificate of Completion in Industrial Supervision:

- MM 233 — Fundamentals of Supervision
- IS 1312 — Applied Supervision
- IS 1316 — Industrial Safety
- IS 1325 — Industrial Communications I
- IS 1326 — Industrial Communications II

The remaining nine semester hours necessary to receive the Certificate of Completion may include other Industrial Supervision courses, Technical Arts courses, and courses offered in other colleges. However, these electives must be related to the occupational goal of the student.

Law Enforcement Training

The objective of this program is to provide basic law enforcement training to meet the certification requirements for police officers as set by the Texas Commission on Law Enforcement Officer's Standards and Education. The program consists of eight weeks of intensified training. It usually is offered four times each year.

Admission to this program is limited to officers who currently are associated with law enforcement agencies.

The person who successfully completes this instructional program (12 semester hours) is awarded a Certificate of Completion in Law Enforcement by the University. The Basic Certificate from the Texas Commission on Law Enforcement Officer's Standards and Education is awarded to the officer upon completion of one year of successful employment in a law enforcement agency.

Nurse Assistant

The objective of this program is to prepare the student for the first level of bedside nursing in hospitals and nursing homes under the direction of nursing and medical staff.

Acceptance in the program is dependent upon available space.
NA 1311 and 1312 will be offered in the extended day program for students who are unable to attend day classes and will be taught on a semester basis (16 weeks). NA 1711 will be conducted on an eight week basis with registration held at the regularly scheduled registration time and two additional classes may be held each year. Registration for these additional classes will be held the last week in October and the second week in March of each year.

A person who successfully completes NA 1311-1312 or NA 1711 is awarded a Certificate of Completion in Nurse Assisting.

**Plant Maintenance and Operations**

This course of study is provided for persons engaged in the maintenance and operations of the various petro-chemical plants in the area.

Objectives of this program are to reinforce the practical work skills developed by the student as a result of his work experience and to assure that he has the necessary skills to maintain a position and fulfill a vital role in area industry.

A person who successfully completes 30 semester hours of this instructional program is awarded a Certificate of Completion in Plant Maintenance and Operations.

**Real Estate**

This program of study is designed to prepare a student to enter the real estate industry in the field of real estate sales, appraising, investment, management and/or development. Individual courses in specialized areas would serve to improve the competence of persons presently engaged in some facet of real estate. These courses may be taken to satisfy the educational requirements of the State Licensure Board for salesman license renewal and broker's license.

Upon successful completion of 15 semester hours from the following list of courses a person is awarded a Certificate of Completion in Real Estate.

A two-year degree program in real estate is being planned. Students should consult supplements to this bulletin for further information concerning this program.

**INDUSTRIAL SUPERVISION (IS)**

1312—Applied Supervision. A continuation of MM 233 with a study of methods of applying psychology to the handling of men; the use of testing methods, consideration of such factors as morale, group attitudes, motivation, frustration and fatigue; and application of psychological studies to human behavior on the job. Prerequisite: MM 233. Class: 3 hours. Credit: 3 semester hours.

1313—Critical Path Scheduling. A study of the mechanics of the CPM and PERT method and their specific applications to business and industry. How to introduce CPM into a company and setting up the procedures necessary to adapt it to various types of organizations. Class: 3 hours. Credit: 3 semester hours.

1315—Cost Reduction. Methods of carrying out a comprehensive continuing cost reduction and control program including how to get all levels of supervisory management participation in the cost reduction effort and to include cost control as an integral part of the supervisor's total job. Class: 3 hours. Credit: 3 semester hours.

1316—Industrial Safety. Loss control, cause and costs of accidents, the function of safety inspections, the elimination of specific hazards, fire prevention, investigation of accidents and methods for minimizing their frequency and severity will be topics of
study in this course. These topics will be explored in relation to the recently enacted Occupational Safety and Health Act. Class: 3 hours. Credit: 3 semester hours.

1322—Labor Relations and Legislation. Company policy, labor history, legislation and labor unions, the labor contract, grievances and arbitration are included in this course. Class: 3 hours. Credit: 3 semester hours.

1325—Industrial Communications I. Basic information and techniques for effectively communicating with employees, management, customers and the public. Some of the topics covered in the course are logical and creative thinking, making a speech, dictating, and telephoning. Class: 3 hours. Credit: 3 semester hours.

1326—Industrial Communications II. Basic information and techniques for effectively communicating with employees, management, customers and the public through letter and report writing. Class: 3 hours. Credit: 3 semester hours.

LAW ENFORCEMENT ACADEMY (LE)

1311—Introduction to Law Enforcement. A study of: history and philosophy of law enforcement; structure of government; criminal justice system; Texas Penal Code; Texas Code of Criminal Procedure; search and seizure; civil procedure; rules of evidence; Texas juvenile law and procedures; and laws of arrest. Class: 48 hours total. Credit: 3 semester hours.

1312—Law Enforcement Related Fields. A study of: juvenile procedures; written and oral reports; interviews and interrogations; practical problems, first aid; courtroom demeanor and testimony; Texas liquor laws; speech; defensive tactics; and firearms training. Class: 48 hours. Credit: 3 semester hours.

1611—Law Enforcement Procedures. A study of: patrol procedure; crowd control; communications; case preparation; defensive driving; criminal investigation (all types); detention procedures; disaster operation; handling abnormal people; missing persons; disorderly conduct and minor offenses; and traffic control. Class: 64 hours. Laboratory: 160 hours. Credit: 6 semester hours.

NURSE ASSISTANT (NA)

1311—Medical Communication. This includes developing skills of communication, observation, ethics, arithmetic review, and medical vocabulary. Class: 3 hours. Credit: 3 semester hours.

1312—Nursing Procedures. Developing skills and specific procedures for competent bedside nursing, including familiarization of hospital equipment. Class: 3 hours. Credit: 3 semester hours.

1313—Geriatric Nursing. A study of the field of Geriatrics, the geriatric patient as a person, housing, patient and institutional hygiene, rehabilitation and clinical nursing. Class: 3 hours. Credit: 3 semester hours.

1711—Communication and Procedures. This course includes the material studied in NA 1311-1312 with more emphasis on clinical experience. Class: 30 hours total. Laboratory: 150 hours total. Credit: 7 semester hours.

PLANT MAINTENANCE AND OPERATIONS (PM)

1311—Compressors. The application, operation and maintenance of air and gas compressors, proper installation and power requirements. Class: 3 hours. Credit: 3 semester hours.
1312—Pumps. The application, care and operation of centrifugal rotary and reciprocating pumps and the study of direct and belt drives. Class: 3 hours. Credit: 3 semester hours.

1313—Pipefitting. Methods of fabricating pipe are studied. The use of layout tools, full-scale layout methods and practices, layout of miters and saddles and the use of the steel square in pipe layout is stressed. Class: 3 hours. Credit: 3 semester hours.

1314—Instrument Piping. A study of the piping required for pressure, flow and temperature controllers both transmitting and recording. Class: 3 hours. Credit: 3 semester hours.

1315—Pneumatic Instruments. A study of the physical and chemical laws affecting pressure and temperature measuring and recording instruments. The operation and application of instruments for controlling manufacturing processes is covered. Class: 3 hours. Credit: 3 semester hours.

1316—Control Systems. The basic control theory and methods for obtaining various control effects are studied. Practical industrial installations of control systems, controller adjustments and checking and testing procedures are stressed. Class: 3 hours. Credit: 3 semester hours.

1317—Electronic Instruments. A review of basic electricity including components and basic laws. A study is made of electron tubes, elementary electronic circuits, and some of the more generally used electronic instrument circuits. Class: 3 hours. Credit: 3 semester hours.

1318—Related Physics. A study of matter, energy, mechanics, heat and basic electrical principles as they relate to the refining and chemical processes. Class: 3 hours. Credit: 3 semester hours.

1319—Related Chemistry. A study of organic and inorganic chemistry, the safety consideration in the handling of chemicals and the physical properties of organic homologs. Class: 3 hours. Credit: 3 semester hours.

1320—Unit Operations. This course will include an investigation of fluid flow and transport, distillation, evaporation, extraction and other unit functions. Class: 3 hours. Credit: 3 semester hours.

1321—Blueprint Reading. A study of lines, views, symbols and dimensions involved in reading blueprint and shop sketches. Practice in making freehand sketches of simple objects. Class: 3 hours. Credit: 3 semester hours.

1322—Structural Blueprint Reading. A study of the various engineering drawings and specifications used in the fabrication and erection of structural steel members. Class: 3 hours. Credit: 3 semester hours.

1323—Electrical Blueprint Reading. This course includes a study of the provisions of the National Electrical Code and its application to electrical installations. Block diagrams and schematics of industrial controls, power plants, distribution systems and motor controls also will be studied. Class: 3 hours. Credit: 3 semester hours.

1324—Blueprint Reading for Pipefitters. An introduction to piping drawings, symbols and schematics. Shop fabrication drawings, specifications and material take-off also will be covered in the course. Class: 3 hours. Credit: 3 semester hours.

1325—Water Plant Operations. The source and chemistry of water and the operation of equipment necessary to make it suitable for human and/or industrial consumption will be studied in this course. Class: 3 hours. Credit: 3 semester hours.

1326—Electrical Generation. Study of the operation and maintenance of electrical generators and the drive mechanisms utilized in industrial and public utility applications. Class: 3 hours. Credit: 3 semester hours.
1327—Boiler Operation. Start-up and shut-down procedures, routine operation, boiler instrumentation, fueling and water requirements of the boiler and auxiliary equipment are topics to be discussed in this course. Class: 3 hours. Credit: 3 semester hours.

REAL ESTATE (RES)

1311—Principles and Practices. This is a study of the basic concepts and characteristics of real estate brokerage. It will include the administration and operation of a real estate office and business. Class: 3 hours. Credit: 3 semester hours.

1312—Real Estate Finance. This course deals with the finance involved in the real estate transaction including the economic basis for mortgage financing, kinds of mortgages, interim construction financing, second mortgages, and individual versus group or corporate financing. Class: 3 hours. Credit: 3 semester hours.

1313—Real Estate Appraising. Methods of appraising real property from the income approach to value through residual techniques will be covered in this study. Class: 3 hours. Credit: 3 semester hours.

1314—Real Estate Law. Law as it relates to real estate activities, including contract law, the law of agency, and a study of legal characteristics influencing the capacity of real estate to produce a flow of services and income are topics explored in this course. Class: 3 hours. Credit: 3 semester hours.

1315—Real Estate Development. This course is a study of the techniques and related areas, of residential, industrial, and marine (coastal) development, and includes certain ecological ramifications. Class: 3 hours. Credit: 3 semester hours.

1316—Real Estate Investment and Management. This course is concerned with the analysis of real estate for investment decisions, including estimates of cash flow, the impact of transaction, and the management of investments. Class: 3 hours. Credit: 3 semester hours.
Continuing Education

CONTINUING EDUCATION

Continuing Education has specific reference to education and training programs designed to serve interests and needs of an adult population. The program accepts adults of all levels of academic achievement. It seeks to provide participants with information and experiences that are useful in helping them solve their problems and achieve their educational and occupational objectives.

Lamar University offers informal non-credit courses for adults in a variety of subjects designed to meet educational needs not readily met by conventional educational programs.

Courses generally are offered during the evening hours as a convenience to the participants. Course length varies according to the subject matter and instructional objectives. Facilities for training may be provided by the University, or arrangements may be made to conduct training at a plant site or other location convenient for persons involved.

Adults who are not high school graduates may attend classes along with those who hold advanced degrees. The only admission requirement is a genuine desire to learn. Because these classes are a community service function, fees are minimal.

Non-credit continuing education at Lamar University consists of conferences, institutes, seminars, workshops, short courses and special training courses. The instructional staff is chosen from leaders in local business and industry, Lamar University’s faculty, and other educational institutions. The function of the Office of Continuing Education is to provide the organizational and administrative services necessary to offer these courses.

Courses are offered upon request of a number of individuals, organizations or industry training directors, and may be designed to meet specific needs of persons requesting such instructional programs.

The Office of Continuing Education offers (in cooperation with the College of Technical Arts) the following occupationally oriented programs:

CONFERENCES AND WORKSHOPS

Conferences and workshops usually are less than a week in length and provide in-service training to employees. Conferences are designed to cover many topics concerned with a central theme. Workshops usually emphasize skill training.

Management Conference. This conference is held each Spring to increase the managerial competence of administrators and managers. Outstanding speakers are selected for the conference.

Fireman’s Training School. This five-day school is conducted jointly by Lamar University and the Sabine-Neches Chiefs’ Association to train firemen, employed by municipal and industrial fire departments, in the latest techniques of fire fighting.

Lunchroom Workshop. A four-day workshop for lunchroom and cafeteria workers, usually conducted in late Summer, designed to improve these workers’ performance.
Cummins Diesel Engine Workshop. Representatives of the Cummins Diesel Company conduct this workshop to inform interested persons about the latest improvements made in the company's engines.

Detroit Diesel Engines Workshop. Representatives of the Detroit Diesel Corporation conduct this workshop to inform persons interested in learning about the latest improvements in the various engines manufactured by their company.

Automotive Workshops. This workshop is designed to keep mechanics abreast of the latest developments in the field of automotive repair.

Surveying Workshops. These workshops are offered to satisfy the needs of roadmen, chainmen, instrumentmen, party chiefs and persons preparing to become Registered Public Surveyors. These workshops are conducted in association with Deep East Texas Chapter of the Texas Surveyors' Association.

SHORT COURSES

Short courses are conducted for a specific period of time, usually with a single instructor meeting the class sessions. The goal of most short courses is to offer in-service training at a low cost to the employee.

A short course may be initiated in response to student requests, or when an employer asks for special intensive training for his employees. The content of the course can be designed to meet the specific needs of the students or the employer.

Blueprint Reading. This series of short courses is designed to provide instruction in the reading and interpretation of residential, commercial and industrial construction drawings and specifications preparatory to making construction cost estimates.

Interior Design. Interior design courses consist of a basic course for salesmen, a problems course in interior decoration, and a specialty course in the drawing and presentation of drawings of proposed interior layouts.

Marine Drafting. An advanced drafting course specifically designed for persons interested in marine drafting. Enrollees in this course should have a workable knowledge of the basic drafting techniques and principles.

Post-Vocational Nursing Training. This course is designed to provide advanced training to practicing LVN’s. The topics covered in this course will vary to meet the needs of the students.

Medical Assistants. A series of refresher courses designed to aid those interested in attempting the National Certificate Examination.

Building Maintenance. This series of courses deals with the problems of repairing residential and commercial structures. The topics include plumbing repairs, electrical systems, mechanical repairs and preventive maintenance.

Industrial Safety. Industrial safety is the subject of this short course. Specific topics such as safe work practices, safety clothing and safe attitudes are covered. Supervisors as well as hourly employees benefit from the information presented in this course.

Diesel Engines. Special topics are taught in this advanced course in Diesel Engines repair. The topics include preventive maintenance, tune-up and repair of specific types of engines.

Refrigeration and Air Conditioning. A group of short courses covering subjects ranging from basic refrigeration theory to repair of commercial systems. Automotive air conditioning also is covered in one of the courses.

Welding. Courses are offered in basic welding to prepare workers for the shipbuilding industry. Other courses are conducted to provide advanced training in pipe welding, inert gas welding and semi-automatic welding.
Machine Shop Practices. Courses taught by experienced instructors are offered in the field of machine shop practices. The content of the courses is adapted to the educational objective of the class.

SPECIAL TRAINING ACTIVITIES

The objective of these activities is to provide training to meet the requirements for certification of licensing by various state agencies and associations. In addition, these courses are intended to meet special training needs of businesses and industries and can be conducted at plant sites. The length of the programs varies from a few weeks to a few years.

Apprenticeship Training. Lamar University offers courses which satisfy the requirements of the various joint apprenticeship committees, the Department of Labor and the Bureau of Apprenticeship and Training as specified in their respective standards. Courses for the following trades are presently offered: Bricklaying, Carpentry, Ironworking and Millwright.

Insurance. Certificate and charter requirements of the various insurance societies are met by these courses.

Nursing Home Administration. Persons preparing to take the State Board of Licensure for Nursing Home Administrators Examination are required to have completed 200 hours of specified course work prior to taking the examination. Completion of these courses will satisfy this requirement.

Transportation. This program is designed to prepare candidates for Certificates of Membership in the American Society of Traffic and Transportation. Shipping and receiving procedures, traffic and classification of freight are examples of topics covered in this program.

Water Works Operation. This program meets the requirements of the Texas State Department of Health for the certification of persons employed in water treatment plants.

Basic Fireman's Training. Persons entering the municipal fire departments are required to satisfactorily complete at least 325 clock hours of instruction in a course prepared by the Texas Commission on Fire Protection. The University, in cooperation with the Beaumont Fire Department, schedules this course from three to four times a year.
What Is a Technician?

"Technicians who work with engineers and scientists are among the fastest growing occupational groups in the United States. In recent years, the needs of the Nation's defense program, added to those of the expanding civilian economy, have greatly intensified the demand not only for engineers and scientists but also for technical workers with less training.

* * *

"Technicians are utilized in virtually every activity where technical know-how is required. One of their largest and best known areas of employment is research, development, and design work. Technicians in this type of activity who have titles such as laboratory technicians, physical science aide, or engineering aide generally serve as direct supporting personnel to engineers or scientists. They conduct laboratory experiments or tests; setup, calibrate, and operate instruments; and make calculations. They may work on the fabrication and assembly of experimental equipment and development of models, do drafting and in some instances do design work.

"Technicians in jobs related to production usually follow a course laid out by the engineer or scientist, but they often work without close supervision. They may aid in the various phases of the production planning, such as working out specifications regarding materials and methods of manufacture. Sometimes technicians serve as production supervisors or inspectors, perform tests to insure quality control of products, or make motion and time studies designed to improve the efficiency of operations. They may also perform liaison work between departments such as research or engineering and production.

"In the installation, operation, and maintenance of complex machinery and equipment, technicians often handle or supervise work that might otherwise have to be done by engineers.

"Technicians may also be employed as supervisors of construction projects, as technical representatives of manufacturers seeking to aid the customer in achieving maximum utilization of technical products, or as technical writers of specifications and manuals."

DIRECTORY FOR CORRESPONDENCE
COLLEGE OF TECHNICAL ARTS

Information concerning the College of Technical Arts may be obtained by calling the
Dean's office, 838-8321. All mail should be addressed to Box 10043, Lamar University
Station, Beaumont, Texas 77710.

Dean ................................................. Kenneth E. Shipper
Vocational Counselor ............................... Harry L. Williams
Extended Day Coordinator ......................... Norman Lowrey
Industrial Department ............................. M. Paul Roy, Head
Related Arts Department .......................... Joe I. Juarez, Head
Technical Department ............................. Robert J. Lawrence, Head
Law Enforcement Training ......................... Edward L. Parker, Coordinator
Vocational-Technical Continuing Education .... James D. Spencer, Coordinator
Real Estate ........................................ Alice W. Cater, Coordinator

The following persons or agencies are available to serve students enrolled in the
College of Technical Arts.

President ............................................ John E. Gray, Box 10001
Financial Affairs ................................. H.C. Galloway, Vice-President, Box 10003
Administration ................................. Andrew J. Johnson, Vice-President, P.O. Box 10014
Academic Affairs ................................. David D. Geddes, Vice-President, Box 10002
Student Affairs ................................. George E. McLaughlin, Jr., Dean, Box 10006
Admissions and Records ......................... Norris H. Kelton, Dean, Box 10009
Books/Supplies ................................. Pete Plotts, Bookstore Manager, Box 10019
Financial Aid/Awards ......................... Jess R. Davis, Director, Box 10042
Testing/Placement ................................. Joe B. Thrash, Director, Box 10012
Veterans' Affairs ................................. Director, P.O. Box 10017
Information/Publications ....................... Russell DeVillier, Director, Box 10011
Student Health ................................. Mable Lomote, R.N., Director, Box 10015
University Police ................................. Eugene W. Carpenter, Director, Box 10013
Student Housing ................................. Bruce E. Stracener, Director, Box 10041
Library Services ................................. R. Blaine Thomas, Director, Box 10021
Continuing Education ......................... Joseph D. Reho, Director, Box 10008
L.U. at Orange ................................. J.B. Welch, Director, 410 Front St.,
                                        Orange, Texas 77630
