1976-77 Bulletin of LAMAR UNIVERSITY
College of Graduate Studies
LAMAR UNIVERSITY
College of Graduate Studies

1976-77 Bulletin
Vol. 26 No. 5 April 1976

Founded in 1923, and established as a four-year coeducational state-supported college on September 1, 1951.

The courses, tuition and fees and all other conditions and policies set forth in this catalog issue shall be subject to change without notification.

Lamar University is an equal opportunity/affirmative action educational institution and employer. Students, faculty and staff members are selected without regard to their race, color, creed, sex or national origin, consistent with the Assurance of Compliance with Title VI of the Civil Rights Act of 1964; Executive Order 11246 as issued and amended, and Title IX of the Education Amendments of 1972, as amended. Inquiries concerning application of Title IX may be referred to the Vice-president for Administration.

Bulletin of Lamar University. Second class postage paid at Beaumont, Texas 77710. Published by Lamar University monthly except in June, July and August.

Lamar University’s campus has expanded rapidly during the past decade and now encompasses some 200 acres. Under construction are the Mamie McFaddin Ward Health Sciences and ROTC buildings which are expected to be completed in 1976 as is a campus landscaping and beautification project. A new Speech and Hearing Center and the eight-story Mary and John E. Gray Library were opened during the last year.

Guidelines for future expansion of the campus are included in a conceptual master plan which will guide development into the year 2000. A large portion of the master plan has been approved by the University’s Board of Regents.
Architects have placed strong emphasis upon developing a feeling of "monumentality and dignity" with the Library as the dominant focus of the campus. A number of high-rise buildings or towers are planned. A 4,500-seat auditorium and a 12,000 coliseum also are under consideration.

SPRING SEMESTER

JANUARY 1977

10 Registration of students who have completed entrance requirements.
11-12 Continued registration.
13 Classes begin.
18 Last day for registration or schedule revision.
Period of application for May graduation begins.

MARCH

7-11 Mid-semester week.
21 Last day to apply for May graduation.
Last day to pay for diploma; cap and gown.
28-April 29 Period for Comprehensive Oral Examinations.

APRIL

1 Last day to drop or withdraw without penalty.
Spring recess begins at 5 p.m.
Dining halls and dormitories close.
10 Dining halls and dormitories open.
11 Classes resume at 8 a.m.
14 Comprehensive Written Examination, 1-4 p.m.

MAY

2 Last day to drop or withdraw.
5-11 Final examinations.
14 Commencement.
# SUMMER SESSION

## First Term

### MAY
- 30 Registration.
- 31 Classes begin.

### JUNE
- 1 Last day for registration or schedule revision.
- Period of application for August graduation begins.
- 14 Last day to drop or withdraw without penalty.
- 16 Comprehensive Written Examination, 1-4 p.m.

## SECOND TERM

### JULY
- 7 Registration.
- 8 Classes begin.
- 11 Last day for registration or schedule revision.
- 21 Comprehensive Written Examination, 1-4 p.m.
- 28 Last day to drop or withdraw without penalty.

### AUGUST
- 9 Last day to drop or withdraw.
- 12 Last class day.
- 13 Commencement.
1975-76 Directory

Officers of Administration

GENERAL

JOHN E. GRAY, LL.D., President
ANDREW J. JOHNSON, Ph.D., Vice-President for Administration
DAVID D. GEDDES, Ph.D., Vice-President for Academic Affairs
W.S. "BUD" LEONARD, B.S., Vice-President for University Relations
OSCAR K. BAXLEY, B.B.A., Comptroller and Chief Fiscal Officer
NORRIS H. KELTON, M.A., Dean of Admissions and Records
F.P. WEAVER, B.B.A., Business Manager
GEORGE E. McLAUGHLIN, B.S., Dean of Student Affairs
ROBERT BLAINE THOMAS, Ph.D., Director of Library Services

COLLEGES

E.B. BLACKBURN, JR., Ed.D., Dean, College of Graduate Studies
W. BROCK BRENTLINGER, Ph.D., Dean, College of Fine and Applied Arts
BETTY JO HADLEY, Ph.D., Dean, College of Health Sciences
ROBERT A. McALLISTER, Ph.D., Dean, College of Engineering
M.L. McLAUGHLIN, Ed.D., Dean, College of Education
JOHN A. RYAN, Ph.D., Dean, College of Business
KENNETH E. SHIPPER, Ph.D., Dean, College of Technical Arts
PRESTON B. WILLIAMS, Ph.D., Dean, College of Liberal Arts
ROGER E. YERICK, Ph.D., Dean, College of Sciences

CENTER DIRECTORS

W. SAM MONROE, B.B.A., Director, Lamar University at Port Arthur
JOE BEN WELCH, Ed.D., Director, Lamar University at Orange

THE GRADUATE COUNCIL

E. B. BLACKBURN, JR., B.S., M.Ed., Ed.D., Dean of the College of Graduate Studies, Chairman
ROBERT F. ACHILLES, B.S., M.A.; Ph.D., Professor of Speech
OTTO GEORGE BROWN, B.S., M.S., Ph.D., Professor of Mechanical Engineering—Head, Department of Mechanical Engineering
ALICE CATER, B.B.A., M.B.A., Instructor II, Technical Arts
BETTY JO HADLEY, R.N., B.A., M.S., Ph.D., Professor of Nursing—Dean, College of Health Sciences
J. LEON McGRAW, JR., B.S., M.S., Ph.D., Associate Professor of Biology
MIETZL J. MILLER, B.A., M.A., Ph.D., Professor of Economics
MONTY L. SONTAG, B.A., M.A., Ph.D., Professor of Special Education—Head, Department of Special Education
DAVID D. ZINK, B.A., M.A., Ph.D., Professor of English
The Graduate Faculty

Members

ROBERT F. ACHILLES, Professor of Speech
  B.S., McPherson College
  M.A., Ph.D., Wichita State University
  Regents' Professor

HOWARD W. ADAMS, Professor of Secondary Education
  B.A., Wayne State College
  M.A., Ed.D., University of Nebraska

ALI M. ALLI, Associate Professor of Industrial Engineering
  B.S., Alexandria University
  M.S., Ph.D., Oklahoma State University
  Registered Professional Engineer

ADRIAN N. ANDERSON, Associate Professor of History—Head, Department of History
  B.S., M.A., Ph.D., Texas Tech University

HAROLD T. BAKER, Professor of Chemistry
  B.S., University of Minnesota
  Ph.D., State University of Iowa

ROBERT J. BARNES, Professor of English
  B.A., M.A., The University of Kansas
  Ph.D., The University of Texas
  Regents' Professor

BILLY RAY BARRINGTON, Professor of Psychology
  B.S., Southwest Texas State University
  M.Ed., Sam Houston State University
  Ph.D., University of Houston

LUTHER A. BEALE, Professor of Civil Engineering—Head, Department of Civil Engineering
  B.S., M.S., Georgia Institute of Technology
  Ph.D., The University of Texas
  Registered Professional Engineer

WENDELL C. BEAN, Professor of Electrical Engineering—Head, Department of Electrical Engineering
  B.A., B.S., Lamar University
  M.S., Ph.D., University of Pittsburgh
  Registered Professional Engineer

ALICE C. BELL, Associate Professor of Health and Physical Education for Women
  B.S., M.A., Ph.D., Texas Woman's University

MYRTLE LEE BELL, Professor of Psychology—Head, Department of Psychology
  B.S., M.S., Texas A&I University
  Ed.D., The University of Texas

RICHMOND O. BENNETT, Professor of Accounting—Head, Department of Accounting
  B.S., M.S., Texas A&M University
  Ph.D., The University of Texas
  Certified Public Accountant
GEORGE BERZSENyi, Associate Professor of Mathematics
B.A., University of Dallas
M.S., Ph.D., Texas Christian University

E. B. BLACKBURN, JR., Professor of Elementary Education—Dean, College of Graduate Studies
B.S., North Texas State University
M.Ed., Hardin-Simmons University
Ed.D., University of Colorado

DAVID L. BOST, Professor of Secondary Education
B.A., Hardin-Simmons University
M.J., The University of Texas
Ph.D., East Texas State University

JAMES J. BRENNAN, Associate Professor of Industrial Engineering
B.S., Iowa State University of Science and Technology
M.S., University of Arkansas
Ph.D., The University of Texas
Registered Professional Engineer

W. BROCK BRENTLINGER, Professor of Speech—Dean, College of Fine and Applied Arts
B.A., Greenville College
M.A., Indiana State University
Ph.D., University of Illinois

KENNETH R. BRIGGS, Professor of Secondary Education
B.S., M.Ed., Ed.D., North Texas State University
Regents' Professor

SPENCER L. BRINKERHOFF, JR., Associate Professor of Civil Engineering
B.S., University of Arizona
M.S., Ph.D., Arizona State University
Registered Professional Engineer

OTTO GEORGE BROWN, Professor of Mechanical Engineering—Head, Department of Mechanical Engineering
B.S., The University of Oklahoma
M.S., Ph.D., The University of Texas
Registered Professional Engineer

CHARLES M. BURKE, Associate Professor of Elementary Education—Head, Department of Elementary Education
B.S., Southeastern Louisiana University
M.Ed., Louisiana State University
Ed.D., University of Southern Mississippi

MARGARET D. CAMERON, Professor of Chemistry—Head, Department of Chemistry
B.A., Texas Woman's University
M.S., University of Houston
Ph.D., Tulane University
Regents' Professor

JOSEPH B. CARLUCCI, Professor of Music
B.M., M.M., Yale University
D.M.A., Eastman School of Music, University of Rochester
RICHARD T. CHERRY, Professor of Business Administration
B.A., Texas A&M University
M.A., Ph.D., The University of Texas
Regents' Professor

BETTY FAY COODY, Professor of Elementary Education
B.A., East Texas State University
M.Ed., Ph.D., The University of Texas
Regents' Professor

JAMES L. COOKE, Professor of Electrical Engineering
B.S., Texas Tech University
M.S., The University of Texas
Ph.D., Northwestern University
Registered Professional Engineer
Regents' Professor

RUSSELL WALTER COWAN, Professor of Mathematics
A.B., M.A., Ph.D., University of California (Berkeley)

STERLING C. CRIM, Professor of Mathematics
B.S., Baylor University
M.Ed., North Texas State University
M.A., George Peabody College for Teachers
Ph.D., The University of Texas

VERNON ROY CROWDER, Associate Professor of Health and Physical Education for Men
B.S., Lamar University
M.S., Ph.D., Louisiana State University

FLOYD M. CRUM, Professor of Electrical Engineering
B.S., M.S., Louisiana State University
Registered Professional Engineer

JANE S. DAVIDSON, Associate Professor of Home Economics
B.S., Texas Woman's University
M.S., Sam Houston State University
Ph.D., Texas Woman's University

ANDRE PIERRE DELFLACHE, Professor of Civil Engineering
Civil Engineer of Mines, University of Brussels
B.S., M.S., Sc.D., University of Brussels
Registered Professional Engineer

GEORGE W. de SCHWEINITZ, Professor of English
B.A., University of Colorado
M.A., Ph.D., State University of Iowa

WALTER DEZELLE, JR., Professor of Secondary Education
B.S., M.Ed., Southwest Texas State University
Ed.D., University of Houston

KENNETH LEE DORRIS, Associate Professor of Chemistry
B.S., Ph.D., The University of Texas

EWIN A. EADS, Professor of Chemistry
B.S., M.S., North Texas State University
Ph.D., Tulane University
WINFRED S. EMMONS, JR., Professor of English
B.A., Louisiana Tech University
M.A., The University of Virginia
Ph.D., Louisiana State University

H.E. EVELAND, Professor of Geology—Head, Department of Geology, Director of
Oceanographic Technology
B.S., M.S., Ph.D., University of Illinois

HARRY L. FRISSELL, Professor of English
B.A., Southwestern University
M.A., Ph.D., Vanderbilt University

DAVID G. GATES, Professor of Industrial Engineering—Head, Department of
Industrial Engineering
B.S., M.S., University of Arkansas
Ph.D., Oklahoma State University
Registered Professional Engineer

MARILYN D. GEORGAS, Associate Professor of English
B.A., Sam Houston State University
M.A., Lamar University
Ph.D., The University of Texas

VERNON H. GRIFFIN, Professor of Elementary Education, Director of Certification
and Graduate Studies
B.S., M.Ed., Sam Houston State University
Ed.D., University of Houston

HOWELL H. GWIN, JR., Associate Professor History
B.A., M.A., Ph.D., Mississippi State University

BETTY JO HADLEY, Professor of Nursing—Dean, College of Health Sciences
R.N., California Hospital School of Nursing
B.A., University of California (Berkeley)
M.S., University of Southern California
Ph.D., University of California (Los Angeles)

KEITH C. HANSEN, Associate Professor of Chemistry
B.S., Lamar University
Ph.D., Tulane University

W. RICHARD HARGROVE, Professor of Elementary Education
B.S., M.Ed., North Texas State University
Ed.D., George Peabody College for Teachers

RICHARD C. HARREL, Associate Professor of Biology
B.S., East Central State College
M.S.Ed., The University of Georgia
Ph.D., Oklahoma State University

W. PATRICK HARRIGAN, III, Associate Professor of Speech
B.S., Loyola University
M.F.A., Tulane University
Ph.D., Louisiana State University

OLGA D. HARVILL, Associate Professor of English
B.A., M.A., Lamar University
Ph.D., University of Houston

MARY JANE HASKINS, Associate Professor of Health and Physical Education for
Women
B.S., M.A., Ph.D., The Ohio State University
JAMES R. HAWKER, Professor of Psychology
B.S., University of Southern Mississippi
Ph.D., The University of Texas
JAMES B. HIGGINS, Professor of Health and Physical Education for Men—Head, Department of Health and Physical Education for Men
B.A., Trinity University
M.Ed., University of Houston
BRADLEY B. HOGUE, Professor of Elementary Education
B.A., M.Ed., Southern Methodist University
Ed.D., North Texas State University
DeWITTE T. HOLLAND, Professor of Speech—Head, Department of Communication
A.B., Howard College
B.S., U.S. Merchant Marine Academy
B.D., Southern Baptist Theological Seminary
M.A., University of Alabama
Ph.D., Northwestern University
BELLE MEAD HOLM, Professor of Health and Physical Education for Women—Head, Department of Health and Physical Education for Women
B.S., M.A., George Peabody College for Teachers
Ph.D., Texas Woman's University
VIRGINIA RAYE HOLT, Associate Professor of Health and Physical Education for Women
B.S., Georgia State College for Women
M.S., Baylor University
Ed.D., University of Tennessee
JACK R. HOPPER, Professor of Chemical Engineering—Head, Department of Chemical Engineering
B.S., Texas A&M University
M.Ch.E., University of Delaware
Ph.D., Louisiana State University
Registered Professional Engineer
PAUL EDWARD ISAAC, Professor of History
B.A., Pepperdine College
M.A., Ph.D., The University of Texas
S. WALKER JAMES, Professor of Speech
B.A., M.A., Baylor University
M.F.A., Case Western Reserve University
Ph.D., University of Denver
ANDREW J. JOHNSON, Professor of History, Vice-President for Administration
B.A., The University of Texas
M.A., The University of Chicago
M.A., Ph.D., Indiana University
HARVEY C. JOHNSON, Professor of Secondary Education
B.A., Texas College
M.A., University of Michigan
Ed.D., University of Southern California
KIRKLAND C. JONES, Associate Professor of English
B.A., University of Washington
M.A., Texas Southern University
Ph.D., University of Wisconsin

RICHARD W. JONES, Associate Professor of Accounting
B.S.C., Texas Christian University
M.A., University of Alabama
Ph.D., University of Arkansas
Certified Public Accountant

HI KYUNG KIM, Associate Professor of Economics
B.B.A., M.B.A., Southern Methodist University
Ph.D., University of Houston

C. D. KIRKSEY, Professor of Business Administration—Head, Department of Business Administration
B.S., M.S., North Texas State University
Ph.D., The University of Texas

J.D. LANDES, Professor of Accounting
B.S., M.S., North Texas State University
Ph.D., The University of North Carolina

PHILIP W. LATIMER, Professor of Mathematics—Acting Head, Department of Mathematics
B.A., Baylor University
M.S., North Texas State University

RUSSELL J. LONG, Professor of Biology
B.A., Ohio Northern University
M.A., Miami University
Ph.D., Ohio State University
Regents’ Professor

MILDRED ALICE LOWREY, Associate Professor of Health and Physical Education for Women
B.S., Howard College
M.S., Alabama College
Ph.D., Florida State University

WILLIAM W. MacDONALD, Associate Professor of History
B.S., Boston University
M.A., Ph.D., New York University

HOWARD MACK, Professor of History
B.A., University of Toledo
M.A., Ph.D., Lehigh University

CONRAD DELL MANG, Professor of Elementary Education
B.S., M.Ed., M.L., University of Houston
Ed.D., The University of Texas

EUGENE P. MARTINEZ, Professor in the Department of Mechanical Engineering
B.S., Lamar University
M.S., William Marsh Rice University
Ph.D., University of Houston

WILLIAM H. MATTHEWS, III, Professor of Geology
B.A., M.A., Texas Christian University
Regents’ Professor
DOROTHY W. McALISTER, Professor of Home Economics—Head, Department of Home Economics
B.S., Mary Hardin-Baylor College
M.S., Ph.D., Texas Woman's University

ROBERT A. McALLISTER, Professor of Chemical Engineering—Dean, College of Engineering
B.S., North Carolina State University at Raleigh
M.S., The University of Wisconsin
S.M., Massachusetts Institute of Technology
Ph.D., Georgia Institute of Technology
Registered Professional Engineer

CHARLES D. McCULLOUGH, Associate Professor of Business Administration

J. LEON McGRAW, JR., Associate Professor of Biology
B.S., Lamar University
M.S., Ph.D., Texas A&M University

EDWARD ROY McINTOSH, Associate Professor of Elementary Education
B.S.E., University of Florida
M.S., Florida State University

B.S., M.S., University of Nebraska
Ph.D., University of Illinois
Registered Professional Engineer
JACK N. RENFROW, Associate Professor of English  
B.A., Louisiana Tech University  
M.A., University of Denver  
Ph.D., Louisiana State University  

CARL J. RIGNEY, Professor of Physics—Head, Department of Physics  
B.S., University of Louisville  
M.S., Ph.D., Northwestern University  

BRUCE G. ROGERS, Professor of Civil Engineering  
B.S., University of Houston  
M.S., Ph.D., The University of Illinois  
Registered Professional Engineer  

HENRY B. RULE, Professor of English  
B.A., The University of Texas  
M.A., Columbia University  
Ph.D., University of Colorado  

JOHN A. RYAN, Professor of Business Administration — Dean, College of Business  
B.S., University of Southern California  
M.B.A., Ph.D., The University of Texas  

R. BEELER SATTERFIELD, Associate Professor of History  
B.A., M.A., Vanderbilt University  
Ph.D., Johns Hopkins University  

RAMON S. SATTERWHITE, Associate Professor of Electrical Engineering  
B.S., University of Arkansas  
M.S., The University of New Mexico  
Ph.D., The Ohio State University  
Registered Professional Engineer  

E. LEE SELF, Professor of Secondary Education  
B.S., M.Ed., Northwestern State University of Louisiana  
Ph.D., Louisiana State University  

W. RUSSELL SMITH, Professor of Biology  
B.S., M.S., North Texas State University  
Ph.D., The University of Texas  
Regents' Professor  

MONTY L. SONTAG, Professor of Special Education—Head, Department of Special Education  
B.A., University of Denver  
M.A., Ed.D., Columbia University  

LARRY W. SPRADLEY, Associate Professor of Business Administration  
B.A., Stephen F. Austin State University  
M.Th., Southern Methodist University  
M.S., Lamar University  
Ph.D., Texas A&M University  

WILLIAM H. STANLEY, Associate Professor of Secondary Education  
B.S., North Texas State University  
M.Ed., Hardin-Simmons University  
Ed.D., North Texas State University  

JEREMIAH M. STARK, Professor of Mathematics  
B.S., United States Coast Guard Academy  
B.S., North Texas State University  
S.M., Ph.D., Massachusetts Institute of Technology
MANFRED STEVENS, Professor of Government—Head, Department of Government
B.A., M.A., The University of Oklahoma
Ph.D., The University of Michigan

JOHN W. STOREY, Associate Professor of History
B.A., Lamar University
M.A., Baylor University
Ph.D., University of Kentucky

ARNEY L. STRICKLAND, Associate Professor of English—Head, Department of English
B.A., M.A., Lamar University
Ed.D., Ball State University

WALTER ALLAN SUTTON, Associate Professor of History
B.A., William Marsh Rice University
M.A., Ph.D., The University of Texas

RICHARD E. SWAIN, III, Associate Professor of Secondary Education—Head, Department of Secondary Education
B.S., M.Ed., Ed.D., North Texas State University

ROBERT BLAINE THOMAS, Professor of English, Director of Library Services
B.S., Virginia Polytechnic Institute and State University
M.A., M.S., Ph.D., Louisiana State University

GEORGE B. TIMS, JR., Professor of Industrial Engineering, Director of Cooperative Education
B.S., M.S., Oklahoma State University
Registered Professional Engineer

General Information

LOCATION

Lamar University, a state-supported institution, is located in Beaumont, the center of industrial Southeast Texas. The campus is adjacent to the Port Arthur Highway (Spur 380) in southeastern Beaumont.

The city features modern schools, churches and shopping districts to serve the industrial community of approximately 120,000 persons. Principal industries in the area are oil refining, shipping, shipbuilding, rubber manufacturing and chemical production. Surrounding the urban communities are ranches and rice farms.

Within the metropolitan area are the cities of Port Arthur, Orange, Vidor, Port Neches, Nederland and Groves. All lie within 25 miles of Beaumont and form the heart of the upper Gulf Coast area with a population of more than 350,000.

HISTORY

South Park Junior College was established in 1923 and was controlled by the South Park Independent School District. Classes were conducted in the South Park High School Building. An initial enrollment of about 125 students in 1923 had increased to 300 by 1931.

In 1932, the name of the institution was changed to Lamar College. At this time, separate facilities were provided, additional equipment was purchased and new policies instituted. By 1939, enrollment was approximately 640.

Lamar Union Junior College District was created in 1940, and Lamar College was separated from the South Park Independent School District. Bonds were approved and new facilities were constructed on the site of the present main campus.

A movement to expand Lamar College into a four-year state-supported school culminated in the creation of Lamar State College of Technology on September 1, 1951. Since that time, enrollment has increased to more than 12,700 students, and the curriculum has been expanded to include many areas of study. Graduate work in specified fields began in the academic year of 1960-61, and extension work became an integral part of the educational program in 1964. A doctoral program in engineering was added in 1971. Lamar University at Orange, offering first and second year courses, opened in 1969. Lamar University at Port Arthur, also offering first and second year courses, began operation in the fall of 1975. The University also owns 36 acres on Pleasure Island in Port Arthur.

The institution's status as a university became official on August 23, 1971, when the name was changed to Lamar University.

GOVERNMENT

A board of nine regents, appointed by the Governor and approved by the State Senate for terms of six years, governs the University. The Board of Regents delegates the direction of university affairs to the president, administrative officers and faculty.

ACCREDITATION AND APPROVAL

Lamar University is fully accredited by the Association of Texas Colleges and Universities and by the Southern Association of Colleges and Schools. The College of Graduate Studies is a member of the Council of Graduate Schools in the United States.
Several departments have been accredited by professional agencies. In the College of Engineering, the departments of Chemical, Civil, Electrical, Industrial, and Mechanical Engineering are accredited by the Engineers' Council for Professional Development. Other accreditations include the Department of Chemistry, which is accredited by the American Chemical Society; the Department of Music, which is accredited by the National Association of Schools of Music; and the Departments of Elementary and Secondary Education, which are accredited by the National Council for the Accreditation of Teacher Education.

The Texas Education Agency has approved Professional Certification programs in a number of areas.

THE LIBRARY

The new eight-story Mary and John E. Gray Library has a strong collection of over 350,000 volumes in support of continuously expanding academic programs. Approximately 20,000 volumes are added to the collection annually. The Library subscribes to over 3,000 periodicals, and as a selective document depository, it has over 50,000 state and federal documents and microforms. Texas academic libraries are linked by teletype for faculty, graduate student and advanced student research.

RESEARCH OFFICE

A Research Office was formally organized in 1956.

It is administered by a director who serves as the chairman of the faculty research committee. All state financed research projects are awarded through the research committee.

COMPUTER CENTER

The University operates a Computer Center as a service to faculty, administration, students, researchers and others. The Computer Center has modern, high-speed digital and analog equipment valued in excess of $750,000. It is anticipated that new equipment will be purchased and put into operation within a year.

TESTING AND PLACEMENT CENTER

The Testing and Placement Center is located in the Educational Services Center and is open 8 a.m. to 5 p.m. Monday through Friday.

This Center provides testing service for entering students and for others who want it. Nonstudents wishing to use this service pay a fee depending upon the testing program desired.

Placement service also is provided at this Center and is available to all students, faculty and former students.

HEALTH CENTER

The University maintains a Health Center for the use of students. Two types of service are available: (1) out-patient service for those who have minor ailments but who do not require constant supervision, and (2) infirmary service for those who are in need of the continued attention of the University physician or of nursing care.

It is not possible for the University to provide unlimited medical service. Special medicines, examinations, treatments, X-rays and laboratory tests are not furnished by the University. No charge is made, however, for up to 10 days care each semester in the Health Center.
Beginning with the 1975 Fall Semester, all students will pay a Health Service Fee of $1 per semester hour with a maximum of $10 for each of the Fall and Spring Semesters, and a maximum of $5 for each of the Summer Sessions. This fee will be used only for health services. Added benefits for the student are: (1) vaccines, serums and gamma globulin will be given in the Health Center free of charge. Pre-admission vaccinations are not included; (2) all drugs prescribed and dispensed in the Health Center are free of charge, and (3) the first $100 of costs for emergency care of accidental injuries sustained on the campus and treated in a local hospital or doctor's office will be paid from Student Health fees.

The Health Center, located on East Virginia St. near Combs Hall, is adequately staffed and equipped for treating most illnesses and injuries. The Center does not provide care for students requiring surgery or the services of specialists. In these cases, every effort will be made by the physician or nurse to notify the parents or guardian of the student's needs.

The University assumes no responsibility for continued medical care for students having chronic diseases. The students should arrange for the care of a private physician located in or near Beaumont. When the University is not in session, the Student Health Center is not responsible for a student's health care.

The University is not under obligation to provide hospital services elsewhere if the Health Center is filled to capacity. The Health Center, however, has a sufficient number of beds for all normal needs.

Students who are ill should report promptly to the Center for medical care.

VETERANS EDUCATION

Lamar is approved for educational training under all of the Veterans Educational Assistance programs.

Veterans and their dependents, who are interested in attending Lamar under federal laws which provide educational assistance, are directed to secure information by consulting the Office of Veterans' Affairs, Wimberly Student Affairs Building.

This office advises veterans on program and training opportunities, academic assistance and counseling. Veterans interested in information in these areas should report to the Office of Veterans' Affairs in the Wimberly Student Affairs Building.

LOAN FUNDS AND SCHOLARSHIPS

Financial assistance in the form of loans, grants and scholarships is available for a number of qualified students. Details may be obtained on request from the Director of Student Financial Aid.

TEACHING ASSISTANTSHIPS

A number of teaching assistantships are available in the various departments of the College of Graduate Studies. Application forms and additional information may be obtained from the Dean of the College of Graduate Studies.

The stipend for a teaching assistantship varies in accordance with the number of courses taught, and the student must reduce his academic load in relation to his teaching assignment.

Tuition and fees are not waived for teaching assistants, but nonresidents (out of Texas) are not required to pay out-of-state tuition.

Applications must be received by February 1, and appointments are made by March 1 for the next academic year.
 TEACHER CERTIFICATION

Lamar University has been approved by the Texas Education Agency to offer professional certification programs in elementary, special, secondary education, counseling and guidance, supervision and administration. Specific information concerning certification may be found in the "Education" section of this catalog or may be obtained from the Director of Certification in the College of Education.
Fees and Expenses

PAYMENT OF FEES

Lamar University reserves the right to change fees in keeping with acts of the Texas Legislature and the University's Board of Regents. A student is not registered until all fees are paid in full. Payment may be made by check, money order or currency. Checks and money orders, not in excess of total fees, should be made payable to Lamar University and will be accepted subject to final payment.

TUITION AND FEES

Tuition is based upon the number of hours for which the student registers, and is determined by the student's classification as a Texas resident; a nonresident U.S. citizen; or nonresident who is a citizen of another country.* Each student pays a student services fee of $2.50 per semester hour, with a maximum of $30 in a long session.

SUMMARY OF FEES

Additional fees and charges which are applied on a selective basis are listed following the Summary of Fees.

Code: A. Texas residents; B. nonresidents; C. nonresidents who are citizens of another country and who were enrolled prior to June 16, 1975.

* Determination of legal residence for tuition purposes is made on the basis of statues of the State of Texas. Refer to the Coordinating Board, Texas College and University System "Rules and Regulations for Determining Residence Status" as revised, July 16, 1974, available in the Office of the Dean of Admissions and Records.
Laboratory Fees

A laboratory fee of $2 is charged each semester for courses with a combined lecture and laboratory credit of from one to three semester hours. The laboratory fee is $4 per semester for courses of four or more semester hours credit.

Private Lessons in Voice and Instrumental Music

One half-hour lesson per week ......................................... $18
Two half-hour lessons per week ........................................ 36

Parking Fee

Each student who pays the necessary fee is issued a car decal which permits parking on the campus. This decal is numbered and is to be displayed as instructed in official parking and traffic regulations, which are issued when automobiles are registered. Strict observance of traffic and parking regulations is necessary for the safe, orderly flow of vehicles in the campus area.

Charges for parking on campus are made at registration. Automobile registration fees are as follows: Fall Semester, $10; Spring Semester, $6; Summer Session I, $4; Summer Session II, $2. Only one registration is required during an academic year, and a student's parking fee is honored until the end of Summer Session II.

Health and Accident Insurance

Health and accident insurance coverage is available at registration for students carrying nine or more semester hours. The fee is estimated at $36. This or similar insurance is required of all international students.

Refund of Fees

Any student officially withdrawing will receive a refund on tuition, Setzer Center, student service, laboratory, building and general use and private lesson fees according to the following schedule:

Long Session
1. During the first two weeks of the semester, 80 per cent.
2. During the third week of the semester, 60 per cent.
3. During the fourth week of the semester, 40 per cent.
4. During the fifth week of the semester, 20 per cent.

Summer Session
1. During the first week of the semester, 60 per cent.
2. After the first week no refund.

No refunds are made when dropping courses.
Application for a refund must be made to the Comptroller after the student has officially withdrawn, but not later than the end of the current semester or Summer Session. It takes about 30 days to process these refunds.

**Returned Check Fees**

A student is automatically suspended from the University if a check is returned unpaid. The student may re-enter upon redemption of the check plus payment of the returned check fee of $2.

**Fine and Breakage Loss**

All library fines, charges for breakage or loss of equipment or other charges must be paid before a transcript of credit or a permit to re-enter the University will be issued.

**Student Responsibility for Residence Classification**

The responsibility of registering under the proper residence classification is that of the student. If there is any possible question of his right to classification as a resident of Texas, it is his obligation, prior to or at the time of his registration, to raise the question with the Dean of Admissions and Records and have his status officially determined.

Every student who is classified as a resident student but who becomes a nonresident at any time by virtue of a change of legal residence by his own action or by the person controlling his domicile, is required to notify the Dean of Admissions and Records.
Student Housing

The student housing program at Lamar is designed to supplement the academic program by providing opportunities for social and intellectual development and recreation in a pleasant living environment. The University recently completed a multi-million dollar renovation program, making its residence halls among the most modern in Texas. A variety of living styles are available and include modern furniture, semi-private rooms, carpet, central heating and air conditioning and various color schemes in the dormitories. Apartment accommodations in newly remodeled buildings also are available.

Students who do not feel that the residence hall program meets their personal needs may elect to find living accommodations off-campus.

Questions concerning the housing system, its policies, room and board rates, should be directed to the Student Housing Office, Lamar University Station, Box 10041, Beaumont, Texas 77710.
Academic Regulations

COURSE NUMBERING

Semesters of a course are numbered separately and each number contains three or more figures. Master’s level courses are numbered 400G and 500. Doctoral level courses are numbered 500D and 600. The second figure indicates the number of semester hours credit. The third figure (or figures) indicates the order in which the course is taken. The letter a or b following course numbers indicates partial credit in each case; full credit for such numbered courses will be granted only when the series is complete.

CHANGING SCHEDULES

No course may be added, changed or dropped without permission of the department head of the student’s major field. Usually a course may not be added after the first week of the semester (first two days of Summer Session). See University calendar.

DROPPING COURSE

A student may drop a course without penalty during the time periods stated in the calendar of this bulletin.

For drops or withdrawals after this penalty free period, grades are recorded as Q, W or F indicating that the student was passing or failing at the time of the drop or withdrawal.

WITHDRAWALS

A student wishing to withdraw for the remainder of a semester, or term, should fill out a Withdrawal Petition in triplicate, after clearing all financial obligations and returning all uniforms, books, laboratory equipment and other materials to the point of original issue.

The Withdrawal Petition is signed by the Dean of the College of Graduate Studies and, together with a withdrawal notice for each class, is then presented to the Dean of Admissions and Records by the student.

On application before the end of the semester or summer term, the Comptroller will return such fees as are returnable according to the schedule shown under the “Fees” section of this bulletin. This refund is made only to the person withdrawing and only if requested before the end of the current semester or summer term.

If a withdrawal is made before the end of the first 10 weeks (three weeks of summer term) or if the student is passing at the time of withdrawal, a grade of W is issued for each course so affected. A grade of F is issued for all courses not being passed at the time of withdrawal after this penalty-free period.

A student who leaves without an official withdrawal will receive a grade of F in all courses and will forfeit all returnable fees.

ENFORCED WITHDRAWAL DUE TO ILLNESS

The Director of the Health Center and the Dean of Student Affairs, on the advice of competent medical personnel, may require withdrawal, or deny admission, of a student for health reasons (mental or physical).
ACADEMIC RECORDS

Academic records are in the permanent custody of the Admissions and Records Office. Transcripts of academic records may be secured by an individual personally, or will be released on the student's written authorization. Transcripts are 50 cents per copy.

Copies of transcripts from other institutions, on file in the Offices of Admissions and Records, and the College of Graduate Studies, will not be released. Copies of these records must be obtained from the issuing college.

STUDENT RECORDS

The following information concerning student records maintained by Lamar University is published in compliance with the Family Education Rights and Privacy Act of 1975 (PL 93-380).

Access to records by persons other than the student will be limited to those persons and agencies specified in the statute. Records will be maintained of persons granted such access and the legitimate interest in each case.

The release of information to the public without the consent of the student will be limited to the categories of information listed below which have been designated by the University as directory information and which will be routinely released. The student may request that any or all of this information be withheld from the public by making written request to the Admissions and Records Office. The request must be made by the last official day to register for a given session and applies to that session only. Directory information includes name; current and permanent address; telephone listing; date and place of birth; sex; marital status; major and minor; semester hour load; classification; class schedule; eligibility for and participation in officially recognized activities and sports; weight and height of members of athletic teams; dates of attendance; degrees and awards received with dates; previous educational agencies or institutions attended.
General Regulations

OFFICIAL SUMMONS

An official summons takes precedence over other university activities of the student and should be answered promptly on the day and hour designated.

DISCIPLINE

It is assumed that any student eligible for admission to the University is familiar enough with the ordinary rules of conduct for ladies and gentlemen to need no definite discipline regulations. The University reserves the right to place on disciplinary probation or to dismiss any student at any time for sufficient cause.

Disciplinary procedures, specific University rules and regulations, and statements of student rights and responsibilities are published each year in the Student Handbook. Copies of the Conduct Code are available in the office of Student Development.

PENALTY FOR FALSE STATEMENTS

A student who makes a false statement to any university official or on any official form submitted to the University is subject to immediate dismissal.

STUDENT DEBTS

The University is not responsible for debts contracted by individual students or student organizations and will not act as a collection agency for organizations, firms or individuals to whom students may owe bills.

Students and student organizations are expected to honor contractual obligations promptly.

Penalty for failure to clear up these obligations may be: a) no readmission; b) withholding of grades and transcripts; c) withholding of degree.

PARKING REGULATIONS

At registration, each student who pays the necessary fee is issued a car decal which permits parking on the campus. This decal is numbered and is to be placed in a specific place on the back window of the car.

CHANGE OF ADDRESS OR NAME

Students are responsible for all communications addressed to them at the address on file in the Office of Student Affairs, in the Office of the College of Graduate Studies and in the Office of Admissions and Records. Any student who moves during a semester must immediately register his change of address in the above offices. Change of address forms are available in the Office of Admissions and Records and in the Office of the College of Graduate Studies.

Change of name due to marriage, or correction of name because of spelling errors, may be made by completing a name change card at the Office of Admissions and Records. All name changes must be accompanied by a copy of the legal document making the name change official. This document will be kept on file in the student's confidential folder.
The College of Graduate Studies

HISTORY

The College of Graduate Studies was instituted in the Fall 1960, with the offering of the Master of Arts degree in the fields of history and English.

In 1962, master's degrees were begun in mathematics, engineering and elementary education; in 1965, in business administration, chemistry, special education and secondary education; in 1968, in health and physical education, government, speech, guidance and counseling; in 1969, in biology, and in 1970, in education supervision. Also in 1970, a doctor's degree in engineering was authorized. In 1972, a master's degree in school administration was approved. Master's degrees in public administration and in psychology were authorized for 1974. In 1975, master's degrees in music, music education and home economics were initiated.

OBJECTIVES

The objectives of the College of Graduate Studies are as follows:
1. Advancement of knowledge through research.
2. Intensification within a student's chosen field of specialization and allied areas.
3. Development of the student's skill in the methodology of research.
4. Promotion of the power of independent thought by making the student responsible for his own scholarship.

DEGREES OFFERED

Master of Arts
   Master of Arts in English
   Master of Arts in Government
   Master of Arts in History

Master of Business Administration

Master of Education
   Master of Education in Elementary Education
   Master of Education in Guidance and Counseling
   Master of Education in Secondary Education
   Master of Education in Special Education
   Master of Education in Supervision
   Master of Education in School Administration

Master of Engineering

Master of Engineering Science

Master of Music

Master of Public Administration

Master of Science
   Master of Science in Biology
   Master of Science in Chemistry
   Master of Science in Health and Physical Education
   Master of Science in Home Economics
Master of Science in Mathematics
Master of Science in Psychology
Master of Science in Speech
Master of Science in Speech Pathology/Audiology
Doctor of Engineering

ENROLLMENT

Admission

Applicants seeking admission to the College of Graduate Studies must present evidence that their academic record and personal attributes indicate the ability to pursue graduate work successfully. The policies for admission set forth by the Graduate Council are as follows:

1. An applicant must hold a bachelor’s degree from an institution approved by a recognized accrediting agency.
   The following official credentials should be filed with the Dean of the College of Graduate Studies at least four weeks before registration.
   A. Two official transcripts sent directly from each college previously attended.
   B. Two completed copies of the application for admission to the College of Graduate Studies.
   C. Scores on the aptitude section of the Graduate Record Examination (sent directly to the Dean, College of Graduate Studies by the Educational Testing Service). The Lamar Testing and Placement Center, located in the Educational Services Building, administers the Graduate Record Examination. Application forms and information about the Graduate Record Examination are available at this Center.
   D. Applicants for the Doctor of Engineering degree also should write a letter to the Dean of the College of Engineering. This letter should include information about the applicant, engineering experience, present employment and chief interests. The applicant also should indicate what type of work he would like to undertake for his field study.
   E. All students are required to present a certificate at registration showing proof of immunization against tetanus and diphtheria.

2. The applicant’s undergraduate grade point average and Graduate Record Examination scores must be above the minimum standard established by the College of Graduate Studies. These standards are:
   A. For regular admission both of the following requirements must be met:
      (1) A minimum overall grade point average of 2.5 on a four-point scale.
      (2) A minimum composite score (verbal and quantitative) of 720 on the aptitude section of the Graduate Record Examination and a minimum verbal score of 350.
   B. For admission on probation one of the following requirements must be met:
      (1) A minimum grade point average of 2.5 on junior and senior work and acceptable scores on the Graduate Record Examination—a composite (V + Q) of 720 and a minimum verbal score of 350.
(2) A grade point average lower than 2.5, but with a score of at least 540 on an appropriate section of the GRE aptitude test. (Some departments use the verbal score; some use the quantitative score; and some use either.) If the department requires a quantitative aptitude score of 540, a score of 350 is required on the verbal aptitude.

(3) A minimum overall grade point average of 3.0 and a minimum verbal score of 350 on the GRE.

NOTE: Probation is removed automatically without notification after the student completes nine consecutive semester hours of graduate work with grades of B or better.

C. Admission requirements for foreign students are evaluated on an individual basis after the following information is received:

1. Official transcripts from colleges previously attended.

2. Scores on the Graduate Record Examination, and scores on the Test of English as a Foreign Language. In general, a foreign student whose native language is not English is expected to score over 500 on the TOEFL, over 300 on the verbal aptitude of the GRE and fulfill the composite requirement (V + Q=720) on the GRE.

3. A student who wishes to pursue graduate work in any area for which he has not had the prerequisites will be required to make up deficiencies as prescribed by the Graduate Council. In general, the student is required to have a minimum of 24 semester hours (12 of which must be on the junior-senior level) of undergraduate work in the subject chosen as the graduate major. For a minor, 12 semester hours of undergraduate work are required.

4. Admission to the College of Graduate Studies does not imply candidacy for a master’s degree.

5. The Dean of the College of Graduate Studies will notify the applicant of his admission to the College of Graduate Studies. All transcripts, certificates, etc. become the property of the College of Graduate Studies and are not returnable.

Special Students

An applicant who wishes to register for graduate work without enrolling in a degree program may do so under the following conditions:

1. He must hold a bachelor’s degree.

2. He must be approved for admission by the Dean of the College of Graduate Studies.

3. With departmental approval, courses taken by a special student may be used for graduate degree credit under the following conditions:

Special Students by Choice. If application for admission to a graduate degree program is received in a subsequent semester and requirements for admission are complete and acceptable, a maximum of 12 semester hours previously completed may be approved for degree credit.

Degree Students Who Have Not Met Admission Requirements. If initial application is for admission to a degree program and the student fails to meet admission requirements upon completion of 12 semester credit hours, the student may not continue to take courses for degree credit and must have the approval of the Graduate Dean to re-enroll.
Registration

1. A student who has been admitted to the College of Graduate Studies may register in August or January for the long sessions, or in June or July for the summer terms.

2. A graduate student who has completed all course work, but is working on his thesis, must be registered if he wishes to obtain professional assistance from a faculty member.

COLLEGE OF GRADUATE STUDIES REQUIREMENTS

General

1. All course work applied toward a given degree (except the doctor of engineering) must be completed within a period of six years. Time spent in active military service will not be used in computing the six-year limit.

2. No graduate student is permitted to carry more than 15 semester hours of graduate work during one semester of the long term nor more than 12 semester hours of graduate work during the summer session of 12 weeks (six semester hours each session).

3. With the approval of the head of the major department and the Graduate Dean, an undergraduate student within 12 semester hours of graduation may take not more than six semester hours of graduate courses to be applied toward the master's degree, provided the total academic load does not exceed 15 semester hours.

4. With the approval of the head of the major department and the Graduate Dean, the student may transfer as much as six semester hours of graduate work (with grades of A or B) completed at another institution.

5. The number of semester hours of off-campus courses taken from this institution which may count toward a graduate degree is determined by each college, provided the standards of the College of Graduate Studies (regarding graduate faculty and instructional facilities) are consistent with those on the Lamar campus.

6. A maximum of six semester hours of work done in institutes may be approved for graduate credit on a degree program.

7. A student may be required to drop either from any course or from the University temporarily, or permanently, for any of the following reasons:
   A. Academic work below the standard as specified by the Graduate Council.
   B. Academic dishonesty or misconduct on the part of the student.

8. The grading system for Graduate students is A, B, C, D, F, I, Drop, Withdrawal—graduate credit being allowed for grades of A, B and C. An overall grade point average of B (3.0) is required for graduation; however, a thesis grade may not be averaged with course grades to provide the required 3.0 average. Incomplete work must be finished during the next long semester, or the Office of Admissions and Records must change the grade of I to the grade of F, unless arrangements for a time extension are made. (Form G-16) Under unusual circumstances, the student may apply, through the instructor, for an extension. The extension may be granted by the Dean of the College of Graduate Studies.
9. When a graduate student with regular admission status falls more than three grade points below a 3.0 (B) average, he is placed on probation. If he makes progress toward eliminating the grade point deficiency during the next semester in which he is registered, he is removed from probation. If he does not make progress toward eliminating the deficiency, his case is referred to the Academic Standards Committee of the College of Graduate Studies for a recommendation.

10. The student admitted on probation whose grade point average falls more than three grade points below a 3.0 (B) average is referred to the Academic Standards Committee.

11. Resignation from the College of Graduate Studies should be made in writing to the Dean.

12. The University reserves the right to change any of its rules, requirements or course regulations without notice.

DEGREE REQUIREMENTS

General

1. A graduate student must earn 30 to 36 semester hours of graduate credit, depending upon the plan he is following, and must complete a residence requirement of at least one academic year or its equivalent in summer terms.

2. A minimum of 18 semester hours of the required 30 to 36 hours must be courses numbered 500 or above.

3. All candidates must pass a comprehensive oral examination if a thesis is written. If a thesis is not written, a comprehensive written or oral examination is required or a combination of both written and oral examinations.

4. The student must meet the specific requirements as set forth in this catalog for his particular degree program.

Master of Arts

1. Meet all general degree requirements.

2. Complete 30 semester hours of graduate work: 18 in the major field, six in thesis, six in an approved minor or six additional hours in the major.

3. Present evidence of a reading knowledge of at least one foreign language. This requirement may be satisfied by examination or by submitting college credit equivalent to that required for the degree of Bachelor of Arts in this institution.

4. If a thesis is not written, complete 36 hours of approved course work.

Master of Business Administration

1. Meet all general degree requirements.

2. Complete 30 semester hours of graduate work as specified under College of Business degree requirements if a thesis is written.

3. If a thesis is not written, complete 36 hours of graduate work as specified under College of Business degree requirements.
Master of Education
1. Meet all general degree requirements.
2. Complete 30 semester hours of graduate work if a thesis is written or 36 semester hours if a nonthesis program is selected.
3. Meet specific requirements that are listed in the Education section of this catalog for each degree program.

Master of Engineering
1. Meet all general degree requirements.
2. Complete 36 semester hours of graduate work or complete 30 hours of graduate work plus a three-hour design project.

Master of Engineering Science
1. Meet all general degree requirements.
2. Complete 30 semester hours of graduate work as follows: a minimum of 12 semester hours in engineering courses, six semester hours in thesis, a minimum of nine semester hours in a combination of science and mathematics, and three semester hours of electives.

Master of Music
1. Meet all general degree requirements.
2. Complete 30 semester hours of graduate work: 24 in the major field, six in thesis or a recital and a research paper.

Master of Music Education
1. Meet all general degree requirements.
2. Complete 36 hours of graduate work which may include six in thesis.

Master of Public Administration
1. Meet all general degree requirements.
2. Complete 36 semester hours of graduate work as specified for the degree in the Government section of this catalog.

Master of Science
1. Meet all general degree requirements.
2. Complete 30 semester hours of graduate work: 15 to 18 semester hours in the major field, six in thesis, and six to nine semester hours in the minor field. On approval by the head of his major department a student may elect to take all of his work in his major field.
3. If a thesis is not required, complete 36 hours of approved course work.
4. The graduate degree in psychology requires 36 hours in approved course work and six hours in thesis. A substitution for the thesis may be made in the community psychology program.

Doctor of Engineering
1. Obtain credit for all courses required by the student's doctoral committee. The number and extent of these courses will depend upon the student's diagnostic examination, his engineering experience, and educational objectives.
2. In general a minimum of 30 semester hours beyond the equivalent of a master's degree will be required.
3. Satisfactorily pass candidacy examinations as devised by the student's doctoral committee.
4. Complete a field study involving some technological innovation.
5. Submit and defend a formal engineering report on the field study.

ADMISSION TO CANDIDACY

Master's Degree
1. Prior to the time that a graduate student is admitted to candidacy, the head of the major department or a person designated by him acts as the student's adviser.
2. A student may be admitted to candidacy after completing one-half of his course work, excluding the thesis, and after removing all undergraduate deficiencies. During this time he must have demonstrated his ability and inclination to do graduate work.
3. The individual student is responsible for making an application for Admission to Candidacy. This is done in the office of the head of the major department or graduate coordinator.
4. A departmental recommendation concerning the applicant's degree plan and the appointment of an advisory committee is then submitted to the Dean of the College of Graduate Studies. If approved, the student is admitted to candidacy.
5. The advisory committee will include a person designated as the major professor, along with two other members of the faculty.
6. A student must complete at least nine semester hours after admission to candidacy.
7. Advanced GRE scores are required by specified departments.
8. Candidacy examinations are required by the Department of Psychology.

Doctor of Engineering
A student will be admitted to candidacy for the doctor of engineering degree only upon the recommendations of his doctoral committee. In general this committee will require the following:
1. Satisfactory progress in all course work.
2. Continuously pursuing his course work by earning at least three semester hours credit in two consecutive long terms. Failure to do so will require the student to make application to the graduate engineering faculty for permission to continue.
3. Prepare a proposal for a field study involving a technological innovation and defend this proposal to his doctoral committee as part of his candidacy examinations.
4. Satisfactorily pass other examinations designed to determine if the student is ready to do the field study.

A student who fails to be admitted to candidacy on his first attempt may take additional courses or otherwise prepare himself for an additional attempt as may be recommended by his doctoral committee. Failure to meet minimum requirements as estimated by the student's doctoral committee may require the student to withdraw from the doctoral program.
THESIS REQUIREMENTS

A thesis is optional in Master of Arts degree plans and may be a departmental requirement or option in other programs. A student who is required or elects to write a thesis must/may:

1. Register for the thesis course and begin research with the approval of the student's graduate advisor. The first registration is for Thesis Course 669A; subsequent registrations are for Thesis Course 669B. No Grade "NG" is assigned for each registration until the thesis is finally approved.
2. Register for a thesis course each semester or term that he works on research or writing.
3. Secure a copy of the approved manual of instructions for preparing a thesis and follow it explicitly.
4. Write a thesis under the direction of his supervising professor. The thesis must be approved by his advisory committee and the Graduate Dean. Six semester hours of credit will be granted for the successful completion of the thesis. No credit will be reported for the thesis course until the final copy of the thesis has been approved.
5. Submit a single, unbound copy of the thesis to the Dean of the College of Graduate Studies at least 30 days prior to the expected date of graduation.
6. Submit three copies (four if a personal copy is desired) of the finished thesis to the Graduate Dean no later than 10 days prior to the graduation date.
7. Pay the thesis binding fee to the Lamar Bookstore no later than 10 days prior to the graduation date.

FINAL EXAMINATION

1. Each candidate for a master's degree is required to pass a final oral or written examination. This examination must be taken at least 15 days prior to the conferring of the degree.
2. A student presenting a thesis as a part of the degree requirement must be enrolled and take an oral examination. This examination is confined to the thesis and background subject matter pertaining to the thesis.
3. A candidate not presenting a thesis as a part of the degree requirement must take a written or oral examination or a combination of both written and oral examinations.
4. If all requirements for graduation except the comprehensive examination are completed during a semester for a nonthesis program, the oral or written examination may be administered the following semester without the student being enrolled in the College of Graduate Studies.
5. A calendar showing scheduled dates for oral and written examinations is prepared by the Dean of the College of Graduate Studies.

CONFERRING OF DEGREES

Degrees earned in the College of Graduate Studies are conferred in December, May and August. The candidate must be present to receive the degree, unless he has been excused by the Graduate Dean.
1. A candidate for the Master's degree or Doctor of Engineering degree must file an application for graduation in the office of the Graduate Dean. This application must be made in accordance with the calendar published in this bulletin.

2. Requests to receive a degree *in absentia* must be filed in the Graduate Dean's office at least four weeks before the commencement date.
The College of Graduate Studies, organized in 1960, has a graduate faculty of 172 and an enrollment of approximately 1,500. The college has established an excellent national and international reputation, evidenced by the large number of out-of-state and international students that are presently pursuing graduate study.

It is believed that academic excellence continues to improve. The Graduate faculty of Lamar University is recognized by the graduate students and their regional peers for their excellent training, research and teaching abilities.

New graduate degree programs continue to be approved and initiated. In 1975, a Master of Music degree, a Master of Music Education degree, and a Master of Science degree in Home Economics were authorized. With the completion of the new library this year, library facilities for graduate study and research will be greatly improved.

Also, the new Speech and Hearing Center with laboratories and training rooms for speech audiology/pathology will enhance those respective graduate programs. Plans for the writing of proposals for several graduate degrees on the master's level and one doctoral program will be formulated in the near future.
Fields of Study

Department of Biology

The Department of Biology offers a program of study leading to the Master of Science in Biology degree. It is designed to enhance the professional competence of graduates in biology or closely related disciplines who are presently engaged in or planning to enter secondary school or college teaching, or who expect to be employed by private or governmental agencies in biologically oriented fields. Applicants must have completed a minimum of 24 semester hours in the biological sciences and a minimum of one semester of organic chemistry, and remove any deficiencies as provided in the section on Admission.

DEGREE REQUIREMENTS

The candidate for the M.S. in Biology degree must meet all the College of Graduate Studies general requirements as listed in this catalog. Additional specific requirements are:

1. Thirty-three hours of graduate credit which may include a maximum of 12 semester hours in approved 4000 level courses with augmented requirements.

2. Submit a written proposal for the thesis. After the thesis proposal is written, but before actual research is begun, take an oral examination before the biology graduate faculty over general biological concepts and on the experimental design of the proposed thesis and related disciplines. Weaknesses shown by this examination will result in recommended remedial formal course work or informal study, and a second exam will be held over these areas. Failure in the second exam results in rejection. The preliminary examination must be completed within the first two years of graduate study.

GRADUATE FACULTY

Members

Associate Professor Richard C. Harrel
  Limnology, environmental science
Professor Russell J. Long
  Mammalogy, histology, embryology
Associate Professor J. Leon McGraw, Jr.
  Ichthyology, cellular biology, invertebrate zoology
Professor Jed J. Ramsey
  Ornithology, comparative physiology
Professor W. Russell Smith
  Microbiology
Associate Professor Charles P. Turco
  Parasitology, invertebrate zoology
Professor Henry T. Waddell
  Mycology, genetics
Associate Professor Michael E. Warren
  Entomology, biochemical systematics
Associate Members

Assistant Professor Phillip Malnassy
  Botany, plant physiology
Assistant Professor Phillip B. Robertson
  Marine biology
Assistant Professor William C. Runnels
  Botany, algology

Biology courses may be selected from the following list:

510 — Materials and Techniques of Research. Survey of laboratory and library research techniques, instrumentation and materials requisite to scientific investigation. Required of all entering graduate students. Class: 1 hour. Credit: 1 semester hour.

511 — Graduate Seminar. Current topics in biological research. May be repeated for credit. Class: 1 hour. Credit: 1 semester hour.

531 — Seminar in Biological Sciences. A resource area course for those seeking the M.Ed. degree and teaching at the elementary and junior high level. Topics include modern biological concepts and demonstrations of how these concepts may be applied to varied grade levels. Emphasis is placed on practical application in the classroom. Class: 3 hours. Credit: 3 semester hours.

540 — Ornithology. Natural history, taxonomy and ecology of birds. Class: 3 hours. Laboratory: 3 hours. Credit: 4 semester hours.

542 — Mycology. Isolation, cultivation and identification of fungi with special emphasis on those of economic importance. Class: 3 hours. Laboratory: 3 hours. Credit: 4 semester hours.

543 — Ichthyology. Natural history, taxonomy and ecology of freshwater and marine fishes. Required field trip. Class: 3 hours. Laboratory: 3 hours. Credit: 4 semester hours.

544 — Herpetology. Natural history, taxonomy and ecology of amphibians and reptiles. Required field trip. Class: 3 hours. Laboratory: 3 hours. Credit: 4 semester hours.

545 — Mammalogy. Natural history, taxonomy and ecology of mammals. Required field trip. Class: 3 hours. Laboratory: 3 hours. Credit: 4 semester hours.

546 — Marine Invertebrate Zoology. Field study and identification of area species; current research. Required field trips. Recommended prerequisites: Bio 346 or 445G. Class: 3 hours. Laboratory: 3 hours. Credit: 4 semester hours.

547 — Advanced Limnology. Analysis of freshwater communities with emphasis on effects of pollution. Prerequisite: Bio 443G. Class: 3 hours. Laboratory: 3 hours. Credit: 4 semester hours.

548 — Helminthology — Biology of free-living and parasitic worms. Prerequisite: Bio 346 or 441G. Class: 3 hours. Laboratory: 3 hours. Credit: 4 semester hours.

549 — Comparative Physiology. Fundamental physiological processes in animals from the phylogenetic viewpoint. Prerequisite: Bio 344, Chm 342. Class: 3 hours. Laboratory: 3 hours. Credit: 4 semester hours.

5101, 5201, 5301, 5401 — Special Problems. Research in areas other than thesis. Prerequisite: approval of graduate supervisor. Time arranged. Credit: 1-4 semester hours; maximum of 4 semester hours.
5333, 5666—Institute in Biological Sciences. Designed to provide credit for participation in summer or in-service institutes. Credit varies with duration. May be repeated for credit when nature of institute differs from those taken previously. Class: 3 or 6 hours. Credit: 3 or 6 semester hours.

669A-669B — Thesis. Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.

From the list below, a maximum of 12 semester hours of 400G level courses with augmented requirements may be taken for graduate credit, subject to approval by the graduate advisor and Department Head. Course descriptions may be found in the Bulletin of Lamar University.

440G — Ornithology
441G — Parasitology
442G — Entomology
443G — Limnology
444G — Vertebrate Natural History
445G — Marine Biology
446G — Terrestrial Ecology
447G — Cellular Biology
449G — Protistology
4101G-4401G — Special Topics in Biology
4302G — Cellular Physiology
4402G — Taxonomy of Vascular Plants
College of Business

The College of Business offers a program of study leading to the Master of Business Administration degree. Persons seeking admission to this program must meet the general requirements for admission that are outlined in the Graduate catalog. An applicant also must have completed the equivalent of the following undergraduate courses in business: accounting, six semester hours; business law, three semester hours; business statistics, three semester hours; principles of economics, six semester hours; principles of management, three semester hours; principles of marketing, three semester hours; principles of finance, three semester hours; business communications, three semester hours, or a substitution approved by the Dean of the College of Business.

DEGREE REQUIREMENTS

The candidate for the Master of Business Administration degree must meet all the College of Graduate Studies general degree requirements as listed in this catalog. The student may follow either of two plans. Plan I requires 24 hours of course work and a thesis. Plan II requires 36 hours of course work, including BA 5312 for students who do not write a thesis. More than 50 percent of work must be 500 level courses and must include at least one 500 level course in each of the following subject areas: accounting, economics, finance, management and marketing.

1. Undifferentiated Business Courses:
   Acc 534 — Seminar in Accounting
   BA 530 — Seminar in Management
   BA 531 — Seminar in Marketing
   BA 5310 — Advanced Statistical Analysis
   BA 5311 — Seminar in Financial Management
   BA 5312 — Business Research

2. Specialization:
   Acc 535 — Contemporary Accounting Theory
   Acc 536 — Advanced Accounting Problems
   Acc 537 — Managerial Accounting
   BA 532 — Problems in Business Finance
   BA 538 — Business Problems and Organization
   BA 539 — Quantitative Analysis Control
   BA 5314 — Marketing Thought and Theory
   BA 5315 — Legal Aspects of Marketing
   BA 5316 — Seminar in Current Marketing Problems

3. Six hours Thesis:
   669A-669B — Thesis in Business Administration

4. Economics:
   Eco 530 — Seminar in Monetary and Fiscal Policy
   Eco 532 — Advanced Economic Theory
   Eco 533 — Contemporary Literature and Thought
   Eco 534 — Collective Bargaining
   Eco 536 — American Economic Growth and Development
   Eco 537 — Managerial Economics
   Eco 5301 — Money and Capital Markets
   Eco 5341 — Manpower
   Eco 5371 — International Finance
5. Approved electives — six semester hours in accounting, business administration or economics. If a thesis is not written, 18 hours of approved courses must be completed in addition to those selected from 1, 2 and 4 above.

Requirements for Applicants With Degrees in Nonbusiness Fields

Students whose baccalaureate degrees are in nonbusiness fields may earn the Master of Business Administration degree by completing 60 semester hours of work in the College of Business. The first year of work (30 semester hours) will consist of the following undergraduate core courses or their equivalents. Descriptions of these courses may be found in the undergraduate catalog of this institution.

Acc 231 and 232 — Principles of Accounting or equivalent  
BA 331 — Business Law  
BA 332 — Principles of Finance  
BA 334 — Marketing  
BA 335 — Principles of Management  
BA 3302 — Business Statistics  
Eco 231 and 232 — Principles of Economics  
Business Communications — three semester hours (or a substitution approved by the Dean of the College of Business)

Requirements for the second year of work leading to the MBA degree for nonbusiness majors are as outlined above for business graduates.

Business administration
Accounting courses will be selected from the following list:

534 — Seminar in Accounting. A course designed to broaden the student’s concept of current accounting theory and problems. Class: 3 hours. Credit: 3 semester hours.

535 — Contemporary Accounting Theory. A comprehensive study of the contemporary approaches to the development of accounting theory. This will include a study of historical development as well as more recent contributions of present day scholars. Class: 3 hours. Credit: 3 semester hours.

536 — Advanced Accounting Problems. An intensive study of accounting techniques and problems with emphasis placed on the concepts of income determination, asset valuation, and cost analysis. Contemporary developments are reflected through a study of research materials and professional publications. Class: 3 hours. Credit: 3 semester hours.

537 — Managerial Accounting. Application of accounting data in decision-making; cost analyses as applied in the development of budgets and standards; accounting as a tool for cost control and pricing; case problems. Class: 3 hours. Credit: 3 semester hours.

Business administration courses must be selected from the following:

530 — Seminar in Management. A course designed to give students an integrated theory of management which incorporates the significant contributions of the various approaches. Research papers are presented by each student as an inquiry in depth of certain sub-theories. Prerequisite: BA 335. Class: 3 hours. Credit: 3 semester hours.

531 — Seminar in Marketing. An intensive study of specific marketing concepts, theories, and strategies in the marketing effort. Emphasis is placed on reading from current journals and other related publications. Prerequisite: BA 334. Class: 3 hours. Credit: 3 semester hours.

532 — Problems in Business Finance. A comprehensive study of how financial problems affect all areas of business management. The case study approach is utilized in order to stimulate analysis and discussion of forms of organization, promotion of new firms, short-term and long-term sources of funds and financing, dividend policies, mergers, refinancing and recapitalization, reorganization, and comprehensive financial planning. Prerequisite: BA 5311. Class: 3 hours. Credit: 3 semester hours.

538 — Business Problems and Organization. Managerial decision-making in the areas of marketing, finance, production, and labor-management relations. General management perspectives are stressed in determining objectives, establishing policies, and planning and organizing the use of facilities, materials, and manpower; motivation of individuals and groups. The case-study approach is utilized. Class: 3 hours. Credit: 3 semester hours.

539 — Quantitative Analysis Control. A course designed to help the student examine the decision-making function through the use of model building and other mathematical procedures. Emphasis is on the selection of a model or tool for a particular business problem. Problem areas are drawn from the major functions of an organization. The techniques covered include decision making under uncertainty, inventory analysis, linear programming, Markov analysis, and project-planning models. Prerequisite: BA 3302 and mathematical competence. Class: 3 hours. Credit: 3 semester hours.
5310 — Advanced Statistical Analysis. Further development of the application of statistical methods to the process of making decisions in the face of uncertainty. The use of quantitative methods and models for management is emphasized. Topics include multiple correlations, sampling theory, queuing theory, and statistical quality control. Prerequisite: BA 3302. Class: 3 hours. Credit: 3 semester hours.

5311 — Seminar in Financial Management. A study of selected topics in financial management, including capital budgeting and optimum financial structure. Research papers are presented by each student for critical analysis and discussion. Class: 3 hours. Credit: 3 semester hours.

5312 — Business Research. The student will design and carry out an individual research project under the supervision of a faculty member. Emphasis will be placed on research design and methodology, sources of business and economic data, and the use of quantitative techniques to achieve substantive research results. Class: 3 hours. Credit: 3 semester hours.

5314 — Marketing Thought and Theory. A study of the contributions of outstanding marketing scholars to marketing thought. An evaluation of the principles and theories in marketing from the social and the firm's point of view. Prerequisite: Six semester hours in marketing. Class: 3 hours. Credit: 3 semester hours.

5315 — Legal Aspects of Marketing. A study of governmental controls which are intended to promote the free enterprise system. Several Supreme Court cases which have affected marketing practices will be briefed. Prerequisite: Six semester hours in marketing. Class: 3 hours. Credit: 3 semester hours.

5316 — Seminar in Current Marketing Problems. A comprehensive overview and critical analysis of selected current problems relating to the field of marketing. Prerequisite: Six semester hours in marketing. Class: 3 hours. Credit: 3 semester hours.

669A-669B — Thesis. Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.

Economics courses must be selected from the following:

530 — Seminar in Monetary and Fiscal Policy. A study of the theory and practice of monetary management and the taxing-borrowing-spending programs of the government as they affect growth, output, employment, prices, and resource allocation. Prerequisites: Eco 231, 232, and 334 or consent of instructor, and graduate standing. Class: 3 hours. Credit: 3 semester hours.

532 — Advanced Economic Theory. Advanced economic analysis and methodology; price and distribution theory; perfect and imperfect competition and allied subjects. Prerequisites: Eco 333 or 339 and graduate standing. Class: 3 hours. Credit: 3 semester hours.

533 — Contemporary Literature and Thought. Readings, special projects, studies, and research in the current professional literature. The student will become acquainted with learned journals, economists, their current thinking, present issues and emphasis in the field. Prerequisites: 6 hours of Economics and graduate standing. Class: 3 hours. Credit: 3 semester hours.

534 — Collective Bargaining. Background ideologies, contract provisions, current legal and social developments, public employment and international labor practices. Prerequisite: Eco 336 or consent of instructor and graduate standing. Class: 3 hours. Credit: 3 semester hours.

536 — American Economic Growth and Development. An advanced level study and analysis of the major forces which contributed to American economic development; regional development theory and actual growth patterns; theories of growth applied to
America's economic development, past, present, and potential. Prerequisites: 6 hours of economics or consent of instructor and graduate standing. Class: 3 hours. Credit: 3 semester hours.

537 — Managerial Economics. A study in depth of the principles and techniques of economic analysis applicable to the problems of business management. Prerequisites: 9 hours of Economics including Eco 333 or 339 and graduate standing. Class: 3 hours. Credit: 3 semester hours.

5301 — Money and Capital Markets. Survey of the functions and performances of financial institutions; analysis of the sources and uses of funds in financial markets; market structures of interests rates; and flow of funds analysis. Prerequisite: One of the following: Eco 332, 334, 431G, or BA 332, or 437G, and graduate standing. Class: 3 hours. Credit: 3 semester hours.

5341 — Manpower: Identification and analysis of income distribution, unemployment, occupational composition of the labor force, manpower training program legislation and evaluation, field trips and experiences in local manpower training projects. Prerequisite: 3 hours Labor Economics and graduate standing. Class: 3 hours. Credit: 3 semester hours.

5371 — International Finance. Analysis of the international balance of payments and problems associated with it, international liquidity and monetary systems with emphasis on theory and issues of international financial markets — their nature, ramifications, and practices. Prerequisite: Either Eco 332, 334, 335 or 4331G and graduate standing. Class: 3 hours. Credit: 3 semester hours.

Below is the list of 400G level courses which may be taken with augmented requirements for graduate credit, subject to approval by the graduate advisor. Course descriptions may be found in the Bulletin of Lamar University.

Acc 430G — Auditing
Acc 431G — Advanced Accounting
Acc 433G — C.P.A. Review
Acc 434G — Advanced Cost Accounting
Acc 435G — Accounting Systems
Acc 437G — Municipal and Governmental Accounting
BA 4111G, 4211G, 4311G, 4411G — Special Problems in Business
BA 434G — Advanced Legal Principles
BA 436G — Production Management
BA 437G — Investments
BA 438G — Petroleum Law
BA 4303G — Quantitative Techniques in Marketing
BA 4305G — Real Estate
BA 4306G — Financial Markets
BA 4307G — Financial Institutions
BA 4308G — Organizational Behavior
BA 4310G — Marketing Management
BA 4312G — International Marketing
BA 4313G — Buyer Behavior
BA 4314G — Administrative Policy
BA 4315G — Budgetary Control
BA 4316G — Business Simulation, Modeling and Decision Theory
BA 4317G — Computers in Business Management
BA 4318G — Marketing Research
BA 4319G — Advanced Marketing Problems
Eco 430G — Economics of Urban Problems
Eco 431G — Monetary Theory
Eco 433G — History of Economic Thought
Eco 434G — Economics Development
Eco 435G — Comparative Economic Systems
Eco 436G — Business Cycles
Eco 437G — Applied Economic Analysis
Eco 439G — Mathematical Economics
Eco 4111G, 4211G, 4311G, 4411G — Special Problems in Economics
Eco 4314G — Industrial Organization
Eco 4315G — Social Control of Business
Department of Chemistry

The Department of Chemistry offers a program of study leading to the Master of Science degree in Chemistry. Those seeking admission to this program must meet the general requirements as set forth in this catalog for admission to the College of Graduate Studies. In addition, the applicant must offer the substantial equivalent of the courses in general chemistry, inorganic chemistry, analytical chemistry, organic chemistry and physical chemistry required of undergraduate students in the chemistry curriculum. The applicant also must have completed one year of college physics and mathematics through integral calculus.

Students working towards the graduate degree in chemistry will take a set of four proficiency examinations, one in each of the fields of chemistry: analytical, inorganic, organic and physical. These examinations are taken on entrance and are offered in the fall and again during the beginning of the spring semester. The results of these examinations are used for orientation and guidance.

Degree Requirements

The candidate for the M.S. degree in Chemistry must meet all the College of Graduate Studies general degree requirements as listed in this catalog. Additional specific degree requirements are as follows:

1. Fifteen to 18 semester hours of course work in Chemistry which must include Chm 531, 533, 535, 537 and at least one 500 level Selected Topics course in Chemistry with a grade point average of 3.0 (B) in these courses.
2. Presentation of a thesis.
3. Six to nine additional semester hours of 400G or 500 level courses in an approved field of study.
4. A reading knowledge of one of the following modern foreign languages: German, French or Russian.

GRADUATE FACULTY

Members
Professor Harold T. Baker
  Physical chemistry
Professor Margaret D. Cameron
  Organic chemistry
Associate Professor Kenneth L. Dorris
  Physical chemistry
Professor Ewin A. Eads
  Inorganic chemistry
Associate Professor Keith C. Hansen
  Organic chemistry
Associate Professor J. Dale Ortego
  Inorganic chemistry
Professor Roger E. Yerick
  Analytical chemistry
Associate Members

Assistant Professor John A. Whittle
Organic chemistry, biochemistry

The graduate student will select his chemistry courses from the following list:

531 — **Advanced Analytical.** Prerequisites: Graduate standing or consent of instructor. Class: 3 hours. Credit: 3 semester hours.

532 — **Kinetics.** Rate equations developed by the application of statistical methods to the kinetic theory of gases will be compared with experimental reaction rate determinations. The development and significance of partition functions, the collision theory, and the theory of absolute reaction rates will be presented. May be taken for graduate credit in chemistry or engineering. Class: 3 hours. Credit: 3 semester hours.

533 — **Advanced Inorganic.** Prerequisite: Graduate standing or consent of instructor. Class: 3 hours. Credit: 3 semester hours.

535 — **Advanced Organic.** Prerequisite: Graduate standing or consent of instructor. Class: 3 hours. Credit: 3 semester hours.

537 — **Advanced Physical.** Prerequisite: Graduate standing or consent of instructor. Class: 3 hours. Credit: 3 semester hours.

539, 569 — **Graduate Problems in Chemistry.** May be repeated for credit. Techniques of research under close supervision of instructor; individual consultations; reports. May not be substituted for required courses. Prerequisite: Graduate standing and consent of instructor. Time arranged. Credit: 3 or 6 semester hours.

538 — **History of Chemistry.** The development of Chemistry as related to the men of science who contributed to its progress. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

5101, 5201, 5301, 5401, 5501, 5601 — **Special Topics.** The course is designed to meet special needs of students. Each topic is offered on an irregular schedule as the demand requires. Prerequisite: departmental approval. Class: 1-6 hours and/or laboratory 0-6 hours. Credit: 1-6 semester hours.

5311 — **Selected Topics in Analytical Chemistry.** May be repeated for credit when topic varies. Description of course content will appear in schedule of classes. Prerequisite: Chm 531 or consent of instructor. Class: 3 hours. Credit: 3 semester hours.

5331 — **Selected Topics in Inorganic Chemistry.** May be repeated for credit when topic varies. Description of course content will appear in schedule of classes. Prerequisite: Chm 533 or consent of instructor. Class: 3 hours. Credit: 3 semester hours.

5351 — **Selected Topics in Organic Chemistry.** May be repeated for credit when topic varies. Description of course content will appear in schedule of classes. Prerequisite: Chm 535 or consent of instructor. Class: 3 hours. Credit: 3 semester hours.

5352 — **Modern Synthetic Organic.** Selected topics in modern synthetic organic chemistry. Prerequisite: Graduate standing. Class: 3 hours. Credit: 3 semester hours.

5371 — **Selected Topics in Physical Chemistry.** May be repeated for credit when topic varies. Description of course content will appear in schedule of classes. Prerequisite: Chm 537 or consent of instructor. Class: 3 hours. Credit: 3 semester hours.

669A, 669B — **Thesis.** Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.
Below is the list of 400G level courses which may be taken with augmented requirements for graduate credit, subject to approval by the graduate advisor. Course descriptions may be found in the Bulletin of Lamar University.

411G — Chemical Literature
412G — Senior Seminar
433G — Modern Physical
436G — Inorganic
441G — Biochemistry I
442G — Biochemistry II
444G — Qualitative Organic Analysis
446G — Instrumental Methods of Analysis
Department of Communication

A Master of Science degree in Speech is offered by the Department of Communication and may be obtained through programs of study with an optional emphasis in Public Address, Theater, and Speech Pathology or Audiology with emphasis in education of the deaf, if desired. The master's program is designed to help the student deepen and expand his knowledge of these fields and provide him with the opportunity to develop skills and concepts which may be applied to the several vocational ends relating to the above three fields of study. Persons seeking admission to these programs must meet the general requirements for admission that are outlined in the College of Graduate Studies catalog. Generally, an applicant should have completed 24 semester hours of undergraduate courses in the speech curriculum.

MASTER OF SCIENCE IN SPEECH PATHOLOGY/AUDIOLOGY

Degree Requirements

The candidate for the Master of Science degree in Speech must meet all the College of Graduate Studies general degree requirements as listed in this catalog, plus the special requirements of obtaining a minimum of 100 supervised hours of clinical experience. A total of 36 semester hours of course work is required for the degree, including six semester hours of electives. An optional thesis program may be elected by the candidate which would eliminate the six hours of electives.

Professional Certification Requirements of the American Speech & Hearing Association (including undergraduate work):

The certificate of clinical competence in Speech Pathology or Audiology requires the completion of 60 semester hours that includes 18 hours in fundamentals and 42 hours in the management of disorders of communication. Of these 42 hours, 24 (not including thesis) must be in courses in either Speech Pathology or Audiology, and no fewer than six in either. Furthermore, 30 of the 42 semester hours must be in the courses acceptable toward a graduate degree. Certification also requires verification of 275 hours of supervised clinical practice.

MASTER OF SCIENCE IN PUBLIC ADDRESS/THEATER

Thirty semester hours are required to complete programs in these areas, 18 of which will come as a result of course work in either of these two fields, six hours in thesis, and six hours of course work in an approved minor field. At least 12 semester hours, exclusive of the thesis, must be in speech courses numbered 500 or above. With the approval of the Head of the Department of Communication, 12 semester hours of course work may be substituted for the thesis. No specific courses are required in either of these programs, and each student should work out his particular program in consultation with an assigned graduate advisor.
GRADUATE FACULTY

Members
Professor Robert F. Achilles
   Speech pathology
Professor W. Brock Brentlinger
   Speech, mass media
Associate Professor W. Patrick Harrigan, III
   Theater, oral interpretation
Professor DeWitte T. Holland
   Public address
Professor S. Walker James
   Theater
Associate Professor Olen Pederson
   Audiology, speech pathology

Associate Members
Associate Professor Arnold C. Anderson
   Rhetoric
Assistant Professor Robert Moulton
   Speech pathology, education of the deaf

The graduate student may select his courses in Speech from the following list:

515, 525 — Individual Study. Independent study of special and/or specific problems in disorders of communication. Credit: 1-2 semester hours.

530 — Seminar in Speech Pathology. Study of theory and diagnostic procedures of speech pathology. May be repeated once for credit when topic differs. Class: 3 hours. Credit: 3 semester hours.

531 — Advanced Clinical Practice. Diagnostic and therapeutic procedures in speech pathology or audiology. One hour of clinical practice per week per credit hour. May be repeated once for credit. Time arranged. Credit: 3 semester hours.

532 — Speech Science. A study of communication theory, science of sound and instrumentation applicable to communication disorders. Class: 3 hours. Credit: 3 semester hours.

533 — Seminar in Clinical Supervision and Administration. A study of diagnostic procedures, administration and management in clinics and public schools. Class: 3 hours. Credit: 3 semester hours.

534 — Seminar in Cerebral Palsy and Cleft Palate. Research and theory of nature, etiology and treatment of communicative disorders resulting from cerebral palsy and cleft palate. Class: 3 hours. Credit: 3 semester hours.

535 — Individual Study. Independent study of special problems in disorders of communication. May be repeated once for credit. Time arranged. Credit: 3 semester hours.

537 — Seminar in Phonology. Etiology and therapy of voice disorders including esophageal speech. Class: 3 hours. Credit: 3 semester hours.

538 — Seminar in Hearing Conservation. A study of special topics in audiology, with emphasis on hearing conservation and pediatric audiology. Class: 3 hours. Credit: 3 semester hours.

539 — Seminar in Fine Arts. A study of the areas of art, music and theater. Class: 3 hours. Credit: 3 semester hours.
5310 — American And British Public Address. A review of selected famous American and British orators and a comprehensive study of their speeches. Class: 3 hours. Credit: 3 semester hours.

5315 — Advanced Argumentation And Debate. The application of the principles of logic and motivation to the argumentative process. A review of the place of forensics in the high school and how such a program is developed and maintained. Class: 3 hours. Credit: 3 semester hours.

5321 — Seminar in Audiology. Emphasis on medical audiology and related subjects. Class: 3 hours. Credit: 3 semester hours.

5322 — Seminar in Disorders of Language. Etiology, diagnosis and clinical management of language disorders. Class: 3 hours. Credit: 3 semester hours.

5323 — Seminar in Aphasia. A study of the etiological factors, neurology, diagnostic methods and therapy procedures pertinent to aphasia. Class: 3 hours. Credit: 3 semester hours.

5324 — Seminar in Stuttering. Etiology, development and therapy of stuttering. Class: 3 hours. Credit: 3 semester hours.

5325 — Advanced Problems Of Stage Direction. Theory and problems in directing plays of different periods and styles, including musical comedy, and practice in solving such problems. Prerequisites: graduate standing and Spc 335. Class: 2 hours. Laboratory: 3 hours. Credit: 3 semester hours.

5340 — Studies In Modern Theater. Trends in theater production, theory, practice, and techniques from Adolph Appia to the present. Prerequisites: graduate standing and Spc 233. Class: 3 hours. Credit: 3 semester hours.

5341 — Seminar In Oral Interpretation. A study of the history of oral interpretation and its contributions to the field of communication. Experimental studies in literary analysis, rhetorical principles, and performance skills. Class: 3 hours. Credit: 3 semester hours.

5345 — History And Principles Of Dramatic And Rhetorical Criticism. The development of the theories and criteria of dramatic and rhetorical criticism as practiced by representative critics from Aristotle to the present. Class: 3 hours. Credit: 3 semester hours.

5350 — Individual Study. Independent study of special problems in theater and public address. Course may be repeated for credit. Class: 3 hours. Credit: 3 semester hours.

669A, 669B — Thesis: Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.

Below is the approved list of 400G level courses which may be taken with augmented requirements for graduate credit, subject to approval by the graduate advisor. Course descriptions may be found in the Bulletin of Lamar University.

430G — Problems and Projects in Speech (Speech)
431G — Problems and Projects in Theater (Theater)
431G — Laws and Ethics of Mass Media (Communication)
432G — History and Principles of American Journalism (Communication)
432G — The Psychology of Speech and Language (Speech)
434G — Persuasion (Speech)
435G — Organic Speech and Voice Disorders (Speech)
436G — History of Theater (Theater)
437G — Directing Secondary School Theater Activities (Theater)
438G — Directing Secondary School Speech Activities (Speech)
438G — Broadcast News (Communication)
439G — Rhetoric and Public Address (Speech)
4311G — Theory and Practice of Scenery and Lighting Design (Theater)
4312G — Costume Design and Construction (Theater)
4321G — Advanced Language for the Deaf (Speech)
4322G — Advanced Speech for the Deaf (Speech)
4324G — Advanced Audiology (Speech)
4393G — Intermediate Manual Communication (Speech)
College of Education

Graduate degree and certification programs are offered by the departments of Elementary Education, Secondary Education, Special Education, Health and Physical Education, and Home Economics.

Degrees Offered:

- Master of Education in Elementary Education
- Master of Education in Guidance and Counseling
- Master of Education in School Administration
- Master of Education in Secondary Education
- Master of Education in Special Education
- Master of Education in Supervision
- Master of Science in Health and Physical Education
- Master of Science in Home Economics

Professional Certificates available:

- Counselor
- Educational Diagnostician
- Elementary Education
- Mental Retardation
- Reading Specialist
- School Administrator
- School Superintendent
- Secondary Education
- Special Education
- Supervisor

MASTER OF EDUCATION DEGREE (M.Ed.)

General Requirements:

1. The student must fulfill the general requirements for admission and the general degree requirements that are stated elsewhere in this bulletin.

2. The applicant in elementary education must have completed 24 semester hours in education, including 12 semester hours in elementary education methods and materials courses.

3. The applicant in secondary education must have completed a minimum of 18 semester hours in education and 24 hours in the discipline to be pursued at the graduate level, including a minimum of nine hours at the 300 level or higher.

4. The applicant in guidance and counseling, school administration, special education and supervision must hold a Provisional Teaching Certificate, or its equivalent.

5. The student in fields other than guidance and counseling and school administration may elect to write a thesis. If so, he is required to complete a minimum of 24 hours in addition to a thesis.

6. The student who does not choose to write a thesis must earn a minimum of 36 hours of graduate credit and is required to complete successfully a written examination.
Degree Plan in Elementary Education

To meet individual needs, considerable flexibility is allowed in planning the student's program; however, the usual pattern of course work is as follows:

1. **Specialization Area.** Six semester hours of courses must be taken for graduate credit from one or a combination of the following disciplines: history, English, foreign languages, mathematics, science, art, music, speech or health and physical education.

(NOTE: To fulfill requirements concurrently for a Master's degree and for a Professional Certificate, a student may complete six additional hours in the area of specialization and substitute these hours for six hours in the elective area. He also should elect a 36 hour nonthesis program.)

2. **Professional Development.** Six semester hours must be selected from the following courses (three semester hours if the student elects to write a thesis):
   - Edu 530 — Structure and Organization of Public Education
   - Edu 531 — Research (Required)
   - Edu 532 — Current Issues in Education
   - Edu 533 — Contemporary Philosophies of Education
   - Edu 534 — Advanced Study in Human Development
   - Edu 535 — The Learning Process
   - Edu 537 — Public School Curriculum

3. **Resource Area.** Twelve semester hours must be selected from the following courses (nine semester hours if the student elects to write a thesis):
   - Edu 536 — Problems in Teaching Science and Social Studies in the Elementary School
   - Edu 538 — Modern Mathematics in the Elementary School
   - Edu 539 — Foundations of Reading
   - Edu 5303 — Strategies for Individualizing Elementary Instruction
   - Edu 5310 — Language Arts In The Elementary School
   - Edu 5329 — Corrective Reading

4. **Electives.** Twelve semester hours (six semester hours if student elects to write a thesis) from any of courses listed below or in a concentrated area.

   A. Reading Specialist
      - Edu 539 — Foundations of Reading
      - Edu 5301 — Current Literature for Children and Adolescents
      - Edu 5302 — Practicum: Diagnosis and Remediation of Reading Difficulties
      - Edu 5329 — Corrective Reading

   B. Audio-Visual Specialist
      - Edu 433G — Teaching Media and Audio-Visual Technology
      - Edu 435G — Individualized Instruction Through Technology
      - Edu 5370 — Technology
      - Edu 5372 — Film and Television as a System of Teaching

   C. Early Childhood Education
      - Edu 4304G — History and Philosophy of the Kindergarten
      - Edu 4305G — Seminar in Early Childhood Educational Research
      - Edu 5351 — Advanced Study in Early Childhood Curriculum
      - Edu 5352 — Creative Activities in Early Childhood Education
D. Supervision
SpEd 5316 — Administration & Supervision of Special Education Programs
Edu 5336 — Leadership and Evaluation of Instruction
Edu 5337 — Practicum and Seminar
Edu 5338 — Instructional Supervision

E. Special Education
SpEd 5361 — Survey of Learning Potentials of Exceptional Children
SpEd 5364 — Behavior Modification and Contingency Management of Disabled Learners
SpEd 5365 — Instructional Processes with Exceptional Children
SpEd 5366 — Modification of Curriculum and Instruction for the Atypical Learner

Degree Plan in Elementary Education with Professional Certification in Reading

1. To fulfill requirements concurrently for a Master’s degree and Professional Certification in Reading, the student:
   A. must hold a valid Texas Provisional Elementary or Secondary Certificate;
   B. must have completed a minimum of three years of creditable classroom teaching;
   C. should elect a 36 hour nonthesis program.

2. The usual pattern of coursework is as follows:
   A. Professional Development Area. Six semester hours required.
      Edu 531 — Research (required)
      Edu 530 — Structure and Organization of Public Education
      Edu 532 — Current Issues in Education
      Edu 533 — Contemporary Philosophies of Education
      Edu 534 — Advanced Study in Human Development
      Edu 535 — The Learning Process
      Edu 537 — Public School Curriculum
   B. Resource Area. Twelve semester hours required.
      Edu 536 — Problems in Teaching Science and Social Studies in the Elementary School
      Edu 538 — Modern Mathematics in the Elementary School
      Edu 539 — Foundations of Reading
      Edu 5303 — Strategies for Individualizing Elementary Instruction
      Edu 5310 — Language Arts In The Elementary School
      Edu 5329 — Corrective Reading
   C. Specialization Area. Six semester hours.
      Soc 432G — Educational Sociology
      Eng 4312G — Study in Language and Linguistics
   D. Additional Requirements. Twelve semester hours.
      Edu 5301 — Current Literature for Children and Adolescents (required)
      Edu 5302 — Practicum: Diagnosis and Remediation of Reading Difficulties (required)
      Edu 5319 — Problems in Secondary School Instruction
      Edu 5320 — Adolescent Development
      Edu 5321 — Strategies for Individualizing Secondary Instruction
Professional Certificates in Elementary Education

The applicant should hold or be eligible for a Provisional Certificate before admission into a professional program and have three years of teaching experience before being recommended for the Professional Certificate.

Requirements for the Professional Certificate follow an outline prescribed by the Texas Education Agency; consequently, the format for the certificate and the format for the degree are not identical. By selecting a nonthesis program and with careful planning, a student may fulfill concurrently requirements for the Master's degree and requirements for a Professional Certificate in Elementary Education or the Reading Specialist Certificate. Specific information concerning these certificates may be obtained from the Director of Graduate Studies or the Department of Elementary Education.

Other Certificates

It is possible for students to complete part or all of the requirements for a provisional teaching certificate or an endorsement to such a certificate while working on a Master of Education degree in Elementary Education. Endorsements in areas such as mental retardation, physically handicapped/minimally brain injured, emotionally disturbed, language and/or learning disabilities, early childhood/exceptional children and kindergarten may be adapted to such an arrangement. Specific information concerning these certificates may be obtained from the Director of Graduate Studies or from the Department of Elementary Education.

Degree Plan in Secondary Education

To meet individual needs, considerable flexibility is allowed in developing the student's plan for a nonthesis or a thesis program; however, the usual pattern of course work is as follows:

1. **Professional Development.** Eighteen semester hours must be taken as follows:
   - **Required:** Six semester hours
     Edu 531 — Research
     Edu 537 — Public School Curriculum
   - **Electives:** Twelve semester hours may be selected from any of the courses approved for the following areas, or may be concentrated in one area.
     - Teaching Specialization
     - Supervision
     - Testing and Measurement
     Audio-Visuels Specialist
     Reading Specialist
     Special Education
   A list of specific courses required or recommended in each of the concentrations is available through the Office of the Director of Graduate Studies or the Department of Secondary Education.

2. **Specialization Area:** For the nonthesis route to the degree, 18 semester hours of graduate work must be completed in one of the disciplines listed below. A minimum of 12 hours must be taken at the 500 level. If the student elects to write a thesis, the specialization requirement is reduced to 12 semester hours with at least six at the 500 level. A list of specific courses required or recommended is available through the Office of the Director of Graduate Studies or in the departmental office of the discipline. Graduate students should check the approved list before registering for specific courses. Complete lists of graduate offerings are found in
this graduate catalog for each discipline. Specialization areas are available in the following disciplines:

- Biology
- Chemistry
- English
- Government
- Health and Physical Education
- History
- Mathematics
- Physics
- Speech

**Program Leading to Professional Teaching Certificate — Secondary**

The Texas Education Agency issues a Professional Teaching Certificate to the candidate recommended by the college when he has completed an approved 30 semester hour program of credit beyond the bachelor’s degree. This program must include work in professional development, in a teaching specialization area and in a resource area. Requirements also indicate that the candidate must hold a Provisional Teaching Certificate and have three years of teaching experience. Specific requirements for the certificate may be obtained in the Office of the Director of Graduate Studies or in the Department of Secondary Education.

**Other Certificates**

It is possible for graduate students to complete requirements for a Provisional Teaching Certificate while completing a Master of Education degree in Secondary Education. Specific information concerning these certificates may be obtained from the Head of the Department of Secondary Education.

**Degree Plan in Special Education**

To meet individual needs, some flexibility is allowed in planning the student’s program; however, the usual pattern of course work is indicated below. If a student desires, he may complete requirements concurrently for a Professional Certificate in Mental Retardation or requirements for a Professional Certificate as an Educational Diagnostician. This degree, if seeking a professional certificate in Mental Retardation or as an Educational Diagnostician, is planned as a 36 semester hour nonthesis program. A student not seeking a professional certificate within a degree may complete a minimum of 24 semester hours in addition to a thesis.

1. **Specialization Area.** Fifteen semester hours must be selected from the following courses:
   - SpEd 5311 — Prescriptive Teaching with the Mentally Retarded
   - SpEd 5313 — Learning Potentials in Mentally Retarded Children
   - SpEd 5314 — Instructional Processes with the Mentally Retarded
   - SpEd 5315 — Problems and Issues in Mental Retardation
   - SpEd 5362 — Psychoeducational Evaluation of Exceptional Children
   - SpEd 5363 — Practicum in Psychoeducational Procedures
   - SpEd 5364 — Behavior Modification and Contingency Management of Disabled Learners
   - SpEd 5365 — Instructional Processes with Exceptional Children
   - SpEd 5366 — Modification of Curriculum and Instruction for the Atypical Learner

2. **Professional Development.** Nine semester hours must be selected from the following courses:
   - Edu 530 — Structure and Organization of Public Education
   - Edu 531 — Research (required)
3. Resource Area. Twelve semester hours may be selected from the following, or other appropriate approved courses from the Head of the Department of Special Education.

- SpEd 431G — Psychology of Exceptional Children (with special permission)
- SpEd 439G — Methods and Materials in Learning Disability (with special permission)
- SpEd 4308G — Appraisal Processes in Programming for the Exceptional Learner (with special permission)
- SpEd 4309G — Instruction of the Exceptional Learner (with special permission)
- SpEd 5316 — Administration and Supervision of Special Education Programs
- Edu 5334 — Interpretation and Analysis of Tests and Measurements
- Edu 5335 — Individual Testing
- Edu 5351 — Advanced Studies in Early Childhood Curriculum
- SpEd 5361 — Survey of Learning Potentials of Exceptional Children

Professional Certificates in Special Education

- Educational Diagnostician
- Mental Retardation

With careful planning a student may complete requirements for either of the Professional Certificates indicated above within the Masters degree program. Specific information concerning these certificates may be obtained from the Director of Graduate Studies or the Department of Special Education.

Provisional Certificates in Special Education

- Generic Special Education
- Mental Retardation
- Physically Handicapped/Minimally Brain Injured
- Language/Learning Disabilities
- Emotionally Disturbed
- Early Childhood/Exceptional Children

Students may obtain provisional certification in the above listed areas. A combination of graduate and undergraduate courses leading to one or more certificates is possible. Specific information concerning these certificates may be obtained from the Department of Special Education.

Degree Plan in Guidance and Counseling

To meet individual needs, some flexibility is allowed in planning the student’s program; however, because of requirements for certification the usual pattern of course work is as follows:

1. The Guidance Program. Three semester hours.
   Edu 5322 — Organization and Administration of Guidance Program

2. The Pupil Served. Six semester hours.
   Edu 431G — Psychology of Exceptional Children
Edu 534 — Advanced Study in Human Development
Edu 535 — The Learning Process

3. **Resource Areas.** Twenty-seven semester hours.
   Required (21 semester hours)
   Edu 531 — Research
   Edu 5323 — Occupational and Vocational Guidance
   Edu 5324 — Individual and Group Counseling
   Edu 5328 — Practicum in Guidance and Counseling
   Edu 5333 — Individual Counseling Theories and Techniques
   Edu 5334 — Interpretation and Analysis of Tests and Measurement
   Edu 5335 — Individual Testing
   Electives (six semester hours)
   Edu 5332 — Guidance and Counseling in the Elementary School
   SpEd 5361 — Survey of Learning Potentials of Exceptional Children
   SpEd 5362 — Psychoeducational Evaluation of Exceptional Children
   SpEd 5363 — Practicum in Psychoeducational Procedures

**Professional Counselor’s Certificate**

A student who completes requirements for a Master of Education degree in Guidance and Counseling will have fulfilled all curriculum requirements for a Professional Counselor’s Certificate. A student who desires the certificate, without fulfilling all degree requirements should check with the Director of Guidance and Counseling for specific information. Usually such a student who is otherwise eligible can meet these requirements by completing 30 semester hours. The Texas Education Agency issues a Professional Counselor’s Certificate based upon completion of an approved program in guidance and counseling and three years of teaching experience in an accredited school system.

**Degree Plan in Supervision**

Requirements for a Master of Education in Supervision may be met by completing a 36 semester hour nonthesis program or by completing a 30 semester hour plan that includes a thesis. The student is allowed some flexibility in planning his program; however, the usual pattern of course work is as follows:

1. **Professional Development.** Six semester hours.
   Edu 531 — Research (Required)
   SpEd 5316 — Administration and Supervision of Special Education Programs
   Edu 5334 — Interpretation and Analysis of Tests and Measurement

2. **Specialization Area.** Nine semester hours.
   Edu 5336 — Leadership and Evaluation of Instruction
   Edu 5337 — Practicum and Seminar: Supervision and Curriculum Development
   Edu 5338 — Instructional Supervision

3. **Resource Area.** Twenty-one semester hours (15 if thesis is written).
   A. Learning Process. Three semester hours.
      (1) Edu 534 — Advanced Study in Human Development
      (2) Edu 535 — The Learning Process
      (3) SpEd 5364 — Behavior Modification and Contingency Management of Disabled Learners
   B. Electives. Eighteen semester hours (12 is thesis is written).
If the student chooses to write a thesis, the number of electives is reduced to six hours in course work plus six hours in thesis. With approval, other graduate level courses applicable to professional certification sequences may be selected.

**Professional Supervisor’s Certificate**

Curriculum requirements for a Professional Certificate in supervision may be met by completing a Master of Education degree in Supervision. A student who desires the certificate without fulfilling all degree requirements should consult with the Director of Certification for specific information.

**Degree Plan in School Administration**

Requirements for a Master of Education degree in School Administration may be met by completing a 36 semester hour nonthesis program. The program is designed to provide the first 36 of the 45 semester hours required for the Professional Administrators’ Certificate. A plan listing the specific courses for the degree is available in the office of the Director of Graduate Studies or in the Department of Secondary Education.

To meet individual needs, some flexibility is allowed in planning the student’s program; however, because of requirements for certification the usual pattern of course work is as follows:

1. **Common Core for Degree. Required: 18 semester hours.**
   - Edu 531 — Research
   - Edu 534 — Advanced Study of Human Development
   - Edu 537 — Public School Curriculum
   - Edu 5318 — School Management and School Services
   - Edu 5331 — Theory and Practice in School Administration
   - Edu 5344 — School Law

2. **Related Areas of Study. Six semester hours.**
   - Soc 432G — Sociology of Education
   - CS 5301 — Computer Systems for Educational Applications
   - BA 5311 — Seminar in Financial Management
   - BA 538 — Business Problems and Organization
   - Gov 535 — Seminar in Theory and Practice of Public Administration

3. **Specialized Preparation for School Administrators. Twelve semester hours.**
   - Edu 5339 — The School Principal (Required)
   - Nine semester hours selected from the following:
     - Edu 539 — Foundations of Reading
     - Edu 5317 — Organization and Administration of Special Programs
     - Edu 5325 — Pupil Personnel Management
     - Edu 5336 — Leadership and Evaluation of Instruction
     - Edu 5338 — Instructional Supervision (Required)
     - Edu 5342 — Public School Finance

*Note:* The student planning to complete requirements for certification in school administration should select courses which apply to that program.
Professional Certification for School Administrator and for School Superintendent

There are two plans in operation for the completion of valid Administrators' Certificates. One is based upon a plan approved under 1966 Standards, and students working under that plan have until September 1, 1977, to complete all requirements for that program. Students enrolled in the Professional Administrator's program at Lamar before September 1, 1973, had until that date to declare whether they wished to complete requirements of the "old" program or change to the new standards.

The new standards are presented in this catalog, since all students entering Lamar's program after September 1, 1973, will follow these plans. Two types of certificates are available under the new standards:

1. The Professional Administrator's Certificate requires the completion of the approved 45 semester hour plan of graduate credit.
2. The Professional School Superintendent's Certificate requires the completion of the Professional Administrator's Certificate and an additional 15 semester hour approved plan of graduate credit.

To be eligible for recommendation for the Professional Administrator's Certificate, the candidate completing the 45 hour approved plan must hold a Provisional Teaching Certificate, must hold a Master's degree, must have a minimum of two years of creditable classroom teaching experience, and must have completed an approved administrative internship experience.

To be eligible for recommendation for the Professional School Superintendent's Certificate, the candidate must have met all of the requirements for the Professional Administrator's Certificate, plus the completion of the 15 semester hour plan of specialized graduate work for school superintendents.

Professional Certificate course requirements are as follows:

1. General Administrative Competencies. Eighteen semester hours.
   Edu 531 — Research
   Edu 534 — Advanced Study of Human Development
   Edu 537 — Public School Curriculum
   Edu 5318 — School Management and School Services
   Edu 5336 — Leadership and Evaluation of Instruction
   Edu 5344 — School Law

2. Related Academic Studies. Nine semester hours.
   Soc 432G — Sociology of Education (Required)
   CS 5301 — Computer Systems for Educational Applications (Required)
   Three semester hours selected from the following:
   BA 538 — Business Problems and Organization
   BA 5311 — Seminar in Financial Management
   Gov 535 — Seminar in Theory and Practice of Public Administration

   Edu 539 — Foundations of Reading (Required)
   Edu 5317 — Organization and Administration of Special Programs (Required)
   Edu 5325 — Pupil Personnel Management
   Edu 5338 — Instructional Supervision (Required)
   Edu 5339 — The School Principal (Required)
   Edu 5342 — Public School Finance
Edu 5347 — Seminar in Public School Administration
Edu 5348 — Practicum in School Administration (Required)

   Edu 5326 — School-Community Relations
   Edu 5341 — The School Superintendent (Required)
   Edu 5342 — Public School Finance
   Edu 5343 — Administration of School Plant
   Edu 5345 — Personnel Management
   Edu 5349 — Internship for the School Superintendent

GENERAL INFORMATION CONCERNING PROFESSIONAL CERTIFICATES

Validity

The Professional Certificate is valid for life unless canceled by lawful authority, and gives the holder legal authority to perform duties in the public schools of Texas in the specialized areas designated on the face of the certificate.

Requirements:
1. Have completed the requirements for a Provisional Certificate.
2. Have at least three years of teaching experience.
3. Have completed an approved teacher education program.
4. Be of good moral character.
5. Be a citizen, or in the process of becoming a naturalized citizen of the United States.
7. Have completed, in a Texas institution of higher learning, a course or courses in which the Constitutions of the United States and the State of Texas have been given special emphasis.
8. Have completed at least six semester hours of American history or three semester hours in American history plus three semester hours in Texas history.

GRADUATE FACULTY

Members
Professor Howard W. Adams
   Secondary education, education research
Professor E. B. Blackburn, Jr.
   Elementary education, elementary curriculum
Professor David L. Bost
   Secondary education, guidance and counseling
Professor Kenneth R. Briggs
   Secondary education, educational psychology
Associate Professor Charles M. Burke
   Elementary education, elementary curriculum
Professor Betty Fay Coody
  Elementary education, elementary curriculum
Professor Walter Dezelle, Jr.
  Secondary education, guidance and counseling
Professor Vernon H. Griffin
  Elementary education, elementary curriculum
Professor W. Richard Hargrove
  Elementary education, foundations of education
Professor Bradley B. Hogue
  Elementary education, educational psychology
Professor Harvey C. Johnson
  Secondary education, curriculum and administration
Professor Conrad Dell Mang
  Elementary education
Associate Professor Edward Roy McIntosh
  Elementary education, instructional media
Professor M. L. McLaughlin
  Elementary education, contemporary education
Professor E. Lee Self
  Secondary education, public education
Professor Monty Sontag
  Special education
Associate Professor William H. Stanley
  Educational administration
Associate Professor Richard E. Swain, III
  Secondary education, science education

Associate Members
Assistant Professor Sandra Lee Haven
  Math education
Assistant Professor Milton H. Hyman
  Special education
Assistant Professor Harvey L. Kanter
  Special education
Assistant Professor Phillip B. Snyder
  Science education
Assistant Professor Norma L. Tompkins
  Special education
Assistant Professor Curtis E. Wills
  Secondary education, guidance and counseling

The graduate student will select education (Edu) courses from the following list:

530 — Structure and Organization of Public Education. Analysis of the operation and function of public education at the local, state, and national levels. Class: 3 hours. Credit: 3 semester hours.

531 — Research. Introduction to skills and techniques necessary for research and problem solving in education. Emphasis on terminology, methodology, and spirit of systematic research. Class: 3 hours. Credit: 3 semester hours.

532 — Current Issues in Education. Current controversies and trends in public education. Class: 3 hours. Credit: 3 semester hours.
533 — Contemporary Philosophies of Education. Influence of recent philosophies on education. Schools of educational philosophy and implications for curriculum development and teaching methods. Class: 3 hours. Credit: 3 semester hours.

534 — Advanced Study in Human Development. A study of development and nature of the human personality. Emphasis on recent psychological and biological experiments. Class: 3 hours. Credit: 3 semester hours.

536 — Problems in Teaching Science and Social Studies in the Elementary School. A study of current developments, recent trends and innovative methods of teaching science and social studies in the elementary school, with emphasis upon individual teaching problems and research. Class: 3 hours. Credit: 3 semester hours.

537 — The Public School Curriculum. Analysis of the objectives, organization, and content of the different areas of the public school curriculum in grades K-12. Emphasis is given to models of curriculum development and to techniques for curriculum improvement. Class: 3 hours. Credit: 3 semester hours.

538 — Modern Mathematics in the Elementary School. Problems, research, and innovative methods in elementary mathematics. This course is designed for elementary teachers who wish to pursue individual problems, research, and recent methods and trends of teaching elementary mathematics. Class: 3 hours. Credit: 3 semester hours.

539 — Foundations of Reading. Methods for extending and refining fundamental reading habits and attitudes, and for increasing reading efficiency. Attention will be given to all facets of the foundations of a reading program. Class: 3 hours. Credit: 3 semester hours.

5101, 5201, 5401, 5601 — Institute in Education. Designed to advance the professional competence of participants. For each institute, a description of the particular area of study will be indicated. May be repeated for credit when nature of institute differs sufficiently from one previously taken. Class: 1 to 6 hours. Credit: 1 to 6 semester hours.

5301 — Current Literature for Children and Adolescents. Survey of recent literature for children and adolescents. Emphasis is given to nonfiction in such areas as earth science and social science. Extensive reading of actual literature. Class: 3 hours. Credit: 3 semester hours.

5302 — Practicum: Diagnosis and Remediation of Reading Difficulties. Work with pupils in diagnosing and correcting reading disabilities. Students will determine the causes of reading disabilities, employ observation and interview procedures, use standard and informal tests, and study materials and methods of instruction. Class: 3 hours. Credit: 3 semester hours.

5303 — Individualized Instruction in the Elementary School. Basic concepts of individualized instruction will be covered in detail. Various innovative methods of individualized instruction will be investigated. Particular attention will be given to types of school organization such as the "open" school. Class: 3 hours. Credit: 3 semester hours.

5304 — Advanced Child Development. A consideration of the contributions of scientific research to an understanding of child development and behavior. Emphasis on biological, social, cultural and psychological factors determining individual differences in the child. Class: 3 hours. Credit: 3 semester hours.

5305 — Problems in Elementary School Instruction. Consideration of the instructional problems encountered by teachers in the elementary schools. Prerequisite: one year of teaching experience. Class: 3 hours. Credit: 3 semester hours.
5310 — Language Arts in the Elementary School. A study of developments and trends in the teaching of language arts with primary consideration given to individual teaching problems, individual research, and recent innovative methods. Class: 3 hours. Credit: 3 semester hours.

5317 — Organization and Administration of Special Programs. Study of principles, organization and administrative practices in special, compensatory and vocational education. Attention is given to administrative competencies essential to the successful implementation of career education in all elements of the school program. Class: 3 hours. Credit: 3 semester hours.

5318 — School Management and School Services. Study of principles of school business procedures related to fiscal accounting, including the preparation, analysis and control of the school fiscal budget. Study of building management, cafeteria programs, transportation services and textbook services. Class: 3 hours. Credit: 3 semester hours.

5320 — Adolescent Development. Physical, mental, social and emotional characteristics of the adolescent; his interests and problems; his family and community relationships. Class: 3 hours. Credit: 3 semester hours.

5321 — Strategies for Individualizing Secondary Instruction. An analysis of the strategies for individualizing instruction, including the techniques of diagnosis and prescription for learning problems. Studies of the open classroom, team teaching, independent study, learning modules, nongraded programs, and other organizations for instruction are included. Class: 3 hours. Credit: 3 semester hours.

5322 — Organization and Administration of the Guidance Program. Essential services and management functions of guidance and counseling services for schools. Class: 3 hours. Credit: 3 semester hours.

5324 — Individual and Group Counseling. Processes of individual study. Counseling procedures and techniques for individuals and groups. Class: 3 hours. Credit: 3 semester hours.

5325 — Pupil Personnel Management. Survey of student services in the public schools emphasizing principles, philosophy and operating procedures. Class: 3 hours. Credit: 3 semester hours.

5326 — School-Community Relations. Emphasizes the relationship of educational and social patterns of living which exists in every community; recognizes the burden of leadership which rests with the public school as it occupies the central position of influence in the community. Class: 3 hours. Credit: 3 semester hours.

5327 — College Teaching. Designed for graduate students with little or no pedagogical training or experience. Application of learning principles and pedagogical procedures in college classes. Class: 3 hours. Credit: 3 semester hours.

5328 — Practicum in Guidance and Counseling. Supervised observation and practice of guidance and counseling in a school setting. Pre-requisite: Edu 5335 and approval of department head. Class: the number of hours equivalent to 8 hours per week for 16 weeks. Credit: 3 semester hours.

5329 — Corrective Reading. Causes of reading disability, methods of diagnosis, and remedial instruction. Class: 3 hours. Credit: 3 semester hours.
5331 — Theory and Practice in School Administration. Introduction to theories of administration, organizational structures, and current practices in educational administration. Emphasis is given to types of organizational designs, personnel titles and roles, line staff relationships, and general theories of successful administrative practice. Class: 3 hours. Credit: 3 semester hours.

5332 — Guidance and Counseling in the Elementary School. A course designed to provide an understanding of guidance principles and techniques applicable to the elementary school. Class: 3 hours. Credit: 3 semester hours.

5333 — Individual Counseling Theories and Techniques. Opportunities are provided for the student to enrich his background and experience in interviewing and in dealing with human relations problems in the counseling situation. Class: 3 hours. Credit: 3 semester hours.

5334 — Interpretation and Analysis of Tests and Measurement. Analysis and evaluation of types of tests and measurement devices will be conducted. Methods of determining the reliability and validity of tests are investigated. Designs for testing programs and selection of appropriate tests will be included. Class: 3 hours. Credit: 3 semester hours.

5335 — Individual Testing. Theoretical and practical study emphasizing the administration, scoring, and basic interpretation and practice in the use of individual psychological tests. Students will be trained to administer the Wechsler tests, the Stanford Binet, or other subsequently developed individual intelligence scales. Prerequisite: Edu 4337G or Edu 5334. Class: 3 hours. Credit: 3 semester hours.

5336 — Leadership and Evaluation of Instruction. Investigation of the leadership roles in instructional programs. Techniques of evaluation and interpersonal relationships leading to instructional improvement are considered. Special attention is given to reading programs and the total language arts program K-12. Class: 3 hours. Credit: 3 semester hours.

5337 — Practicum and Seminar. Supervision and curriculum development. Investigation of the role of the supervisor with emphasis on curriculum development. Investigations will center around problems in supervision, curriculum theory, and educational experimentation. Class: 3 hours. Credit: 3 semester hours.

5338 — Instructional Supervision. Identification of the role and competencies of the supervisor, including a study of supervisory practices and policies relating to program development and instructional improvement in the public schools, K-12. Class: 3 hours. Credit: 3 semester hours.

5339 — The Public School Principal. Study of the role and competencies for the administrator of the elementary, middle, and secondary schools. Specific studies of job analysis and responsibilities in various organizations of the K-12 program are included. Class: 3 hours. Credit: 3 semester hours.

5341 — The School Superintendent. Emphasis on the legal and delegated authority, responsibilities and operative techniques of the superintendency. Class: 3 hours. Credit: 3 semester hours.

5342 — Public School Finance. Analysis of principles of school finance to include problems of budgeting, accounting, and administration of funds. Class: 3 hours. Credit: 3 semester hours.

5343 — Administration of School Plant. Operation, maintenance, and utilization of physical plant to include administration of records, standards and control of plant, and development of school building programs. Class: 3 hours. Credit: 3 semester hours.
5344 — School Law. Interpretation and operation of school law including a study of the Texas Education Code and the Handbook for Public School Law. Class: 3 hours. Credit: 3 semester hours.

5345 — Personnel Management. Fundamentals of human relations and organizational behavior in developing programs of recruitment selection, assignment, evaluation, promotion, and termination of personnel. Class: 3 hours. Credit: 3 semester hours.

5346 — Public Relation in School Administration. Development of principles governing school-community relationships to promote mutual understanding and support of school's purposes, functions, and needs. Class: 3 hours. Credit: 3 semester hours.

5347 — Seminar in School Administration. Study of basic concepts and principles of school administration as applied to selected topics. Special attention will be given to new and developing programs and to administrator's roles in these programs. Class: 3 hours. Credit: 3 semester hours.

5348 — Practicum in Educational Administration. Supervised experience in administration and offered by arrangement between the university and the public school. Class: arranged. Credit: 3 semester hours.

5349 — Internship for the School Superintendent. Designed to give the prospective school superintendent on-the-job training under the guidance of a successful, experienced, practicing administrator and under the supervision of members of the university staff. Class: Time arranged. Credit: 3 semester hours.

5351 — Advanced Study in Early Childhood Curriculum. A comprehensive study of the organization, methods, and materials used for instruction in Kindergarten and other programs for young children. Class: 3 hours. Credit: 3 semester hours.

5352 — Creative Activities in Early Childhood Education. Teaching methods and materials for releasing creative expression with music, art, and literature. Workshop approach with demonstration of art and music processes. Class: 3 hours. Credit: 3 semester hours.

5370 — Technology. Application of present technology to the production of educational materials, and the utilization of these materials in the direction of instruction. Class: 3 hours. Credit: 3 semester hours.

5372 — Film and Television as a System of Teaching. Study of the basic concepts of the production and use of educational television, still and motion pictures. Emphasis will be given to the production of pictorial teaching materials and to the use of such materials as a system of teaching. Class: 3 hours. Credit: 3 semester hours.

5390-9 — Selected Topics. Significant topics in Elementary, Secondary, and Special Education. The description of the particular area of study will appear on the printed semester schedule. A student may repeat for a maximum of six semester hours when topic varies. Class: 3 hours. Credit: 3 semester hours.

669A-669B — Thesis. Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.

Below is the approved list of 400G level courses which may be taken with augmented requirements for graduate credit, subject to approval by the graduate advisor. Course descriptions may be found in the Bulletin of Lamar University.

433G — Teaching Media and Audio-Visual Technology
435G — Individualized Instruction through Technology
4304G — History and Philosophy of the Kindergarten
4305G — Seminar in Early Childhood Educational Research
4337G — Tests and Measurements
GRADUATE RESOURCE COURSES

CS 5301 — Computer Systems for Educational Applications. Functional units of computers including both hardware and firmware; software; analysis, design, and evaluation of computing configurations for educational applications; cost estimation techniques for both academic and administrative applications. Class: 3 hours. Credit: 3 semester hours.

Soc 430G — Seminar in Sociology. Basic concepts and principles of sociology as applied to the study of selected topics. Designed for education majors or other non-sociology majors. Class: 3 hours. Credit: 3 semester hours.

Soc 432G — Sociology of Education. A study of the multi-cultural influences on the school system and the democratic society. Included will be an analysis of educational problems in the multi-cultural society of Texas. Class: 3 hours. Credit: 3 semester hours.

The graduate student will select special education (SpEd) courses from the following list:

5311 — Prescriptive Teaching with the Mentally Retarded. Extrapolate psychological and sociological data into individual teaching prescriptions for mentally retarded children; applied experience. Class: 3 hours. Credit: 3 semester hours.

5313 — Learning Potentials in Mentally Retarded Children. Determining the degree of modifiability of pupil behaviors, identifying functioning levels, and devising appropriate teaching strategies; individual project. Class: 3 hours. Credit: 3 semester hours.

5314 — Instructional Processes with the Mentally Retarded. Translating the behaviors of mentally retarded children into child development categories and applied behavior modification processes in child study projects. Class: 3 hours. Credit: 3 semester hours.

5315 — Problems and Issues in Mental Retardation. Appraisal of current problems, trends and practices in the education and care of exceptional children. Class: 3 hours. Credit: 3 semester hours.

5316 — Administration and Supervision of Special Education Programs. Analysis of the functions of special education in the administrative structure of the school; the principles and practices in administration and supervision in special education. Class: 3 hours. Credit: 3 semester hours.

5361 — Survey of Learning Potentials of Exceptional Children. General survey of the learning potentials of those children deficient in basic integrities which can be categorized into central peripheral nervous system dysfunction, and/or behavioral disorders. Class: 3 hours. Credit: 3 semester hours.

5362 — Psychoeducational Evaluation of Exceptional Children. Simulated experiences in the use of formal and informal methods of appraising and communicating pupils' educational status and progress. Class: 3 hours. Class: 3 semester hours.

5363 — Practicum in Psychoeducational Procedures. Practicum experience in the use of formal and informal instruments in the evaluation of the psychoeducational and social development of children and the utilization of education and clinical data in individual teaching plans. Prerequisite: Edu 5362. Class: 3 hours. Credit: 3 semester hours.

5364 — Behavior Modification and Contingency Management of Disabled Learners. The description of specific types of learning, the sequence in learning school-related tasks, and the competencies to manipulate events to effect desired learning. Class: 3 hours. Credit: 3 semester hours.
5365 — Instructional Processes with Exceptional Children. Competency in developing educational strategies for the remediation, amelioration, or compensation of exceptionality as it interferes with achievement or adjustment in school. Class: 3 hours. Credit: 3 semester hours.

5366 — Modification of Curriculum and Instruction for the Atypical Learner. Information and familiarity with instructional materials necessary for meeting the special needs of exceptional learners. Utilization of Special Educational Instructional Materials Centers. Class: 3 hours. Credit: 3 semester hours.

5390-9 — Selected Topics. Significant topics in Special Education. The description of the particular area of study will appear on the printed semester schedule. A student may repeat for a maximum of six semester hours when topic varies. Class: 3 hours. Credit: 3 semester hours.

669A-669B — Thesis. Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.

Below is the approved list of 400G level courses which may be taken with augmented requirements for graduate credit, subject to approval by the graduate advisor. Course descriptions may be found in the Bulletin of Lamar University.

431G — Psychology of Exceptional Children
439G — Methods and Materials in Learning Disabilities
4308G — Appraisal Processes in Programming for the Exceptional Individual
4309G — Instruction of the Exceptional Learner
Degree Requirements

The Master of Science degree in Health and Physical Education requires the completion of 30 semester hours of graduate work: 18 in Health and Physical Education, six in thesis, and six in an approved supporting field. The supporting field must be approved by the student's graduate committee or with its approval six additional hours in Health and Physical Education may be substituted for the supporting field.

With the approval of the student's graduate committee in Health and Physical Education, 12 semester hours of course work may be substituted for the thesis. If the nonthesis option is selected, six hours must be taken in an approved supporting field.

HPE 536, Research Methods in Health and Physical Education, is required of all students.

GRADUATE FACULTY

Members

Associate Professor Alice C. Bell
  Health education
Associate Professor Vernon R. Crowder
  Exercise physiology
Associate Professor Mary Jane Haskins
  Physical education, research
Professor James B. Higgins
  Physical education
Professor Belle Mead Holm
  Health education, curriculum, administration
Associate Professor Virginia R. Holt
  Physical education, curriculum
Associate Professor Mildred A. Lowrey
  Physical Education
Professor Leonard A. Yates
  Physical education, curriculum, administration

Associate Members

Assistant Professor Raymond L. Fletcher
  Physical education, recreation

The graduate student will select his courses in health and physical education from the following:

530 — Problems in Health and Physical Education. Biological, physiological, social, psychological, and other purposes and outcomes; selection and distribution of activities; teaching methods; facilities; teacher preparation; literature; research problems. Permission must be obtained from Department Head for enrollment in class. Class: 3 hours. Credit: 3 semester hours.
531 — Cultural Foundations of Physical Education. A study of history and cultural foundations of sport and physical education activities, their origin and influence upon modern man. Class: 3 hours. Credit: 3 semester hours.

532 — Seminar in Physical Education. Designed to develop abilities in locating and evaluating literature and research in physical education and in allied fields. Course may be repeated for a maximum of six semester hours as the topic varies. Class: 3 hours. Credit: 3 semester hours.

533 — Organization and Administration of the School Health Program. Administrative relationships and procedures in conducting school health programs. Class: 3 hours. Credit: 3 semester hours.

534 — Scientific Basis of Exercise. A study of professional literature and laboratory experimentation on the role of physical activities and their effects on the human organism. Class: 3 hours. Credit: 3 semester hours.

535 — Trends and Issues in Health and Physical Education. Designed to assist the student to become knowledgeable on current trends and issues in the areas of health and physical education. Study will include historical, analytical, and projective approaches. Course may be repeated for a maximum of six semester hours as the topic varies. Class: 3 hours. Credit: 3 semester hours.

536 — Research Methods in Health and Physical Education. Familiarity with types of research in Health and Physical Education with emphasis on tools and techniques of research and research design. Class: 3 hours. Credit: 3 semester hours.

5101, 5201, 5301, 5601 — Workshop in Health and Physical Education. This course is designed to advance the professional competence of graduate students in health and physical education. Topic will vary. A description of the particular area of study will be indicated. May be repeated for credit when nature of course differs sufficiently from one previously taken. Class: 1-6 hours. Credit: 1-6 semester hours.

669A-669B — Thesis. Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.

Below is the approved list of 400G level courses which may be taken with augmented requirements for graduate credit, subject to approval by the graduate advisor. Course descriptions may be found in the Bulletin of Lamar University.

434G — Health and Human Ecology (Health Education)
435G(M) — Adapted Physical Education
437G(W) — Health Science and Epidemiology (Health Education)
439G — History and Theory of Dance (Dance)
DEPARTMENT OF HOME ECONOMICS

Degree Requirements

The Master of Science degree in Home Economics requires the completion of 30 semester hours of graduate work: 18 in home economics, six in thesis, and six in an approved supporting field. With the approval of the student's graduate committee, 12 semester hours of course work may be substituted for the thesis. If the nonthesis option is selected, six hours must be taken in an approved supporting field.

The student's graduate program must include Home Economics 5314: Research Techniques.

GRADUATE FACULTY

Members

Associate Professor Jane S. Davidson
Home economics education
Professor Dorothy W. McAlister
Home economics education, textiles and clothing, consumer economics

Associate Members

Assistant Professor Ferial A. El-Maguid
Nutrition and food science
Assistant Professor LeBlond McAdams
Clothing and fashion merchandising

The graduate student will select home economics courses from the following list:

530 - Seminar in Home Economics. An intensive study of selected problems and recent developments in Home Economics. Class: 3 hours. Credit: 3 semester hours.
531 - Recent Advances in Foods and Nutrition. Readings in and discussion of selected studies and recent developments in the field of nutrition and foods. Implications for dietitians, nutritionists, teachers, extension workers and others. Class: 3 hours. Credit: 3 semester hours.
532 - Draping. An application of couture costume design principles and construction techniques. Dress design based on the manipulation of fabric on a form. Class: 2 hours. Laboratory: 3 hours. Credit: 3 semester hours.
533 - Heritage of Dress. A survey of costume history and customs which have affected garment styles. An analysis of historic costume and its contribution to civilizations. Class: 3 hours. Credit: 3 semester hours.
535 - Cultural Aspects of Food. The relationship of food acceptability and use to the cultural and social development of people over the world. Food preparation experiences as influenced by international food patterns. Class: 2 hours. Laboratory: 3 hours. Credit: 3 semester hours.
537 - Family Management. Socio-economic changes, public policies and programs, and management practices related to family well-being. Class: 3 hours. Credit: 3 semester hours.
538 - Curriculum Development in Home Economics. Philosophy and development of home economics education programs for secondary schools, colleges or universities with emphasis on current curriculum developments and trends. Class: 3 hours. Credit: 3 semester hours.
539 — Experimental Foods. Investigation into principles and problems of food preparation. Development of professional attitudes and techniques through laboratory groups and individual projects. Class: 2 hours. Laboratory: 2 hours. Credit: 3 semester hours.

5311 — Advanced Textiles. Analysis and comparison of recent scientific textile trends with reference to fiber content, yarn, fabrication, color and finish. Class: 3 hours. Credit: 3 semester hours.

5312 — Resources in Home Economics Education. Creative development, selection and evaluation of instructional materials including preparation, selection, and use of visual materials. Class: 3 hours. Credit: 3 semester hours.

5314 — Research Techniques. Principles and application of standard techniques used in research. Class: 3 hours. Credit: 3 semester hours.

669A, 669B — Thesis. Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.

Below is the approved list of 400G level courses which may be taken with augmented requirements for graduate credit, subject to approval by the graduate advisor. Course descriptions may be found in the Bulletin of Lamar University.

411G, 421G, 431G — Special Topics
430G — Quantity Food
432G — Family Clothing
433G — Household Equipment
434G — Fashion and Production
435G — Consumer Housing
436G — Home and Fashion Merchandising
437G — Individual Problems in Home Economics
College of Engineering

The College of Engineering offers a program of study leading to the Master of Engineering Science degree (M.E.S.), a Master of Engineering degree (M.E.), and Doctor of Engineering (D. Egr.). The Department of Mathematics offers a Master of Science degree in Mathematics (M.S.). See Department of Mathematics, this catalog.

MASTER OF ENGINEERING SCIENCE

The Master of Engineering Science degree plan requires the completion of 30 semester hours of graduate work, including thesis. For admission to the program, the student must meet the following requirements.

1. The general requirements for admission to the College of Graduate Studies.
2. Hold a bachelor's degree in a field of engineering or applied science.
3. Have credit equivalent to that required for undergraduate engineering students at Lamar

It is assumed that all graduate students are proficient in the use of digital computers.

Degree Requirements

The candidate for the M.E.S. degree must meet all the College of Graduate Studies general degree requirements as listed in this catalog. Thirty semester hours of graduate work are required with the following restrictions:

1. A minimum of 18 semester hours of credit in engineering courses, including:
   a. Six semester hours in thesis.
   b. Three semester hours of engineering courses from those designated as graduate core courses, and
   c. Nine additional semester hours of engineering courses of which at least six semester hours must be on the 500 level.
2. From approved 400G-500 level courses, nine semester hours in a combination of mathematics and science.
3. Three hours of electives.
4. All course work presented for the M.E.S. degree must have the approval of the candidate's committee.

MASTER OF ENGINEERING

The Master of Engineering (M.E.) degree is designed to suit the needs of the practicing engineer. This program recognizes the value of, and the initiative required for, professional registration.

For admission to the program, the student must meet the following requirements:

1. The general requirements for admission to the College of Graduate Studies.
2. Hold a bachelor's degree with credit substantially equivalent to that required for an engineering degree at Lamar.

Degree Requirements:

1. The candidate for the M.E. degree must meet all the general requirements of the College of Graduate Studies as listed in this catalog.
2. The general requirement is 36 semester hours of graduate work. At least 18 semester hours of this work must be engineering courses at the 500 level. The
remainder will be selected by the graduate student through consultation and agreement with his graduate committee.

3. A graduate student holding an Engineer-in-Training (EIT) certificate or a graduate student who is a Professional Engineer registered in the State of Texas (or registered in another state where requirements do not conflict with the provisions of the Texas Engineering Practice Act and are of a standard not lower than those specified in Section 12 of that Act) may satisfy course requirements by completing 33 semester hours of graduate work providing Egr 631 (Design Project) is included.

DOCTOR OF ENGINEERING

The Doctor of Engineering degree is designed as an extension of the Master of Engineering to allow a practicing engineer to work on practical engineering problems of considerable complexity.

For admission to the program, these requirements must be met:

1. Hold a master's degree in engineering or at least 30 semester hours of engineering, science or mathematics courses at the graduate level.
2. Submit a letter of application to the Coordinator of Engineering Graduate Studies. This letter should include information about the applicant's engineering experience, present employment, chief interests and type of work he might undertake for his field study.

An applicant who has been accepted into the College of Graduate Studies and whose application indicates he might be admitted to the program, will be notified and a graduate faculty committee will review the applicant's transcripts, test scores and letter of application. The committee will then determine if a diagnostic examination is warranted. If such an examination is approved, the committee will then prepare and administer the examination.

Diagnostic Examination

The objectives of the diagnostic examinations are threefold: (1) to determine the appropriateness of the student's background, (2) to help determine the student's qualifications for a doctoral program, and (3) to provide guidance for the selection of a study program. The committee may decide to do any one of the following: (1) accept the student into the doctoral program, (2) not accept the student, or (3) accept the student conditionally. If the student is accepted conditionally, the committee will specify what additional preparation the student must make. The committee also will specify whether the student is to retake the diagnostic exams, a portion of these exams, or may be accepted into the doctoral program upon completion of the additional preparation.

Study Program

After a student is accepted into the doctoral program he will meet with his committee to outline a program of study. This program of study would normally consist of a minimum of 30 semester hours of 500D and 600 level course work beyond the equivalent of a master's degree.

The study program would be chosen in consultation with the student to suit his interests and abilities as nearly as the standards of the doctoral program and the interests of the faculty will allow. In addition to his study program the student will be expected to demonstrate a proficiency in at least one computer language.
The student is expected to pursue his study program in a continuous manner by earning three semester hours credit in two consecutive long terms. Failure to do so will require an application to the Graduate Engineering Faculty to continue his study program.

**Candidacy Examination**

Near the end of the study program the student will make written application to his doctoral committee to be allowed to take the candidacy examinations. The purposes of the candidacy examinations are threefold: (1) to test the ability of the student to comprehensively relate the subjects of his study program, (2) to verify that the time taken to complete the study program has not been so long as to disassociate the student’s graduate education, and (3) ascertain the student is ready to do the field study. The committee may again make any one of three decisions upon evaluation of these exams: (1) pass, (2) fail, or (3) conditional pass. A conditional pass would be accompanied by the requirements of the committee and the action to be taken upon the fulfillment of these requirements.

**Field Study**

After the student is admitted to candidacy he will be required to submit a formal engineering proposal conforming to a standard format outlining his field study. This field study normally would be expected to take a minimum of one man-year and should involve some technological innovation. A unanimous vote of the doctoral committee shall be required to approve a field study. During the course of the field study the student would normally register for 30 semester hours of Field Study. Upon completion of the field study a formal engineering report with a standard format shall be submitted to the members of the doctoral committee and defended in an oral examination.

**GRADUATE FACULTY**

**Members**

Associate Professor Ali M. Alii  
Operations research, quality control

Professor Luther A. Beale  
Structural analysis, design

Professor Wendell C. Bean  
Automatic control systems, bioengineering

Associate Professor James J. Brennan  
Applied statistics, systems simulation, manufacturing processes and materials

Associate Professor Spencer L. Brinkerhoff, Jr.  
Engineering mechanics, structural design

Professor Otto G. Brown  
Fluid mechanics in turbulent flow; bioengineering

Professor James L. Cooke  
Process control; power system analysis

Professor Floyd M. Crum  
Solid state devices in electronic circuits

Professor Andre P. Delflache  
Soil mechanics, foundations, ocean engineering, geophysics
Professor David G. Gates  
Decision-making processes; plant layout, human factors
Professor Jack R. Hopper  
Reaction kinetics, catalysis
Professor Eugene P. Martinez  
Gas dynamics
Professor Robert A. McAllister  
Transport properties, fluid mechanics
Professor Harry T. Mei  
Heat transfer, humidity control
Professor Irvin L. Reis  
Probabilistic design, mathematical models, management engineering
Professor Bruce G. Rogers  
Ultimate load characteristics of structures, stress analysis
Associate Professor Ramon S. Satterwhite  
Electromagnetic fields and waves
Professor George B. Tims, Jr.  
Engineering management
Associate Professor Bobby R. Waldron  
Mathematical statistics, computer science
Professor Richard E. Walker  
Rheology, analog-hybrid computers
Associate Professor Joseph T. Watt  
Digital systems, control, and analog computers
Associate Professor Carl L. Yaws  
Physical and thermodynamic properties, solar energy

Associate Members

Associate Professor John A. Bruyere  
Material science
Assistant Professor Carl Carruth  
Work design and measurement, human factors and motivation
Assistant Professor William E. Morgan  
Environmental engineering
Assistant Professor L. Wayne Sanders  
Heat transfer, air pollution control, fluid mechanics

The graduate student will select his engineering courses from the following:

*531 — Materials Science. Principles underlying the behavior of materials existing in the solid, liquid, and gaseous phases. Class: 3 hours. Credit: 3 semester hours.

*533 — Computer Methods in Engineering Analysis. Computer techniques will be introduced and employed. Numerical methods for solving transcendental equations, polynomials, simultaneous linear algebraic equations, and partial differential equations. Monte Carlo method, random numbers and simulation of engineering systems will be introduced. Class: 3 hours. Credit: 3 semester hours.

534 — Nonlinear Analysis. Various methods of solving nonlinear differential equations are studied. Analytical, graphical, and computer solutions are included. Class: 3 hours. Credit: 3 semester hours.

*Core Courses. A core course may be repeated one time for graduate credit, upon prior approval, where course content varies.
*535 — Control Theory. Introduction to state variables; multiple-input-multiple-output systems; controllability; performance criteria; choice of control strategy. Class: 3 hours. Credit: 3 semester hours.

*536 — Thermodynamics-Process Industry. Thermodynamic laws are derived and applied to physical chemical phenomena. Ideal and non-ideal gas, liquid, and solid solution behavior are developed for physical and chemical equilibria. Statistical and irreversible thermodynamics are introduced. Course credit in chemistry is optional. Class: 3 hours. Credit: 3 semester hours.

*537 — Thermodynamics-Energy Conversion. The basic laws of thermodynamics are derived and applied in the analysis of power cycles, energy conversion, and specific processes. Basic principles of irreversible thermodynamics and phenomenological relations are presented. An elementary statistical approach is presented with simple examples of the calculation of the transport properties of gases, liquids, and solids. Class: 3 hours. Credit: 3 semester hours.

538 — Sampled Data Control Systems. Principles of digital and sampled-data control systems. Analysis of response, stability, and compensation by transforms and other methods; special topics as time permits. Prerequisite: Mth 4301G. Class: 3 hours. Credit: 3 semester hours.

539 — Seminar. Investigation of current engineering practices, research, and literature. The course may be repeated for credit when the subject matter differs. Class: 3 hours. Credit: 3 semester hours.

5303 — Regression Analysis. Review of regression analysis; theory of least squares; multivariate analysis; theory of the general linear hypothesis model. Class: 3 hours. Credit: 3 semester hours.

5304 — Nonlinear Programming. Theory of linear and nonlinear programming; the lambda and delta-form of the approximating problem; quadratic programming; gradient methods. Class: 3 hours. Credit: 3 semester hours.

5305 — Reliability. Statistical theories pertinent to solution of engineering problems in reliability; distribution and failure theory including failure rate and mean time to failure for the exponential, log normal, gamma, and Weibull distributions. Class: 3 hours. Credit: 3 semester hours.

5308 — Cost and Optimization Engineering. Includes the mathematics of cost comparisons, profitability, and optimization with emphasis on processing, cost estimation, and control. Class: 3 hours. Credit: 3 semester hours.

5311 — Heat Transfer Analysis. Fundamental principles of heat transfer by conduction, convection and radiation. Emphasis will be given to the analysis of problems combining the various heat transfer mechanisms. Class: 3 hours. Credit: 3 semester hours.

5312 — Heat Transfer Mechanisms. This course will be concerned with individual mechanisms of heat transfer. The mechanisms studied will be conduction, radiation, convection, or boiling. The course may be repeated for credit as the mechanism studied varies. Class: 3 hours. Credit: 3 semester hours.

5313 — Fluid Mechanics. Fluid statics, fundamentals of fluid motion, systems and control volumes, basic laws, irrotational flow, similitude and dimensional analysis, incompressible viscous flow, boundary layer theory, and an introduction to compressible flow. Vector methods will be employed. Class: 3 hours. Credit: 3 semester hours.

5314 — Hydraulic Engineering. Design considerations of hydraulic systems including closed and open channel flow together with related hydraulic accessories. Class: 3 hours. Credit: 3 semester hours.

*Core courses. A core course may be repeated one time for graduate credit, upon prior approval, where course content varies.
5315 — Theory of Elasticity. General analysis of stress and strain, equations of equilibrium and compatibility, stress and strain relations, two dimensional stress problems, elastic energy principles, thermoelastic problems. Class: 3 hours. Credit: 3 semester hours.

5316 — Operations Research I. The use of advanced mathematical models for optimizing engineering problems with emphasis on management decisions. Includes special techniques based on systems analysis, design of experiments, linear programming, queuing, simulation, and probabilistic analysis. Class: 3 hours. Credit: 3 semester hours.

5318 — Stress Analysis. Use of reflection and refraction photoelastic apparatus to determine state of stress in opaque and transparent structural models. Demonstration of brittle coating techniques. Comparison of electrical resistance and mechanical strain gages. Investigation of dynamic loading with oscilloscopes and other recording apparatus. Class: 3 hours. Credit: 3 semester hours.

5319 — Design of Experiments. Experimental design and analysis of experiments are developed as tools of the manufacturing and process industries. Exploratory and evolutionary (EVOP) designs, analysis of variance (ANOVA), error, and regression are treated in some detail. Prerequisite: Course in statistics or equivalent. Class: 3 hours. Credit: 3 semester hours.

5321 — Quality Control Systems. Application of statistical methods to industrial problems; regression and correlation theory; analysis of variance; use of control charts for control of manufacturing operations. Class: 3 hours. Credit: 3 semester hours.

5322 — Rheology. A study of non-Newtonian liquids with emphasis on principles and fundamentals. Methods of measuring rheological properties of non-elastic and elastic liquids are developed. Laminar and turbulent flow characteristics are reviewed. Class: 3 hours. Credit: 3 semester hours.

5325 — Information Theory. Aspects applicable to all fields of engineering. Entropy as a measure of information; signal processing, channel capacity and coding theory. Class: 3 hours. Credit: 3 semester hours.

5326 — Waves and Coastal Processes. Hydrodynamics of waves, wave generation, reflection, energy transmission and dissipation. Coastal phenomena, harbors and breakwaters, analysis of tides and tidal currents. Salt water, fresh water interaction and diffusion in estuaries: erosion and shoaling in tidal waters. Class: 3 hours Credit: 3 semester hours.

5327 — Numerical Methods of Structural Analysis. Matrix methods applied to analysis of trusses, beams and frames. Class: 3 hours. Credit: 3 semester hours.

5329 — Water and Waste Analysis. Fundamental treatment of sanitary chemistry and microbiology; an intensive study of basic laboratory techniques and instrumentation. Class: 3 hours. Credit: 3 semester hours.

5330 — Wastewater Treatment. Principles of treatment for domestic and industrial wastewaters with emphasis on process kinetics. Class: 3 hours. Credit: 3 semester hours.

5331 — Similitude and Model Design. Dimensional analysis, data processes, prediction equations and model design, including a study of distorted and dissimilar models. Models studied include structural fluid flow, thermal, electrical, magnetic, acoustical, and illumination types. Various analogues from second-order ordinary and partial differential equations are also discussed. Prerequisite: Mth 434G recommended. Class: 3 hours. Credit: 3 semester hours.

5332 — Operations Research II. Advanced topics in operations research-linear programming, non-linear programming, advanced topics in queuing and inventory theories, sensitivity analysis, and dynamic programming. Prerequisite: EGR 5316 or equivalent. Class: 3 hours. Credit: 3 semester hours.

5333 — Production Control. Advanced topics in techniques employed in different types of manufacture for planning and controlling production. Class: 3 hours. Credit: 3 semester hours.

5334 — Salary Administration for Engineers and Scientists. A study of salary incentives, job evaluation, and merit rating for engineering and scientific personnel, executive and managerial compensation. Class: 3 hours. Credit: 3 semester hours.

5335 — Engineering Administration. The qualitative and quantitative responsibilities of the engineer as an administrator. The planning, organization and control of engineering functions. Class: 3 hours. Credit: 3 semester hours.

5336 — Operations Research III. Recent advances in the methodology and philosophy of Operations Research. Prerequisite: Consent of instructor. Class: 3 hours. Credit: 3 semester hours.

5337 — System Simulation. Study of the design, construction, testing, and operation of process models for simulation. Starting with simple hand-computed simulations, the student progresses to relatively complex models requiring the use of a high-speed digital computer. Class: 3 hours. Credit: 3 semester hours.

5338 — Reclamation Engineering Seminar. Investigations of the reclamation of water resources by multiple use, reuse and improvement of existing sources to meet quality requirements. Class: 3 hours. Credit: 3 semester hours.

5340 — Kinetics. Rate equations are developed by the application of statistical methods and the theory of absolute reaction rates. Partition functions and potential energy surfaces will be introduced. Considerable attention will be given to the measurement of reaction rates and the interpretation of experimental data. May be taken for graduate credit in chemistry or engineering. Class: 3 hours. Credit: 3 semester hours.

5341 — Mass-Transfer Operations. The principles of diffusion and mass transfer are considered. The study of gas-liquid operations includes humidification, and design of equipment. Solid-fluid studies include adsorption, ion exchange, drying and leaching operations. Less conventional mass-transfer operations are also considered. Class: 3 hours. Credit: 3 semester hours.
5343 — Industrial Waste Treatment. Procedures for analysis of the industrial waste problem, methods of collecting experimental data; and process design for required treatment. Case studies and special laboratory problems for translating experimental data to prototype design. Class: 3 hours. Credit: 3 semester hours.

5344 — Process Modeling. An introduction to the basic concepts of mathematics modeling. The subject matter is directed toward chemical and petroleum engineering design and operation. Development of models which form the framework of a quantitative and scientific approach to technical problems will be followed by analytical and/or numerical solutions to optimize output and profitability. Class: 3 hours. Credit: 3 semester hours.

5345 — Reactor Design I. Basic principles of reactor design are presented. The primary goal is the successful design of chemical reactors. Major reactor types are treated, giving particular attention to their performance capabilities. Class: 3 hours. Credit: 3 semester hours.

5347 — Manufacturing Analysis. The course is designed to provide the background analysis required to understand manufacturing operations and to predict manufacturing behavior. It includes material behavior, metal cutting, metal forming, new and unconventional cutting and forming techniques, machine tool vibration, and manufacturing cost optimization. Class: 3 hours. Credit: 3 semester hours.

5348 — Probabilistic Design. Application of algebra of normal function to engineering design. Distributive nature of stresses, strengths, and times. Realistic versus idealized design procedures. Class: 3 hours. Credit: 3 semester hours.

5350 — Unit Operations of Environmental Engineering. Theory of fluid and slurry movement under gravity and pressure systems, mixing processes, coagulation and flocculation of chemical treatment, separatory processes including flotation and sedimentation, and gas transfer and absorption of the biological systems. Selected laboratory assignments for model studies of these unit operations. Class: 3 hours. Credit: 3 semester hours.

5351, 5352, 5353 — Electric Power Systems Analysis I, II, III. A three-semester sequence, selected from: symmetrical components, impedance and fault-current calculations, load-flow studies, economic operation, stability and control, system modeling, non-fossil fuel energy conversion. Both analytical and digital-computer methods may be employed as appropriate. Class: 3 hours. Credit: 3 semester hours each.

5354 — Nuclear Power Plants. Nuclear reactor neutron kinetics; core reactivity effects of control poisons, coolant and fuel temperatures, fission product poisons; self regulation, automatic control; startup and shut-down; types of nuclear plants foreseen in electric power generation; special problems and benefits of nuclear power plants. Class: 3 hours. Credit: 3 semester hours.

5355 — Random Signal Theory. Basic concepts of probability theory, correlation functions, power-density spectrum and mean-square error criteria as applied to stationary stochastic processes in linear systems; optimum filtering and prediction and other
special topics depending upon class interest and time available, such as: nonlinear
devices, time-varying systems, non-stationary processes. Class: 3 hours. Credit: 3
semester hours.

5356 — Modern Control Theory. Review of state variables; determining mathemati-
cal models from input-output data; on-off control systems; optimal control. Class: 3
hours. Credit: 3 semester hours.

5357 — Electromagnetic Fields and Waves. Maxwell's equations and various field
theorems derived from them. Boundary value problems including plane wave interac-
tion with planar and cylindrical objects. Source-excited boundary value problems.
Green's functions. Microwave optics. Class: 3 hours. Credit: 3 semester hours.

5358 — Scientific Writing and Editing. Supervised presentation of technical and
scientific projects for students proficient in exposition. Projects subject to depart-
ment's and instructor's approval. Prerequisite: Instructor's consent and departmental
approval. Class: 3 hours. Credit: 3 semester hours.

5359 — Seminar in Engineering Administration. Direct reading, analysis and research
in the classic and modern literature of engineering administration. Class: 3 hours.
Credit: 3 semester hours.

5360 — Case Problems in Engineering Administration. The case method applied to
complex administration problems encountered by engineers. May be repeated for
credit where subject matter differs. Class: 3 hours. Credit: 3 semester hours.

5361 — Microelectronic Integrated Circuits. A basic study of the synthesis of
semiconductor and thin film integrated circuits using passive and active elements. The
application of such devices to computers, signal processors and instruments. Class: 3
hours. Credit: 3 semester hours.

5362 — Decision-Making Processes. A study of the bases and philosophical impli-
cations of executive decision-making. Elementary game theory, minimax and other
strategies. Bayesian interference, subjective probability, teleology of measurement.
Prerequisite: Consent of instructor. Class: 3 hours. Credit: 3 semester hours.

5363 — Administrative Control Systems. Problems affecting the engineer in his de-
sign, analysis and control of information systems. Class: 3 hours. Credit: 3 semester
hours.

5364 — Digital System Engineering. Review of combinational and sequential logic;
organization of digital computers; data representation and transfer; arithmetic opera-
tions; storage and access; control functions. Class: 3 hours. Credit: 3 semester hours.

5365 — Industrial Planning. Industrial planning and decisions. Plant location,
design, evaluation. Symbolic logic, relative importance factors, probabilistic models,
fiscal factors. Class: 3 hours. Credit: 3 semester hours.

5366 — Advanced Engineering Economy. Special economic analyses based on risk,
uncertainty, and other probabilistic considerations. Bayesian attacks, influence of per-
fect information, competitive decisions and decisions under pressure. Class: 3 hours.
Credit: 3 semester hours.

5367 — Nuclear Reactor Theory. Nuclear fission; neutron diffusion, moderation,
and absorption; Fermi age treatment; reactor materials and shielding. Class: 3 hours.
Credit: 3 semester hours.

5371 — Seminar in Administrative Practices. Study of the interrelationships between
the fields of economics, politics, physical science and social science and the effects upon
the management of engineering work. Class: 3 hours. Credit: 3 semester hours.
5375-5390 — Special Topics. The course is designed to meet special needs of students. Each topic is offered on an irregular schedule as the demand requires. Example topics include:

1. Kinetic Theory of Gases
2. Transients in Compressible Flow
3. Non-linear Vibrations
4. Protective Construction
5. Transients in Engineering Systems
6. Stagewise Mass Transfer

Class: 3 hours. Credit: 3 semester hours.

5391 — Work Systems Engineering. Study of current research in methods engineering and work measurement; work design; work systems; systems of standard data and predetermined motion time data, statistical treatment of work measurement. Class: 3 hours. Credit: 3 semester hours.

5392 — Special Topics. The course is designed to meet special needs of students. Each topic is offered on an irregular schedule as the demand requires for electrical engineering students. Class: 3 hours. Credit: 3 semester hours.

5399 — Human Factors Engineering. The specialized adaptation of engineering designs to the human operator's role in man-machine systems. Class: 2 hours. Laboratory: 3 hours. Credit: 3 semester hours.

5101, 5201, 5301, 5401, 5501, 5601 — Institute in Engineering. Designed to advance the professional competence of participants. For each institute, a description of the particular area of study will be indicated. May be repeated for credit when nature of institute differs sufficiently from one previously taken. Class: 1-6 hours. Credit: 1-6 hours.

631 — Design Project. Prerequisite: admission to candidacy. Credit: 3 semester hours.

632 — Justification of Engineering Projects. The preparation of proposals for advanced engineering work. The student will be given individual assistance in preparing a proposal for his field study. Prerequisite: Satisfactory scores on diagnostic exam and approval of advisory committee. Class: 3 hours. Credit: 3 semester hours.

6340 — Distillation. Material and energy-balance relationships are reviewed for multi-component fractionation equipment and for batch stills. Various plate designs are presented from the standpoint of two-phase hydraulics and mass-transfer efficiency. Class: 3 hours. Credit: 3 semester hours.

6341 — Absorption. The theoretical aspects of gas-phase and liquid-phase diffusion systems are presented, and empirical correlations for diffusion coefficients are critically surveyed. Equipment for gas-liquid operations, and the estimation of gas-liquid solubilities, are discussed. The principles of gas adsorption will be applied to chemical reactions occurring on the surface of solid catalysts and on liquid surfaces. Class: 3 hours. Credit: 3 semester hours.

6342 — Extraction. The thermodynamics of nonideal solutions is reviewed, and the prediction of ternary solubility relationships from binary solution data is thoroughly developed. The quantitative design of equipment for liquid-liquid extractions is given considerable emphasis. Both multistage and continuous contact equipment are considered. Class: 3 hours. Credit: 3 semester hours.

6343 — Reactor Design II. Emphasis is placed on complex reactor design. Attention is devoted to chemical kinetics and catalysis as well as to the engineering aspects of both homogeneous and heterogeneous reactors. Mixing problems are discussed in
terms of residence time distribution. The importance of temperature effects is stressed. Prerequisite: Egr 5345 or equivalent. Class: 3 hours. Credit: 3 semester hours.

6350 — Reactor Plant Dynamics. Operating characteristics of reactor systems; modeling of neutronic, fluid, heat transfer and fluid processes; dynamics, stability and control of reactor plant systems; engineered safeguards. Prerequisite: Egr 5354 or equivalent. Class: 3 hours. Credit: 3 semester hours.

6351 — Nuclear Reactor Kinetics. Development of kinetics equations; special topics in space-time kinetics, noise analysis, rod oscillator tests, xenon stability, special control problems. Prerequisite: Egr 5354 or equivalent. Class: 3 hours. Credit: 3 semester hours.

661 — Engineering Practice. An internship period under personal supervision. Approval must be obtained from the student’s graduate committee. Usually, a formal proposal will be required. Prerequisite: Consent of advisor. Total credit: 6 semester hours.

662 — Engineering Practice. An internship period under personal supervision. Approval must be obtained from the student’s graduate committee. Usually, a formal proposal will be required. Prerequisite: Egr 632 and consent of advisor. Total credit: 6 semester hours. Must be repeated for credit until Field Study is completed.

669A-669B — Thesis. Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.

Below is the approved list of 400G level courses which may be taken with augmented requirements for graduate credit, subject to approval by the graduate advisor. Course descriptions may be found in the Bulletin of Lamar University.

ChE 435G — Advanced Analysis
ChE 437G — Computer Applications
ChE 4111G — Seminar
ChE 4316G — Stagewise Processes
ChE 4318G — Advanced Distillation
ChE 4321G — Process Economics
ChE 4322G — Unit Operations
ChE 4323G — Engineering Materials
ChE 4325G — Introduction to Nuclear Engineering
CE 430G — Indeterminate Structures
CE 433G — Environmental Health Engineering
CE 434G — Soil Engineering
CE 435G — Water and Waste Water Treatment
CE 438G — Reinforced Concrete Design
CE 439G — Structural Steel Design
CE 4310G — Soil-Structure Interaction
CE 4312G — Advanced Structural Design
CS 439G — Scientific Computer Application
CS 4307G — Survey of Programming Languages
CS 4309G — Introduction to Simulation Techniques
CS 4315G — Numerical Analysis
CS 4316G — Numerical Analysis II
EE 432G — Electronics III
EE 434G — Network Synthesis
EE 436G — Control Engineering
EE 437G — Electromagnetic Fields II
EE 4302G — Communication Theory
EE 4303G — Logical Design of Switching Systems
EE 4304G — Advanced Topics
Egr 438G — Introductory Petroleum Engineering
IE 411G — Industrial Engineering Seminar II
IE 430G — Quality Assurance and Control
IE 432G — Statistical Decision Making for Engineers
IE 435G — Production and Inventory Control
IE 436G — Design of Production Facilities
IE 437G — Operations Research
IE 4302G — System Analysis and Design
IE 4303G — Linear Programming
IE 4313G — Human Engineering
IE 4315G — Organization and Management
ME 431G — Engineering Systems Design
ME 432G — Mechanical Vibrations
ME 434G — Internal Combustion Engines
ME 435G — Turbomachinery
ME 438G — Environmental Systems Engineering
ME 439G — Advanced Strength of Materials
ME 4311G — Controls Engineering
ME 4312G — Gas Dynamics
ME 4313G — Transport Theory II
ME 4315G — Thermodynamics III
ME 4316G — Engineering Project
ME 4317G — Engineering Analysis II
Department of English

Degree Requirements

The degree of Master of Arts in English requires the completion of 30 semester hours of graduate work: 18 in English, six in thesis and six in an approved minor. With the approval of the Head of the Department of English, 12 semester hours of course work may be substituted for the thesis. At least 18 semester hours, including the thesis, must be in English courses numbered 500 or above. The minor must be approved by the Head of the Department of English, or with his approval, six additional hours in English may be substituted for the minor.

Professional Certification Requirements (Texas) in English

The plan for the Professional Certificate — Secondary requires the completion of 30 semester hours of graduate work: 18 in English, six in resource areas, and six in approved teacher education. At least 12 semester hours must be in English courses numbered 500 or above. The courses in the resource areas must be approved by the Head of the Department of English; such approval will be given on the basis of the support they can give to the major and on the specific needs of the graduate student. The six semester hours of teacher education must be taken in courses specifically approved for the Professional Certificate — Secondary.

Depending on the student’s undergraduate course work, his graduate program in English will include Eng 4327G, 533 and 539, and one course from either 535, 536, 537 538 or 5311.

GRADUATE FACULTY

Members

Professor Robert J. Barnes
  British and Continental literature: 1840 to the present
Professor George W. de Schweinitz
  Modern American literature, creative writing
Professor Winfred S. Emmons, Jr.
  Middle English language and literature, American literature
Professor Harry L. Frissell
  Seventeenth century British literature
Associate Professor Marilyn D. Georgas
  Renaissance and Victorian literature
Associate Professor Olga D. Harvill
  British Romantic literature
Associate Professor Kirkland C. Jones
  Medieval and Renaissance literature
Associate Professor Elizabeth M. Meeks
  American literature and English education
Professor Robert C. Olson
  Eighteenth century British literature
Associate Professor Jack N. Renfrow
  Renaissance literature: dramatic
Professor Henry B. Rule
  American literature: 1840 to the present
The graduate student will select his English courses from the following list:

533 — Special Topics in Old and Middle English Language And Literature. Intensive study of the language necessary for reading literature of the period focused on. Course may be repeated for a maximum of six semester hours credit when the topic varies. Prerequisite: graduate standing and Eng 430G or 431G. Class: 3 hours. Credit: 3 semester hours.

535 — Special Topics in Renaissance and Seventeenth Century English Literature. An intensive study of an author or related authors selected from the period. Course may be repeated for a maximum of six semester hours credit when the topic varies. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

536 — Special Topics in Restoration and Eighteenth Century English Literature. An intensive study of an author or related authors selected from the period. Course may be repeated for a maximum of six semester hours credit when the topic varies. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

537 — Special Topics In Nineteenth Century English Literature. An intensive study of an author or related authors selected from the period. Course may be repeated for a maximum of six semester hours credit when the topic varies. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

538 — Special Topics in Twentieth Century Literature. An intensive study of an author or related authors selected from the period. Course may be repeated for a maximum of six semester hours credit when the topic varies. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

539 — Special Topics in American Literature. An intensive study of an author or related authors selected from the period. Course may be repeated for a maximum of six semester hours credit when the topic varies. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

5311 — Special Topics in Comparative Literature. Intensive study of an author or authors, genre, or period selected from the range of world literature. Emphasis on analysis and literary method. Course may be repeated for a maximum of six semester hours credit when the topic varies. Class: 3 hours. Credit: 3 semester hours.

669A-669B — Thesis. Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.

Below is the approved list of 400G level courses which may be taken with augmented requirements for graduate credit, subject to approval by the graduate advisor. Course descriptions may be found in the Bulletin of Lamar University.

430G — History of the English Language
432G — Studies in Sixteenth Century Literature
434G — Shakespeare
435G — Studies in Seventeenth Century Literature
438G — Studies in Eighteenth Century Literature
439G — Studies in Romantic Literature
4311G — Studies in Victorian Literature
4312G — Studies in Language and Linguistics
4317G — Contemporary Drama
4318G — Contemporary Poetry
4319G — Contemporary Fiction
4322G — Russian Literature
4325G — Language: Sound and Meaning
4326G — Expository Writing
4327G — Bibliography and Methods of Research
4328G — Early American Literature
4329G — Modern American Literature
4333G — Studies in a Particular Author
4334G — Critical Studies in Literature
Department of Geology

The Department of Geology offers the following graduate courses to be used primarily as a support to other advanced degree programs.

GRADUATE FACULTY

Members

Professor H. E. Eveland
  Geomorphology, glacial geology
Professor William H. Matthews, III
  Paleontology, stratigraphy
Associate Professor William R. Pampe
  Paleontology, meteorology, stratigraphy

5301, 5601 — Institute in Earth Science. Summer, in-service or other institute for earth science teachers, with emphasis on Earth Science Curriculum Project materials and techniques. Class: 3-6 hours. Laboratory: 3-9 hours. Credit: 3-6 semester hours.
Department of Government

The Department of Government offers programs of study leading to the Master of Arts in Government degree and the Master of Public Administration degree. Persons seeking admission to either program must meet the general requirements for admission that are outlined in the Graduate catalog. An applicant must have completed a bachelor's degree in government or political science, or if the degree is in another area, a minimum of 24 semester hours of undergraduate courses in government. Twelve of the 24 hours must be on the junior and senior level.

Degree Requirements

The degree of Master of Arts in Government requires the completion of 30 semester hours of graduate work: 18 in government, six in thesis, and six in an approved minor. With the approval of the Head of the Department of Government, 12 semester hours of course work may be substituted for the thesis. At least 18 semester hours, including the thesis, must be in government courses numbered 500 or above. The minor must be approved by the Head of the Department of Government or with his approval six additional hours in government may be substituted for the minor.

The student's graduate program must include Government 530.

The degree of Master of Public Administration requires the completion of 36 semester hours of graduate work: 21 in the core curriculum and 15 from the approved list of courses. The applicant must have completed the following undergraduate courses or their equivalents: urban politics, three semester hours; introduction to public administration, three semester hours; statistics for social scientists, three semester hours. A foreign language is not required.

GRADUATE FACULTY

Members

Associate Professor William M. Pearson
  Public administration
Professor Manfred Stevens
  Comparative government, Europe
Professor William R. Tucker
  Political thought

Associate Members

Assistant Professor Bruce Drury
  Latin American government and the developing areas
Assistant Professor Elbert T. Dubose, Jr.
  Public administration
Assistant Professor Boyd Lanier
  International relations
Assistant Professor Glenn Utter
  Theory and methodology

The graduate student in the MA program will select his government courses from the following list:

530 — Scope and Methods of Political Science. The study in depth of selected topics concerning the theoretical foundations underlying a scientific approach to the study of
political phenomena and analytical techniques to be applied to a study of political behavior. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

531 — Seminar in Political Theory. Selected issues in political thought with emphasis on the classical thinkers and their relationship to contemporary political, economic and social problems. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

534 — Seminar in American Government and Politics. A survey of the literature in the field of American government and politics. Classical and contemporary works are examined, with emphasis on the modern approaches to the study of American government and politics. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

535 — Seminar in Administrative Theory. An examination of major theories dealing with organizations and their characteristics, scope, and effect on public administration and executive behavior. Emphasis will be placed on the relationships between theories and supporting empirical research. Class: 3 hours. Credit: 3 semester hours.

536 — Seminar in International Relations. The study in depth of selected problems in international relations both historical and current. Problems of a theoretical, legal and institutional nature as well as specific policies will be dealt with. Class: 3 hours. Credit: 3 semester hours.

537 — Seminar in Comparative Study of Political Systems. Study of the theory and method of comparative political analysis; systematic examination and explanation of the structure and function of Western and non-Western political systems. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

669A-669B — Thesis. Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.

Below is the approved list of 400G level courses which may be taken with augmented requirements for graduate credit, subject to approval by the graduate advisor. Course descriptions may be found in the Bulletin of Lamar University.

430G — Organization Theory and Behavior
433G — Contemporary Political Thought
434G — Formulation of Public Policy
435G — The International System
436G — American Constitutional Law and Development
437G — American Constitutional Law and Development
439G — Comparative Public Administration
4381G — Government and Politics of the Soviet Union
4382G — Government and Politics of East Asia
4383G — Government and Politics of Latin America

The graduate student in the MPA program is required to complete the following core curriculum of 21 hours:

535 — Seminar in Administrative Theory. An examination of major theories dealing with organizations and their characteristics, scope, and effect on public administration and executive behavior. Emphasis will be placed on the relationships between theories and supporting empirical research. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

5351 — Seminar in Personnel Administration. Personnel theory and practice in the public setting. The basic methods and functions of personnel administration in the
context of public organizations; employee motivation, employee relations and collective bargaining will be emphasized. Class: 3 hours. Credit: 3 semester hours.

5352 — Seminar in Fiscal Administration. The study of formulation and administration of government budgeting, including the role of the budget in the policy process, approaches to budget formulation and analysis, the development of the PPB approach, and other basic concepts and practices in government budget and finance administration. Class: 3 hours. Credit: 3 semester hours.

5353 — Seminar in Public Policy Formulation. The process of policy-making within governmental agencies and within the total political process. Emphasis will be placed on decision-making, public policy analysis, and policy implementation. Class: 3 hours. Credit: 3 semester hours.

5354 — Seminar in Special Studies in Public Administration. Analysis of selected problems in public administration; urban and regional planning and management, administrative reorganization, the environment, and related problems. Class: 3 hours. Credit: 3 semester hours.

5358 — Internship. Practical administrative experience in a local, state, regional, or federal office or agency that is the equivalent of one-half time for one semester (full-time in a Summer semester). Examinations and reports on practices and problems in agencies are required. This course may be waived for students already employed in an administrative capacity in a governmental agency if they elect three additional hours from the approved program courses. Class: Time arranged. Credit: 3 semester hours.

5359 — Internship. Practical administrative experience in a local, state, regional, or federal office or agency that is the equivalent of one-half time for one semester (full-time in a Summer semester). Examinations and reports on practices and problems in agencies are required. This course may be waived for students already employed in an administrative capacity in a governmental agency if they elect three additional hours from the approved program courses. Prerequisite: Gov 5358. Class: Time arranged. Credit: 3 semester hours.

The graduate student in the MPA program will select an additional 15 hours to the 21 hour core requirement with the approval of the graduate advisor.
Department of History

Degree Requirements

The degree of Master of Arts in History requires the completion of 30 semester hours of graduate work: 18 in history, six in thesis, and six in an approved minor. At least 12 semester hours, exclusive of thesis, must be in history courses numbered 500 or above, and six of these must be in seminar courses. With the approval of the Head of the Department of History, 12 semester hours of course work may be substituted for the thesis. In this latter program, at least 18 semester hours of course work must be in courses numbered 500 or above, and nine of these must be in seminar courses. The minor must be approved by the Head of the Department of History; such approval will be given on the basis of the support the minor can give to the major. With the approval of the Head of the Department of History, six additional hours in history may be substituted for the minor.

Graduate Faculty

Members

Associate Professor Adrian N. Anderson
United States history, revolution, early national

Associate Professor Howell Holmes Gwin, Jr.
European history, classical and medieval

Professor Paul E. Isaac
United States history, recent, the West

Associate Professor William W. MacDonald
Modern European history, Great Britain

Professor Howard Mackey
Modern European history, Great Britain

Professor L. Wesley Norton
United States history, social and intellectual

Associate Professor R. Beeler Satterfield
United States history, middle period

Associate Professor John W. Storey
United States history, urban, social and intellectual

Associate Professor Walter A. Sutton
United States history, diplomatic

Professor Preston B. Williams
Modern European history, Central and Western Europe

Professor Ralph A. Wooster
United States history, Civil War, the South

The graduate student will select history courses from the following list:

530 — Classical and European Historiography. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

531 — American Historiography. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.
532 — Readings in American History. Course may be repeated for a maximum of six semester hours credit when topic varies. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

533 — Readings in European History Before 1815. Course may be repeated for a maximum of six semester hours credit when the topic varies. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

534 — Readings in European History Since 1815. Course may be repeated for a maximum of six semester hours credit when the topic varies. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

535 — Seminar in Texas History. Course may be repeated for a maximum of six semester hours credit when the topic varies. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

536 — Seminar in Southern History. Course may be repeated for a maximum of six semester hours credit when the topic varies. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

537 — Seminar in United States History. Course may be repeated for a maximum of six semester hours credit when the topic varies. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

539 — Seminar in the American West. Course may be repeated for a maximum of six semester hours credit when the topic varies. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

5311 — Seminar in European History. Course may be repeated for a maximum of six semester hours credit when the topic varies. Prerequisite: graduate standing. Class: 3 hours. Credit: 3 semester hours.

669A-669B — Thesis. Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.

Below is the approved list of 400G level courses which may be taken with augmented requirements for graduate credit, subject to approval by the graduate advisor. Course descriptions may be found in the Bulletin of Lamar University.

430G — Era of the Renaissance and Reformation
431G — The Old Regime
432G — The French Revolution and Napoleon
433G — Russia and Eastern Europe to 1860
434G — Nineteenth Century Europe
435G — Twentieth Century Europe
436G — The American West
437G — The Old South
438G — The New South

Department of Mathematics

The Department of Mathematics offers a program of study leading to the Master of Science degree in Mathematics (M.S.). Those seeking admission to this program must meet the general requirements as set forth in this catalog for admission to the College of Graduate Studies. In addition, the applicant’s 24 semester hours of undergraduate work in mathematics must include a course in advanced calculus or its equivalent.

Degree Requirements

The Master of Science degree in Mathematics requires the completion of 30 semester hours of graduate work if student elects to write a thesis, or 36 semester hours of graduate work if student does not write a thesis. If a thesis is written, six of the 30 semester hours are expected to be Mth 669A and Mth 669B-Thesis. Degree plans may include as many as nine semester hours in an approved minor field, or a student may elect to take all of his work in mathematics. All degree plans must show a minimum of 18 semester hours of mathematics courses on the 500 level or above.

Members

Associate Professor George Berzsenyi
  Analysis, problem solving
Professor Russell W. Cowan
  Differential equations, applied mathematics
Professor Sterling C. Crim
  Applied mathematics
Professor Philip W. Latimer
  Analysis, modern elementary mathematics
Associate Professor William C. Nylin
  Computer Science
Associate Professor Richard L. Price
  Mathematics education
Associate Professor David Read
  Topology, analysis
Professor Jeremiah M. Stark
  Analysis, applied mathematics

Associate Members

Associate Professor Joseph A. Baj, II
  Topology, analysis
Associate Professor Mary Katherine Bell
  Mathematics education
Associate Professor Sam M. Wood, Jr.
  Analysis, abstract algebra

For mathematics majors:

531 — Theory of Functions of Real Variable. Analytical functions, pathological functions, set functions, Riemann integral, measure theory, Lebesque integral, Riemann-Stieltjes and Lebesque-Stieltjes integral. Class: 3 hours. Credit: 3 semester hours.

532 — Modern Algebra. Numbers, sets, rings, fields, polynomials, and the theory of fields. The theory of fields includes the study of subfields, prime fields, simple field
extensions, algebraic field extensions, and Galois fields. Class: 3 hours. Credit: 3 semester hours.

533 — Calculus of Variations. The Euler-Lagrange differential equation, necessary conditions of Legendre, Jacobi, and Weierstrass, sufficient conditions for an extreme brachistochrone problem, geodesics, surface of revolutions of minimum area, other problems as time permits. Class: 3 hours. Credit: 3 semester hours.

534 — Topology. Sets, compact spaces, topological spaces, embedding and metrization, and Urysohn lemma. Uniform spaces and function spaces as time permits. Class: 3 hours. Credit: 3 semester hours.

535 — Introduction to Advanced Analysis. The Riemann mapping theorem, prime number theorem, functions of finite order, Turan's proof of Fabry gap theorem, other topics as time permits. Prerequisite: Mth 431G. Class: 3 hours. Credit: 3 semester hours.

537 — Methods of Applied Mathematics. The Dirichlet problem, solution of boundary value problems, the Bergman kernel function, method of the minimum integral, applications of conformal mapping. Prerequisite: Mth 431G. Class: 3 hours. Credit: 3 semester hours.

539 — Infinite Series. Sequences, power series, series of functions, complex series; expansion of functions, tests for convergence, uniform convergence, conditions for rearranging terms in a series, Fourier series, Lambert series, Weierstrass theorem on double series, asymptotic expansions, summation of series. Class: 3 hours. Credit: 3 semester hours.

5301 — Operational Mathematics. Ordinary differential equations, the Laplace Transform, elementary properties; Inverse Transforms, applications of the Laplace Transform to ordinary differential equations. Class: 3 hours. Credit: 3 semester hours.

5302 — Operational Mathematics. Application of Laplace Transform to partial differential equations, boundary-value problems and characteristics, function representation. Class: 3 hours. Credit: 3 semester hours.

5311 — Complex Variables. Conformal mapping and analytic continuation, calculus of residues, hydrodynamics, and asymptotic expansions. Class: 3 hours. Credit: 3 semester hours.

5331 — Special Topics for Graduate Students. Advanced topics in mathematics to suit the needs of individual classes of graduate students. Course may be repeated for a maximum of six semester hours credit when the topic varies. Class: 3 hours. Credit: 3 semester hours.

669A-669B — Thesis. Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.
Below is the approved list of 400G level courses which may be taken with augmented requirements for graduate credit, subject to approval by the graduate advisor. Course descriptions may be found in the Bulletin of Lamar University.

- 431G — Complex Variables
- 433G — Vectors and Matrices
- 434G — Partial Differential Equations
- 435G — Introductory Topology
- 437G — Probability and Statistics
- 438G — Statistical Methods
- 430IG — Advanced Calculus for Engineers I
- 4302G — Advanced Calculus for Engineers II
- 4315G — Numerical Analysis
- 4316G — Numerical Analysis II
- 4317G — Topics in Advanced Mathematics
- 439G — Scientific Computer Applications (Computer Science)

**Mathematics—Education**

- **5321 — Foundations I.** Basic set theory and mathematical logic, introduction to axiomatic systems, the role of definitions, theorems, examples, intuition versus rigor in mathematics, constructive foundation for the real number system, its algebraic and topological properties. Class: 3 hours. Credit: 3 semester hours.
- **5322—Foundations II.** Continuation of Mth 5321. Class: 3 Hours. Credit: 3 semester hours.
- **5323 — Real Analysis.** The first year of Calculus reviewed from a higher viewpoint. Class: 3 hours. Credit: 3 semester hours.
- **5324 — Algebra.** Basic algebraic structures, groups, rings, Euclidean rings, division rings, integral domains, fields. Class: 3 hours. Credit: 3 semester hours.
- **5325 — Linear Algebra.** Vector spaces with special emphasis on the algebraic structures of $\mathbb{R}$, $\mathbb{R}^2$, and $\mathbb{R}^3$. Class: 3 hours. Credit: 3 semester hours.
- **5326 — Probability and Statistics.** Permutation and factorials, elementary principles of probability, mathematical expectations, averages, curve fitting, application. Class: 3 hours. Credit: 3 semester hours.
- **5327 — Data Processing.** A survey of higher level languages and an assembly language with applications to advanced programming techniques. Syntax, semantics, and numerical techniques as applied to programming applications. Class: 3 hours. Credit: 3 semester hours.
- **5328 — Seminar in the History of Mathematics.** Historical origin of mathematical concepts, lives and achievements of great men of mathematics, balance kept between ancient and modern developments. Class: 3 hours. Credit 3 semester hours.
- **5329 — Seminar in Mathematical Discovery.** Case histories studied in detail, inductive and heuristic reasoning, teaching by the discovery method. Class: 3 hours. Credit: 3 semester hours.
- **5330 — Seminar in Enrichment Topics in Mathematics.** Curves of constant width, squaring the square, magic squares, mathematical puzzles, games, many other topics. Class: 3 hours. Credit: 3 semester hours.
- **5332 — Seminar in Geometry.** Basic concepts and selected Euclidean topics. Class: 3 hours. Credit: 3 semester hours.
5333 — Seminar in Number Theory. Pythagorean, Fibonacci, Lucas, triangular and other numbers, other topics as time permits. Class: 3 hours. Credit: 3 semester hours.

5334 — Seminar in Problem Solving. Understanding the problem, search for the solution, making sketches, the role of trial and error, checking the solution. Class: 3 hours. Credit: 3 semester hours.
Department of Music

The Master of Music and the Master of Music Education degrees are offered by the Department of Music. The master's program is designed to help performers and specialists in the several areas of the music program to develop skills and concepts which may be applied to their particular fields of endeavor. Persons seeking admission to these programs must meet the general requirements for admission that are outlined in this catalog. Generally, an applicant should hold a Bachelor of Music degree or its equivalent in music courses, this equivalency to be determined by the Department of Music.

Degree Requirements

The candidate for the Master of Music degree must meet all the College of Graduate Studies general degree requirements as listed in this catalog. The Master of Music in performance requires 30 semester hours of course work, of which six hours consist of a thesis, or a recital and a research paper. The Master of Music Education degree requires 36 hours of course work, which may include six hours of thesis work. An oral examination is required for all students before completion of a degree.

GRADUATE FACULTY

Members
Professor Joseph B. Carlucci
  Single reed woodwinds
Professor George L. Parks
  Voice, music education
Professor Charles A. Wiley
  Double reed woodwinds

Associate Members
Assistant Professor Mary French Barrett
  Voice
Associate Professor Edna Brooks
  Upper strings
Assistant Professor J. N. Collier
  Musicology
Associate Professor Paul W. Holmes
  Theory and composition
Professor Hubert B. Kaszynski
  Piano, organ
Assistant Professor John R. LeBlanc
  Voice, choral
Associate Professor Joseph Truncale
  Voice, opera

The graduate student will select music courses from the following list:

Applied Music (AM)

521, 522, 523, 524, 525 — Graduate Applied Music. For music education majors only. Graduate applied music in any instrument category, including composition. No
more than eight hours may be applied to the music education degree toward graduation. Class: 2 hours. Credit: 2 semester hours.

541, 542, 543, 544, 545 — Graduate Applied Music. Graduate applied music in any instrument category, including composition. No more than 12 hours may be applied to the Master of Music degree. Class: 4 hours. Credit: 4 semester hours.

Music Education (MEd)

520 — Piano Accompanying. A study of the techniques of accompanying, with practical experience. Class: 2 hours. Credit: 2 semester hours.

530 — Advanced Instrumental Organization and Administration. Organization and administration of public school bands and orchestras, with emphasis on rehearsal methods and techniques, library systems, program building, publicity procedures, contest preparation, techniques of class instruction and budget. Class: 3 hours. Credit: 3 semester hours.

531 — Advanced Choral Organization and Administration. Philosophy, organization, and administration of vocal music programs at the public school level; emphasis similar to MEd 530. Class: 3 hours. Credit: 3 semester hours.

532 — Seminar in Special Problems. Research problems of special interest to students whose major emphasis is in the graduate field of music. Research paper required. Class: 3 hours. Credit: 3 semester hours.

533 — Basic Concepts in Music Education. The historical, philosophical and psychological bases of music education. Class: 3 hours. Credit: 3 semester hours.

534 — Supervision of Music. Supervision of public school music programs, with emphasis on leadership, instruction, public relations and problems in scheduling and finance. Class: 3 hours. Credit: 3 semester hours.

535 — Advanced Materials and Methods in Elementary Music. Study of current trends, methods and materials in teaching elementary school music, with emphasis on individual study and presentations. Class: 3 hours. Credit: 3 semester hours.

536 — Advanced Choral Conducting. Development of technical facility in conducting choral music, with emphasis on complex interpretive elements and problems of the choral conductor. Class: 3 hours. Credit: 3 semester hours.

537 — Advanced Instrumental Conducting. Advanced interpretive problems and rehearsal techniques related to the conducting of various types of band and orchestral music. Class: 3 hours. Credit: 3 semester hours.

538 — Advanced Instrumental Methods. The principles and techniques of teaching instrumental music. Class: 3 hours. Credit: 3 semester hours.

539 — Advanced Vocal Methods. The principles and techniques of teaching vocal music. Class: 3 hours. Credit: 3 semester hours.

Music Literature (MLt)

532 — Instrumental Literature. Survey of music for large instrumental ensembles, chamber music and music for solo instruments. Emphasis on the concerto and symphony, the string quartet, and sonata literature, with special attention to the needs and interests of students enrolled. Class: 3 hours. Credit: 3 semester hours.

533 — Keyboard Literature. Survey of keyboard literature from the pre-piano period to the present, including study of the piano sonata and other characteristic forms. Emphasis on performing, listening and analysis. Class: 3 hours. Credit: 3 semester hours.

534 — Choral Literature. The literature, performance practices, and history of choral music, including a study of representative works from various countries. Class: 3 hours. Credit: 3 semester hours.
535 — Survey of the Baroque Era. Comprehensive study of the period, beginning with the transition to Baroque, c. 1580, and ending c. 1750. Emphasis on advances in musical form, stylistic developments and performance practices. Class: 3 hours. Credit: 3 semester hours.

536 — Survey of the Classic Era. Comprehensive study of the period, beginning with the transition to classicism, c. 1730, and ending c. 1827. Emphasis on advances in the musical form, stylistic developments and performance practices. Class: 3 hours. Credit: 3 semester hours.

537 — Survey of the Romantic Era. Comprehensive study of the period, beginning with the transition to Romanticism, c. 1815, and ending c. 1910. Emphasis on advances in the musical form, stylistic developments and performance practices. Class: 3 hours. Credit: 3 semester hours.

538 — Twentieth Century Music. A survey of major composers and schools of composition from Debussy to the present. Class: 3 hours. Credit: 3 semester hours.

Music Theory (MTy)

532 — Advanced Band Arranging. Advanced techniques in arranging music for various types of bands, and study of models by masters of band arranging. Class: 3 hours. Credit: 3 semester hours.

533 — Advanced Counterpoint. Application, through analysis and creative writing, of contrapuntal techniques in larger forms such as canon and fugue. Class: 3 hours. Credit: 3 semester hours.

534 — Advanced Orchestration. Techniques of scoring for various types of orchestras, and study of models by masters of orchestration. Class: 3 hours. Credit: 3 semester hours.

535 — Twentieth Century Harmony. The analysis and writing of music based on twentieth century harmonic techniques and devices. Class: 3 hours. Credit: 3 semester hours.

536 — Pedagogy of Theory. The principles and techniques of teaching the various branches of music theory, including principles of learning, history of theory, critical study of appropriate texts and supervised teaching of music theory classes. Class: 3 hours. Credit: 3 semester hours.

537 — Analytical Techniques. Traditional and contemporary approaches to the visual and aural analyses of music from all periods. Class: 3 hours. Credit: 3 semester hours.

538 — Advanced Choral Arranging. Advanced techniques in arranging music for various vocal combinations. Class: 3 hours. Credit: 3 semester hours.

539 — Jazz Arranging. Techniques in arranging music for various jazz combinations. Class: 3 hours. Credit: 3 semester hours.

Music (Mus)

669A-669B — Thesis. Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.
Department of Physics

The Department of Physics offers the following graduate courses to provide an area of specialization for the Master of Education degree in Secondary Education and as support to other advanced degree programs. For the M. S. degree in Mathematics, a nine semester-hour minor in Physics is accepted; in addition, the subject of the thesis may be a mathematical problem from physics.

GRADUATE FACULTY

Members
Associate Professor Hugh O. Peebles, Jr.
   Astrophysics
Professor Joseph F. Pizzo, Jr.
   Theoretical physics, relativity
Professor Carl J. Rigney
   Thermal physics, electromagnetism

5101, 5201, 5301, 5401, 5501, and 5601 — Institute in Physics. Designed to provide credit for participation in summer, in-service or other institutes. Credit varies with duration. The description of the area of study of each institute will appear on the printed schedule. May be repeated for credit when nature of institute differs sufficiently from those taken previously. Class: 1-6 hours. Laboratory: 2-4 hours. Credit: 1-6 semester hours.

530 — Seminar in Physical Science. Designed for non-science majors. Measurement, light, the solar system and stars, force and motion, work and energy, heat, weather, lightning, electric charge and current, magnetism, batteries, atoms and molecules. May not be taken for credit by any student with a major in engineering, mathematics, or a science. Class: 3 hours. Credit: 3 semester hours.

531 — Theoretical Physics. The application of typical mathematical techniques, with emphasis on field and potential concepts. Class: 3 hours. Credit: 3 semester hours.

532 — Relativity. Brief introduction to the special and general theory followed by detailed study of a particular topic. Class: 3 hours. Credit: 3 semester hours.

533 — Seminar. Selected topics pertaining to the research reported in contemporary publications. Course may be repeated for a maximum of six semester hours credit when the topic varies. Class: 3 hours. Credit: 3 semester hours.

Below is the approved list of 400G level courses which may be taken with augmented requirements for graduate credit, subject to approval by the graduate advisor. Course descriptions may be found in the Bulletin of Lamar University.

431G — Classical Mechanics
432G — Introductory Quantum Mechanics
433G — Solid State Physics
436G — Nuclear Physics
437G — Astrophysics
448G — Optics
Department of Psychology

The Department of Psychology offers a program of study leading to the Master of Science degree in Psychology. It is designed to prepare professional personnel for employment in industry or in the area of community mental health. Those seeking admission to this program must meet the general requirements as set forth in the catalog for admission to the College of Graduate Studies. In addition, the applicant must offer the substantial equivalent of the courses in statistics and experimental psychology required of undergraduate students in the psychology curriculum.

Degree Requirements

The candidate for the Master of Science degree in Psychology must meet all of the College of Graduate Studies general degree requirements as listed in the catalog. Additional specific degree requirements are as follows:

1. Twenty-one semester hours of course work in psychology which must include Psychology 530, 531, 532, 5310, 5311, 5312, and 5313 for the Community Psychology Program, or Psychology 530, 531, 532, 5320, 5321, 5322 and 5323 for the Industrial Psychology Program.

2. Satisfactorily pass candidacy examinations as devised by the Psychology Department Graduate Faculty. A student may request and be administered both the written and oral examinations upon completion of a minimum of 15 semester hours of graduate credit provided he has a grade point average of 3.0 (B). A student must have satisfactorily passed candidacy examinations prior to enrolling in Psychology 5330.

3. Nine additional semester hours of 400G or 500 level courses in an approved field of study.

4. Six semester hours of Psychology 5330 and 5331 or six additional hours in 400G or 500 level courses if this requirement is waived.

5. Presentation of a thesis.

6. Nonthesis option. With the approval of the Head of the Department of Psychology, Psy 5332, Practicum III, and Psy 631, Field Study, may be substituted for the thesis in the Community Psychology program.

GRADUATE FACULTY

Members

Associate Professor Billy Ray Barrington
  Individual and group psychotherapy, diagnostics

Professor Myrtle Lee Bell
  Developmental psychology, child psychology, group dynamics

Professor James R. Hawker
  Industrial-Organizational psychology, communications, human learning, research methodology

Associate Members

Associate Professor Otto R. Flocke
  Individual and group psychotherapy, diagnostics, child psychology

Assistant Professor Robert A. Gay
  Developmental psychology, behavior modification
Assistant Professor Oliver H. London
   Industrial-Organizational psychology, social
Assistant Professor James E. Schroeder
   Animal Learning, motivation, cognitive processes
Assistant Professor James L. Walker, Jr.
   Psychological measurement, statistics, instrumentation and methodology

The graduate student will select his psychology courses from the following list:

530 — **Advanced General Psychology.** A comprehensive overview of the history of psychology, systems of psychological thought, and the areas of physiological psychology, sensation and perception, learning and cognition. Emphasis will be placed on both background material and current research. May be taken out of sequence. Class: 3 hours. Credit: 3 semester hours.

531 — **Advanced General Psychology II.** A comprehensive overview of the following areas of psychology: personality, motivation, developmental, social and abnormal. Emphasis will be placed on both background material and current research. May be taken out of sequence. Class: 3 hours. Credit: 3 semester hours.

532 — **Experimental Design.** A study of the research procedures and techniques commonly used by the applied and theoretical psychologist in the design, execution, control and evaluation of experiments. Class: 3 hours. Credit: 3 semester hours.

533 — **Individual Study.** Independent study of special problems in industry or in the community. May be repeated for credit. Time arranged. Credit: 3 semester hours.

534 — **Special Topics in Psychology.** Topics in developmental, physiological, social, differential, experimental, quantitative, cognitive or clinical psychology. Includes library and/or laboratory work and conferences with a staff member. A description of the particular area of study will be indicated. A student may repeat the course for credit when the area of study varies. Time arranged. Credit: 3 semester hours.

535 — **Seminar in Psychology.** An intensive study of selected areas of psychological thought and/or research. Emphasis will be on locating and evaluating literature in a selected area of psychology. Description of course content will appear in the schedule of classes. May be repeated for credit when topic varies. Class: 3 hours. Credit: 3 semester hours.

5310 — **Introduction to Social and Psychological Assessment.** An introduction to psychological evaluation techniques including test construction, statistics, and administration and scoring techniques for selected objective and projective tests. Class: 3 hours. Credit: 3 semester hours.

5311 — **Community Psychology I.** An overview of community psychology and the role of the psychologist in community psychology. Emphasis is upon the systems approach in understanding the various structures of a community. Psychological intervention in the family, groups, and organizations will be studied. Class: 3 hours. Credit: 3 semester hours.

5312 — **Community Psychology II.** A study of evaluative procedures stressing test interpretation and report writing with field experience included. Prerequisite: Psy 5310. Class: 3 hours. Credit: 3 semester hours.

5313 — **Psychological Counseling.** Major models of therapy will be studied. Each student will assume a client case load to practice counseling techniques under supervision by a faculty member. Prerequisite: Psy 5311. Class: 3 hours. Credit: 3 semester hours.

5320 — **Theory and Techniques of Psychological Measurement.** Theory of measurement of human behavior; survey of representative tests of intelligence, aptitudes, interests, personality, etc. Class: 3 hours. Credit: 3 semester hours.
5321 — Advanced Industrial Psychology I. A critical examination of the social and organizational factors in the work situation. Primary emphasis on human relations, leadership, and organizational influences on behavior. Class: 3 hours. Credit: 3 semester hours.

5322 — Advanced Industrial Psychology II. Psychological principles and techniques applied to job analysis, selection and placement of workers, training, and organizational efficiency. Prerequisite: Psy 5320. Class: 3 hours. Credit: 3 semester hours.

5323 — Advanced Experimental Psychology. Theory and application of experimental design in psychological research. Students will have an opportunity to design and conduct an original research study. Prerequisite: Psy 532. Class: 3 hours. Credit: 3 semester hours.

5330 — Practicum I. Supervised training and experience in a local, state, or regional agency, institution, or employment setting. The specific nature of the practicum depends on the professional background and goals of the candidate and will be determined by the candidate, his faculty advisor, and a member of the cooperating agency. This course may be waived by the Graduate Faculty of the Psychology Department for students already employed in a professional capacity if they elect three additional hours from the approved program courses. Prerequisite: Admission to candidacy. Time arranged. Credit: 3 semester hours.

5331 — Practicum II. Supervised work in an area of particular interest to the student. The practicum includes both a close relationship with a faculty member and a member of the cooperating agency. This course may be waived by the Graduate Faculty of the Psychology Department for students already employed in a professional capacity if they elect three additional hours from the approved program courses. Prerequisite: Psy 5330. Time arranged. Credit: 3 semester hours.

5332 — Practicum III. Supervised internship in the area of particular interest to the student upon approval of the graduate coordinator. The practicum includes teaching and training other graduate students who are in the process of developing community mental health intervention skills and diagnostic abilities. Prerequisite: Psy 5331, selection of nonthesis option, and consent of instructor. Time arranged. Credit: 3 semester hours.

631 — Field Study. Design, conduct and report a project utilizing appropriate methods of research. Prerequisite: Must have completed or be enrolled in Psy 5332, selection of nonthesis option and consent of instructor. Time arranged. Credit: 3 semester hours.

669A-669B — Thesis. Prerequisite: Approval of graduate advisor. Credit: 6 semester hours.

How to Enter the College of Graduate Studies at Lamar

1. Complete two application blanks and mail to the Dean of the College of Graduate Studies.

2. Ask the Registrar of each college that you attended to send two transcripts to the Dean of the College of Graduate Studies.

3. Have Graduate Record Examination scores (aptitude section and the appropriate subject area) sent to the Dean of the College of Graduate Studies.

4. If University housing is desired, send request to Student Housing Office.

5. All students are required to submit a certificate of immunization for tetanus and diphtheria at each registration.
