Lamar University
College of Technical Arts
1983-84 Bulletin
Vol. 31 No. 3

Fourteenth annual catalog issued with announcements for 1983-84.
Founded in 1923, and established as a four-year coeducational state-supported college on September 1, 1951.

The provisions of this bulletin do not constitute a contract, expressed or implied, between any applicant, student, and faculty member in Lamar University. Lamar University reserves the right to withdraw courses at any time, change fees, calendars, curricula, graduation procedures, and any other requirement affecting students. Changes become effective when the proper authorities so determine the application to both prospective students and to the students already enrolled. For additional and complete information refer to the Lamar University General Bulletin.

Lamar University is an equal opportunity/affirmative action educational institution and employer. Students, faculty and staff members are selected without regard to their race, color, creed, sex, or national origin, consistent with the Assurance of Compliance with Title VI of the Civil Rights Act of 1964; Executive Order 11246 as issued and amended; Title IX of the Education Amendments of 1972, as amended; Section 504 of the Rehabilitation Act of 1973. Inquiries concerning application of these regulations may be referred to the Executive Associate to the President.

The Campus

Lamar University’s campus has expanded rapidly during the past decade and now encompasses some 200 acres.

The Cecil Bessom Technical Arts Building and several other buildings have been completed recently. The University also has campuses in Orange and Port Arthur.

Guidelines for future expansion of the Beaumont campus are included in a conceptual master plan which will guide development into the year 2000. A large portion of the master plan has been approved by the University’s Board of Regents.
Architects have placed strong emphasis upon developing a feeling of "monumentality and dignity" with the library as the dominant focus of the campus. The 20-year plan shows the addition of multi-storied buildings.
1983-84 Calendar

Published dates of this calendar are subject to revision by published notice from the Vice President for Academic Affairs.

General Information

Location

Lamar University, a state-supported institution, is located in Beaumont, one of the world's largest petrochemical centers. Beaumont is one of the fastest growing and most progressive cities in the Sunbelt. The city offers private and public schools, churches, museums, shopping districts and a wide range of leisure-time activities to serve the metropolis of 130,000. A civic center, convention center and coliseum draw professional entertainers and a wide variety of business, social and professional groups to the city. Beaumont is convenient to major recreational facilities of Southeast Texas, including the Gulf of Mexico, large lakes and the Big Thicket National Forest.

History

South Park Junior College was established in 1923 and was controlled by the South Park Independent School District. Classes were conducted in the South Park High School building. An initial enrollment of about 125 students in 1923 had increased to 300 by 1931.

In 1932, the name of the institution was changed to Lamar College. At this time, separate facilities were provided, additional equipment was purchased and new policies instituted. By 1939, enrollment was approximately 640.

Lamar Union Junior College District was created in 1940, and Lamar College was separated from the South Park Independent School District. Bonds were approved and new facilities were constructed on the site of the present main campus.

A movement to expand Lamar College into a four-year state-supported school culminated in the creation of Lamar State College of Technology on September 1, 1951. Since that time, enrollment has increased to more than 12,800 students, and the curriculum has been expanded to include many areas of study. Graduate work in specified fields began in the academic year of 1960-61, and extension work became an integral part of the educational program in 1964. A doctoral program in engineering was added in 1971. Lamar University at Orange, offering first and second year courses, opened in 1969. Lamar University at Port Arthur, also offering first and second year courses, began operation in the fall of 1975, and expanded the occupational programs available to students. The University also owns 36 acres on Pleasure Island in Port Arthur.

The institution's status as a university became official on August 23, 1971, when the name was changed to Lamar University.

Vocational subjects were among the first courses offered by Lamar and have played an important role in the development of Lamar University. A Division of Vocations was established in 1946 and became the Lamar School of Vocations in 1955. In 1970, the name was changed to the School of Technical Arts and in 1972, it became the College of Technical Arts. During 1971, the College began awarding Associate of Applied Science degrees in certain two-year programs. The College offers the Certificate of Completion in programs of one year or less in duration.

Government

A board of nine regents, appointed by the Governor and approved by the State Senate for terms of six years, governs the University. The Board of Regents delegates the direction of university affairs to the president, administrative officers and faculty.

Accreditation

Lamar is accredited by the Association of Texas Colleges and Universities, the Southern Association of Colleges and Schools and is approved by the Texas Education Agency.

Several departments and programs have been accredited by professional agencies. In the College of Engineering, the departments of Chemical, Civil, Electrical, Industrial and Mechanical Engineering are accredited by the Accrediting Board for Engineering and Technology. The undergraduate programs of the College of Business are accredited by the American Assembly for Collegiate Schools of Business. Other accreditations include the Department of Chemistry by the American Chemical Society; Department of Music by the National Association of Schools of
Music; and the Departments of Elementary and Secondary Education by the National Council for the Accreditation of Teacher Education, and Council on Social Work Education.

The University also is a member of a number of academic councils, societies, associations and other such organizations.

**Objectives**

The basic objective of the College of Technical Arts is to help students equip themselves for effective living and for responsible citizenship in our society by offering educational programs and training which will extend their basic knowledge, encourage their continued development and give them marketable skills. In working toward this goal, the College encourages students to assume a major share of the responsibility for the development of their potentialities and for utilization of their abilities, for their own purposes and for the good of society.

In order to stimulate students to have open minds, emphasis is placed upon the development of creative and scientific thinking for the solution of problems in the social and physical environment of their time. An effort is also made to provide guidance which will encourage the students to reach mature and responsible decisions, whatever the nature of the problems they may encounter.

The College of Technical Arts recognizes its obligation to make available to the community all the opportunities implicit in its function as a part of Lamar University. In an effort to achieve this goal, the specific objectives of the college are as follows:

1. To provide guidance services that will assist each student in making an appropriate vocational choice.
2. To provide certificate, diploma and degree programs designed to prepare students for employment in various fields.
3. To provide education and training which allows the graduate to advance rapidly in his/her chosen field.
4. To instill in the student the desire to learn which will guide his/her growth in his/her profession.
5. To provide in-service training to persons currently employed in Southeast Texas.
Admissions

High School Relations, Orientation and Recruitment

The Office of School Relations, located in Room 201 of the Wimberly Student Affairs Building, provides complete admissions counseling for entering students. Professionally trained personnel assist prospective students in assimilating all admission credentials so that the transition into a college environment may be made as smooth and problem-free as possible. The office also is responsible for coordinating special days, clinics and institutes on campus as well as arranging for student tours and college day/night visits. Orientation programs for entering freshmen, new international students and college transfers are coordinated here as well. All initial inquiries to the University should be made to this office by writing P.O. Box 10007, Lamar University Station, Beaumont, Texas 77710 409/838-7516.

Admissions Requirements

Students who desire to enter programs in the College of Technical Arts must satisfy the following admission requirements:

1. File an application for admission.
2. Have transcript of high school grades sent directly to the Dean of Admissions and Records, Lamar University. Students transferring from another institution must submit official transcripts from each college previously attended. This requirement applies regardless of the length of time in attendance and regardless of whether credit was earned or is desired. Further information concerning transfer students may be found in the "Admissions" section of the general university bulletin.
3. One of these prerequisites must be met:
   a. Graduation from an accredited high school, or
   b. Transfer with transcript from an accredited college or university, or
   c. Individual approval from the Dean of Admissions and Records. Persons 19 years of age or older whose high school class has been graduated for at least one year who demonstrate the ability to benefit from college coursework may request consideration for individual approval. Students wishing to enter under this prerequisite should first contact the Dean of the College of Technical Arts for admission to the Beaumont campus; the director of the Orange campus or the director of the Port Arthur campus.

Entrance Examination

Although students entering the College of Technical Arts are not required to take an entrance examination, those students who wish to take an entrance examination may submit either SAT or ACT scores. These examinations are useful for counseling purposes. Both tests are given several times each year at test centers throughout the United States and in many foreign countries. It is recommended that summer and fall applicants take one of these tests early in the senior year and, if possible, no later than February. Location of test centers, test dates, fees, test application forms, sample question booklets, etc. may be obtained without charge from high school school counselors or by writing to the testing agency. SAT inquiries should be directed to the College Entrance Examination Board, Box 1025, Berkeley, California 94704. ACT inquiries should be directed to the American College Testing Program, Box 168, Iowa City, Iowa 52240.

Where to Apply

All required admission forms should be addressed to the Office of Admissions and Records, Lamar University, Lamar University Station, Box 10009, Beaumont, Texas 77710.

Readmission

Former Lamar students who have not been in attendance for one or more regular semesters must file for readmission by submitting the standard application for admission form.
Financial Aid and Awards

Financial assistance in the form of scholarships, grants, loans and employment is available to a number of qualified students. Information regarding programs and eligibility criteria can be obtained from the Office of Student Aid, P.O. Box 10042, Lamar Station, Beaumont, Texas 77710.

When To Apply

Applications should be completed by March 1 for the following academic year. Notification of awards will be mailed in late spring and early summer. The university will continue to award student aid as long as funds are available. The most desirable types of aid, however, are normally expended early. Therefore, students should make every effort to meet the March 1 deadline.

How To Apply

Lamar University requires all students applying for aid to file the General Application for Student Aid. Students wishing to be considered for scholarships only should request the Scholarship Application. Students should be aware that scholarship funds are limited and recipients normally must have a grade point average in excess of 3.50 to be considered.

Students wishing to apply for grants, loans and/or work-study employment must also file the Financial Aid Form with the College Scholarship Service to determine the degree of need. Since the processing of this form requires between three and four weeks those students planning to meet the March 1 deadline should file about February 1.

After the application is complete the Student Aid Office will consider the student’s academic record and potential as well as substantiated degree of need. The amount and type of assistance will be determined by the staff of the Student Aid Office.

Minimum Qualifications

Scholarship awards to entering freshmen are determined by the applicant’s scores on the Scholastic Aptitude Test (SAT) or American College Testing Program (ACT), leadership and high school class rank. Scholarship awards for upperclassmen are determined by their cumulative grade point average at the college level. Scholarship applicants must have a combined score of 900 on the SAT or composite score of 20 on the ACT plus a grade point average in excess of 2.5 to be eligible for a university administered scholarship.

Those applying for need-based grants, loans or work-study employment have their eligibility established by the Financial Aid Form.

Applicants should arrange to have SAT or ACT test scores on file with Lamar University Admissions Office and have the General Application and Financial Aid Form calculation on file in the Student Aid Office. Freshmen may be able to obtain required forms from their high school counselors or directly from the Student Aid Office, P.O. Box 10042, Beaumont, Texas 77710. Students currently enrolled at Lamar may obtain the forms from the Student Aid Office, Wimberly Student Affairs, Room 216. Students must re-apply each year for reconsideration for continued assistance.

Grants

The Basic Educational Opportunity Grant (PELL) is the foundation source for all other aid programs. All applicants are required to submit the Student Eligibility Report for the Basic Grant except those applying for scholarships only. No other need based assistance (grants, loans, work-study) can be awarded until the student’s eligibility for the Basic Educational Opportunity Grant is determined. The filing of the Financial Aid Form should cause the BEOG Student Eligibility Report to be sent to the student’s address. The student should then send the Student Eligibility Report to the Student Aid Office for an estimated grant amount to be determined. The final Basic Grant will be determined at the time of enrollment.

Other available grants are the Supplemental Educational Opportunity Grant, the Texas Public Education Grant (TPEG) and the State Student Incentive Grant (SSIG). Students with exceptional need as determined by the Financial Aid Form may be awarded one of these grants.
Scholarships

Scholarships are funds which cover a portion of the student's expenses. Scholarships at Lamar University are of two types: those administered solely by the university, including the selection of recipients, and those administered by the university at the request of donors who select the recipients themselves. The scholarship program at Lamar University is financed solely by public donation. Half of the scholarship is disbursed for the fall term and the remaining half for the spring semester.

Loans

Lamar University provides both short-term and long-term loans. Short-term loans for 30 days are designed to cover emergency situations and must be repaid within the semester in which the loan is made. Long-term loans with repayment after graduation may be obtained under such programs as the National Direct Student Loan Program, the Federally Insured Student Loan Program, and the Hinson-Hazelwood College Student Loan Act. Those interested in one of these loan programs should contact the Student Aid Office for information and application forms.

Employment

Employment opportunities under the College Work Study Program and other employment programs of the University, are available to Lamar students as part of the financial assistance program. The University, local businesses and industries provide a number of part-time jobs which enable students to earn part or all of their expenses while attending the University.

Valedictorians

Valedictorians from accredited high schools of Texas are entitled to an exemption from payment of tuition for the two regular semesters immediately following graduation. Fees are not exempt. During registration, valedictorians should report to the scholarship station for fee adjustments. The names of valedictorians of all Texas high schools are certified by principals to the Texas Education Agency and the list is supplied to the University for reference.

Students with Physical Handicaps
(Vocational Rehabilitation)

The Texas Rehabilitation Commission offers assistance for tuition and nonrefundable fees to students who have certain disabling conditions, provided their vocational objectives have been approved by a TRC counselor. Examples of such conditions are orthopedic deformities, emotional disorders, diabetes, epilepsy, heart conditions, etc. Other services also are available to assist the handicapped student to become employable. Application for such service should be made at the Texas Rehabilitation Commission, Beaumont District Office, 1110 Goodhue Building, Beaumont, Texas 77701.

Services for Handicapped Students

Services for handicapped students are designed to help the student be as successful as possible on the Lamar campus. Students who have certain disabilities qualify for registration assistance, tutoring, adaptive equipment and other personalized services. For additional information contact the Coordinator of Handicapped Services in the Wimberly Student Affairs room 101A, phone 838-8026.
Fees and Expenses

Payment of Fees

Lamar University reserves the right to change fees in keeping with acts of the Texas Legislature and the University's Board of Regents.

A student is not registered until all fees are paid in full. Payment may be made by check, money order or currency. Checks and money orders, not in excess of total fees, should be made payable to Lamar University and will be accepted subject to final payment. Checks and drafts deposited with Federal Reserve banks cannot be handled through regular bank collection channels if received without the magnetic ink (MICR) transit number. The University will not accept counter checks or "changed" checks.

Summary of Registration Expenses

Each student must plan a budget carefully. It is possible to attend Lamar on a modest sum and yet participate in most phases of the university program. To assist in planning registration expenses, the following estimate is furnished as a guide:

Texas residents taking a 15 hour academic work load*

Tuition and Fees

Tuition is based upon the number of hours for which the student registers, and is determined by the student's classification as a Texas resident; a nonresident U.S. citizen; or a citizen of another country.*

*Denomination of legal residence for tuition purposes is made on the basis of statutes of the State of Texas.

Each student pays a Student Service Fee of $4.00 per semester hour, with a maximum of $40 in a long session.
## Summary of Fees

Additional fees and charges which are applied on a selective basis are listed following the Summary of Fees.

*Code: A. U.S. citizens who are legal residents of Texas under tuition law; B. (1) U.S. citizens who are not legal residents of Texas under tuition law, and (2) aliens from non-exempt countries.*
Parking Fee

Charges for parking on campus are made at registration. Automobile registration fees are as follows: Fall Semester, $15; Spring Semester, $10; Summer Session I, $6; Summer Session II, $4. Only one registration is required during an academic year, and a student's parking fee is honored until the end of Summer Session II.

Health and Accident Insurance

Health and accident insurance coverage is available at registration for students carrying nine or more semester hours. The fee is estimated at $62. This or similar insurance is required of all international students.

Special Fees

Fees will be set by the University for courses in which special plans must be prepared and specialists secured as instructors.

Exemption 1—Scholarships to High School Honor Graduates

The highest ranking student in the graduating class of a fully accredited Texas high school will be entitled to a scholarship valued at $100. This scholarship must be used during the long session immediately following graduation. Details may be obtained from the Student Aid Office.

Exemption 2—Veterans

Lamar is approved under all of the Veterans Educational Assistance programs for educational training of veterans of the U.S. Armed Forces.

Persons who were citizens of Texas at the time of entry into the Armed Forces, and who are no longer eligible for educational benefits provided for veterans of the United States, are exempt from tuition and laboratory fees. This applies to those who served in World War I, World War II, the Korean Conflict or the Vietnam War and were honorably discharged. To obtain this exemption, necessary papers must be presented prior to registration and approval obtained from the Office of Veterans’ Affairs. The above exemption also extends to wives, children and dependents of members of the Armed Forces who were killed in action or died while in the service in World War II, the Korean Conflict or Vietnam War.

Students who expect to attend under some veteran's benefit plan should contact the Office of Veterans’ Affairs 60 to 90 days prior to registration. The Office of Veterans’ Affairs advises veterans on program and training opportunities, academic assistance and counseling. Veterans interested in information in these areas should visit the office in the Wimberly Student Affairs Building.

Refund of Fees

Any student officially withdrawing will receive a refund on tuition, Setzer Center, student service, laboratory, building and general use and private lesson fees according to the following schedule:

Fall or Spring Semester
1. Prior to the first class day, 100 per cent.
2. During the first five class days, 80 per cent.
3. During the second week of the semester, 70 per cent.
4. During the third week of the semester, 50 per cent.
5. During the fourth week of the semester, 25 per cent.
6. After the fourth week of the semester, none.

Summer Session
1. Prior to the first class day, 100 per cent.
2. During the first, second or third class day, 80 per cent.
3. During the fourth, fifth or sixth class day, 50 per cent.
4. Seventh class day and after, none.
Dropping Courses
All students who drop courses during the first 12 class days of the Fall or Spring Semester, or within the first four days of a Summer Session, and remain enrolled at Lamar University, will receive a refund on tuition and fees for that particular course or courses. These refunds will be made to the student four to eight weeks after the session begins.

All questions regarding refunds should be directed to the Finance Office.

Returned Check Fees
A student is automatically suspended from the University if a check is returned unpaid. The student may re-enter upon redemption of the check plus payment of the returned check fee of $5.

Fine and Breakage Loss

Library fines, charges for breakage or loss of equipment or other charges must be paid before a transcript of credit or a permit to re-enter the University will be issued.

The University reserves the right to make a special assessment against any student guilty of inexcusable breakage, loss of instructional equipment or other university property.

Student Responsibility for Residence Classification

The responsibility of registering under the proper residence classification is that of the student. If there is any possible question of his/her right of classification as a resident of Texas, it is his/her obligation, prior to or at the time of registration, to raise the question with the Dean of Admissions and Registrar and have his/her status officially determined.

Every student who is classified as a resident student who becomes a nonresident at any time by virtue of a change of legal residence by his/her own action or by the person controlling his/her domicile, is required to notify the Dean of Admissions and Registrar.

Students failing to comply with the residence provisions of the state tuition bill (Art. 2645c, V.C.S. as amended 1957) are subject to penalties as set forth in the law and/or appropriate disciplinary action.

Rules and Regulations for Determining Residence Status

See the general bulletin for complete information on how residence status is determined, or consult the Coordinating Board, Texas College and University System "Rules and Regulations for Determining Residence Status" as revised, October 17, 1973. The latter publication is available at the Admissions and Records Office.
College of Technical Arts

The College of Technical Arts provides technical and industrial education for thousands of men and women from Texas, other states and many foreign countries. It is housed in a modern plant consisting of six buildings containing 125,000 feet of classroom, shop and office space. The new Cecil R. Beeson Technical Arts classroom and office building was completed for occupancy for the fall of 1977. Parking for 550 cars is provided adjacent to these buildings. Entrance to this area, located in the 4400 block of Spur 380 Beaumont-Port Arthur Highway, is on Lavaca Street. The College of Technical Arts also offers courses and programs on campuses located in Orange and Port Arthur. Off-campus courses are offered in several cities in the area.

An Associate of Applied Science degree is awarded in the following fields of study: automotive mechanics; business data processing; child care technology; cosmetology; drafting technology; diesel mechanics; electrical technology; electronics technology; fire protection technology; general secretary; industrial electronics technology; industrial supervision; legal secretary; machine tools; maintenance pipefitting; medical secretary; mid-management; occupational safety and health; property tax administration; real estate; refrigeration and air conditioning technology; technical accounting; and welding.

A student may earn a diploma upon satisfactory completion of one of the following programs: accounting clerk; automotive mechanics; clerical; cosmetology; electronics; marine construction; office occupations; or welding.

The appliance repair, child care technology, industrial supervision, maintenance pipefitting, occupational safety and health, plant maintenance plate welding, real estate, and refrigeration programs have provisions for offering a Certificate of Completion when the specified course requirements have been satisfied.

Associate Degree Programs

The College of Technical Arts offers career-oriented education in 23 degree programs in four departments in the College. The 23 programs that lead to the Associate of Applied Science degree are:

**Adult Training Programs**
- Child Care Technology (Beaumont and Port Arthur)
- Cosmetology (Port Arthur)
- Electrical Technology (Beaumont)
- Fire Protection Technology (Beaumont)
- Maintenance Pipefitting (Beaumont)
- Occupational Safety and Health (Beaumont)

**Industrial Department**
- Auto Body Technology (Port Arthur)
- Automotive Mechanics (Port Arthur)
- Diesel Mechanics (Beaumont)
- Machine Tools (Beaumont)
- Refrigeration and Air Conditioning Technology (Beaumont)
- Welding (Beaumont, Orange, Port Arthur)

**Related Arts Department**
- Business Data Processing (Beaumont and Port Arthur)
- Industrial Supervision (Beaumont and Orange)
- Mid-Management (Beaumont, Orange, Port Arthur)
- Property Tax Administration (Beaumont)
- Real Estate (Beaumont, Orange, Port Arthur)
- Technical Accounting (Orange)

**Technical Department**
- Drafting Technology (Beaumont, Orange, Port Arthur)
- Electronics Technology (Port Arthur)
- General Secretary (Orange and Port Arthur)
- Industrial Electronics Technology (Beaumont and Orange)
- Legal Secretary (Port Arthur)
Medical Secretary (Port Arthur)
Word Processing (Port Arthur)

All of the above two-year programs are designed to give the student training prior to entry into an occupation. Successful completion of one of these programs should provide the student with sufficient knowledge, skill and confidence to enter and advance rapidly in a selected field.

The curriculum of each program is designed to allow a student to enter in any semester and is arranged so that a student can take supporting work in either the College of Technical Arts or in other colleges in the University.

**Diploma Programs**

Three departments in the College of Technical Arts offer diploma programs in nine fields of study.

**Adult Training Programs**
- Cosmetology (Port Arthur)
- Marine Construction (Orange)

**Industrial Department**
- Auto Body Technology (Port Arthur)
- Automotive Mechanics (Port Arthur)
- Welding (Orange and Port Arthur)

**Technical Department** (Orange and Port Arthur)
- Accounting Clerk
- Clerical
- General Secretary
- Legal Secretary
- Medical Secretary

**Certificate Programs**

In addition to the above degree and diploma programs, the College of Technical Arts offers Certificates of Completion in ten programs.

**Adult Training Programs**
- Child Care Technology (Port Arthur and Beaumont)
- Fire Protection Certification School (Beaumont)
- Maintenance Pipefitting (Beaumont)
- Occupational Safety and Health (Beaumont)
- Plant Maintenance and Operations (Beaumont and Orange)

**Industrial Department**
- Appliance Repair (Beaumont)
- Refrigeration (Beaumont)
- Plate Welding (Beaumont)

**Related Arts Department**
- Industrial Supervision (Beaumont and Orange)
- Real Estate (Beaumont, Orange, Port Arthur)

**Bachelor of Science in Industrial Technology**

In 1973-74, the College of Technical Arts offered a Bachelor of Science degree in Industrial Technology to students who successfully completed an approved program of study. This program has been suspended. Students who are enrolled in the four year program will be allowed to complete their degree as long as they are enrolled at Lamar University. Should a student fail to enroll for a Fall or Spring Semester, he/she will be dropped from the program. Students may submit, in writing prior to the beginning of a semester, a request to skip a semester without being dropped from the program.

The Department of Industrial Engineering in the College of Engineering is offering a new version of the Bachelor of Science degree in Industrial Technology. Most of a student's Technical Arts work will apply to this four year degree. Students should refer to the general bulletin for a description of this non-engineering degree.
New Programs in High Technology

Because this publication covers an extended time period, new programs may be created and described in an official supplement to this bulletin. Prospective students are encouraged to contact the College of Technical Arts to determine the status of several new programs being considered.

Other Associate Degrees

Two year program leading to associate degrees and certificates are offered by the other college within Lamar University. At the Beaumont campus, the following programs are offered:

Office Administration — College of Business
Food Service Management — College of Education
Law Enforcement — College of Arts and Sciences
Teacher Aide — College of Education
Dental Hygiene — College of Health and Behavioral Science
Radiologic Technology — College of Health and Behavioral Science
Associate Degree Nursing — College of Health and Behavioral Science
Vocational Nursing — College of Health and Behavioral Science
Respiratory Technology — College of Health and Behavioral Science
Adult Training Programs

Supervisor: Norman E. Lowrey
218 Beeson Technical Arts Building

Child Care Technology

This course of study is provided for persons preparing for, or employed in, the field of early childhood care. The courses may be used as academic instruction in working toward national Child Development Associate requirements, but do not provide Child Development Associate certification by themselves. An Associate of Applied Science degree will be awarded upon completion of the program.

Child Care Technology Courses (CCT)

131 Survey of Early Childhood Development
This course includes an overview of the basic development in children zero to six years of age with emphasis placed on working with children in all areas on their developmental level.

132 Nutrition and Health
This course will cover instruction in basic health, safety and first aid, including an overview of common childhood illnesses and recognition of them.

136 The Infant 0 to 18 Months
This course will provide an in-depth study of the infant from conception to 18 months. All phases of infant development will be included. Appropriate ways of working with infants in a day care center situation will be discussed.

262 Curriculum Planning and Teaching Techniques
This course deals with planning curricula for pre-school age children and a survey of learning methods and theories with practical application of these theories in the child care facility.

231 Advancing Language Use
This course is designed to teach methods of increasing language use in children. These techniques include role-playing, puppetry, dramatization, etc. This course also includes an insight into the vast world of literature available for young children at different age levels and instructions on how teachers may effectively present stories to them.

232 Toddlers 18 to 36 Months
This course provides an in-depth study of the toddler's development in all areas. Means of working with a toddler in a day care center will be discussed.

235 Working with the Exceptional Child
This course is designed to help the student deal with exceptional children in a day care situation. Simple testing procedures for determination of a child's developmental levels will be presented. The course will include discussions of ways to work with children who do not have "normal" development.
### Electrical Technology

Graduates of the program will be prepared to function in electrical maintenance and electrical distribution related occupations. The program is designed to interface with approved training programs.

Upon completion of the Program of Study an Associate of Applied Science Degree will be awarded.

*These courses are designed for students in approved training or apprentice programs.

#### Electrical Technology Courses (ELE)

- **ELE 121, 122, 221, 222 Seminar**
  - (2:0:0)
  - This course is designed to address specific topics of interest to students enrolled in ELE 141, 142, 241, or 242 Electrical Internship.
  - **Corequisite:** ELE 141, 142, 241 or 242.

- **ELE 130 Electrical Blueprint Reading**
  - (3:1:0)
  - This course includes a study of the provisions of the National Electrical Code and its application to electrical installation. Block diagrams and schematics of industrial controls also will be studied.

- **ELE 131 Fundamentals of Electricity**
  - (3:0:0)
  - This course is designed to give the student an introduction to electrical theory. Electron theory, ohm's law, and theory of magnetism will be discussed.
ELE 132 DC and Single Phase AC Theory
A study of more complex DC and single phase AC circuits, reactance, impedance, power factor and phase relationship will be discussed.

ELE 133 Electrical Codes and Standards I
A continuation of ELE 130 with emphasis on the mathematics involved in code applications.

ELE 134 Electrical Codes and Standards II
A study of the provisions and interpretations of the National Electrical Code and its relationship to other standards including the OSH act.

ELE 135 Three Phase AC Theory
A study of the generation, distribution, transformation and utilization of three phase current.

ELE 136 Basic Electrical Lab
This lab course will provide experiments with basic electrical circuits to demonstrate electrical and magnetic principles, basic wiring techniques and skill will also be taught in this lab.

ELE 137 DC and Single Phase AC Lab
Advanced wiring procedures and skills, including residential and commercial installations will be taught in this course.

ELE 138 Three Phase AC Lab I
Experiments with the transformation and utilization of three phase AC in inductive and capacitive loads will be conducted in this lab.

ELE 139 Three Phase AC Lab II
A continuation of ELE 138 with emphasis on phase correction for inductive and capacitive loads.

ELE 141, 142, 241, 242 Electrical Internship
Approved supervised employment under supervision of journeyman or first class craftsman to be certified by program coordinator. Corequisite: ELE 121, 122, 221, or 222.

ELE 230 Electrical Codes and Standards II
A continuation of ELE 134 with emphasis on calculations associated with rating capacities of conductors and the total installation.

ELE 231 Electrical Power Distribution
A detailed study of transformers, relays, utility lines and installation practices.

ELE 232 AC-DC Machines
A study of the various types of AC-DC motors and their characteristics.

ELE 235 Trouble Shooting Techniques
Techniques and equipment used in diagnosing and remediating electrical malfunctions will be studied in this course.

ELE 234 AC-DC Motor Control
A study of motor starting, speed control and stopping systems and devices will be studied in this course.

ELE 235 Electrical Power Generation
Study of the operation and maintenance of electrical generation equipment and control mechanisms utilized in industrial and public utility applications.

ELE 236 Power Distribution Lab
Experiments with transformers, relays and other devices used in the electrical distribution system will be conducted in this lab.

ELE 237 AC-DC Machines Lab
Practical experiments with electrical machines, controls and accessories will be conducted in this laboratory course.

ELE 238 AC-DC Motor Control Lab
A continuation of ELE 232 with emphasis on starting, speed control and stopping systems and devices.

ELE 239 Protective Relaying
Experiments with relays used in switching of high voltage and balancing of generation equipment.

ELE 2311 Industrial Installations
Skills in the installation of rigid, explosion proof electrical system will be taught in this course.

Fire Protection Technology

The objectives of this program are to provide training for supervisory personnel for fire departments and industrial safety departments, provide in-service education for fire fighters and prepare graduates for related careers, such as fire insurance sales personnel. The fire protection technology courses are generally taught during the extended day hours and the schedule of classes allows attendance by students working shifts.

A graduate of this two-year instructional program is awarded the Associate of Applied Science degree.
Students who successfully complete FT 1311, 1312 and 1313 will be awarded a Certificate of Completion in Fire Protection Technology. This program is approved by the Texas Commission on Fire Protection Personnel Standards and Education.

**Fire Protection Technology Courses (FT)**

1311 Introduction to Fire Protection
Organization of fire departments, general rules and regulations, fire apparatus, first aid, fire alarm and communications.
Prerequisite: Admission to the Basic Certification School for Fire Fighters and consent of instructor.

1312 Fire Science
Fire extinguishers, fire service ladder practices, salvage and overhaul, water supplies, automatic sprinklers, fire science and arson detection.

1313 Fire Fighting
Ropes, fire hose practices, fire stream practices, ventilation practices, rescue operations, breathing apparatus, inspection procedures, aircraft fire protection, emergency driving and civil disorders.

1314 Related Fire Studies
Effective reading and study skills, fire service mathematics, community relations and report writing.

1315 Fundamentals of Fire Protection
History and philosophy of fire protection; review of statistics of loss of life and property by fire; introduction to agencies involved in fire protection; current legislative developments and career orientation; recruitment and training for fire departments; position classification and plans; employee organization; a discussion of current related problems and review of expanding future fire protection problems.

132 Fire Protection Systems
Study of the required standard for water supply; special hazards protection systems; automatic sprinkler and special extinguishing system; automatic signalling and detection system; rating organizations and underwriting agencies.

133 Industrial Fire Protection I
Specific concerns and safeguards related to business and industrial organizations. A study of industrial fire brigade organization and development, plant layout, fire prevention programs, extinguishing factors and techniques, hazardous situations and prevention methods.

134 Fire Prevention
The objectives and views of inspections, fundamental principles, methods, techniques and procedures of fire prevention administration. Fire prevention organization; public cooperation and image; recognition of fire hazards; insurance problems and legal aspects; development and implementation of a systematic and deliberate inspection program; survey of local, state and national codes pertaining to fire prevention and related technology; relationship between building inspection agencies and fire prevention organization.

135 Industrial Fire Protection II
Development of fire and safety organizations in industry; relation between private and public fire protection organizations; current trends, deficiencies and possible solutions for industrial fire problems; role of insurance problems and other special organizations; an in-depth study of specific industrial processes, equipment, facilities and work practices to understand potential hazards and techniques to detect and control such hazards.
230 Fire Administration I 3:3:0  
An in-depth study of organization and management as related to a fire department including budgeting, maintenance of records and reports and management of fire department officers. Personnel administration and distribution of equipment and personnel and other related topics.

231 Building Codes and Construction 3:3:0  
Fundamental consideration and exploration of building construction and design with emphasis on fire resistance of building materials and assemblies, exposures and related data focused on fire protection concerns; review of related statutory and suggested guidelines, both local and national in scope.

232 Fire and Arson Investigation 3:3:0  
A study of the detection of arson, investigation techniques, case histories, gathering and preserving of evidence, preparing for a court case; selected discussion of laws, decisions and opinions; kinds of arsonists, interrogation procedures, cooperation and coordination between fire fighters and arson investigators and other related topics.

233 Hazardous Materials I 3:3:0  
Study of chemical characteristics and behavior of various materials that burn or react violently related to storage, transportation, handling hazardous materials, i.e., flammable liquids, combustible solids and gases. Emphasis on emergency situation and most favorable methods of handling fire fighting and control.

234 Fire Administration II 3:3:0  
Study to include insurance rates and ratings, preparation of budgets, administration and organization of training in the fire department; city water requirements, fire alarm and communications systems; importance of public relations, report writing and record keeping; measurements of results, use of records to improve procedures and other related topics.

235 Hazardous Materials II 3:3:0  
Hazardous materials covering storage, handling, laws, standards and fire fighting techniques associated with chemicals, gases, flammable liquids, corrosives, poisons, explosives, rocket propellants and exotic fuel and radioactive materials.

236 Field Safety Education 3:3:0  
A survey of physical, chemical and electrical hazards and their relationship to loss of property and/or life. Study of codes, laws, problems and cases. Safe storage, transportation and handling techniques are stressed to eliminate or control potential risks.

237 Legal Aspects of Fire Protection 3:3:0  
A study of legal rights and duties, liability concerns and responsibilities of the fire department while carrying out their duties. Introduction and basic concepts of Civil and Criminal law, the Texas and Federal Judicial structure and cities' liability for acts of the fire department and fire prevention bureaux. An in-depth study of various cases concerning fire fighters, fire departments, municipalities.

238 Fire Service Communications 3:3:0  
The development of fire alarm systems, the various types of systems, installation, operation and testing of the most common systems, receiving, dispatching and radio communication procedures; FCC regulations; the fire alarm operations office; mutual aid systems; fire station communications and facilities; response and fire ground procedures; emergency operations; code and numbering systems; required records and reports; technological advances.

241 Fire Fighting Tactics and Strategy 4:3:2  
Essential elements in analyzing the nature of fire and determining the requirements. Efficient and effective utilization of manpower, equipment and apparatus. Emphasis to be placed on pre-planning, study of conflagration problems, fire ground organization, problem solving related to fire ground decision making and attack tactics and strategy. Use of Mutual Aid and large scale command problems.

**Maintenance Pipefitting**

This course of study is provided for persons preparing for, or employed in, the occupation of maintenance pipefitting. The courses may be used as related instruction in company apprentice training programs. Liberal substitution of courses will be allowed in consideration of the diversity of skill requirements among companies in the area. However, a program of study must be agreed upon prior to enrollment.

An Associate of Applied Science Degree will be awarded upon completion of the program of study.

Maintenance Pipelighting Courses (Pip)

131 Pipelighting
Methods of fabricating pipe are studied. The use of layout tools, full scale layout methods and practices, layout of miter and saddles and the use of the steel square in pipe layout is stressed.

132 Portable Water Systems
A study of portable water systems, its treatment and protection from contamination. Sizing and installation of water systems will be covered with emphasis on materials and tools needed to accomplish the installation.

134 Pipe Layout
A course in planning, scheduling and laying out of work to be performed by the craftsman. An introduction to the estimation of material, labor and miscellaneous costs.

135 Drainage Waste and Vent Systems
A study of drainage, waste and vent systems including sanitary and storm systems. Tools, materials and maintenance of installations will be discussed in this course.

136 Pipelighting Laboratory
The use of layout tools, full scale layout methods and practices, layout of miters and saddles is studied in this laboratory course.

137 Sanitary Systems Laboratory I
A laboratory course providing practice in the repair, replacement and adjustment of fixtures and appliances used in commercial and industrial installations.

138 Piping Systems Laboratory I
A study of layout problems that include template making, offset problems, hangers and supports, rigging and hoisting, and other fabrication procedures utilized in the maintenance and repair of process piping systems.

139 Sanitary Systems Laboratory II
A laboratory course in sanitary fixture repairs, adjustments and replacement. Emphasis will be placed on fixtures used in commercial and industrial installations.

231 Blueprint Reading for Pipelifters
An introduction to piping drawings, symbols and schematics. Shop fabrication drawings, specifications and material takeoff also will be covered in the course.

232 Instrument Piping Systems
A study of the piping required for pressure flow and temperature controllers both transmitting and recording.

234 Field Measurements
A study of the use of the transit and level with emphasis on field dimensioning and sketching for fabrication.

236 Piping Systems Laboratory II
A continuation of Pip 138 with emphasis on systems layout.

237 Instrument Piping Techniques
A laboratory course designed to develop skills in the layout and piping of pneumatic instrument systems and associated equipment.

238 Field Sketching
A laboratory course designed to teach field measurements and sketching. Conversion of field sketches to detailed drawings will also be covered in the course.
Occupational Safety and Health

This program is designed to prepare the individual for employment as a safety specialist in business or industry. Courses may be taken individually to upgrade persons already employed as safety specialists. Occupational Safety and Health courses will be taught in the evening hours as well as the regular day schedule to accommodate the shift worker.

A graduate of this two-year instructional program is awarded the Associate of Applied Science Degree. A Certificate of Completion will be awarded upon completion of the courses marked with an asterisk. Persons interested in pursuing the Bachelor of Science in Industrial Technology are required to take the alternate general education courses.

Occupational Safety and Health Courses (OSH)

131 Introduction to Occupational Safety and Health
   An introduction to the principles of occupational safety and health. A survey course covering the basic principles and techniques. Required for OSH majors and suitable for management and supervisory certificate students.

3:3:0

132 Safety and Health Standards, Codes and Regulations
   A review of the important occupational safety and health standards and codes with particular emphasis on application of the codes to typical work situations as prescribed by the Occupational Safety and Health Act of 1970.

3:3:0

133 Physical Hazards Control I
   An in-depth study of the basic responsibilities and techniques for safety inspections and control of, or removal of hazards from the site.

3:3:0

134 Vehicle and Traffic Safety
   A basic introduction to problems and practices of vehicle and traffic safety programming with emphasis on regulatory requirements.

3:3:0

231 Physical Hazards Control II
   Continuation of physical hazards inspections and studies in the work environment. Covers the principles of protective equipment, guarding, material handling, chemical and electrical hazards and illuminations.

3:3:0

232 Health Hazard Recognition
   The subject matter of the course deals with the fundamentals of industrial hygiene and surveying techniques.

3:3:0

233 Human Factors in Safety
   Designed to acquaint the student with the physiological and psychological factors that contribute to accident causation. An exploration of theoretical and research findings.

3:3:0

234 Safety Program Management
   Designed to acquaint the student with the common elements of a modern safety program covering management responsibility, roles of committees, budgeting and accident investigation.

3:3:0

235 Security Administration
   Organization, administration and management of security and plant protection units. Personnel and budgeting.
Plant Maintenance and Operations

This course of study is provided for persons engaged in the maintenance and operations of the various petrochemical plants in the area.

Objectives of this program are to reinforce the practical work skills developed by the student as a result of his/her work experience and to insure that he/she has the necessary skills to maintain a position and fulfill a vital role in area industry.

A person who completes 30 semester hours of Plant Maintenance courses, or approved related courses, is awarded a Certificate of Completion in Plant Maintenance and Operations. Some Plant Maintenance courses are offered at Port Arthur and Orange, but students must enroll in courses on the main campus to complete the program.

Plant Maintenance and Operations Courses (PM)

1311 Compressors
The application, operation and maintenance of air and gas compressors, proper installation and power requirements.

1312 Pumps
The application, care and operation of centrifugal rotary and reciprocating pumps and the study of direct and belt drives.

1313 Pumps Laboratory
Diagnosis and remedy of pump malfunctions will be covered in this laboratory course. Replacement of seals, couplings and impellers; alignment; and disassembly for inspection will be emphasized in this course.

1315 Pneumatic Instruments
A study of the physical and chemical laws affecting pressure and temperature measuring and recording instruments. The operation and application of instruments for controlling manufacturing processes is covered.

1316 Control Systems
The basic control theory and methods for obtaining various control effects are studied. Practical industrial installations of control systems, controller adjustments and checking and testing procedures are stressed.

1317 Electronic Instruments
A review of basic electricity including components and basic laws. A study is made of electron tubes, elementary electronic circuits and some of the more generally used electronic instrument circuits.

1318 Related Physics
A study of matter, energy, mechanics, heat and basic electrical principles as they relate to the refining and chemical processes.

1319 Related Chemistry
A study of organic and inorganic chemistry, the safety considerations in the handling of chemicals and the physical properties of organic homologs.

1320 Unit Operations
This course will include an investigation of fluid flow and transport, distillation, evaporation, extraction and other unit functions.

1321 Blueprint Reading
A study of lines, views, symbols and dimensions involved in reading blueprint and shop sketches. Practice in making freehand sketches of simple objects.

1322 Structural Blueprint Reading
A study of the various engineering drawings and specifications used in the fabrication and erection of structural steel members.

1324 Blueprint Reading for Pipefitters
An introduction to piping drawings, symbols and schematics. Shop fabrication drawings, specifications and material take-off also will be covered in the course.

1325 Water Plant Operations
The source and chemistry of water and the operation of equipment necessary to make it suitable for human and/or industrial consumption will be studied in this course.

1326 Electrical Generation
Study of the operation and maintenance of electrical generators and the drive mechanisms utilized in industrial and public utility applications.

1327 Boiler Operation
Start-up and shut-down procedures, routine operation, boiler instrumentation, fueling and water requirements of the boiler and auxiliary equipment are topics to be discussed in this course.
1328 Marine Blueprint Reading
A study of marine and shipbuilding blueprints, and the symbols and conventions relating to them. The course also includes a study of A.I.S.C. standards and specifications.

1329 Industrial Blueprint
A study of plot plans, foundation drawings, schedules, sections and specifications used in commercial and industrial construction.

1333 Construction Estimating
A study of building codes, plans, specifications, contracts, and the general techniques of estimating building construction costs.

1335 Southern Standard Building Code
An overview of the Southern Standard Building Code, its organization and history. Specific instruction on the interpretation of the code emphasis on foundations, framing and occupancy requirements.

1336 Southern Standard Plumbing Code
An overview of the Southern Standard Plumbing and Gas Code. Specific instruction will be given in the interpretation of the code with emphasis on sizing the waste, vent and gas piping systems.

1338 Chromatography
History, theory of operation, application and maintenance of the chromatograph will be discussed in this course.

1339 Chromatography Laboratory
A laboratory course in the operation and maintenance of the gas chromatography.

1340 Industrial Hydraulics
The operation and maintenance of hydraulic equipment, including basic hydraulics and all types of pumps, motors and controls, will be studied in this course.

1345 Instrument Lab I
A study of the various instruments used in the control of industrial processes. Demonstration and application of calibration procedures will be the major emphasis in this lab course.

1347 Instrument Lab II
A lab course designed to prepare the student to align and repair electronic/electromechanical controllers, recorders and transmitters.

Special Training Activities

The purpose of Special Training Activities is to serve the educational and training needs of adults by offering short courses, workshops and conferences designed to achieve a specific objective. The flexibility of these training activities allows the College of Technical Arts to react quickly to a training need expressed by industrial firms, governmental agencies or groups of concerned individuals. Technical Arts, in cooperation with the Division of Public Service, negotiates the nature and length of the training with the group requesting the training. College facilities, equipment and faculty are available to insure that the training objective is successfully achieved.

Special Training Activities include:

Defensive Driving Classes: National Safety Council approved classes in defensive driving are offered regularly by the College of Technical Arts. Successful completion of the eight hour class allows students to receive a reduction in their automotive insurance rates as well as learn safe driving techniques.

Industrial Safety Conference: Faculty members in the Fire Protection Technology and Occupational Safety and Health programs periodically sponsor safety related conferences and workshops. Recent workshops covered safety for supervisors and OSHA regulations.

Industrial Start-Up Training: New industries and existing firms undergoing expansions may qualify for industrial start-up training operated by Lamar and funded by the Texas Education Agency. To date, several extensive training programs have been conducted by Adult Training.

Lamar — IMI Maintenance Training Institute: The International Maintenance Institute in conjunction with Adult Training Programs offers a continuing series of seminars and workshops on various topics of interest to maintenance trainees, mechanics and supervision.

Motorcycle Safety: The Motorcycle Safety Course is offered by the Fire and Safety Institute in conjunction with the Motorcycle Safety Foundation. The course offers twenty hours of training.
and is designed for the beginner or novice rider. Motorcycle insurance and instructive material used in the course are provided by the institute.

**Alcohol Awareness:** The Alcohol Awareness program is aimed at the young offender (13-21) and is offered in conjunction with the local Justices of the Peace. The three hour course is a night course which is held twice a month and discusses the psychological, physiological, and legal aspects of involvement with alcohol.

**Child Care Staff Training:** Workshops are held periodically to provide in-service training for day care personnel and the other persons working with pre-school age children. On-site training is also available for individual centers.

**Volunteer Fire Fighter Program:** This program is designed to facilitate the certification of volunteer fire fighters by providing monthly, all day training sessions in the subject areas required by the Commission on Fire Protection Standards and Personnel.

**Truck Driving:** This course is designed to prepare persons for employment as operators of tractor trailers in interstate commerce. Extensive highway driving coupled with preparation for the D.O.T. certification and Texas Commercial Operators examination plus a defensive driving course and certification are included in the instruction.

**Industrial Fire Training:** One and two-day courses are offered for fire brigade members in business and industry. These programs meet the training requirements specified in the OSH Act regulations.

**Fire and Safety Institute:** The Lamar University Fire and Safety Institute was officially recognized in the Spring of 1982. The Institute concept will combine existing fire and safety related programs, both credit and non-credit, into a cohesive organizational structure to provide training to local business and industry.

**Information concerning Special Training Activities can be obtained from the supervisor of adult training.** The telephone number of this office is 409 838-8207.

Appliance Repair

Appliance Repair is a one-year program designed to prepare persons for employment in the installation and repair of domestic appliances. With practically every household equipped with clothes washers, clothes dryers, ranges, disposals and hot water heaters the need for qualified service personnel increases from month to month. Servicing the varied types of appliances, which are built by different manufactureres, requires skills in both mechanics and electricity.

The Appliance Repair program provides experiences which afford opportunity to develop an understanding of electrical and mechanical principles, safety, and the related occupational information necessary to service appliances.

Students successfully completing the required 33 semester hours may apply for the Certificate of Completion in Appliance Repair.

Appliance Repair Courses (AR)

131 Basic Principles of Appliances

132 Applied Electrical Circuity

134 Appliance Problem Analysis
- Study of appliance failures for cause determination. Inspection of damaged components. Systematical search to classify trouble. Electrical and mechanical data appraisal.

135 Electro-Mechanical Troubleshooting
- Failure causes due to abuse or normal wear. Electrical meters and wiring diagrams. Transmissions, motor capacitors, switches and solenoids. Bearings, belts and pumps.

136 Basics of Appliance Mechanics

137 Laundry Appliances
- Proper installation methods for clothes washers and dryers. Service procedures for mechanical and electrical components. Motors, timers, pumps, overload protectors.

138 Major Kitchen Appliances
- A study of service procedures for ranges, disposals, ovens and dishwashers. Heavy emphasis on repair of specific units.

139 Water Heater Analysis
- Proper installations for natural gas and electric water heaters, controlling temperatures thermostatically. Safety controls. Trouble shooting and maintenance.

Diesel Mechanics

The two-year diesel mechanics program is designed to prepare the graduate for a career in the operation, repair and maintenance of diesel engines.

Diesel engines provide power for transportation equipment such as heavy trucks, buses and locomotives. They are used in every type of farming and harvesting equipment. Heavy equipment and stationery engines for pumps and compressors use diesel engines also.
To effectively repair an engine which does not perform, the mechanic must be able to isolate the cause of the problem, repair or replace defective parts, make adjustments and test the engine.

Objectives of the diesel mechanics program include opportunities to learn the design and construction of diesel engines, experiences in their disassembly and repair, tuneup, troubleshooting electrical and hydraulic problems, and preventive maintenance.

A graduate of this instructional program is awarded the Associate of Applied Science degree.

**Diesel Mechanics Courses (DM)**

131. **Introduction to Diesel Mechanics**

- General description and construction of engines, diesel engine principles, frames, cylinders, heads and pistons.

132. **Diesel Cycle Application**

- The diesel cycle, its advantages and applications. The basic problems of operations and the design and construction of diesel engines are studied.

133. **Small Engines**

- The operation and repair of small internal combustion engines. Diagnosis and troubleshooting will be emphasized.

134. **Related Systems**

- Engine cooling, air intake systems, exhaust systems and starting systems.
  - **Prerequisite:** DM 131 and 132.

135. **Maintenance and Repair Problems**

- Maintenance and repair problems of the diesel engine. The checking of bearing clearances and the installation of piston rings are stressed.
  - **Prerequisite:** DM 131 and 132.

136. **Basic Shop Procedures**

- Installation, operation, maintenance and repair of diesel engines; hand tools and precision instruments, shop safety, fastening devices and tubing fabrication.

137. **Precision Instrument Application**

- Installation, operation, maintenance and repair of diesel engines; disassembly, measuring, checking for wear, proper assembly, correct use of taps and dies, flaring tools and torque wrenches.

138. **Tune-up and Repair**

- Valve reconditioning, cylinder head repairs, engine operation and testing, diesel engine operation, shop safety, engine adjustments, cylinder and piston reconditioning.
  - **Prerequisite:** DM 136 and 137.

139. **Accessory Servicing**

- Repair of water pumps, oil pumps, fuel pumps, blowers, minor engine tune-up, valve and turbocharger repair.
  - **Prerequisite:** DM 136 and 137.

231. **Ignition and Combustion Principles**

- Electrical systems, governors, fuels and combustion and fuel systems.
  - **Prerequisite:** DM 131 and 132.
Lamar University

232 Diesel Fuel and Lubrication
A comprehensive study of diesel fuel and lubricating oils. Basic electricity, electrical and gasoline starting systems are also stressed.
Prerequisite: DM 131 and 132.
3:3:0

234 Overhaul Procedures
Engine overhauling, special repairs, salvaging, hydraulics and terms used in diesel engineering.
Prerequisite: DM 231 and 232 or DM 134 and 135.
3:3:0

235 Fuel Injection Systems
Fuel injection systems, hydraulics and its application, engine tune-up and troubleshooting.
Prerequisite: DM 231 and 232 or DM 134 and 135.
3:3:0

236 Troubleshooting and Installation
Installation, operation, maintenance and repair of diesel engines, electrical systems, generators, alternators, cranking motors, regulators, governors, steering clutches, final drives, track and roller frames.
Prerequisite: DM 138 and 139 or DM 136 and 137.
3:0:7

237 Advanced Diesel Engine Maintenance
Installation, operation, maintenance and repair of diesel engines, fuel systems, oil pumps, filters, oil pressure regulators, natural gas carburetors, natural gas regulators and preventive maintenance.
Prerequisite: DM 138 and 139 or DM 136 and 137.
3:0:7

238 Dynamometer Operation and Analysis
Installation, operation, maintenance and repair of diesel engines, fuel injection systems, fuel injection pumps, injector nozzles, unit injectors. Engine performance, testing and engine dynamometer.
Prerequisite: DM 236 and 237 or DM 138 and 139.
3:0:7

239 Diesel Engine Hydraulics
Installation, operation, maintenance and repair of diesel engines, hydraulic pumps, hydraulic controls, hydraulic power applications, advanced engine overhaul, special repairs, diagnosing and tune-up.
Prerequisite: DM 236 and 237 or DM 138 and 139.
3:0:7

Machine Tools

The machine tools program is a two-year program of study directed toward preparing the graduate with the skills, knowledge and perceptions needed to advance in industry as a competent craftsman.

The machinist must set up and operate the standard machine tools, grind his cutting tools, and machine parts to the specifications on a drawing or blueprint. Machinists use precision measuring instruments to insure parts are correct to very close tolerances. These duties require the machinist to be able to work independently.

Because they often carry through all operations, machinists may use the drill press, lathe, milling machine, grinder and other machines to complete individual parts. Students therefore are consistently encouraged to develop responsibility and self-reliance.

Students of this program study cutting tools and materials and will use metal removing machines in the shop to advance their abilities. Graduates are awarded the Associate of Applied Science degree.

<td>Laboratory practice in the proper procedures and methods for layout and setup. Tool and cutter grinding is treated. Time utilization and accuracy are pronounced.</td>
</tr>
<tr>
<td>239</td>
<td>Machine Design and Maintenance</td>
<td>3:0:7</td>
<td>Maintenance and repair of laboratory machine tools is implemented to expand ability and manipulative skills. Assembly projects which involve several machine tools are promoted.</td>
</tr>
</tbody>
</table>

Prerequisite: MT 131 and 132.
**Refrigeration and Air Conditioning Technology**

The refrigeration and air conditioning industry has expanded to include all phases of food preservation and temperature control for human comfort. In addition, many industrial processes require a product be heated or cooled to specific levels to create special compounds.

The refrigeration and air conditioning technology program offers two alternatives in its training. With successful completion of specific courses, students may apply for the Certificate of Completion in Refrigeration. Completion of the two-year program, as listed below, will earn the graduate an Associate of Applied Science degree.

Students will receive experiences which provide opportunity for learning the mechanical and electrical principles of environmental control equipment. They will also receive practice in installation, trouble shooting inoperative equipment, and performing preventive maintenance on air conditioning and refrigeration equipment.

*These courses are required for a Certificate of Completion in Refrigeration. Suggested Technical Arts electives: MTH 131, 133, 135, 231; BC 231; JR 232: DM 131; DS 113; IET 115; 393: 111; BDP 131.

---

**Refrigeration and Air Conditioning Technology Courses (RAC)**

131 **Basic Refrigeration Principles**

The history of refrigeration, theory of heat, compression cycle, metering devices and components of the refrigeration cycle.

132 **Basic Electricity and Electrical Devices**

Servicing domestic refrigeration, heat loads, defrosting, basic electric controls, wiring diagrams, capacitors and relays.

134 **Refrigeration Theory**

Related knowledge in chemistry necessary for refrigeration, cooling coil and condenser design, refrigerant flow controls, electrical control requirements, manufacturers’ tables, charts, diagrams and engineering specification sheets. Safety to be used in refrigeration work.

**Prerequisites:** RAC 131 and 132.

135 **Commercial Refrigeration**

Introduction to and history of commercial refrigeration trade. Knowledge necessary in servicing and repairing electrical motors, motor controllers, measuring power in electrical circuits, calculating compressor tonnage capacities, steps in the systematic analysis of refrigeration circuits and applications of commercial refrigeration.

**Prerequisites:** RAC 131 and 132.

136 **Basic Refrigeration**

Methods of cutting, flaring and bending copper tubing, soldering (hard and soft), leak testing, evacuating and charging of reciprocating equipment. Gauge installation, removal and calibration.

137 **Basic Electrical Wiring and Testing Procedure**

Electric motors, controls and transformers. Finding common start and run on sealed units, changing motor starting switches, testing and wiring single phase and shaded pole motors.
Welding

Welding concerns the various processes of joining metal parts together. It is the most common method for permanently connecting the sections necessary for building drilling rigs, pipelines, ships, bridges and many other manufactured units. The welding program is designed to prepare the student for a career in the field of industrial welding, either as a competent welder or in a position which requires knowledge of welding and welding equipment.

Welding requires manual dexterity, good eyesight and eye-hand coordination. Competence in oxyacetylene welding, arc welding and inert gas welding demands concentration and attention to the job being done. The student is given instruction in the safe and efficient methods for the different types of welding methods and procedures. Students' welds are regularly tested in ways common to industry in order to determine their quality.

Students who complete the required twenty-four semester hours of welding courses may apply for the Certificate in Plate Welding. Students who successfully complete the entire program are awarded the Associate of Applied Science degree.
### Recommended Program of Study

#### First Semester
- **Wld 131** Oxyacetylene Welding* .................................................. 3:30
- **Wld 132** AC-DC Welding, Oxyacetylene Cutting* .......................... 3:30
- **Wld 136** Flat, Horizontal and Vertical Plate Welding* ...................... 3:30
- **Wld 137** Vertical and Overhead Plate Welding* ................................ 3:30
- **TM 131** Fundamentals of Math I or Approved Math (Math Dept) ......... 3:30
- **BC 132** Basic Communications or Eng Comp (Eng Dept) ............... 3:30

#### Second Semester
- **Wld 134** Arc Cutting, Metal Surfacing and Resistance Welding ........... 3:30
- **Wld 135** AC-DC Equipment and Supplies, Brazing and Braze Welding* .... 3:30
- **Wld 138** Flat and Horizontal Vee-Groove Welding* ......................... 3:30
- **Wld 139** Vertical and Overhead Vee-Groove Welding* ..................... 3:30
- **TM 132** Fundamentals of Math II or Approved Math (Math Dept) ......... 3:30
- **MT 136** Business Communications or Eng Comp (Eng Dept) ........... 3:30

#### Third Semester
- **Wld 231** Weld Tests and Inspection, Pipe Welding and Layout .......... 3:30
- **Wld 232** Inert Gas Arc Welding, Equipment and Supplies ............... 3:30
- **Wld 236** Introduction to Inert Gas Welding and Pipe Welding .......... 3:30
- **Wld 237** Layout and Fabrication of Pipe .................................... 3:30
- **TM 231** Applied Geometry ...................................................... 3:30
- **JR 231** Job Relations or Soc 131 Introduction to Sociology .......... 3:30

#### Fourth Semester
- **Wld 234** Special Welding and Cutting Processes .......................... 3:30
- **Wld 235** Production, Heat Treatment and Identification of Metals .......... 3:30
- **Wld 238** Introduction to Butt Welds in Pipe ................................ 3:30
- **Wld 239** Advanced Pipe Welding ............................................ 3:30
- **TM 232** Ind Math ...................................................................... 3:30
- **Elective** ................................................................................. 3:30

*By Approval

*These courses are required for a Certificate in Plate Welding.

---

**Suggested Technical Arts electives:** MT 131, 132, 133, 134, 135; BC 231; JR 231; DM 135; Df 135; IET 133; MT 133, TM 133, 134.

### Welding Courses (Wld)

**131 Oxyacetylene Welding**

**3:5:0**

**132 AC-DC Welding, Oxyacetylene Cutting**

Proper methods employed in AC-DC shielded metal arc welding (SMAW) and oxyacetylene cutting. Soldering and soldering alloys. Safety. Blueprint reading continued.

**3:3:0**

**133 Welding as an Elective**

Arc welding, (SMAW) in the flat, horizontal, vertical and overhead positions. Oxyacetylene cutting and welding.

**3:3:1:3**

**134 Arc Cutting, Metal Surfacing and Resistance Welding**

Studies of carbon-arc, air carbon-arc, metallic electrodes and oxygen-arc cutting processes. Metal surfacing (Hard Surface) and resistance welding. Blueprint reading.

**Prerequisite:** Wld 131 and 132

**3:3:0**

**135 AC-DC Equipment and Supplies, Brazing and Braze Welding**

A thorough study of AC and DC welding electrodes and arc welding equipment and supplies. Brazing and braze welding are also studied. Emphasis on blueprint interpretation.

**Prerequisite:** Wld 131 and 132

**3:3:0**

**136 Flat, Horizontal and Vertical Plate Welding**

Multiple pass fillet welding using the SMAW process (Shielded Metal Arc Welding). Various types and sizes of electrodes will be used. Introduction to oxyacetylene welding and cutting. Welding safety.

**3:0:7**

**137 Vertical and Overhead Plate Welding**

A continuation of multiple-pass fillet welding using the SMAW process. Oxyacetylene welding and cutting practice is extended. Emphasis on safety.

**3:0:7**

**138 Flat and Horizontal Vee-Groove Welding**

Vee-groove welding of plate in the flat and horizontal positions using the SMAW process. Introduction to destructive and non-destructive welding test procedures.

**Prerequisite:** 130 and 137.

**3:0:7**

**139 Vertical and Overhead Vee-Groove Welding and Brazing**

Vee-groove welding of plate in the vertical and overhead positions using the SMAW process. Focus on destructive and non-destructive tests.

**Prerequisite:** Wld 136 and 137.
231 Weld Tests and Inspection. Pipe Welding and Layout
An in-depth study of welding tests and their uses. Introduction to pipe, pipe fittings and layout as used in the welding field. Sketching and blueprint reading extended.
Prerequisite: WLD 131 and 132.

232 Inert Gas Arc Welding, Equipment and Supplies
An introduction to GTAW (Gas Tungsten Arc Welding) and GMAW (Gas Metal Arc Welding), equipment and supplies. Development of the principles and uses of these processes. Blueprint reading and layout.
Prerequisites: WLD 131 and 132.

233 Basic Metallurgy
A basic course in metals' structure, foundry practices, heat treatments, welding, machining and testing procedures. Intended for persons working with, or involved with metals.

234 Special Welding and Cutting Processes
A study of materials (ferrous and non-ferrous) and processes that require special techniques for welding and cutting. Continuation of blueprint reading and layout.
Prerequisite: WLD 134 and 135 or WLD 231 and 232.

235 Production, Heat Treatment and Identification of Metals
Prerequisite: WLD 134 and 135, or WLD 231 and 232.

236 Introduction to Inert Gas Welding and Pipe Welding
Introduction to the "TIG" process (GTAW) for carbon steel, aluminum and stainless steels. Fabrication of various projects used in industry. Introduction to pipe welding and plasma arc cutting (PAC).
Prerequisites: WLD 136 and WLD 137.

237 Layout and Fabrication of Pipe
A continuation of the "TIG" and "MIG" (GMAW) welding methods. Concentrated instruction in the layout, fabrication and welding of ferrous metals and pipe. Continuation of plasma arc cutting (PAC).
Prerequisites: WLD 136 and 137.

238 Introduction to Butt Welds in Pipe
Horizontal and vertical pipe welding (position 1G and 2G) with shielded metal arc welding (SMAW) and "TIG" (GTAW). Continued "MIG" (GMAW) welding. Plasma arc cutting.
Prerequisites: WLD 136 and 137 or WLD 236 and 237.

239 Advanced Pipe Welding
Concentration on pipe welding in the vertical fixed and "Arkansas Bell-Hole" positions (positions 5G and 6G) with shielded metal arc welding (SMAW), "TIG" welding (GTAW) and "MIG" (GMAW) welding. Plasma arc cutting.
Prerequisites: WLD 138 and WLD 139, or WLD 236 and WLD 237.
### Related Arts Department

Department Head: Joe I. Juarez
229 Beeson Technical Arts Building

### Business Data Processing

The objective of this course of study is to prepare the student for a career in computer programming within the field of business data processing. Students learn to write programs in different programming languages to solve a variety of problems. Programs vary with the type of problems to be solved.

In hiring programmers, employers look for people who can think logically and are capable of exacting analytical work. The job also calls for patience, persistence, and the ability to work with extreme accuracy even under pressure. Ingenuity and imagination are particularly important when programmers must find new ways to solve a problem.

A graduate of this two-year instructional program is awarded the Associate of Applied Science degree.

### Placement Test

A good Math background is necessary for a student to benefit fully from any of the languages taught in the Business Data Processing program. A placement test has been developed that will assist in placing a student in the beginning freshman courses.

All entering students are required to take the test before they can register for any of the language courses. It will be given during summer orientation and regular registration periods.

### Business Data Processing Courses (BDP)

- **131** Introduction to Technical Accounting
  - Double-entry accounting practices and procedures applied to special journals, working papers, subsidiary records and preparation of financial statements for a sole proprietorship with an introduction to partnerships.
  - **3:3:0**

- **133** Introduction to Business Data Processing
  - A survey of data processing from its beginning. Introduction to internal data representation, file concepts, record layouts and an overview of programming languages to be encountered in later courses.
  - **3:3:0**

- **136** Technical Accounting
  - A continuation of accounting principles begun in BDP 131.
  - **Prerequisite:** BDP 131.
  - **3:3:0**

- **142** BASIC/FORTRAN
  - A study of the BASIC programming language and introduction to FORTRAN. Progressive techniques are developed through programming, definition, flow charting, coding, documentation, and execution.
  - **Prerequisite:** Placement test.
144 COBOL I
A study of the COBOL programming language. Progressive techniques are developed through program definition, flow charting, coding, documentation and program execution.
Prerequisite: Placement test.

231 System Design
Fundamentals of system design analysis and documentation. Problems in designing, analyzing, changing and existing systems, and implementation.

230 Advanced Tech Accounting
A continuation of accounting principles that were begun in BDP 131 and BDP 136.

245 RPG
A study of the RPG language. Progressive techniques are developed through problem definition, flowcharting and coding.
Prerequisite: BDP 142 or consent of the instructor.

233 Principles of Technical Cost Accounting
Accounting for material, labor and overhead under job cost, process cost and standard cost systems.
Prerequisite: BDP 136 or consent of the instructor.

241 COBOL II
A continuation of BDP 144 with emphasis on on-line handling and disk file processing.
Prerequisite: BDP 144.

245 FORTRAN II
The application of FORTRAN to business and numerical programs.
Prerequisite: BDP 142.

244 COBOL Applications
Defining problems for business application and programming the solutions using primarily the COBOL Language.
Prerequisite: BDP 241.

246 Basic II
The course is to further the programming skills of students who have completed BDP 142 and who have chosen the Basic Language as an alternative for FORTRAN for advanced study.

247 Assembly Language
An introduction to the GMAP (Honeywell) language using computer registers, opcode interpretation/execution and assembled program structure.
Prerequisite: BDP 142 or BDP 144.

Industrial Supervision
Industrial supervision was approved in 1981 as an Associate of Applied Science degree program after being offered for several years as a certificate program. The purpose of the program is to prepare supervisors for industry. The program contains courses needed by foremen, group leaders, superintendents, and others who directly supervise workers in industry. The emphasis is on industrial as opposed to business.
After successful completion of the program of study, a student is awarded an Associate of Applied Science degree.
A person who successfully completes 24 semester hours is eligible to receive a Certificate of Completion in Industrial Supervision.

**Industrial Supervision Courses (IS)**

1312 Applied Supervision 3:3:0
A study of methods of applying psychology to the handling of people; the use of testing methods; consideration of such factors as morale, group attitudes, motivation, frustration and fatigue; and application of psychological studies to human behavior on the job.

1313 Critical Path Scheduling 3:3:0
A study of the mechanics of the CPM and PERT method and their specific applications to business and industry. How to introduce CPM into a company and set up the procedures necessary to adapt it to various types of organizations.

1315 Cost Reduction 3:3:0
Methods of carrying out a comprehensive continuing cost reduction and control program including how to get all levels of supervisory management to participate in the cost reduction effort and to include cost control as an integral part of the supervisor's total job.

1317 Construction Materials 3:3:0
An in-depth study of the nature, origin, properties and use of construction materials. All types of materials used in construction will be covered with particular emphasis on their physical characteristics.

1318 Construction Methods and Equipment 3:3:0
The analysis of up-to-date construction techniques with emphasis upon understanding the organization and equipment used in excavating, pile driving, and concrete, wood, brick, stone and steel construction.

1319 Construction Management 3:3:0
An introductory course covering the total responsibilities of a construction manager, project manager and construction supervisor.

1322 Labor Relations and Legislation 3:3:0
Company policy, labor history, legislation and labor unions, the labor contract, grievances and arbitration are included in this course.

1325 Industrial Communications I 3:3:0
Basic information and techniques for effectively communicating with employees, management, customers and the public. Some of the topics covered in the course are logical and creative thinking, making a speech, dictating, and telephoning.

1326 Industrial Communications II 3:3:0
Basic information and techniques for effectively communicating with employees, management, customers and the public through letter and report writing.

231 Time and Motion Studies 3:3:0
This course is designed to acquaint the industrial supervisor with the techniques of improving productivity through more productive practices.

235 Training and Developing Workforce 3:3:0
Preparing the first line supervisor for the tasks of training and developing workers. Philosophy and techniques are emphasized.

**Mid-Management**

Mid-Management is a program in business and supervisory management designed to develop the fundamental skills, knowledge, attitudes and experience which will enable men and women to function in decision-making positions as supervisors or managers. All new students must be counseled by a mid-management coordinator before registering. This program is offered at the Beaumont, Port Arthur and Orange campuses.

A graduate of this two-year instructional program is awarded the Associate of Applied Science degree.

Mid-Management Courses (MM)

131 Survey of Business
Survey of the functional areas of business and their interrelationships. Economics of industry and business; ownership and organization; marketing; production; personnel; finance and business controls.

2511, 2512 Internship Seminars
This course includes a one-hour seminar designed to build or strengthen a specific management skill. A requisite for this course is that the enrolled student must have at least 15 hours per week of approved supervised employment toward his/her career plan.

132 Free Enterprise System I
A basic introduction to microeconomics for the vocational student.

133 Principles of Selling
Precepts of effective selling in the American economy. Sales process; prospecting; presentation; objections; and closing.

134 Personal Money Management
Advice on how to make the student a better money manager in personal and family affairs. This includes budgets, purchases, taxes, savings, insurance, Social Security, investments, wills and estates.

135 Free Enterprise System II
A practical application of the free enterprise system to the individual and his business. A basic introduction to microeconomics for the vocational student.

138 Fundamentals of Supervision and Leadership
Methods and techniques of supervision; included are basic skills for beginning supervisors. Topics included are new employees, interviewing, job methods training, safety, grievances, motivation, and discipline.

231 Small Business Management
A practical view of the problems of initiating and operating a small business. Should clarify some questions of career choice and decision-making in business.

232 Human Resources Management
An elementary and practical approach to the problems with employees as individuals and groups, including those represented by unions.
Prerequisite: MM 138.

237 Retailing
The development, organization, methods, policies of operation and problems in the marketing structure.

238 Legal Aspects of Business
An introductory course in contracts, warranties, agency, and property law.

Basic Communications, Technical Mathematics and Job Relations

These courses are designed to relate to and complement the various programs offered in the College of Technical Arts. The objectives are to develop student competence in the areas of reading, applied grammar and public speaking; to develop student competence in applied mathematics and to develop student understanding of job and human relations.

Basic Communications Courses (BC)

131 Basic Communications
The objectives of this course are to develop student competence in speaking and writing and to increase student competence in the use of the library for research in his major field.
Business Communications 3:3:0
The preparation of specifications, inventories, orders for supplies, tools and equipment and the basic elements of business letters and report writing through the use of practice letters and case studies.

Technical Writing 3:3:0
A study of the techniques of technical writing and its application to the individual student's major field.
Prerequisite: Students must have taken BC 131 and 132 or its academic equivalent.

Job Relations Courses (JR)

Job Relations 3:3:0
The purpose of this course is to present and analyze the roles of the worker and management. Included in the course will be a presentation of labor-management relations, evolution and growth of the American labor movement, development and structure of American business, communicative channels, state and federal legislation that affects the worker and management and personnel problems encountered in association with employers and employees.

Human Relations 3:3:0
The purpose of this course is to survey the social sciences that help explain human behavior and motivation. This course will include such topics as maturation, deviant behavior, cultural and social problems and interpersonal relationships in the job situation. These topics are designed to help individuals better understand themselves and society.

Mathematics Courses (TM)

Fundamentals of Mathematics I 3:3:0
Review and application of the fundamentals of mathematics; fractions, decimals, ratio and proportion, weights and measures, metric system, introduction to algebra.

Fundamentals of Mathematics II 3:3:0
Introduction to algebra, polynomials, exponents, powers and roots, solutions of simple equations, introduction to trigonometry and logarithms.
Prerequisite: TM 131 or the equivalent.

Business Mathematics 3:3:0
A comprehensive course in basic business mathematics. Presenting work in interest, payrolls, taxes, financial statements and special problems for the mid-manager.
Prerequisite: TM 131 or the equivalent.

Fundamentals of Metric Measure for the Craftsman 3:3:0
An introduction to the “Think Metric” approach of learning the International System of Measurement. Presentation of units on prefixes, length, volume, mass, area and temperature.

Algebra Trigonometry 3:3:0
A study of basic algebraic and trigonometric techniques needed by a technician. Includes simultaneous equations, logarithms, solutions of triangles, radian measure and complex numbers.
Prerequisite: TM 131 or the equivalent.

Applied Geometry 3:3:0
Introduction to geometry, areas of polygons, triangles, circles, prisms, cylinders, pyramids, cones, frustums, spheres and special solids.
Prerequisite: TM 132 or the equivalent.

Industrial Mathematics 3:3:0
Introduction to trigonometry; strength of materials, work and power problems; speed ratios and pulleys and gears.
Prerequisite: TM 231.

Real Estate

The program of study is designed to prepare a student to enter the real estate industry in the fields of real estate sales, appraising, brokerage, finance, development, investment and management. It is planned for those entering the real estate industry, as well as for those who wish to expand their professional knowledge. These courses may be taken to satisfy the educational requirements of the Texas Real Estate Commission for salesman's licenses, renewals and broker's licenses.

Upon successful completion of 60 semester hours in the real estate degree program, a student is awarded an Associate of Applied Science degree in Real Estate.

After successful completion of 15 semester hours of real estate courses, a person is awarded a Certificate of Completion in Real Estate, upon request.

The real estate program is offered at the Beaumont, Orange and Port Arthur Campuses.

## Real Estate Courses (ReS)

### 1311 Principles and Practices
This is a study of the basic concepts and characteristics of real estate. It includes specialized areas such as real estate financing, investment, management, development, planning and property appraising.

### 1312 Real Estate Finance
This course deals with the finance involved in the real estate transaction, including the economic basis for mortgage financing, second mortgage and individual versus group or corporate financing.

**Prerequisite:** Re 1311.

### 1313 Real Estate Appraising
Methods of appraising real property from the income approach to value through residual techniques will be covered in this study.

**Prerequisite:** Re 1311.

### 1314 Real Estate Law
Law as it relates to real estate activities, including contract law, the law of agency and a study of legal characteristics influencing the capacity of real estate to produce a flow of services and income are topics explored in this course.

**Prerequisite:** Re 1311.

### 1315 Real Estate Marketing
Concepts for effective marketing of real estate through the sales process; prospecting, listing techniques, presentations, contracts, closings and basic objectives.

**Prerequisite:** Re 1311.

### 2315 Real Estate Development
This course is a study of the techniques and related areas of residential, industrial, recreational and marine (coastal) development, including certain ecological ramifications.

### 2316 Real Estate Investment and Management
This course is concerned with the analysis of real estate for investment decisions, including estimates of cash flow, impact of transaction and management of investment.

**Prerequisite:** Re 1311.

### 2317 Real Estate Current Trends and Problems
This course is designed to cover problems related to the practice of real estate.

**Prerequisite:** Re 1311.

### 2318 Real Estate Brokerage
This course consists of procedures to establish a real estate office; selling; securing and listing prospects, showing the property, financing the sale; legal factors of the transaction and closing the sale.

**Prerequisite:** Re 1311.

### 1301 Real Estate Internship
The student works with a real estate related business for 15 hours a week. The duties and activities are aimed at providing a training program for the student. Students, as a group, meet once a week with the instructor to analyze their work experience and relate it to their course in real estate.

**Prerequisite:** Re 1311.
Technical Department
Department Head: Dr. Jerry L. Wilson
231 Beeson Technical Arts Building

Drafting Technology
Program Coordinator: Ralph K. Mock

The two-year drafting program offered by the College of Technical Arts is designed to provide basic technical information required for entry into the occupation of drafting. Drafters prepare precise drawings and specifications from sketches, field notes, and other information furnished by an engineer or designer. They also calculate the strength, quality, quantity, and cost of materials. Final drawings contain a detailed view of the object as well as specifications for materials to be used, procedures to be followed, and other information to carry out the job. Upon graduation drafters may specialize in a particular field of work, such as mechanical, electrical, electronic, aeronautical, structural, pipe, or architectural drafting.

Anyone planning a career in drafting should be able to do detailed work requiring a high degree of accuracy, have good eyesight and eye-hand coordination; be able to function as part of a team since they work directly with engineers, architects, and skilled workers; and be able to do freehand drawings of three-dimensional objects. Artistic ability is helpful in some specialized fields. A graduate of this two-year program is awarded the Associate of Applied Science degree.

Recommended Program of Study

First Semester
- Dft 131 Drafting Instruments .............................................. 3.50
- Dft 132 Fund of Drafting .................................................. 3.50
- Dft 136 Basic Drafting Lab I ............................................... 3.06
- Dft 137 Basic Drafting Lab II ............................................. 3.06
- BC 131 Basic Communications or Eng Composition (Eng Dept) .... 5.30
- TM 131 Fundamentals of Math I or Approved Mth (Math Dept) .... 3.50

Second Semester
- Dft 134 Civil-Arch Drafting ............................................... 3.30
- Dft 135 Civil-Arch Techniques ........................................... 3.80
- Dft 138 Civil Arch Lab I .................................................... 3.06
- Dft 139 Civil Arch Lab II .................................................. 3.06
- BC 132 Business Communications or Eng Composition (Eng Dept) 3.30
- TM 131 Algebra-Trigonometry or Approved Mth (Math Dept) ....... 3.30

Third Semester
- Dft 231 A.S.M. Standards, Pipe and Fitting Designs .............. 3.30
- Dft 232 Process Pipe Drafting ............................................. 3.30
- Dft 236 Systems Drafting Lab I ........................................... 3.06
- Dft 237 Systems Drafting Lab II .......................................... 3.06
- Dft 230 Smokey's Table .................................................... 3.30
- JR 231 Job Relations or Approved Soc (Soc Dept) ................. 3.30

Fourth Semester
- Dft 234 A.I.S.C. Specifications and Standards .................... 3.30
- Dft 235 Structural Design ................................................ 3.30
- Dft 238 Structural Design Lab I ....................................... 3.30
- Dft 239 Structural Design Lab II ....................................... 3.30
- Dft 233 Drafting Design Prog ............................................ 3.30
- Elective ............................................................................ 3.30

Suggested Technical Arts electives: Dft 261; MTH 131, 132, 134, 135; BC 231; MT 135; TM 231. Other electives by departmental approval only.

Drafting Technology Courses (Dft)

131 Drafting Instruments ...................................................... 3.30
The proper use of all drafting instruments, the construction of freehand and mechanical lettering, dimensioning, multiview projection and geometrical construction. TM 131 (or equivalent) to be taken concurrently.

132 Fundamentals of Drafting ............................................... 3.30
Instruments and materials of the professional draftsman. The course will include geometric construction, orthographic projections, sections, conventions, various methods of pictorial drawing and other technology as required in the profession.
Prerequisite: Dft 131.

135 Introduction to Drafting .................................................. 3.14
A course designed to develop illustrative and graphic communication skills, with emphasis on presenting information effectively by using diagrams, drawings, prints, sketches, graphs and charts drawn freehand and employing commonly available drawing aids such as straight edges, squared and graph paper and similar aids.

134 Civil-Architectural Drafting ............................................ 3.30
This course covers the drafting techniques and theory of design for floor plans, schedules, elevations, site plans, foundations, electrical plans and schematics, sectional views, and surveying.
Prerequisite: Dft 131 and 132.
135 Civil-Architectural Drafting Techniques
This course introduces terminology and techniques related to building construction estimating. It also introduces structural steel shapes, loading conditions, and conditions of static equilibrium. Prerequisite: Dft 131 and 132.

136 Basic Drafting Laboratory I
This is the first in a series of four courses in the use of drafting instruments, freehand and mechanical lettering, conventional signs and symbols, orthographic projection and pictorial drawing. This is a comprehensive laboratory course in basic drafting procedures and skills and is planned as a preparation for the three succeeding courses which will provide practice in the skills required in specialized types of drafting. Dft 131 to be taken concurrently.

137 Basic Drafting Laboratory II
This course is a continuation of Dft 136. Dft 132 to be taken concurrently. Prerequisite: Dft 136.

138 Civil-Architectural Drafting Laboratory I
DRAFTING OF PLANS FOR CONSTRUCTION IN WOOD, METAL, OR MASONRY INCLUDING: FOUNDATION, FLOOR, AND ROOF DETAILS; WIRING, WINDOW, DOOR, AND DOOR FINISH SCHEDULES; AND ELEVATIONS. IT ALSO INCLUDES MISCELLANEOUS ELECTRICAL SCHEMATICS AND SURVEYING PROBLEMS. PREREQUISITES: DFT 136 AND 137.

139 Civil-Architectural Drafting Laboratory II
This is a continuation of Dft 138. Dft 134 is to be taken concurrently. Prerequisite: Dft 136 and 137.

1311 Blueprint Reading
A study of lines, views, symbols and dimensions involved in reading blueprint and shop sketches. Practice in making freehand sketches of simple objects.

1311 Electrical and Electronics Drawing
This course is designed to enhance the background of the electrical-electronics student as well as the professional draftsman, by treating the main areas of the electrical industry, such as electronics, automation, microelectronics, electric power, and architectural wiring.

250 Smokey's Tables
Introduction and applications of Smokey's Tables. Prerequisite: TM 1331 or equivalent.

251 ASM Standards, Pipe and Fitting Designs
A study of pipe and fittings, designs, symbols and specifications, sizing process lines and process symbols. Drafting of flow diagrams, vessels, heat exchangers, pumps, instruments, compressors and mechanical equipment. Prerequisite: Dft 132 and TM 1331 or equivalent.

252 Process Pipe Drafting
Process pipe drafting covering nomenclature, plans, elevations, details and process equipment. Prerequisite: Dft 231 and 230. Dft 230 may be taken concurrently.

253 Drafting Design Procedures
The solutions of essential miscellaneous elements in the design and drawing of problems in the electrical, architectural, piping, structural and other types of drafting by the use of Smokey's Tables and the calculator. Prerequisite: Dft 230 or approval of instructor.

254 AISC Specifications and Standards
AISC specifications and standards, basic strength of materials, structural theory and design. Detailing structure members and connections. Prerequisite: Dft 132 and 135 or 232.

255 Structural Design
Structural steel, completion of column details, brace details, skewed connections, moment connections, shear connections, erection drawings, stair and miscellaneous details. Design using AISC standards of beams and columns working withkip loads. Prerequisite: Dft 234.

256 Systems Drafting Laboratory I
A study of pipe and fittings, designs, symbols and specifications, sizing process lines and process symbols. Drafting of flow diagrams, vessels, heat exchangers, pumps, instruments, compressors and mechanical equipment. Dft 231 to be taken concurrently. Prerequisite: Dft 137.

257 Systems Drafting Laboratory II
This course is a continuation of Dft 256. Dft 232 to be taken concurrently. Prerequisite: Dft 256.

258 Structural Design Laboratory I
Drafting of plans, sections and details and AISC specifications for industrial structures which will include structural steel, pipe and concrete reinforcing rods. Dft 254 to be taken concurrently. Prerequisite: Dft 137 and 139 or 237.
Industrial Electronics Technology

Program Coordinator: William H. Mauer

Electronic technicians are faced with a veritable maze of semiconductor and microprocessor devices and a multitude of new and diverse circuits which utilize them. These devices and their applications increase continually as industrial, government, and academic research and development laboratories push back the frontiers of knowledge in pure and applied science and in technology. The technical manpower needed to help design, maintain, and repair the "new breed" of industrial electronics equipment that is currently available and in use is expected to triple during the next decade.

Learning about electronics requires that a person must acquire both technical knowledge and manual dexterity. Both are required in order to demonstrate an acceptable level of performance. Those who acquire basic electronic knowledge alone are of little value in industry if they cannot put it to use in the practical applications encountered in the real world. A truly technically trained individual must be able to do things with what he knows. The Industrial Electronics program offered by the College of Technical Arts teaches a person how to apply learned electronic knowledge to practical situations. A graduate of this two-year program is awarded the Associate of Applied Science degree.

Lamar University at Orange

Lamar University began offering courses in Orange, Texas, in 1969 on an extension basis. In 1971, the Texas Legislature created Lamar University at Orange and the citizens of Orange provided facilities for the educational center. The facilities have been expanded with the acquisition of land formerly owned by the U.S. Navy. An extensive remodeling of the main building was completed in 1976 at a cost exceeding $500,000.

Lamar University offers first and second year courses in the principal fields of the University in addition to complete programs in drafting technology, real estate, office occupations, industrial electricity and electronics, mid-management, industrial supervision, marine construction, welding and other career-oriented courses. Most courses are offered during the evening hours for the convenience of working students. For additional information, see the Lamar University at Orange bulletin.

Drafting Technology

This program is designed to provide basic technical information required for entry into the occupation of drafting. Drafters prepare precise drawings and specifications from sketches, field notes and other information furnished by an engineer or designer. They also calculate the strength, quality, quantity, and cost of materials. Final drawings contain a detailed view of the object as well as specifications for materials to be used, procedures followed, and other information to carry out the job. Drafters may specialize in a particular field of work, such as mechanical, electrical, electronics, aeronautical, structural, or architectural drafting.

Anyone planning a career in drafting should be able to do detailed work requiring a high degree of accuracy; have good eyesight; an eye-hand coordination; be able to function as part of a team since they work directly with engineers, architects, and skilled workers; and be able to do freehand drawings of three-dimensional objects. Artistic ability is helpful in some specialized fields.

A graduate of this two-year instructional program is awarded the Associate of Applied Science degree.

137 AC Laboratory
Familiarization with VTVM, oscilloscope and audio generator, experimentation and analysis of the characteristics of series and parallel inductance and capacitance and transformers. IET 132 to be taken concurrently.
Prequisite: IET 136

138 Solid State Laboratory I
CE-CB-CC circuits. Audio and linear circuits oscillators. Transistor testing devices. IET 134 to be taken concurrently.
Prequisite: IET 137

139 Solid State Laboratory II
Special transistors: FET, MOSFET, IGFET, etc. TTL basic circuits. N and D, nor gates. Visual audio oscillators. IET 135 to be taken concurrently.
Prequisite: IET 138.

230 Radio Telephone License Preparation
A course designed to prepare the students to take the Federal Communications Commission test. It is oriented primarily toward two-way radio communication services. Elements I and II prepares for the third-class license and Elements III for the second-class license.

231 Digital Logic I
The theory of TTL, including timers. Readouts, OP AMPS, the use of Truth Tables and the binary number system.
Prequisite: IET 135 and 1341.

232 Digital Logic II
The theory and application to practical circuits using CMOS devices. Emphasis is placed on clocked circuits, flip-flops, shift registers, counters and OP-amplifiers.
Prequisite: IET 231.

234 Microprocessor Theory I
Development of the computer, numbering systems, logic circuits, arithmetic logic.
Prequisite: IET 232.

234 Instrumentation for Process Measurement and Control
A study of the practical application of electronic and pneumatic instruments used in various petrochemical and manufacturing processes. TAUGHT ON ORANGE CAMPUS ONLY.
Prequisite: IET 232 or departmental approval.

235 Microprocessor Theory II
Theory of memories, computer organization, computer peripherals, programming. IET 233 may be taken concurrently.
Prequisite: IET 234 and 2331.

236 Digital Logic Laboratory I
Timers, registers, readouts, counters, OP Amps. IET 231 to be taken concurrently.
Prequisite: IET 139.

237 Digital Logic Laboratory II
Practical experiments with CMOS circuits. Clocked circuits, flip-flops, shift registers, counters, OP-amplifiers are examined in detail. IET 232 to be taken concurrently.
Prequisite: IET 236.

238 Microprocessor Laboratory I
Experiments with numbering systems, microcomputer basics, arithmetic, introduction to the microprocessor. IET 234 to be taken concurrently.
Prequisite: IET 237.

239 Microprocessor Laboratory II
Continued experiments with the MPU, interfacing, and programming. IET 235 to be taken concurrently.
Prequisite: IET 238.

Industrial Supervision
Industrial Supervision was approved in 1981 as an Associate of Applied science degree program after being offered for several years as a certificate program. The purpose of the program is to prepare supervisors for industry. The program contains courses needed by foremen, group
leaders, superintendents, and others who directly supervise workers in industry. The emphasis is on industrial as opposed to business.

After successful completion of the program of study, a student is awarded an Associate of Applied Science Degree.

A person who successfully completes 24 semester hours is eligible to receive a Certificate of Completion in Industrial Supervision.

**Recommended Program of Study**

**First Semester**
- MM 131 Survey of Business
- Eco 131 Principles of Eco
- *EC 131 Basic Communications
- TM 131 Fundamental Mathematics I
- *IS 1312 Applied Supervision

**Second Semester**
- *IS 1315 Cost Reduction
- BC 132 Business Communications
- TM 134 Business Mathematics
- BDP 131 Introduction to Tech Accounting
- *OSH 131 Introduction to Occ Safety & Health

**Third Semester**
- *IS 1313 Critical Path Sched
- Soc 131 Introduction to Sociology
- IS 1325 Industrial Communication I
- IS 254 Middle Mgmt Development
- *MM 232 Human Resource Management
- *Electives (3 hours)**

**Fourth Semester**
- MM 250 Legal Aspects of Business
- *IS 1322 Labor Relations & Lega
- Spc 131 Public Speaking
- IS 233 Training & Develop Workforce
- IS 231 Time & Motion Studies
- *IS 236 Human Resources & Mgt Devel

**Industrial Supervision Courses (IS)**

For course descriptions see page 41.

**Marine Construction**

This program is designed to train workers for entry level employment in the steel fabrication and shipbuilding industries. Ample features are designed into the curriculum to allow for substantial upgrading and/or diversification should graduates of the program choose to return at a later date for additional training.

The following outline of courses are suggested for a Certificate of Completion in Marine Construction.

**Recommended Program of Study**

**Structural Fitting and Layout**

**First Semester**
- MC 111 Orientation
- MC 130 Tack Welding and Cutting
- MC 131 Structural Fitting
- DF 1311 Blueprint Reading
- TM 131 Fund of Mach I
- BC 131 Basic Communications

**Second Semester**
- MC 231 Advanced Blueprint Reading
- MC 262 Marine & Struct Layout
- MC 263 Advanced Layout
- TM 1331 Algebra and Trig

**Marine Construction Courses (MC)**

111 Orientation
- Introduction to marine construction through the use of speakers and and plant tours.

130 Tack Welding and Cutting
- Basic tack welding and cutting skills needed by fitters and layouters.

131 Structural Fitting
- Simple lab projects which offer experience in reading basic prints, cutting, grinding, and fitting.

132 Liquid Piping Systems
- A study of the piping schemes used in ship construction for potable water, sanitary and fire fighting systems.
137 Marine Fire Systems
The design and layout of water, steam and chemical fire fighting systems will be studied in this course.

138 Potable Water System
A study of the system of piping used in the conveyance and protection of the water used for human consumption in the marine installation.

231 Advanced Blueprint Reading
The practice and application of lines, views, structural shapes, sections, detailed assembly drawings, orthographic, oblique, and perspective drawings, welding symbols, and their significance and application in the shop.

234 Gaseous Piping Systems
A study of fuel exhaust, compressed air and steam systems.

235 Marine Piping Drawings
A study of piping symbols, schematics, shop fabrication drawings, specifications and the take-off of materials from these drawings.

238 Fuel and Exhaust Systems
Problems associated with the layout and installation of systems that provide fuel for engine room, galley and heating equipment.

239 Air and Steam Systems
Problems associated with the layout and installation of compressed air to shop and engine room equipment and the steam system used for heating purposes.

262 Marine and Structural Layout
Lecture to apply to specific lab projects, including math as needed. More complicated lab projects than those in MC 131. Application of Smiley’s tables.

263 Advanced Layout
Concentration on the making of templates.

Mid-Management
Mid-Management is a program in business and supervisory management designed to develop the fundamental skills, knowledge, attitudes and experience which will enable men and women to function in decision-making positions as supervisors or managers. All new students must be counseled by a mid-management coordinator before registering.

A graduate of this two-year instructional program is awarded the Bachelor of Applied Science degree.

Mid-Management Courses (MM)

For course descriptions, see page 42.
Office Occupations

This program is designed to prepare for fulltime employment immediately upon completion of the program. Persons who are seeking their first employment in an office position and those who are seeking promotion may benefit from this curriculum.

A one-year diploma—requiring three full semesters—is offered for a general office clerk. A two-year associate of applied science degree (A.A.S.)—requiring four full semesters—is available for the general secretary.

Recommended Programs of Study

General Office Clerk (Diploma)

First Semester
- OO 141 Beginning Typing ............................................. 4.33
- OO 131 Business Machines ........................................... 3.03
- OO 120 Intro to Office Etiquette .................................... 2.20
- BC 131 Basic Communications or Eng Comp (Eng Dept) ....... 3.50
- MM 131 Survey of Business .......................................... 3.50

Second Semester
- OO 142 Intermediate Typing ......................................... 4.33
- TM 134 Business Mathematics ....................................... 3.50
- OO 134 Elementary Accounting ...................................... 3.50
- BC 132 Business Communications or Eng Comp (Eng Dept) .... 3.50
- CS 130 Computers and Society or BDP 133 ....................... 3.50

15:11:6

Third Semester
- OO 231 Advanced Typing ............................................. 3.12
- OO 235 Sec Office Procedures ........................................ 3.06
- MM 238 Legal Aspects of Bus ......................................... 3.30
- BDP 136 Inter Acc .................................................. 3.30

157:14

Diploma—46 semester hours.

General Secretary

First Semester
- OO 141 Beginning Typing ............................................. 4.33
- OO 143 Beginning Shorthand ......................................... 4.41
- BC 131 Basic Communications or Eng Comp (Eng Dept) ....... 3.50
- MM 131 Survey of Business .......................................... 3.50
- OO 120 Intro to Office Etiquette .................................... 2.20

Second Semester
- OO 142 Intermediate Typing ......................................... 4.33
- OO 144 Intermediate Shorthand ...................................... 4.41
- BC 132 Business Communications or Eng Comp (Eng Dept) .... 3.50
- OO 131 Business Machines .......................................... 3.06
- TM 134 Business Mathematics ....................................... 3.50

16:15:4

Third Semester
- OO 231 Advanced Typing ............................................. 3.12
- OO 241 Advanced Shorthand ......................................... 4.41
- OO 114 Elementary Accounting ...................................... 3.50
- OO 234 Intro to Word Processing .................................... 3.50
- CS 130 Computers and Society or BDP 133 ....................... 3.50

Fourth Semester
- OO 237 Machine Transcription ..................................... 3.06
- OO 235 Sec Office Procedures ........................................ 3.06
- OO 133 Intro to Office Etiquette .................................... 3.06
- MM 130 Legal Aspects of Bus ........................................ 3.50
- SO 131 or Pdy 131 Intro to Soc ..................................... 3.50

15:6:18

A.A.S.—64 semester hours.

Office Occupations Courses (OO)

120 Introduction to Office Etiquette .......................... 2:2:0

Introduces the student to various aspects of office work—filing, telephone techniques, grooming and nutrition, job interviewing, making application for jobs, how the office fits into the company product. Course includes field trips to various types of offices to acquaint students with many types of office work environments. Should be taken first semester enrolled.

131 Business Machines ........................................ 3:0:5

Instruction and practice on the 10-key adding machine, the printing calculator, and the electronic display calculator.

Prerequisite: Departmental permission.

134 Elementary Accounting ....................................... 3:3:0

Double entry accounting practices and procedures applied to a sole proprietorship utilizing special journals, working papers and the preparation of financial statements.

137 Partnership and Corporate Accounting ................. 3:3:0

An in-depth study of the organization and accounting procedures of a partnership and corporation.

Prerequisite: OO 134.
138 Payroll Procedures
Instruction in principles and procedures of payroll including computing and paying wages and salaries, social security benefits and taxes, federal and state unemployment insurance and taxes, personnel and payroll records, withholding for income tax purposes and examination of current federal income tax laws and instruction in preparing income tax returns.
Prerequisite: TM 134, CO 134.

139 Medical Terminology
Detailed course in medical terminology covering medical prefixes, suffixes and phonetics.

141 Beginning Typewriting
This course develops key-board skills and includes speed-accuracy skill development, tabulation, manuscript typewriting, business forms and business letters.

142 Intermediate Typing
This course continues to develop the basic typewriting skills and applies these skills to on-the-job activities in staff offices such as general accounting, executive, technical, professional and governmental offices. Prerequisite: CO 141 with a grade of C or better or an advanced standing exam with a grade of B or better.

143 Beginning Shorthand
Introduction to the principles of Gregg shorthand including shorthand alphabet, brief forms and phrasing. Reading, dictation at 60 wpm, basic transcription. Requires five hours per week of scheduled class and lab work. Prerequisite: Ability to type or must be taking typing concurrently; must demonstrate spelling and punctuation ability by passing test or be concurrently enrolled in BC 131.

144 Intermediate Shorthand
Development of the student's ability to take new-matter dictation at 60-100 words per minute and transcribe into mailable copy. Requires five hours per week of scheduled class and lab work. Prerequisite: CO 143 with a grade of C and BC 131 or must demonstrate spelling and punctuation ability by passing departmental test for spelling and punctuation.

231 Advanced Typing
Course provides additional on-the-job typing activities with emphasis placed on production typing. Prerequisite: CO 142 with a grade of C or better or an advanced standing exam with a grade of B or better.

233 Accounting Applications
Proper accounting procedures applied to practical situations involving the use of practice sets. Prerequisite: CO 134 and 137.

234 Introduction to Word Processing
History and background of word processing—its past, present and future; applications and career opportunities; extensive review of language skills—grammar, spelling, punctuation, and proofreading. Prerequisite: Should be able to type a minimum of 45 wpm, must demonstrate spelling and punctuation ability by passing test or be concurrently enrolled in BC 131.

235 Medical Office Procedures
Course prepares student for general secretarial training, but student may specialize in general, legal or medical secretarial work. Prerequisite: CO 142 with grade of "C" or better.

237 Machine Transcription
Course introduces student to the use of machine transcription for general secretarial training, but student may specialize in general, legal or medical transcription. Prerequisite: CO 142 with grade of "C" or better.

239 Intermediate Word Processing
Hands-on experience on text-editing electronic typewriters and/or word processing equipment with heavy emphasis on the production of mailable copy at the conclusion of semester. May be taking CO 237 concurrently.
Prerequisites: CO 142 with a C grade, CO 234 with a C grade, and CO 237.

241 Advanced Shorthand
Continued development of speed in taking dictation at 90-120 wpm and transcribing into mailable copy. Introduction to chemical terms used in area industry. Requires five hours per week of scheduled class and lab work. Prerequisite: CO 144 with grade of "C" or better or departmental permission.

**Plant Maintenance and Operations**

This course of study is provided for persons engaged in the maintenance and operations of the various petro-chemical plants in the area.

Objectives of this program are to reinforce the practical work skills developed by the student as a result of work experience and to ensure that the student has the necessary skills to maintain a position and fulfill a vital role in area industry.

A person who successfully completes 30 semester hours of this instructional program is awarded a Certificate of Completion in Plant Maintenance and Operations. Students must enroll on the main campus to complete the program.
Plant Maintenance and Operations Courses (PM)

For course descriptions see page 28.

Real Estate

Real Estate is a program designed to prepare a student to enter the real estate industry in the fields of real estate sales, appraising, brokerage, finance, development, investment and management.

A graduate of this two-year degree program is awarded the Associate of Applied Science degree.

Real estate courses may be taken to satisfy the educational requirements of the State Licensure Board for salesman license, renewal and broker's license.

Upon successful completion of 15 semester hours of real estate courses, a person can be awarded a Certificate of Completion in Real Estate.

Real Estate Courses (REs)

For course descriptions see page 44.

Welding

Welding concerns the various processes of joining metal parts together. It is the most common method for permanently connecting the sections necessary to build drilling rigs, pipelines, ships, bridges and many other manufactured units. The Welding Program is designed to prepare the student for a career in the field of industrial welding, either as a competent welder or in a position which requires knowledge of welding and welding equipment.

Welding requires manual dexterity, good eyesight and eye-hand coordination. Competence in oxyacetylene welding, arc welding and inert gas welding demands concentration and attention to the job being done. The student is given instruction in the safe and efficient methods for the different types of welding methods and procedures. Students' welds are regularly tested in ways common to industry in order to determine their quality.

Students who complete the required twenty-four semester hours of Welding courses may apply for a Certificate of Completion in Plate Welding. Students who successfully complete the entire program of study are awarded the Associate of Applied Science in Welding.
### Recommended Program of Study

- Elective ........................................................................... 3.50

**Note:**
- By approval
- *These courses are required for a certificate in pipe welding.

### Welding Courses (Wld)

For course descriptions see page 37.
Lamar University at Port Arthur

Port Arthur College merged with Lamar University in August 1975, with legislative funding of instructional programs at the first and second year level. Lamar University-Port Arthur courses are offered on the same basis as courses authorized for the university system in principal areas of business, education and liberal arts, as well as vocational and technical arts programs. Fields of study located only at the Port Arthur campus include automotive mechanics, electronics technology, cosmetology, drafting, welding, child care technology, real estate, general secretary, legal secretary and medicalsecretary.

For additional information, see the Lamar University at Port Arthur bulletin.

Automotive Mechanics

Automotive Mechanics is a course of study designed to prepare the student for a career in the field of automotive repair and servicing. The objectives of the program are to provide a student with the technical background to understand the operation of the modern automobile and to offer experience which will develop skills in the repair and servicing of automobiles and trucks.

This program is offered only at the Port Arthur campus and a student may receive a diploma for one year of study or an Associate of Applied Science degree for completion of the full two year program of study.

Automotive Mechanics Courses (AME)

131 Introduction to Automotive Mechanics
A study of shop safety, basic mechanical tool usage, and basic engine and component systems functions. 3:30

132 Fundamentals of Internal Combustion Engines
Study and skills in inspection and diagnosis of engine problems. Assembly and repair of automotive engines. 3:30

134 Automotive Electrical Systems
Study of automotive electrical and charging system components. Prerequisite: AME 137. 3:30

135 Fuel and Emission Control
An in-depth study of carburetors, repairs and adjustment of fuel system components. Prerequisite: AME 132. 3:30

136 Basic Shop Procedures
Practical application of shop operations, general shop safety and maintenance, use of hand tools and shop equipment. 3:07
Shop Equipment and Instrumentation Application 3:0:0
Application of study in the use of shop electrical and related equipment. Correct usage and safety will be stressed. Testing equipment operations.

Engine Tune-Up 3:0:0
A program of continued study and application of carburetion and engine electrical components and valve reconditioning. Safety related to engine operation will be stressed. Application of engine tune-in, inspection, adjustments and repairs of automotive ignition systems.
Prerequisite: AMe 137.

Automotive Trouble Shooting 3:0:0
Practical application of skills in diagnosis and repair.
Prerequisite: AMe 137.

Automotive Chassis 3:3:0
Study of automotive suspension parts and front-end alignment.
Prerequisite: AMe 137.

Automotive Engine Overhaul 3:3:0
Study and development of skills in engine overhaul and repair of malfunctions.
Prerequisite: AMe 139.

Automobile Transmission 3:3:0
Theory and repair of automatic and manual transmission repairs.
Prerequisite: AMe 137.

Automobile Air Conditioning 3:3:0
Auto air conditioning and heater service.
Prerequisite: AMe 137.

Chassis Repairs and Alignment Procedures 3:0:7
Application of study of AMe 131 in developing skills in service and repairs of springs, shocks, steering components, brakes and wheel alignment.
Prerequisite: AMe 137.

Advanced Engine Maintenance 3:0:7
Study and application of major engine and component repairs, inspection and service.
Prerequisite: AMe 139.

Application of Drive Train Repairs 3:0:7
Application and study of manual and automatic transmissions. Actual repairs, adjustment and inspection of transmissions, clutch assemblies, propeller shafts and joints and rear axle differentials.
Prerequisite: AMe 137.

Heater and Air Conditioning Service 3:0:7
An in-depth study of heater and air conditioning service and repairs.
Prerequisite: AMe 137.

Auto Body Technology

The objective of the program is to prepare persons for the profession of Auto Body Repairmen. Students will be taught the necessary skills, work habits and attitudes, application and use of theories, technical information, and related occupational information to assure sound judgments, accurate decisions, and procedures involved in the occupation to a professional degree.

This program is offered only at the Port Arthur campus, and a student may receive a diploma for one year of study or an Associate of Applied Science degree for completion of the full two-year program of study.

Auto Body Technology Course Descriptions (AUB)

131 Introduction to Auto Body Repair
   The use and safe handling of hand and power tools are covered. The various fasteners used on automobiles are described and demonstrated. Shop safety, shop layout, organization and management, and an overview of the automotive industry are taught.

132 Minor Metal and Paint Repairs
   Body construction and sheet metal alignment are studied. The applications of primer and paint, mixing and matching of paints, and application of plastic to minor damages are taught.

134 Business Operations and Estimating
   Business principles of managing a service shop are studied. Management functions and governmental regulations are stressed. Procedures and practical application of damage estimations are presented.

135 Paint Problems and Corrections
   The examination of potential problems that occur in the application of finishes is conducted. The recognition, prevention, and correction of problems are stressed.

136 Basic Auto Body Laboratory
   The safe and correct use of hand and air tools, sanders, and other related equipment is covered. Practical application of shop organization and management. Correct use of power equipment as well as basic filling of plastic, preparing metal, sanding, and masking are taught. Emphasis is on minor body repairs and adjustments.

137 Basic Metal and Paint Laboratory
   The practical applications of fillers, plastics, primers and paints are taught. The development of painting skills, basic metal repairs and replacement of panels is stressed.

138 Auto Body Welding
   The application of acrylene welding, spot welding, heating, bending, stretching and shrinking applied to body panels in repair processes is taught. Aluminum welding practices are included.

139 Automotive Glass and Trim
   The service techniques used in removal and replacement of automotive glass and trim are taught. Various type of trim, gaskets and hardware and assemblies are included.

231 Major Body Repair
   A study of principles and techniques for repair of major damage to fenders, panels, quarter panels, hoods, trunk lids and bumpers. Special projects, methods and problems are discussed.

232 Major Collision and Frame Repair
   Procedures and techniques are presented for the correction, repair and replacement of frame sections. The care and safe use of frame straightening tools and equipment are stressed. And, students will continue study of all materials used in the painting and metal repair field.

234 Special Effects
   Special decorative effects are covered, such as simulated wood and vinyl application. Transfer repair, renewal, removal, film application, painting and taping techniques are studied.

236 Major Body Repair Laboratory
   The practical application of major body repairs bringing together knowledge and techniques learned in previous sections.

237 Advanced Repair Laboratory
   Major paint repair and metal replacement are applied with emphasis on commercial and fast production techniques and practices. Practical application of all previous laboratory experiences and techniques is continued.

238 Special Effects Laboratory
   The practical application of decorative effects in use today. Specialized techniques are emphasized.
Business Data Processing

The objective of this course of study is to prepare the student for a career in computer programming within the field of business data processing. Students learn to write programs in different programming languages to solve a variety of problems. Programs vary with the type of problems to be solved.

In hiring programmers, employers look for people who can think logically and are capable of exacting analytical work. The job also calls for patience, persistence, and the ability to work with extreme accuracy even under pressure. Ingenuity and imagination are particularly important when programmers must find new ways to solve a problem.

A graduate of this two-year instructional program is awarded the Associate of Applied Science degree.

Placement Test

A good Math background is necessary for a student to benefit fully from any of the languages taught in the Business Data Processing program. A placement test has been developed that will assist in placing a student in the beginning freshman courses.

All entering students are required to take the test before they can register for any of the language courses. It will be given during summer orientation and regular registration periods.

Child Care Technology

This course of study is provided for persons preparing for, or employed in, the field of early childhood care. The courses may be used as academic instruction in working toward national Child Development Associate requirements, but do not provide Child Development Associate certification by themselves. An Associate of Applied Science degree will be awarded upon completion of the program.
Recommended Program of Study

First Semester
* CITT 114 Survey of Early Childhood Education.......................... 3.30  
* CITT 122 Nutrition and Health.................................................. 3.30  
* HRS 101 Marriage and Family Relationships............................. 3.30  
  BCT 141 Basic Communications or  
    Eng 101............................................................................... 3.30  
  or Math 133............................................................................... 3.30

  ............................................................. 15.15.00

Third Semester
* CITT 215 Advancing Language Use.............................................. 3.14  
* CITT 212 Toddlers 18 to 48 Months............................................ 3.30  
* CITT 215 Working with the Exceptional Child............................ 3.14  
* CITT 201 Special Problems Seminar and Practicum....................... 6.3.10  
Gov 331 Introduction to American Government.............................. 3.30  
  ............................................................. 18.11.18

Fourth Semester
* CITT 301 Developing and Advancing Creativity.......................... 4.2.14  
CITT 302 Development and Administration of Child Care Centers........ 3.8.0  
CITT 302 Curriculum Planning and Teaching Techniques................... 6.5.10  
** Elective........................................................................... 5.5.00  
  ............................................................. 18.13.04

**A certificate of completion will be awarded upon satisfactory completion of these courses.
***At least 2 semester hours to be chosen from Art 130, Art Appreciation, WPE 125 Basic Abstract Fundamentals, Psy 130 Introduction to Psychology, for 150 Introduction to Sociology or 221 Human Relations.

Child Care Technology Courses (CCT)
For course descriptions see page 22.

Cosmetology

The objective of the program is to prepare persons for a career in the Cosmetology profession. The recommended courses of study are designed to meet the requirements for licensure established by the Texas Cosmetology Commission. Students may apply to enter any of the following programs:

1. Two-year Associate of Applied Science — Cosmetology Operator
2. Two-year Associate of Applied Science — Cosmetology Instructor
3. One-year diploma — Cosmetology Operator
4. One-year diploma — Cosmetology Instructor

Licensure requirements include instruction, application of skills, written application, health certificate and birth certificate prior to application for examination by the Texas Cosmetology Commission. The program is offered on the Port Arthur campus only.

Cosmetology Operator

#### Cosmetology Courses (Cos)

141 Cosmetology I  
Development of personalities, hygienic living, professional ethics and sanitation, safety rules and state laws on cosmetology. A general orientation to cosmetology including basic fundamentals of skills.

142 Cosmetology II  
Includes shampooing, rinsing, hair and scalp treatments and related theory.

143 Cosmetology III  
Shaping of nails, nail styling and cosmetics that apply, including disorders and diseases of the nails. Practice in manipulative skills of facials, theory of massage and the art of applying make-up and the related theory.

144 Cosmetology IV  
Practice of basic hair shaping technique and the development of practical manipulative skills of cold waving, chemical hair relaxing, hair pressing and thermal waving and curling.

145 Cosmetology V  
The study of practice of creativity in hair styling through development of line and design. Includes combing and arranging.

146 Cosmetology VI  
The scientific art of applying hair tints, bleaches and froostings.

147 Cosmetology VII  
Shaping, styling and coloring wigs and hairpieces.

148 Cosmetology VIII  
Advanced techniques in hair shaping including new trend cuts and razor shaping.

1409 Cosmetology IX  
Beauty salon management, selling principles, preparation of applications and interviews, business records and supplies. Usually taught during a summer session.
Lamar University

1410  Cosmetology X
The development of all skills to speed requirements and proficiency of profession. Review of theory and preparation for examination by the Texas Cosmetology Commission. Usually taught during a summer session.

181  Cosmetology: Instructor I
A program to develop methods and techniques of teaching skills, including orientation and the theory of teaching. Basic unit planning and daily lesson plan development.
Prerequisite: Cosmetology Operator License.

182  Cosmetology: Instructor II
A program to develop practical clinic management techniques, to include supervision of student skills in classroom.
Prerequisite: Cosmetology Operator License.

183  Cosmetology: Instructor III
A program to develop methods and techniques of teaching informational theory relative to cosmetology.
Prerequisite: Cosmetology Operator License.

184  Instructor IV
A program to prepare students for passing the Texas Cosmetology Commission Examination for Cosmetology Instructor's License.
Prerequisite: Cosmetology Operator License.

**Drafting Technology**

This program is designed to provide basic technical information required for entry into the occupation of drafting. Engineering drafters prepare precise drawings and specifications from sketches, field notes and other information furnished by an engineer or designer. The majority of drafters specialize in some particular field of work such as piping, structural, architectural or machine manufacturing.

A graduate of this two-year instructional program is awarded the Associate of Applied Science degree.

**Electronics Technology Courses (ET)**

131 DC Theory and Circuits,
Electron theory, basic circuit characteristics, series circuits, parallel circuits, series-parallel circuits, conductors, insulators, and semiconductors, resistors, cells and batteries, Kirchhoff's Laws, Thevenin's Theorem.
3.30

132 AC Theory
Magnetism, electromagnetic induction, alternating voltage and current, inductance and inductive devices, capacitance and capacitive devices. Prerequisite: Credit for or registration in ET 131.
3.30

133 Basic Electricity Lab I
Introduction to voltmeters, ammeters, ohmmeters, component and symbol familiarization; wiring techniques for series, parallel, and complex DC circuits; use and operation of DC power supply.
3.06

134 Basic Electricity Lab II
Familiarization with the oscilloscope and signal generator; experimentation and analysis of series, parallel, and complex AC circuits.
3.30

135 Electronic Circuits I
A study of power supplies, voltage and current regulation, audio frequency amplifiers, radio frequency amplifiers, and oscillators. Prerequisite: ET 132 or departmental approval.
3.30

136 Electronic Circuit Lab I
Laboratory experiments covering semiconductor characteristics, power supplies, transistor biasing, basic amplifier circuits. Prerequisite: ET 134 or departmental approval.
3.06

137 Transistor Theory
Semiconductor materials, junction diodes and transistors, biasing techniques, transistor circuit configurations, and temperature considerations. Prerequisite: ET 132 or departmental approval.
3.30

138 Electronic Circuit Lab II
Laboratory experiments covering push-pull amplifiers, differential amplifiers, noise, resonance, and oscillators. Prerequisite: ET 136 or departmental approval.
3.06

230 Linear Integrated Circuits
A study of operational amplifiers, characteristics, general applications, testing and breadboarding op-amps, special purpose op-amps. Prerequisite: ET 137 or departmental approval.
3.30

231 Electronic Circuits II
A study of basic transmitters, amplitude modulation, frequency modulation, receivers, antennas, and transmission lines. Prerequisite: ET 135 or departmental approval.
3.30

232 Digital Logic I
A study of number systems, basic logic gates, Boolean algebra, simplifying logic circuits, encoders and decoders, monostable and bistable circuits. Prerequisites: ET 137 or departmental approval.
3.30
Digital Logic II
A study of more advanced logic circuits such as counters, shift registers, adders, memory, ALU, and introduction to interfacing.
Prerequisite: ET 232 or departmental approval.

Digital Logic Lab I
Experiments with the basic logic circuits discussed in ET 232.
Prerequisite: ET 138 or departmental approval.

Digital Logic Lab II
Experiments with the more advanced logic circuits discussed in ET 235.
Prerequisite: ET 234 or departmental approval.

Industrial Electronics I
A study of active and passive networks in the control of industrial and manufacturing processes.
Prerequisite: ET 137 or departmental approval.

Industrial Electronics II
A continuation of ET 236 with emphasis on thyristor motor control, digital/analog interfacing, and computer control of industrial processes.
Prerequisite: ET 236 or departmental approval.

Microprocessor Theory
A study of a microcomputer system including the arithmetic logic unit, memory registers, control registers, internal and external bus systems.
Prerequisite: ET 235 or departmental approval.

Microprocessor Lab
Hands on experience with a microcomputer system to enhance the theory in ET 238.
Prerequisite: ET 235 or departmental approval.

Advanced Electronic Circuit Lab
Experiments covering linear integrated circuits, FET's, MOSFET's, varactors and tunnel diodes, photo cells, wavetaps, LED's, multivibrators, thyristors, and UJT's.
Prerequisite: ET 135 or departmental approval.

Microcomputer Applications
Experiments with practical applications of microcomputers including interfacing, control of external machinery, etc.
Prerequisite: ET 235 or departmental approval.

Mid-Management
Mid-Management is a program in business and supervisory management designed to develop the fundamental skills, knowledge, attitudes and experience which will enable men and women to function in decision-making positions as supervisors or junior executives. All new students must be counseled by a mid-management coordinator before registering.

A graduate of this two-year instructional program is awarded the Associate of Applied Science degree.

Office Occupations (OO)
The objectives of the Office Occupations program are to provide skills needed for a career in five different clerical areas and to provide in-service education for office personnel wanting to improve their skills. Students may obtain an Associate of Applied Science degree in Medical Secretary, Legal Secretary, Word Processing, or General Secretary. Students also may receive a diploma in one of the following areas: Accounting Clerk, Clerical, General Secretary, Legal Secretary or Medical Secretary.

Word Processing (WP)
131 Word Processing Concepts 3:30
An introductory course in the history and scope of word processing, including concepts, terminology, career opportunities, technology, systems, procedures and equipment. The course will also contain a review of language skills: spelling, grammar, punctuation, and proofreading.

132 Word Processing I 3:23
The student will be introduced to basic word processing machine operating techniques, document generation, keyboarding, editing, and document distribution and retention. The course will be taught using screen-diskette word processing equipment and the memory typewriter. The course also introduces the student to the use of machine transcription for general secretarial training, but students may specialize in general, legal, or medical transcription.
Prerequisite: OO 142 or concurrent enrollment.
Word Processing II
This course is designed to provide advanced training in word processing using screen-diskette word processing equipment and in conjunction with dictating/transcribing equipment. Emphasis will be placed on the production of mailable documents. The course will also teach development of teamwork skills, work scheduling, flow charting, systems analysis, and managing a word processing center.
Prerequisite: WP 132 with a grade of "C" or better.

Word Processing III
A capstone word processing course using screen-diskette word processors. Emphasis is placed on the production of mailable documents in realistic office-type experiences. The student will integrate previously learned operational skills with decision-making and human relations skills.
Prerequisite: WP 231 with a grade of "C" or better.

Office Occupations Courses (OO)

130 Introductory Typewriting
For students with no previous typewriting instruction. Emphasis is placed on mastery of keyboard, development of correct typewriting techniques, centering and personal-use typewriting. May be used as elective, but not as a required course in Office Occupations programs.

131 Business Machines
Instruction and practice on the 10-key adding machine, the printing calculator, the electronic display calculator and the posting machine.
Prerequisite: Departmental permission.

132 Key Punch
With regards to the IBM 029 and IBM 129, this course consists of an indepth study in making program cards and verifying pre-punched cards with concentration on becoming familiar with the keyboard and emphasis on accuracy, as well as speed.
Prerequisite: 45 WPM on typewriter. A certificate is offered for key punch upon successful completion of the course.

133 Bookkeeping/Accounting
Basic course in bookkeeping/accounting designed for students with no previous accounting instruction. Provides basic understanding of accounting through the explanation of procedures involved in the accounting cycle for service and manufacturing businesses.

134 Elementary Accounting
Double-entry accounting practices and procedures applied to a sole proprietorship utilizing special journals, working papers and the preparation of financial statements.
### Business Legal Procedure
Basic business legal procedures and forms. This will include contracts, sales, commercial paper, bailments, insurance, agencies, transferring of property; also visit to Small Claims Court.

### Partnership and Corporate Accounting
An in-depth study of the organizational and accounting procedures of a partnership and corporation.
Prerequisite: 00 134.

### Payroll Procedures
Instruction on principles and procedures of payroll including computing and paying wages and salaries, social security benefits and taxes, federal and state unemployment insurance and taxes, personnel and payroll records, withholding for income tax purposes and examination of current federal income tax laws and instruction in preparing income tax returns.
Prerequisite: TM 134, 00 134.

### Medical Terminology
Detailed course in medical terminology covering medical prefixes, suffixes and phonetics.

### Beginning Typewriting
This course develops keyboard skills and includes speed-accuracy skill development, tabulation, manuscript typewriting, business forms and business letters.
Prerequisite: 00 130 or departmental permission.

### Intermediate Typing
This course continues to develop the basic typewriting skills and applies these skills to on-the-job activities in staff offices such as a general office, an accounting office and an executive office and in service offices such as a technical office, a professional office and a government office.
Prerequisite: 00 131 with a grade of "C" or better.

### Beginning Shorthand
Introduction to the principles of Gregg Shorthand including shorthand alphabet, brief forms and phrasing. Reading, dictation at 60 wpm, basic transcription. Requires five hours per week of scheduled class and lab work.
Prerequisite: Ability to type or must take typewriting concurrently, or departmental permission.

### Intermediate Shorthand
Development of student’s ability to take new-matter dictation at 60-100 wpm and transcribe into mailable copy.
Prerequisite: 00 143 Beginning Shorthand with grade of "C" or better or departmental permission.

### Advanced Typing
Course provides additional on-the-job typing activities. Emphasis is placed on production typing.
Prerequisite: 00 142 with grade of "C" or better.

### Office Practice
Introduces the student to three important aspects of secretarial work filing, duplicating machine processes and machine transcription. Spelling and punctuation are also emphasized.
Prerequisite: 00 142.

### Accounting Applications
Proper accounting procedures applied to practical situations involving the use of practice sets.
Prerequisite: 00 134, 00 137.

### Secretarial Office Procedures
Course prepares student for general secretarial training, but student may specialize in general, legal or medical secretarial work.
Prerequisite: 00 142 with grade of "C" or better.

### Machine Transcription
Course introduces student to the use of machine transcription for general secretarial training, but student may specialize in general, legal or medical transcription.
Prerequisite: 00 142 with grade of "C" or better.

### Advanced Shorthand
Continued development of speed in taking dictation at 90-120 wpm and transcribing into mailable copy.
Introduction to chemical terms used in area industry.
Prerequisite: 00 144 with grade of "C" or better or departmental permission.

# Real Estate
The program of study is designed to prepare a student to enter the real estate industry in the fields of real estate sales, appraising, brokerage, finance, development, investment and management. It is planned for those entering the real estate industry, as well as for those who wish to expand their professional knowledge. These courses may be taken to satisfy the educational requirements of the Texas Real Estate Commission for salesman’s license, renewal and broker’s license.

Upon successful completion of 60 semester hours in the Real Estate degree program, a student is awarded an Associate of Applied Science degree in Real Estate.
After successful completion of 15 semester hours of Real Estate courses, a person is awarded a Certificate of Completion in Real Estate, upon request.

**Real Estate Courses (REs)**

For course descriptions see page 44.

**Welding**

Welding concerns the various processes of joining metal parts together. It is the most common method for permanently connecting the sections necessary for building drilling rigs, pipelines, ships, bridges and many other manufactured units. The welding program is designed to prepare the student for a career in the field of industrial welding, either as a competent welder or in a position which requires knowledge of welding and welding equipment.

Welding requires manual dexterity, good eyesight and eye-hand coordination. Competence in oxyacetylene welding, arc welding and inert gas welding demands concentration and attention to the job being done. The student is given instruction in the safe and efficient methods for the different types of welding methods and procedures. Students’ welds are regularly tested in ways common to industry in order to determine their quality.

Students who complete the required twenty-four semester hours of welding courses may apply for the Certificate in Plate Welding. Students who successfully complete the entire program are awarded the Associate of Applied Science degree.

Welding Courses (Wld)

For course descriptions see page 37.
Academic Affairs

Graduation Requirements

Associate of Applied Science

Generally, students are eligible for graduation when they have completed an approved program of study. Specifically, a student must:

1. Satisfy all admission requirements.
2. Complete an approved degree plan.
3. Have at least a 2.0 grade point average on all courses attempted in the College of Technical Arts, at least a 2.0 grade point average on all courses used to meet degree requirements and at least a 2.0 grade point average on all courses in the major field. These grade point requirements must be met before applying for graduation.
4. Complete 24 semester hours of major work at Lamar with 12 hours in 200 level courses.
5. Make final application for graduation and pay all fees by the deadline date as stated in the current catalog.
6. Attend the official graduation exercise or receive prior approval from the Dean of Admissions and Registrar to be absent.

Diploma

1. Satisfy all admission requirements.
2. Complete an approved diploma plan.
3. Have at least a 2.0 grade point average on all work submitted on the diploma plan and at least a 2.0 on all courses in the major field submitted on the diploma plan.
4. Complete 18 semester hours of major work at Lamar.
5. Make final application for graduation and pay all fees by the deadline date as stated in the current bulletin.

Certificate of Completion

Generally, students are eligible for graduation when they have completed an approved program of study. Specifically, a student must:

1. Satisfy all admission requirements.
2. Complete an approved certificate plan.
3. Have at least a 2.0 grade point average on all work submitted on the certificate plan.
4. Make application for certification to the person responsible for the program.

Graduation Under a Particular Bulletin

A student normally is entitled to graduate under the degree provisions of the catalog in effect at the time of the first completed semester of enrollment with these exceptions:

A catalog more than seven years old shall not be used.

The program of the student who interrupts enrollment (for reasons other than involuntary military service) for more than one calendar year shall be governed by the catalog in effect at the time of the student's re-entrance to the University. The student who interrupts enrollment for involuntary military service must re-enroll within one year from the date of separation from military service in order for this provision to apply. For these purposes, enrollment shall be defined as registration for and successful completion of at least one course during an academic term. A student forced to withdraw for adequate cause before completion of a course may petition for a waiver of this provision at the time of withdrawal.

The program of the student who changes major from one department to another within the University shall be governed by the degree requirements in effect at the time the change of major becomes effective.

At the discretion of the dean, the student will be required to comply with all changes in the curriculum made subsequent to the year in which the student is enrolled. Deletions and additions of courses will be of approximately equal credit so that no student will have an overall appreciable increase of total credits required for graduation.
Any first-time college student who entered a junior college on or after September 1, 1968, can qualify, upon transfer to Lamar University, to graduate under the Lamar University catalog in effect when the student entered the junior college if the core curriculum provisions of the Coordinating Board are followed. Students are subject to the requirement that if they interrupt their studies for more than one calendar year at the junior college or before transfer to Lamar University, they must qualify for graduation under the catalog in effect when they return to the junior college or matriculate at Lamar University. This policy became effective for the year 1974-75.

Graduation With Honors

To be designated as honor graduates, members of the College of Technical Arts graduating class must (1) have completed at least 30 semester hours at Lamar University; (2) have a grade point average of at least 3.5 for all course work attempted at Lamar as well as a 3.5 on the combination of work at Lamar and all attempted work at other institutions attended. A grade point average of 3.5 to 3.64 qualifies for "honors," 3.65 to 3.79 for "high honors" and 3.80 to 4.00 for "highest honors."

Grades made the semester of graduation are included in the calculation of grade point averages for honors. Recognition of honor graduates at the commencement exercises, however, will of necessity be limited to those who have the qualifying grade point average at the end of the semester or term preceding graduation. Both diplomas and permanent records indicate graduation honors.

Academic Progress

Student Classification

Student are classified as freshmen, sophomores, juniors, seniors and post baccalaureate. For the purpose of determining eligibility to hold certain offices and for other reasons, officially enrolled students are classified as follows:

Freshman: has met all entrance requirements but has completed fewer than 30 semester hours.
Sophomore: has completed a minimum of 30 semester hours with 60 grade points.
Junior: has completed a minimum of 60 semester hours with 120 grade points.
Senior: has completed a minimum of 90 semester hours with 180 grade points.
Post baccalaureate: holds a bachelor's degree, but is not pursuing a degree program.

Grading System

A—Excellent  W—Withdrawn
B—Good  Q—Course was dropped
C—Satisfactory  S—Credit
D—Passing  U—Unsatisfactory, no credit
F—Failure  NG—No grade
I—Incomplete

The grade of W or Q is given if the withdrawal or drop is made before the penalty date or if the student is passing at the time of withdrawal or drop.

The grade of I may be given when any requirement of the course, including the final examination, is not completed. Arrangements to complete deficiencies in a course should be made with the instructor.

Incomplete work must be finished during the next long semester, or the Office of Admissions and Records must change the I grade to the grade of F. The course must then be repeated if credit is desired.

An I grade also automatically becomes an F if the student reregisters for the course prior to removing the deficiencies and receiving a grade change.

The instructor may record the grade of F for a student who is absent from the final examination and is not passing the course.

Semester grades are filed with the Office of Admissions and Records. A grade may not be recorded for a student not officially enrolled in a course during the semester covered. A grade may not be corrected or changed without the written authorization of the instructor giving the grade.
The written instruction for a grade change should be accompanied by a statement explaining the reason for the change.

**Second Associate Degree**

When another associate degree is taken simultaneously, or has been taken previously, the second associate degree may be granted upon the completion of all required work for the second degree. A total of 15 semester hours above the number required for the degree having the greater semester hours requirements must be completed.

**Changing Schedules**

All section changes, adds and drops must be approved by the department head of the student’s major field. All such changes are initiated by the completion of the proper form available in the department head’s office. Usually, a course may not be added after the first week of the semester or first two days of a Summer Session.

**Dropping Courses**

After consultation with their advisor and/or department head, students may drop a course and receive a grade of "Q" during the first six weeks (two weeks in the summer session) of the semester. For drops after this penalty-free period, grades are recorded as "Q" or "F" indicating that the student was passing or failing at the time of the drop. A grade of "Q" may not be assigned unless an official drop has been processed through the Office of Admissions and Records. A student may not drop a course within seven calendar days of the beginning of final examinations or three calendar days before the end of a summer term.

**Withdrawals**

Students wishing to withdraw during a semester or summer term should fill out a Withdrawal Petition in, triplicate in the office of their department head. Students must clear all financial obligations and return all uniforms, books, laboratory equipment and other materials to the point of original issue. Three copies of the withdrawal form signed by the department head, the director of Library Services and an associate dean of Student Development are presented to the Office of Admissions and Records by the student.

The Finance Office, on application before the end of the semester or Summer Session, will return such fees as are returnable according to the schedule shown under the "Fees" section of the catalog. If a withdrawal is made before the end of the sixth week (second week of a summer term) or if the student is passing at the time of withdrawal after the sixth week, a grade of "W" is issued for each course affected. A grade of "F" is issued for all courses not being passed at the time of withdrawal after the penalty-free period.

A student may not withdraw within seven calendar days of the beginning of final examinations or three calendar days before the end of a summer term. A student who leaves without withdrawing officially will receive a grade of "F" in all courses and forfeit all returnable fees.

**Enforced Withdrawal Due to Illness**

The director of the Health Center and the vice-president for Student Affairs, on the advice of competent medical personnel, may require withdrawal or deny admission of a student for health reasons (mental or physical).

**Grade Point Average Computation**

The grade point average is a measure of the student’s overall academic performance and is used in the determination of academic standing, rank in class, eligibility for graduation, etc.

In order to compute grade averages, grade points are assigned to letter grades as follows: to the grade A, 4 points; to B, 3 points; to C, 2 points; to D, 1 point, and to F, I, S, U, NG, W, 0 points. The number of grade points earned in a course is obtained by multiplying the number of semester hours credit by the number of points assigned to the grade made in the course.

The grade point average is calculated by dividing the total number of grade points earned by the total number of semester hours attempted in courses for which the grades A, B, C, D, F and I are assigned. Thus, for grades, S, U, NG, W and Q, neither semester hours nor grade points are used.
in the computation of the grade point average. Hours attempted include all work taken whether passed, failed or repeated.

This method of calculating grade point averages will apply to all students in baccalaureate programs of study effective July 5, 1978. The University’s former repeat policy will not apply to students in four year programs after this date; thus, the grade of a course repeated after July 5, 1978, may not be substituted for a prior grade.

Grade point averages for students in certificate, diploma and associate degree programs are calculated in the manner prescribed for baccalaureate programs, with one exception. A student in one of these programs who passes a course at the same institution where the student previously received a failing grade (F or U) will have only the passing grade and its associated grade points applied toward any certificate, diploma or associate degree. After the course is repeated, the student must file a request for a grade point adjustment with the Records Office. Any adjustment to a grade point average made during the time a student is enrolled in an applicable course of study is disregarded once the student enters a four-year program.

**Final Grade Report**

Reports on grades are mailed at the end of each semester or summer term. These reports include the semester grades and the grade point average for the semester, and for all work attempted at the University.

**Scholastic Probation and Suspension**

Students are expected to make acceptable scholastic progress toward their degree objectives. A "C" is the minimum satisfactory grade and a "C" average or 2.0 grade point average (GPA) constitutes satisfactory performance. Since two grade points are awarded for each semester hour of "C", students are in good standing if they have earned at least twice as many grade points as semester hours attempted. The academic progress of a student with less than enough grade points for a "C" average is unsatisfactory and the student is on scholastic probation for as long as a deficiency exists. The grade point deficiency is the number of grade points less than is required for a "C" average, i.e. the number less than twice as many grade points as hours attempted.

All students with a grade point deficiency of 25 or more grade points at the end of the fall and spring semesters shall be suspended for the following semester providing that no first time college student shall be suspended at the end of his first semester of attendance.

Students suspended from Fall and/or Spring Semesters by this action may, however, attend the Summer Session on probation. Students with a grade point deficiency less than 25 at the close of the Summer Session may register for the following Fall Semester but will be charged with a suspension.

Students returning from an academic suspension must continue to reduce their grade point deficiency every semester of enrollment until the deficiency is eliminated. Should students fail to reduce their deficiency in any one semester, they will be suspended, unless approved for probationary re-enrollment by the dean of their college.

The first academic suspension shall be for one long semester, the second for two long semesters; and the third for four long semesters and readmission only with special permission of the dean of the academic college.

A college may prescribe academic requirements for its majors in addition to the basic university grade point standard, with the approval of the vice-president for Academic Affairs. Students suspended under this provision may register in another college provided they meet the prescribed standards and are accepted through the normal change of major procedure. Students may not register for a 300 or 400 level course offered by the suspending college unless the course is required by their new curriculum.

**Academic Records and Transcripts**

Academic records are in the permanent custody of the Admissions and Records Office. Transcripts of academic records may be secured by an individual personally, or will be released on the student's written authorization. Also see Academic General Information, this bulletin.

Students who owe debts to the University may have their official transcripts withheld until the debt is paid.
Chapter 675, Acts of the 61st Legislature, 1969 Regular Session, provides that "no person may buy, sell, create, duplicate, alter, give, or obtain a diploma, certificate, academic record, certificate of enrollment or other instrument which purports to signify merit, or achievement conferred by an institution of education in this state with the intent to use fraudulently such document or to allow the fraudulent use of such document.

"A person who violates this Act or who aids another in violating this Act is guilty of a misdemeanor and upon conviction, is punishable by a fine of not more than $1,000 and/or confinement in the county jail for a period not to exceed one year."

**Dean's List**

At the end of each semester the Office of Admissions and Records prepares a list of all full-time (those who complete 12 or more semester hours) freshman and sophomore students who have earned for that semester a grade point average of 3.40 or above and junior and senior students who have earned for that semester a grade point average of 3.60 or above. This list is the Dean's List and is announced by the academic dean of each college.

**Course Numbering**

The unit of instruction for credit purposes is the course. Most courses meet three hours each week and have a credit value of three semester hours for one semester, or six hours for two semesters.

Each course has an individual alpha-numeric code (such as Eng 333). The alpha part indicates the subject area. Each number contains three or more figures. The first digit indicates the rank of the course: 1, means it is freshman level; 2, sophomore level; 3, junior level; and 4, senior level. The second figure indicates the number of semester hours credit. The third figure (or figures) indicate the order in which the course normally is taken. The letter a or b following course numbers indicates partial credit in each case; full credit for such numbered courses will be granted only when the series is complete.

Applied music courses are numbered so the second number indicates both semester hour credit and number of private lessons each week.

In this bulletin, each course title will be followed by three digits separated by colons such as (3-3-1). This code provides the following information. The first number is the semester hours of credit for the course. The second number is the class hours of lecture, recitation or seminar meetings per week. The third number is the required laboratory hours per week. The letter A indicates that the hours are Arranged, usually with the instructor of the course.

**New Courses**

In order to meet changing educational requirements, the University reserves the right to add any needed courses at any time without regard to the listing of such courses in the catalog. It is expected that a listing of these courses will appear in the next catalog issue.

The right to change numbers in order to indicate changes in semester hours also is reserved for the reasons above.

**Semester Hour**

The unit of measure for credit purposes is the semester hour. One hour of recitation or equivalent in laboratory work each week usually is equal to one semester hour. For each classroom hour, two hours of study are expected. Two or more hours of laboratory work are counted equivalent to one classroom hour. For laboratory work which requires reports to be written outside of class, two clock hours are usually counted as one semester hour.

**Registration for Classes**

Students will be permitted to attend class only when the instructor has received evidence of proper registration. Registration dates and deadlines are listed in the official University calendar. Students may add courses, make section changes or drop courses only within the period specified in the calendar. A schedule of classes is prepared by the Office of Admissions and Records well in advance of a given semester.
Minimum Class Enrollment

The University reserves the right not to offer any courses listed in this catalog if fewer than 12 students register for the course.

Evening Classes

Classes offered after 4:45 p.m. are considered Evening Classes. Both day and evening classes, with few exceptions, are taught by the regular faculty, and educational facilities are the same. Persons employed during the day may attend classes in the evening and study to obtain a degree or to expand their knowledge in a special field of interest as an adult non-degree student. Enrollment forms are available through the department of Off-Campus and Evening Programs, Room 101 Wimberly Student Affairs Building.

Auditing of Courses by Senior Citizens

Senior citizens, 65 years of age or older, may audit courses without the payment of fees on a space available basis.

Class Attendance

Regular and punctual attendance in classes and laboratories is expected of all students. Instructors should maintain attendance records and adhere to attendance policies formulated by their departments.

In general, the individual instructor approves absences. Absences approved because of engagement in a university activity are published by the Admissions and Records Office. An approved absence allows the student to make-up examinations and written assignments without penalty. Although the student must make up the work missed, additional laboratory time is not granted the student.

All instructors should announce these policies concerning unexcused absences at the beginning of each semester.

Students who miss class work to the extent that their laboratory performance may be unsafe or that they have no reasonable chance to pass the course may be dropped from that course by the department head. The department head should notify the student prior to this action. If this action is taken after the first six weeks of the semester, a grade of “F” may be recorded for the course. The student’s major department will be notified that the student was dropped for the reason of excessive unexcused absences.

Overloads

The Dean of the College of Technical Arts must approve all overloads. In general, the student must demonstrate that he/she is capable of maintaining a high performance level in all classes.

Change of Address or Name

Students are responsible for all communications addressed to them at the address on file in the Student Affairs Office and in the Office of Admissions and Records. Any student who moves during a semester must immediately register his/her change of address in the office of the dean of Student Development and in the Office of Admissions and Records. Change of address forms are available in the Office of Admissions and Records.

Change of name due to marriage, or correction of name because of spelling errors may be made by completing a name change card at the Admissions and Records Office. All name changes must be accompanied by a copy of the legal document making the name change official. This document will be kept on file in the student’s confidential folder.

Educational Records and Student Rights

The following information concerning student records maintained by Lamar University is published in compliance with the Family Education Rights and Privacy Act of 1974 (PL 93-380).

Access to educational records directly related to a student will be granted to him or her unless the type of record is exempted from the provision of the law.

The types, locations and names of custodians of educational records maintained by the University are available from the dean of Admissions and Records.
Access to records by persons other than the student will be limited to those persons and agencies specified in the statute. Records will be maintained of persons granted such access and the legitimate interest in each case.

The release of information to the public without the consent of the student will be limited to the categories of information which have been designated by the University as directory information and which will be routinely released. The student may request that any or all of this information be withheld from the public by making written request to the Admissions and Records Office. The request must be made by the last official day to register for a given session and applies to that session only. Directory information includes name; current and permanent address; telephone listing; date and place of birth; sex; marital status; country of citizenship; major and minor; semester hour load; classification; class schedule; eligibility for and participation in officially recognized activities and sports; weight and height of members of athletic teams; dates of attendance; degrees and awards received, with dates; previous educational agencies or institutions attended.

A student has the right to challenge records and information directly related to him or her if it is considered to be inaccurate, misleading or otherwise inappropriate. Issues may be resolved either through an informal hearing with the official immediately responsible or by requesting a formal hearing. The procedure to be followed in a formal hearing is available in the Office of Admissions and Records.

The right of parental access to student records may be established by either of two methods; first, by the student filing a written consent statement and second, by the parent validating the student's dependency as defined by IRS.
Student Affairs

Counseling and Testing Center

Lamar University maintains a Counseling and Testing Center to serve students encountering educational, social or personal difficulties as well as provide testing services. The center is staffed with a fully-trained and qualified psychologist and counselors and a psychometrist to assist in the resolution of student problems and questions.

While the Counseling Office does not address problems of a long-term therapeutic nature, students encountering difficulties are encouraged to consult the office on a no-charge basis. All contacts are maintained as confidential and there are no entries made in the student's records. In addition to counseling, the office maintains a library to assist students in making decisions concerning choices of majors and careers.

The Testing Office coordinates required testing by Lamar University and provides individual testing services which include the administration and interpretation of vocational interest, and personality tests as requested by the Counseling Center staff. The Testing Office also acts as a National Testing Center for programs such as the Graduate Record Examinations, Law School Admission Test, National Teacher Examinations, Graduate Management Admission Test, Scholastic Aptitude Test (SAT), American College Testing Program (ACT), College Level Examination Program (CLEP), General Educational Development (GED High School Equivalency Test) and numerous other tests. Information and application forms concerning these tests may be obtained from the Testing Office.

The Counseling and Testing Center is located in the Wimberly Student Affairs Building and observes the office hours of the University. A staff member is also available until 7 p.m. Monday through Wednesday for the benefit of students who are attending evening classes.

Health Center

The University maintains a Health Center for the use of students. Two types of service are available: (1) out-patient service for those who have minor ailments but who do not require constant supervision, and (2) infirmary service for those who are in need of the continued attention of the University physician or of nursing care.

It is not possible for the University to provide unlimited medical service. Special medicines, examinations, treatments, X-rays and laboratory tests are not furnished. No charge is made, however, for up to 10 days care each semester in the Health Center, except for meals.

All students pay a Health Service Fee of $5 up to 5 semester hours then $1 for each additional hour with a maximum of $15 for each of the Fall and Spring semesters, and $1 per semester hour with a maximum of $10 for each of the Summer sessions. Vaccines, sera and gamma globulin will be given in the Health Center from 1:00 to 4:30 P.M. Monday through Friday free of charge. Pre-admission vaccinations are not included. All drugs prescribed and dispensed in the Health Center are free of charge except for a limit of one prescription refill per illness or accident. The first $100 of costs for emergency care of accidental injuries sustained on the campus and treated in a local hospital or doctor's office will be paid from student health fees. For services in the Health Center, each student must present his or her student services card.

The Health Center is located on East Virginia Street adjacent to tennis courts. The Health Center does not provide care for students requiring surgery or the services of specialists. In these cases, every effort will be made by the physician or nurse to refer to a doctor or facility for treatment; furthermore, every effort will be made to notify the parent or guardian of the student's needs.

The University assumes no responsibility for continued medical care for chronically ill or injured students. These students should arrange for the care of a private physician. When the University is not in session, the Student Health Center is not responsible for a student's health care.

The University is not under obligation to provide hospital services elsewhere if the Health Center is filled to capacity. The Health Center, however, has a sufficient number of beds for all normal needs.

Students who are ill should report promptly to the Health Center for medical care.
Learning Skills Programs

The Department of Learning Skills Programs is continually seeking to develop new programs and approaches to aid students in making the most of their college experience and thus increase student retention.

Carefully selected and trained student counselors under the direct supervision of the Director of Learning Skills conduct a systematic instructional program designed to provide students with the opportunity to develop the kinds of skills necessary for satisfactory performance in college courses. This program is designed to serve all students—both the very able learners and students with potential academic problems. Any student, regardless of SAT or ACT score, high school rank, grade point average, or classification is eligible to take the course.

The office of Learning Skills Programs also assists with new student orientation and with obtaining and evaluating assessment data for appropriate programs.

Students who desire more information should contact the Director of Learning Skills, Galloway Business Building, Room 102.

Technical Arts Learning Support Center

The College of Technical Arts operates a Learning Support Center for Technical Arts students who need assistance with their studies. Tutorial assistance in several Technical Arts courses is available.

Placement Center

The Placement Center is a centralized operation responsible for placement activities for all colleges of the University. The placement services are available free of all costs to students, faculty, staff and all former students. The center keeps updated information in career fields and job areas, employers and the kind of employees being sought.

Interviews are scheduled regularly with companies, governmental agencies, schools and other employers.

The center also offers student seminars pertaining to job search techniques, interviews, resume writing and job availability. The Placement Center is located in Room 102 of the Galloway Business Building.

Special Services Program

The Special Services Program, under the auspices of the Vice President for Student Affairs/Dean of Students, is designed to provide support services for students who need academic counseling or other assistance to successfully complete their college education. The goal of the office is to increase the retention and graduation rate of students who, by traditional academic measures, would have difficulty succeeding in college. There are also cultural and social activities and seminars included in the program to motivate, expose and help students learn to think more clearly and effectively in problem-solving situations.

The Special Services Program staff includes a career counselor to help with educational and vocational planning, a mathematics specialist to instruct and assist students who require supplementary help in that area, and a reading specialist to assist students who need help in reading and/or English. In addition, a student tutoring staff is available to provide individualized assistance to program participants. Any student enrolled at Lamar University who is determined to be educationally or economically disadvantaged or physically handicapped is eligible to receive tutoring and participate in the activities of the program.

The program operates in close cooperation with the Counseling and Testing Center, the Office of Retention Services, and the Director of Learning Skills in order to deliver its services in the most efficient, effective, and pervasive manner.

The overall thrust of the program is: (1) to identify those students having academic difficulty; (2) diagnose what the difficulty is; (3) and bring the total resources of the Special Services Program and the university to bear on a given student’s problem.

The Special Services Program is located on the second floor of the School of Education in Room 244, P.O. Box 10049, Lamar University, Beaumont, Texas 77710.
Religious Centers

Several denominations provide a full-time ministry to the campus and have established student centers adjacent to the campus.

In addition to credit Bible courses, the centers offer opportunities for worship, noncredit study and counseling to aid the student in developing a meaningful context for his university years.

Student Government Association

The Student Government Association serves as the representative voice of students, as a major facilitator of new and improved student services and programs, and in an important role relative to student judicial proceedings. All regularly enrolled Lamar University students are members of the Student Government Association which affords each student an opportunity to promote, support and participate in a well-rounded student life program.

The President and members of the Student Senate are named each spring in a general student election. The Vice President and Secretary-Treasurer are elected annually by the Student Senate which meets weekly. Student opinions may be expressed at the open meetings of the Senate, or ideas, suggestions, and/or concerns may be submitted through SGA suggestion boxes at various campus locations.

The Student Government Association offices are located in Room 211 of the Setzer Student Center and are staffed by three student officers and a full-time secretary.

Setzer Student Center

The Richard W. Setzer Student Center provides facilities for leisure-time recreation and is the campus center for many extracurricular activities. Completed in 1971 at a cost of $2,800,000, the Center includes a games area, TV rooms, check cashing/ticket sales, music listening room, snack bar, a pub, graphics operations, reservations office, video lounges, a ballroom, various meeting rooms and lounges. The Center houses the Setzer Student Center Council, Student Government Association, Recreational Sports Office, Student Publications Office, Student Organizations Office, Alpha Phi Omega Office, Student Organizations Offices and various staff members who work with these organizations and many others. Commercial business housed in the Center include the Lamar University Bookstore, the Teachers Credit Union of Beaumont and Campus Cut-Up hair styling shops.

Setzer Student Center Council

The Setzer Student Center Council (SSCC) is the student organization responsible for providing the campus with a variety of programs and extracurricular activities, using the Center for the majority of its functions.

The SSCC is comprised of 12 committees: concert, performing arts, forum, contemporary film, classic film, coffeehouse, recreation, social, video tape, video tape productions, travel and homecoming. Students and members of the faculty and staff are urged to seek membership on these committees.

Student Organizations

More than 125 student organizations currently active at Lamar offer student membership opportunities in one or more of the service, professional, religious, mutual interest, honor, sorority, fraternity or recreational groups. Participation in student organizational activity enhances the education of students, who are strongly encouraged to affiliate with the organization(s) of their choice and participate in the programs.

Recreational Sports

All faculty, staff and currently enrolled students have access to the recreational facilities and may participate in the wide variety of activities that are offered. The Recreational Sports Office is responsible for organizing the activities which are arranged into three different levels of involvement and competition.

The Recreation Program offers the use of the University's facilities for free time recreation. Published schedules and reservations allow the student, faculty or staff member to exercise and
enjoy competition with friends at a leisurely pace. Sports equipment is available to be checked out for overnight and weekend excursions or club activities.

_The Intramural Program_ provides an opportunity to participate in supervised, competitive sports between groups within the University community. Persons not involved in varsity athletics are given further opportunity to develop skills learned at the high school level. Organizations may place teams in the All-Sports Division, which consists of competition in 25 different sports, or choose the Independent Division in which specialization in one or more sports may be chosen. The stated purpose of the Intramural Program is to promote human understanding, fair play and behavioral control through the inter-relationships occurring in athletic competition.

_Sports Clubs_ are made up of individuals interested in a specific sport and seek competition beyond the boundaries of the University. Further information on any facet of the Recreational Sports Program may be obtained from Room 212 of the Setzer Student Center.

**Publications**

University student publications include the _University Press_, a student newspaper published twice a week during the long terms; _The Cardinal_, a full-feature magazine published once a semester; and _Pulse_, a literary magazine of student work.

Offices for _University Press_ and _The Cardinal_, both of which serve as training media for students interested in journalism, are at 200 Setzer Center. _Pulse_ offices are located in Room 03 of the Liberal Arts Building.

The _Student Handbook_ sets forth University policies and procedures relative to student conduct, rights and responsibilities. It is available at registration and at other times in 116 Wimberly Student Affairs building or 200 Setzer Center. Each student is urged to obtain and read this publication. The _Student Directory_—containing a listing of the names, addresses and telephone numbers of students, faculty and administrators—is also available in the Setzer Student Center.

**Eligibility for Extracurricular Activities**

An extracurricular activity is understood to be an activity representing the student body, any student organization, any department or division organization or any general activity representing the University.

Any full-time student not on disciplinary or scholastic probation, who is officially registered, is eligible to become a candidate and/or to hold student office or to represent the University in any extracurricular activity provided such student has a grade point average of at least 2.0 for both the total of college work completed at Lamar and that of the preceding semester.

For the purpose of establishing eligibility, two six-week summer terms may count as one semester.

Transfer students have the same eligibility as freshman students until completion of one semester.

**Student Conduct**

In order to meet its educational objectives, an institution of higher learning must expect rational, mature behavior from its constituency. To accept anything less is to invite the destruction of not only academic freedom, but the system of higher education itself.

Student discipline at Lamar is based on an educational philosophy of helping students grow and mature into responsible citizens. When a student behaves in a manner which might require disciplinary action, a careful investigation of all facts is made and the student afforded every opportunity to assist in arriving at just and equitable decisions. Counseling, conferences with parents and/or instructors, conferences with peer groups and other techniques as may seem appropriate, may be employed in making discipline an educational experience.

**Hazing**

Hazing is prohibited in state educational institutions by the Texas Education Code, Section 4.19. Students of Lamar University are forbidden to engage in, encourage, aid, or assist any person(s) participating in what is commonly known and recognized as hazing. Any student who does so will be subject to university disciplinary action and might also expect to be dealt with by civil authority.
Refer to the Student Handbook for more specific definitions and information relative to the legal implications of hazing.

**Penalty for False Statements**

A student who provides false information or makes false statements to any university official or office or on an official form submitted to the university is subject to immediate dismissal.

**Official Summons**

An official summons takes precedence over other university activities of the student and should be answered promptly on the day and hour designated. Failure to heed an official summons may subject the student to serious disciplinary action.

**Student Debts**

The University is not responsible for debts contracted by individual students or student organizations and will not act as a collection agency for organizations, firms or individuals to whom students may owe bills.

Students and student organizations are expected to honor contractual obligations promptly, but in case of flagrant disregard of such obligations the vice-president for student affairs will take appropriate action.

Penalty for failure to clear up these obligations may be: a) no readmission; b) withholding of grades and transcripts; c) withholding of degree.

**Disciplinary Action**

A student is subject to disciplinary action for unacceptable behavior, as outlined in the Student Handbook under "Student Conduct and University Discipline." The dean of Student Development may classify behavior as unacceptable and may refer the case to the proper judicial body for investigation and decision. The student has the privilege of appealing the decision to the University Discipline Committee. This appeal is made through the Office of the Dean of Student Development and the action of the Discipline Committee is subject to review by the vice-president for Student Affairs/Dean of Students.

**Parking Regulations**

Each student who pays the necessary fee is issued a car decal which permits parking on the campus. This decal is numbered and is to be displayed as instructed in official parking and traffic regulations, which are issued when automobiles are registered. Strict observance of traffic and parking regulations is necessary for the safe, orderly flow of vehicles in the campus area.

**Student Housing**

The student housing program is designed to supplement the academic program by providing opportunities for social and intellectual development and recreation in a pleasant living environment. A variety of living styles, designed with most of the conveniences of an apartment and all the advantages of campus living, include semi-private rooms, modern furniture, carpet, central heating and air conditioning. Residence hall staff assist with programs and serve as advisors and counselors to the residents.

Students who do not feel the residence hall program meets their personal needs may elect to find living accommodations off-campus.

It's recommended that freshmen who do not live with parents or other relatives reside on the campus since the adjustment from high school to college frequently is difficult for the first-year student. In a residence hall, students have easy access to the library, to contacts with upperclassmen in their major fields and to professional counseling.

**Reservations**

To reserve a room in a University residence hall or apartment, contact the Housing Office. A check or money order for $50 must accompany the reservation request. Reservations may be
cancelled with full refund until three weeks before the first day of registration. No refunds will be
issued on cancellations received after this date.

All unclaimed rooms will be declared vacant and the deposit forfeited at 6 p.m. on the first
day of regular registration unless the student gives the Housing Office sufficient notice to hold the
room for a longer period. Residents will receive deposit refunds, less any breakage or cleaning
charges, at the end of a semester on proper withdrawal from the housing unit. The deposit will not
be refunded if the student moves from the housing system before the end of a semester and a
penalty will be charged as stated on the housing contract.

Assignments

Permanent assignments cannot be made until the student reports for check-in. The University
reserves the right to assign students to specific apartments, residence halls and rooms. The
University also reserves the right to consolidate residents in order to achieve maximum utilization
of facilities. Students may request certain apartments, dormitories and rooms, and all possible
consideration will be given each request. However, all assignments are made based on the date of
deposit.

Dining Halls

Dining halls are located on Redbird Lane and in Brooks-Shivers Hall. Snack bars, located in
the Setzer Student Center and Beeson Technical Arts Building, provide sandwiches, soft drinks and
light lunches. Commuter students may also use the dining halls. A schedule of serving hours may
be obtained from the Housing Office.

All resident students are required to be on a University Board Plan.

Fees

Room and Board fees may be made in one, two or three payments as outlined on the schedule
furnished by the Housing Office. Statements will not be mailed to students or parents and a $3 late
fine will be charged for failure to comply with the established schedule. Failure to pay all room and
board fees by the specified date will result in suspension.

For additional information and application forms, write: Student Housing Office, Lamar
University Station, Box 10041, Beaumont, Texas 77710.

Other Services

Alumni Association

This association of former students of Lamar, including graduates and ex-students, is active
on a year-round basis. The executive director of the association maintains an office in the Alumni
House, located at the corner of Georgia and Cunningham Streets.

Bookstore

The University operates a bookstore, for the convenience of faculty and students, where
supplies and books, new and used, may be purchased. Used books, which are currently approved,
may be sold to the bookstore. Books which must be discontinued are not purchased by the
Bookstore except at a wholesale price. The Bookstore reserves the right to require the seller to prove
ownership of books.

Brown Center

The Brown Center, located off Highway 90 near Orange, became Lamar University property
in 1976. It is used as a center of cultural and educational activities for the benefit of the people of
Orange County and Southeast Texas. The 87 acres of grounds that comprise the Brown Center
include a graceful mansion built in the Southern antebellum tradition, greenhouses, lakes and
landscaped grounds.

The estate was a gift to the University from the four sons of the late Edgar W. Brown Jr.,
Orange industrialist and philanthropist who served as a charter director of the Lamar University
Foundation, Inc.
**Campus Post Office**

The campus Post Office, a contract facility operated by the University, is officially designated as Lamar University Station 77710. Full postal services are offered.

Each student may make application for a box at the Post Office by completing necessary forms. There is a charge for each box. Three students are allowed to share the same box.

Mail may be picked up at the general delivery window by those students who do not choose to reserve boxes at the Post Office.

**Computer Center**

The University Computer Center is responsible for providing the computing services required by the academic, administrative and research communities of Lamar University.

The Computer Center has a Honeywell 66/20 computer with 256K words of 36 bit MOS memory and approximately 1.1 billion characters of on-line disk storage. The system supports one card reader, one card punch, two line printers and three tape drives at the main site. Over ninety terminals are available for interactive computer use. Extensive communication equipment can connect up to fourteen synchronous and forty-six asynchronous to the computer concurrently. A remote job entry station with one card reader and one printer is located in the Beeson Technical Arts Building.

Academic computing work, particularly students in Computer Science courses, accounts for a large portion of the Computer Center's computer usage. Each student is responsible for preparing his or her own program. Most student programs are usually processed within thirty minutes. Keypunches are available for punching cards. All jobs are automatically scheduled by the computer which considers computing time and storage requirements as well as other factors.

**The Library**

The eight-story Mary and John Gray Library building dominates the campus from its central location. Built to house a million volumes, the Library now occupies six floors with open access to 650,000 volumes. Seating accommodates 1,200 students and faculty.

The first floor service areas include circulation, reference, media, and interlibrary loans. The second floor houses reserve reading, current periodicals and government documents. Four floors provide stacks for books and periodicals shelved in Library of Congress classification sequence from class A on the third floor through class Z on the sixth floor.

The seventh and eighth floors offer expansion space for the future, but are presently shared with other University services. Library special collections and a lecture room share the seventh floor with the Public Services Division, Continuing Education programs. The spacious and elegant eighth floor, furnished by community donors, serves as a University Reception Center for meetings and conferences.

Expanding library collections support continuously evolving academic programs. In addition to a strong collection of books and periodicals, the Library provides access to state and federal government documents and participates in the library networks which extend access to information resources. The Library coordinates multi-media programs on campus and is developing basic collections of equipment and materials for central distribution.

**Office of Public Service**

In addition to providing studies and other services for area business and community organizations, the Office of Public Service conducts on-campus and off-campus instructional programs, for credit and non-credit, with emphasis on adult education. A broad spectrum of vocational and academic courses are offered. Public Service is composed of the departments of Continuing Education and Extramural Education.

Additionally the Office of Public Service administers the Lamar Language Institute.

The institute provides non-academic credit instruction for non-native English speakers seeking functional competence for university study or for communication in an English speaking environment outside the academic setting. Classes are offered in the Fall, Spring and Summer semesters of each year.
At the beginning of each session, students are tested to determine which of the four levels of study is best suited to meet their language needs. A post-test at the end of each session is used to determine progress. Advanced level students are given the Test of English as a Foreign Language (TOEFL) to determine university admissibility with regard to language proficiency.

Classes are taught four hours a day, Monday through Friday. The curriculum includes pronunciation and conversation, listening comprehension, reading and vocabulary development, and grammar and writing skills. Classes are taught exclusively in English. The faculty possesses a wide variety of advanced professional training and experience in English language teaching.

To receive the necessary registration forms, write to Lamar Language Institute, P.O. 10023, LUS, Beaumont, TX 77710.

All forms from students applying from abroad must be received by the LLI no later than July 15 for the fall session; November 15 for the spring session, and April 1, for the summer session.

**Veterans' Education**

Lamar holds a contract for educating veterans under the Vocational Rehabilitation Law, known as Public Law Number 16, and is an approved university for veterans under Public Law Number 346 and Public Law Number 550. The vocational training has been especially prepared for those who wish to establish themselves in business and industry in the Sabine-Neches area.

Veterans who are interested in continuing their education under federal laws providing such training are directed to secure approval from the Office of Veterans' Affairs, Wimberly Student Affairs Building. Advice on program and training opportunities, academic assistance and counseling is available from this office or by writing to Box 10017, LU Station.
Directory of Personnel 1981-82

Board of Regents
Lloyd Hayes, Chairman............................ Port Arthur
A.H. (Bob) Montagne, Vice-Chairman................ Orangefield
Hubert Oxford, III, Secretary...................... Beaumont
Orto Plummer, Chairman Emeritus................ Beaumont
Merlin Breaux........................................ Beaumont
George A. Dishman, Jr................................ Beaumont
Thomas M. Maes, II.................................. Beaumont
W. Donham Crawford................................. Beaumont
B.A. (Mark) Steinhagen............................. Beaumont

Administration
Kemble, C. Robert, Ph.D., President
Johnson, Andrew J., Ph.D., Executive Associate to the President
Geddes, David D., Ph.D., Vice President for Academic Affairs
Leonard, W. S., M.S., Vice President for University Relations
Baxley, Oscar K., M.B.A., Vice President for Finance and Personnel
McLaughlin, George E., Ed.D., Vice President for Student Affairs

Council of Deans
Brentlinger, W. Brock, Ph.D., Dean, College of Fine and Applied Arts and Dean of Graduate Studies
Hargrove, W. Richard, Ed.D., Dean for Academic Services
Johnston, Maxine, M.L.S., Director of Library Services
Monroe, W. Sam, L.L.D., Dean, Lamar University at Port Arthur
Bell, Myrtle L., Ed.D., Dean, College of Health and Behavioral Sciences
Rode, Elmer G., Jr., M.Ed., Dean of Admissions and Registrar
Ryan, John A., Ph.D., Dean, College of Business
Schnur, James O., Ed.D., Dean, College of Education
Shipper, Kenneth E., Ph.D., Dean, College of Technical Arts
Welch, Joe Ben, Ed.D., Dean, Lamar University at Orange
Williams, Preston B., Ph.D., Dean, College of Arts and Sciences
Wooster, Ralph A., Ph.D., Dean of Faculties
Young, Fred M., Ph.D., Dean, College of Engineering

Faculty
The following list reflects the status of the Lamar University College of Technical Arts faculty as of January, 1983. The date following each name is the academic year of first service to the University and does not necessarily imply continuous service since that time.

Bonton, Donald R., 1981, Instructor I of Drafting Technology
A.A.S., Lamar University

Campbell, Jerry W., 1976, Instructor II of Diesel Mechanics
C.C., Lamar University

Cater, Alice W., 1974, Instructor III of Real Estate
B.B.A., Southern Methodist University; M.B.A., The University of Texas at Austin.

Chiasson, Sharon D., 1980, Instructor I of Related Arts
B.A., M.A., Lamar University

Clark, Lynnwood M. Jr., 1972, Instructor II of Business Data Processing
B.S., Lamar University

Coates, Nita F., 1980, Instructor I of Drafting Technology
Danna, John C., 1979, Instructor II of Drafting Technology  
A.A.S., Lamar University

Droddy, Frances M., 1979, Coordinator of Handicapped Services  
B.S., Northwestern State U; M.S., Lamar University

Durgin, Thomas R., 1980, Instructor I of Industrial Electronics Technology

Ellenburg, Renee A., 1982, Instructor I of Child Care Technology
B.S., Texas Tech University

Frederick, Maurice, Jr., 1982, Instructor I of Refrigeration and Air Conditioning Technology

Gardner, Kathryn A., 1979, Instructor II of Business Data Processing  
B.B.A., Lamar University

Green, Marcia L., 1972, Instructor III of Related Arts  
B.A., Bishop College; M.A., Stephen F. Austin State University; M.Ed., Lamar University; Ph.D., Texas Women’s University

Grubbs, Donald R., 1974, Instructor II of Welding  
B.S., Lamar University

Hartford, William H., 1947, Instructor III of Job Relations

Harris, Robert M., 1979, Instructor I of Machine Tools  
A.A.S., Lamar University

Jarrell, Ben M., 1973, Instructor III of Refrigeration and Air Conditioning Technology

Jones, Bonner R., 1982, Instructor I of Electrical Technology

Jones, Phillip B., 1982, Instructor I of Industrial Electronics Technology  
A.A.S., Lamar University

Juarez, Joe L., 1968, Instructor IV of Basic Communications, Head, Related Arts Department  
B.F.A., University of Houston; B.S., Lamar University; M.Ed., University of Houston.

Krepper, George, 1982, Instructor I of Industrial Electronics Technology

Lawrence, Robert J., 1938, Instructor III of Industrial Electronics Technology

Lowrey, Norman E., 1967, Supervisor, Adult Training Programs  
B.S., Lamar University

Mainord, Robert A., 1981, Instructor I of Industrial Electronics Technology  
A.A.S., B.A., Lamar University

Marble, Ronald I., 1967, Instructor IV of Welding  
C.C., Lamar University

Matak III, Pete, 1978, Instructor I of Diesel Mechanics  
A.A.S., Lamar University

Mathis, Verbie T., 1978, Instructor II of Mid-Management  
B.S., Texas Eastern University; M.B.E., Stephen F. Austin State University

Mauer, William H., 1980, Instructor II of Industrial Electronics Technology  
A.A.S., Lamar University

Mock, Ralph K., Jr., 1966, Instructor IV and Program Coordinator of Drafting Technology  
Service Certified Engineering Technician.

Musselwhite, John C., 1982, Instructor I of Industrial Electronics Technology

Neissingham, Christian C., Jr., 1982, Instructor I of Diesel Mechanics  
A.A.S., Lamar University; B.S., New York State University @ Oswego

Nylin, Libbie C., 1976, Instructor II of Related Arts  
B.S., M.S., Lamar University

Pate, W. L., Jr., 1978, Instructor I of Mid-Management  
B.B.A., M.B.A., Lamar University

Ramke, Henry H., 1981, Instructor I of Drafting Technology  
B.Arch, Louisiana State University

Roy, M. Paul, 1963, Instructor IV of Machine Tools, Head, Industrial Department

Shipper, Kenneth E., 1971, Dean, College of Technical Arts  
B.S., Sam Houston State University; M.A., Ph.D., The University of Texas at Austin.

Stahl, Deanna K., 1972, Instructor IV of Technical Mathematics  
B.A., M.S., Lamar University
Standley, Troy, 1977, Instructor III of Fire Protection Technology  
L.B., Baylor University

Thompson, Ellis, 1956, Instructor III of Refrigeration and Air Conditioning Technology

Walker, Delia A., 1979, Instructor II of Drafting Technology  
A.A.S., Lamar University

Wesley, Carey B., 1966, Instructor IV of Welding  
A.A.S., Lamar University

Williams, Harry L., 1968, Vocational Counselor  
B.B.A., Stephen F. Austin State University; M.Ed., Lamar University

Williams, James A., 1982, Instructor I of Industrial Electronics Technology

Wilsker, Ira Lee, 1977, Instructor II of Mid-Management  
B.S., M.B.A., University of Maryland.

Wilson, Jerry L., 1970, Instructor IV of Industrial Electronics Technology, Head, Technical Department  
B.S., M.Ed., Lamar University; Ph.D., Texas A&M University

**Part-Time Faculty**

Aucour, Lynn R., 1982, Adjunct Instructor of Business Data Processing  
A.A.S., Lamar University

Baker, Barbara C., 1982, Adjunct Instructor of Related Arts  
B.A., M.A., University of Southwestern Louisiana

Barnes, Gerallan, 1981, Adjunct Instructor of Related Arts  
B.A., Lamar University

Beard, Mark N., 1982, Adjunct Instructor of Business Data Processing  
B.S., Lamar University

Booyt, James E., 1982, Adjunct Instructor of Appliance Repair

Brewer, Mary C., 1982, Adjunct Instructor of Child Care Technology  
B.S., Lamar University

Burris, Barbara V., 1971, Adjunct Instructor of Related Arts  
B.A., Lamar University

Cater, Otis E., III, 1978, Adjunct Instructor of Real Estate  
B.S., M.Ed., Lamar University

Cedars, Michael C., 1982, Adjunct Instructor of Property Tax Administration

Cherry, Robert E., 1977, Adjunct Instructor of Machine Tools  
A.A.S., Lamar University

Clark, Dorothy J., 1980, Adjunct Instructor of Business Data Processing  
B.B.A., Lamar University

Davis, Harold G., 1982, Adjunct Instructor of Occupational Safety and Health

DeBlanc, Michael G., 1981, Adjunct Instructor of Industrial Electronics Technology  
A.A.S., Lamar University

Degeyer, Connie M., 1982, Adjunct Instructor of Business Data Processing

Dowden, Laron W., 1974, Adjunct Instructor of Refrigeration and Air Conditioning Technology

Droddy, Vollie C., 1978, Adjunct Instructor of Maintenance Pipefitting

Fitzpatrick, James E., 1982, Adjunct Instructor of Industrial Electronics Technology  
A.A.S., Lamar University

Franks, Wanda G., 1978, Adjunct Instructor of Related Arts  
B.S., M.Ed., Lamar University

Gipson, Errett D., Jr., 1973, Adjunct Instructor of Drafting Technology  
A.A.S., Lamar University

Glenn, Ralph L., 1975, Adjunct Instructor of Plant Maintenance and Operations

Gray, Nancy T., 1981, Adjunct Instructor of Related Arts  
B.A., Lamar University

Griffin, Richard P., 1977, Adjunct Instructor of Occupational Safety and Health  
B.S., Baylor University; M.B.A., Lamar University

Halvorsen, Fred H., 1982, Adjunct Instructor of Fire Protection Technology  
B.S., US Coast Guard Academy; M.S., Ph.D., University of Maryland

Hedgepeth, Joe M., 1981, Adjunct Instructor of Appliance Repair
Herbert, Herman G., 1980, Adjunct Instructor of Refrigeration and Air Conditioning Technology
A.A.S., Lamar University

Herrington, Thomas R., 1978, Adjunct Instructor of Welding
A.A.S., Lamar University

Houseman, Robert, 1978, Adjunct Instructor of Real Estate

Huckaby, Dennis E., 1981, Adjunct Instructor of Electrical Technology
B.S., B.S.E.E., Lamar University

Kibbe, Paul W., 1982, Adjunct Instructor of Plant Maintenance

King, Sidney A., 1981, Adjunct Instructor of Real Estate
L.L.B., Baylor University

Knippel, Jeannette M., 1980, Adjunct Instructor of Child Care Technology
B.S., North Texas State University; M.Ed., Texas Women's University

Meagher, Thomas F., 1982, Adjunct Instructor of Electrical Technology

McCoy, Joe C., 1982, Adjunct Instructor of Maintenance Pipefitting

McKay, Calvin J., 1966, Adjunct Instructor of Industrial Supervision
B.S., University of Southwestern Louisiana.

McClendon, Bruce W., 1980, Adjunct Instructor of Real Estate
B.A., University of Missouri; M.A., University of Oklahoma

Moniz, Bertram J., 1980, Adjunct Instructor of Welding
B.S., University of Aston, England; M.S., University of London

Monk, David S., 1980, Adjunct Instructor of Drafting Technology

Oliver, Gregory C., 1982, Adjunct Instructor of Business Data Processing
B.S., Lamar University

Parsley, Thomas E., 1982, Adjunct Instructor of Business Data Processing

Peters, Williams C., 1967, Adjunct Instructor of Business Data Processing
B.A., University of Louisville

Pierce, Dorothy L., 1979, Adjunct Instructor of Real Estate
A.A.S., Lamar University

Prater, Penny L., 1982, Adjunct Instructor of Related Arts
B.S., Lamar University; B.S., Texas A&M University

Schroeter, William E., 1977, Adjunct Instructor of Real Estate
A.A.S., Lamar University

Shanks, James E., Jr., 1977, Adjunct Instructor of Related Arts
B.S., Lamar University

Sigur, Ronald D., 1979, Adjunct Instructor of Drafting Technology

Smith, Albert E., 1976, Adjunct Instructor of Related Arts
B.S., M.Ed., Stephen F. Austin State University

Stephenson, R. Regan, 1980, Adjunct Instructor of Real Estate
B.B.A., Lamar University

Stidham, Mary L., 1981, Adjunct Instructor of Related Arts
B.A., M.A., Lamar University

Vena, Anthony J., Jr., 1977, Adjunct Instructor of Mid Management
B.A., B.B.A., M.B.A., Lamar University

Walker, Bryon P., 1979, Adjunct Instructor of Drafting Technology
A.A.S., Lamar University

Whitehead, Robert N., Jr., 1981, Adjunct Instructor of Fire Protection Technology
B.S., Sam Houston State University

Wilson, James C., 1980, Adjunct Instructor of Plant Maintenance and Operations

Wimp, Gustav R., 1982, Adjunct Instructor of Property Tax Administration
A.A., Lamar University

Woods, Anita J., 1971, Adjunct Instructor of Related Arts
B.A., Sam Houston State University
Lamar University at Orange

Faculty 1983-84

The following list reflects the status of the Lamar University at Orange faculty as of June, 1983. The date following each name is the academic year of first service to the University and does not necessarily imply continuous service since that time.

Arnow, Judith Z. 1972, Assistant Professor of Mathematics
B.A., University of North Dakota; M.S., Lamar University; M.S., Rice University

Baxt, Andrew 1982, Instructor I of Industrial Electronics
A.A.S., Nassau Community College

Brown, G. Ray 1978, Vice Provost and Assistant Professor of Sociology
B.A., M.A., Texas Tech University; Ph.D., Brown University

Campbell, Jesse W., Jr. 1976, Instructor of Physical Education
B.S., M.Ed., Lamar University

Crane, Josh 1982, Director of Academic Programs and Associate Professor of Speech
B.A., Guilford College; M.A., University of Florida; Ph.D., Ohio University

Daniel, G. Max 1973, Assistant Professor of Government
B.A., Lamar University; M.A., Sam Houston State University

Dickey, Sandra Kay 1981, Clinical Vocational Nursing Instructor
B.S., Lamar University; Registered Nurse

Dupree, Carol 1982, Instructor I of Mid-Management
A.A., Highland Jr. College; B.S.Ed., Emporia State University; M.S.Ed., Emporia State University

Ferri, Raymond B. 1980, Instructor I of Industrial Electronics
A.A.S., Lamar University

Franklin, Larkin C. 1970, Instructor of English
B.A., Lamar University; M.A., Brigham Young University

Horton, Don E. 1974, Instructor II of Mid-Management and Director of Technical Arts
B.S., Louisiana Tech University; M.B.A., University of West Florida, Certified Professional Secretary

Mason, Ruth 1973, Instructor I of Vocational Nursing
Diploma, Western Penn. Hosp. of Nursing; Registered Nurse

McLeod, Connie J. 1981, Instructor of English
B.S., Texas A & I University; M.A., North Texas State University

Naughton, Alan J. 1980, Instructor of Economics
B.A., Tarkio College; M.A., Southern Illinois University

Peebles, Robert H. 1970, Assistant Professor of History
B.S., Lamar University; M.A., Sam Houston State University; Ph.D., North Texas State University

Spullen, John 1982, Assistant Professor of Computer Science
M.S., Southern Connecticut State; Ph.D., Peabody College

Talmadge-Parris, Geraldine 1976, Instructor of Music
B.S., M.A., Lamar University

Taylor, Hyman K. 1972, Instructor III of Drafting Technology
A.A.S., B.S., Lamar University

Thrasher-Smith, Shelley Ann 1971, Assistant Professor of English
B.A., M.A., North Texas State University; Ph.D., University of Houston

Wolley, Leslie G. 1976, Instructor II of Industrial Electronics

Welborn, Thomas 1982, Instructor I of Drafting Technology
B.S., International Correspondence School

Welch, Bonnie F. 1978, Instructor I of Office Occupations
B.B.A., Lamar University

Williamson, Annie W. 1979, Instructor I of Office Occupations
A.A., Rockland Community College; B.A., Michigan State University; M.Ed., Bowling Green State University

Wilmore, Brenda 1982, Clinical Instructor of Nursing
B.S., Lamar University; Registered Nurse

Wilmore, Larry R. 1974, Assistant Professor of Biology
B.S., Lamar University; M.S., Ohio State University
Part-Time Faculty

Ahlgrim, Ronald 1980, Adjunct Instructor of Welding
Branson, Wilma C., 1978, Adjunct Instructor of Technical Mathematics
    B.S., M.S., Lamar University
Collier, Helen L. 1980, Adjunct Instructor of Business Communication
    M.Ed., University of Illinois
Kirkindall, Steve 1981, Adjunct Instructor of English
    B.A., M.Ed., Lamar University
Perkins, Lana 1981, Adjunct Instructor of Drafting Technology
Reeves, Claudie H., II 1981, Adjunct Instructor of Industrial Supervision
    B.S., University of the State of New York; B.S., University of Maryland; M.A., University of Northern Colorado
Rives, Barbara S. 1980, Adjunct Instructor of Technical Mathematics
    B.A., David Lipscomb College
Robinson, Jeanette H. 1981, Instructor of English
    B.A., University of Texas; M.A., Lamar University
Ryland, Nelda S. 1981, Adjunct Instructor of Technical English
    B.S., Lamar University
Stevens, Margaret S. 1972, Adjunct Instructor of Geology
    B.A., Central Michigan University; M.S., University of Michigan
Windham, Ben 1981, Adjunct Instructor of Electronics
    A.A.S., Lamar University

Orange Administrative Staff

Welch, Joe Ben, Provost
Brown, M. Ray, Vice Provost
Horton, Don E., Director of Technical Arts
Crane, Josh, Director of Academic Programs
Moreau, Dallas, III, Director of Student Services
Evans, Wayne, Administrative Assistant
Miller, Myra, Associate Registrar
Evans, Foylene, Secretary to the Provost
McGlaun, Dianne, Secretary to the Vice Provost
Ward, Florence, Secretary to the Director of Technical Arts
DeCuur, Shirley, Secretary to the Director of Academic Programs
Drane, Sandy, Secretary to the Director of Student Services
Goodwin, Anitrea, Receptionist
Hughes, Wayne, Supervisor, Buildings and Grounds
Hoggett, Ailene, Bookstore Manager

Lamar University at Port Arthur

Port Arthur Campus Administrative Staff

W. Sam Monroe, Provost
Franklin C. Savage, Director of Technical Programs
Charles Gongre, Director of Academic Programs
Tom Neal, Director of Student Services
Reagan Bedford, Financial Aid Counselor
Jo Nell Helton, Coordinator of Cosmetology
Oscar Smith, Coordinator of Electronics Technology
Glenda Barron, Department Head of Office Occupations
Scott Connell, Librarian, Gates Library
Lawrence Lewis, Director, Physical Plant
Faculty 1983-84

The following list reflects the status of the Lamar University at Port Arthur faculty as of January, 1983. The date following each name is the academic year of first service to the University and does not necessarily imply continuous service since that time.

Barron, Glenda O. 1975, Instructor II of Office Occupations and Head, Office Occupations Department B.S., University of Houston; M.Ed., McNeese University

Bell, RoseMary 1981, Instructor I of Cosmetology Registered Cosmetologist

Eubanks, Jessie A. 1981, Instructor I of Office Occupations B.B.A., Lamar University

Helton, Jo Nell 1983, Coordinator of Cosmetology Registered Cosmetologist

Hunt, Hilton L. 1982, Instructor I of Drafting A.A.S., Lamar University

Lambert, Dawn 1982, Instructor I of Business Data Processing

Louvier, Grant 1983, Instructor I of Automotive Mechanics

McKay, Robert 1980, Instructor I of Automotive Mechanics

Peeler, Robert W. 1978, Instructor I of Electronics Technology B.S., Lamar University

Savage, Franklin C. 1975, Instructor II of Automotive Mechanics, Director of Technical Programs B.S.O.E., Southwest Texas State University

Schippeln, Patricia L. 1976, Instructor II of Office Occupations B.B.A., Lamar University; M.B.Ed., North Texas State University

Smith, Oscar C. 1973, Instructor I of Electronics Technology, Program Coordinator of Electronics Technology Department

Whigham, Virginia 1975, Instructor I of Office Occupations

Part-Time Faculty

Branson, Alice 1982, Adjunct Instructor of Technical Mathematics B.A., Baylor University

Cowan, Betty 1983, Adjunct Instructor of Office Occupations A.A., Lamar University; B.B.A., Sam Houston State U.; M.Ed., Lamar University

Gates, William G. 1982, Adjunct Instructor of Welding B.S., Stephen F. Austin State University

Griffin, Sally 1982, Adjunct Instructor of BASIC Communications/English B.A., Baylor University, M.A., Lamar University

Guidry, Marilyn 1982, Adjunct Instructor of Cosmetology Registered Cosmetologist

Hayes, Jeff L. 1982, Adjunct Instructor of Real Estate B.B.A., University of Texas

Hurbut, Brian 1982, Adjunct Instructor of Mid. Management B.S., Iowa State University; M.S., San Diego State College; M.B.A., University of Houston

Inman, Anna Carol 1982, Adjunct Instructor of Business Data Processing B.A.

James, Helen 1982, Adjunct Instructor of Business Data Processing B.S., University of Texas
King, Maydell 1979, *Adjunct Instructor of Office Occupations*
   B.B.A., Lamar University
Meroney, Robert A. 1982, *Adjunct Instructor of Office Occupations*
   B.B.A., J.D., University of Texas
Nordstrom, Harold Thomas 1981, *Adjunct Instructor of Real Estate*
Phares, Banker 1977, *Adjunct Instructor of Real Estate*
   B.S., Lamar University, J.D., Southern Methodist University
Prather, Joseph A. 1977, *Adjunct Instructor of Welding*
   B.S., Lamar University
Rehke, Helen 1979, *Adjunct Instructor of BASIC Communications*
   B.A., East Texas State University, M.Ed., University of Houston
Schroeder, William E. 1977, *Adjunct Instructor of Real Estate*
Trahan, Lee Ray 1975, *Adjunct Instructor of Welding*
Tronstad, Glen 1981, *Adjunct Instructor of Electronics*
   A.A.S., Lamar University
Williams, Patricia D. 1977, *Adjunct Instructor of Office Occupations*
Young, Carl 1982, *Adjunct Instructor of Welding*
