LAMAR UNIVERSITY • BEAUMONT
graduate catalog

1991-92
Founded in 1923, and established as a four-year coeducational, state-supported college on September 1, 1951.

The provisions of this bulletin do not constitute a contract, expressed or implied, between any applicant, student and faculty member in Lamar University. Lamar University reserves the right to withdraw courses at any time, change fees, calendars, curricula, graduation procedures and any other requirement affecting students. Changes become effective when the proper authorities so determine the application to both prospective students and to the students already enrolled. For additional and complete information refer to the Lamar University General Bulletin.

Lamar University is an equal opportunity/affirmative action educational institution and employer. Students faculty and staff members are selected without regard to their race, color, creed, sex, age, handicap or national origin, consistent with the Assurance of Compliance with Title VI of the Civil Rights Act of 1964; Executive Order 11246 as issued and amended; Title IX of the Education Amendments of 1972, as amended; Section 504 of the Rehabilitation Act of 1973. Inquiries concerning application of these regulations may be referred to the Vice President for Administration and Counsel.
Catalog of Lamar University. (USPS 074-420). Third class postage paid at Beaumont, Texas 77710. Published monthly except in June, July and August.

# 1991-92 Calendar
## Fall Semester - 1991

### August 1991
- **21** Residence halls open at 1:00 p.m.
- **22** Dining halls open at 4:30 p.m.
- **23** Registration begins
- **26** Classes begin
- **27** Schedule revisions - late registration
- **28** Last day for schedule revisions and/or late registration

### September
- **2** Labor day - no classes
- **11** Twelfth Class Day

### October
- **4** Last day to drop or withdraw without academic penalty
- **7** Last day to petition for no grade

### November
- **1** Last day to apply for December graduation (undergraduates)
- **4** Registration for Spring semester begins
- **7** Last day to pay for diploma; cap and gown
- **14** Comprehensive written examination
- **18** Last day to drop or withdraw
- **27** Thanksgiving recess begins at 10:00 p.m.
- **Residence halls close at 6:00 p.m.**
- **Residence halls close at 10:00 p.m.**

### December
- **1** Residence halls open at 1:00 p.m.
- **2** Classes resume at 7:00 a.m.
- **10** Finals preparation day - no classes prior to 5:00 p.m.; Finals begin at 5 p.m.
- **11** Final examinations
- **18** Dining halls close at 10:00 a.m.
- **All grades due 4:00 p.m.**
- **21** Commencement
Spring Semester - 1992

January 1992
10 Orientation Day
12 Residence halls open at 1:00 p.m.
Dining halls open at 4:30 p.m.
13 Registration begins
14 Registration
15 Classes begin
Schedule revisions - late registration
16 Last day for schedule revisions and/or late registration
20 Martin Luther King, Jr., birthday—no classes
21 Applications for May 1992 graduation begin
31 Twelfth Class Day

February
25 Last day to drop or withdraw without academic penalty
Last day to petition for no grade

March
2 Last day to apply for May graduation (graduates only)
13 Spring recess begins at 5:00 p.m.
Dining halls and Residence halls close at 6:00 p.m.
22 Residence halls open at 1:00 p.m.
Dining halls open at 4:30 p.m.
23 Classes resume at 7:00 a.m.

April
2 Comprehensive written examination
3 Last day to apply for May graduation (undergraduates)
Last day to pay for diploma: cap and gown
6 May 4-period oral examinations/thesis defenses
6 Registration for Summer and Fall begins
9 Last day to drop or withdraw
15 Last day to submit single, unbound first copy of thesis to Graduate Office
17 Good Friday — no classes

May
5 Finals preparation day — no classes prior to 5:00 p.m.
Finals begin 5:00 p.m.
5-12 Final examinations
6 End oral examination/thesis defense period
Final copy of thesis due in Graduate Office
Deadline for payment of thesis binding fees
13 Dining halls close at 16:00 a.m.
Residence halls close at 12:00 noon
14 Grades for graduating students due 8:30 a.m.
All grades due 4:00 p.m.
16 Commencement

### Summer Session - 1992

#### First Term

**May**
- 31: Residence halls open at 1:00 p.m.
- 31: Dining halls open at 4:30 p.m.

**June**
- 1: Registration
- 2: Classes begin - schedule revisions and/or late registration
- 3: Application for August 1992 graduation begins
  - Last day for schedule revisions and/or late registration
- 5: Fourth Class Day
- 8: Last day to apply for August graduation (graduate students only)
- 15: Last day to drop or withdraw without academic penalty
  - Last day to petition for no grade
- 29: August 5-period for oral examinations/thesis defenses
- 30: Comprehensive written examination
- 30: Last day to drop or withdraw

**July**
- 3: Last day to apply for August graduation (undergraduates)
- 3: Last day to pay for diploma; cap and gown
- 6: Independence Day observance — no classes
- 8: Last class day
- 9: All grades due by 4:00 p.m.
- 15: Last day to submit single, unbound first copy of thesis to Graduate Office

---

### Summer Session - 1992

#### Second Term

**July**
- 8: Registration
- 9: Classes begin - schedule revisions and/or late registration
- 10: Last day for schedule revision and/or late registration
- 14: Fourth Class Day
- 22: Last day to drop or withdraw without academic penalty
  - Last day to petition for no grade

**August**
- 5: End oral examination/thesis defense period
  - Final copies of thesis due in Graduate Office
  - Deadline for payment of thesis binding fees
- 6: Last day to drop or withdraw
- 13: Last class day
- 14: Dining halls and Residence halls close at 6:00 p.m.
- 14: Senior grades due by 8:30 a.m. All other grades due by noon.
- 15: Commencement

Dean of Graduate Studies: Robert D. Meulion
Editor: Martha S. Reed
MIRABEAU B. LAMAR, second president of the Republic of Texas and father of public education in Texas, is honored with this sculpture located in the quadrangle of the Lamar University-Beaumont campus.
General Information

Location

The central campus of Lamar University, a state-supported institution, is located in Beaumont, Texas, one of the world's largest petrochemical centers. Beaumont is a progressive city in the Sunbelt, offering private and public schools, churches, museums, shopping districts and a wide range of leisure-time activities to serve a metropolis of 130,000. A civic center, convention center and coliseum draw professional entertainers and a wide variety of business, social and professional groups to the city. Beaumont is convenient to major recreational facilities of southeast Texas, including the Gulf of Mexico, large lakes and the Big Thicket National Preserve.

Other campuses of the Lamar University System are located in Orange and Port Arthur, Texas.

History

Lamar University originated on March 8, 1923, when the South Park School District in Beaumont authorized its superintendent to proceed with plans to open "a Junior College of the first class." On September 17, South Park Junior College opened with 125 students and a faculty of fourteen. Located on the third floor of the South Park High School building, the college shared the library and athletic facilities with the high school. In 1932, separate facilities were provided and the name of the institution was changed to Lamar College.

On June 8, 1942, as a result of a public campaign, a new campus was purchased and classes were held for the first time on the present day campus in Beaumont. Following World War II, the College grew to 1,079, and a bill to make Lamar University a state-supported senior college was introduced in the House of Representatives. The legislature approved the Lamar bill (House Bill-52) on June 4, 1949, creating Lamar State College of Technology effective September 1, 1951. Lamar was the first junior college in Texas to become a four-year state-supported college. Uniquely, Lamar retained much of its traditional community college mission, particularly in vocational programs, while continuing to grow with strong programs in engineering, sciences, business, and education.

In 1962, a graduate school was established offering Master's degrees in several fields. The Doctorate in Engineering was established in 1971. In the same year, House Bill-590 became law changing the institution's status to university. Lamar State College of Technology, with an enrollment of 10,874, officially became Lamar University on August 23, 1971.

In 1969, an extension center was opened in Orange and in 1975 the long-standing private Port Arthur College became Lamar University at Port Arthur. The Lamar University System, of which Lamar University-Beaumont is the primary component, was established by the 66th Session of the Texas Legislature with the passage of SB-629, which took effect in August 1983.

Since Lamar University-Beaumont first opened in 1923, it has achieved a unique position in the community of higher education with its traditional academic degree programs, including graduate and baccalaureate curricula. Degrees are offered in more than 130 fields of study.

Government

A board of nine regents, appointed by the Governor and approved by the State Senate for terms of six years, governs the University. The Board of Regents delegates the direction of University affairs to the chancellor, presidents, campus administrative officers and faculty.
Accreditation and Approval

Lamar University-Beaumont is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award Bachelor's, Master's and Doctor's degrees. The College of Graduate Studies is a member of the Council of Graduate Schools in the United States, the Conference of Southern Graduate Schools and the Texas Association of Graduate Schools.

Several departments and programs have been accredited by professional agencies. In the College of Engineering, the programs in Chemical, Civil, Electrical, Industrial and Mechanical Engineering are accredited by the Accreditation Board for Engineering and Technology. The undergraduate and graduate programs of the College of Business are accredited by the American Assembly for Collegiate Schools of Business.

In the Lamar Institute of Technology, formerly the College of Technical Arts, and approved by the coordinating boards and named by the Board of Regents in 1990, several programs are accredited. In the College of Health and Behavioral Sciences, Dental Hygiene is accredited by the American Dental Association; Radiologic Technology, Respiratory Technology and Respiratory Therapy by the American Medical Association; and Nursing by the National League for Nursing.

Other accreditations include the Department of Chemistry by the American Chemical Society, Department of Music by the National Association of Schools of Music, the College of Education and Human Development by the National Council for the Accreditation of Teacher Education and the Texas Education Agency, Sociology by the Council on Social Work Education; programs in Speech Pathology and Audiology by the American Speech-Language-Hearing Association and in Deaf Education by the Council for Education of the Deaf.

The University also is a member of a number of academic councils, societies, associations and other such organizations.

The Library

The eight-story Mary and John Gray Library building dominates the campus from its central location. Built to house a million volumes, the Library occupies six floors with on-line public access catalog to 800,000 volumes. Seating accommodates 1,200 students and faculty.

The first floor service areas include circulation, reference and interlibrary loans. The second floor houses reserve reading, current periodicals and government documents. Four floors provide stacks for books and periodicals shelved in Library of Congress classification sequence from class A on the third floor through class Z on the sixth floor.

The seventh floor houses the library administrative offices, the Media Services Department and Special Collections.

The eighth floor offers expansion space for the future, but is presently shared with other University services. This spacious and elegant floor, furnished by community donors, serves as a University Reception Center for meetings and conferences.

Expanding library collections support continuously evolving academic programs. In addition to a strong collection of books and periodicals, the Library provides access to state and federal government documents and participates in the library networks which extend access to information resources. The Library coordinates multi-media programs on campus and is developing basic collections of equipment and materials for central distribution.

Research Office

A Research Office was formally organized in 1956. It is administered by the Associate Vice President for Research and Dean of Graduate Studies who serves as the chairman of the faculty research committee. All externally-funded research grants and projects are coordinated through the Research Office.
Information Systems (Computer Center)

The University Information Systems Division is responsible for providing the computing services required by the academic, administrative and research communities of Lamar University-Beaumont.

The Computer Center, a department of the Information Systems division, provides for administrative computing with a Bull DPS8/49 (Dual) computer system. This system is capable of processing 1.1 million instructions per second (MIPS), has 24 megabytes (million bytes) of memory and 7.7 gigabytes (billion bytes) of disk storage. The operating system is GCOS 8 and the transaction processor is TP8. The system supports two line printers capable of printing 1200 lines of output per minute each, and three 9 track magnetic tape drives. More than 160 terminals are available for interactive computer use.

Several computers are available to support the academic computing needs. The VAX 6310 minicomputer system handles all computer applications necessary for the operation of the Mary and John Gray Library and general academic applications. This system has the capability of processing 7.0 MIPS. It has 256 megabytes of memory and 9.6 gigabytes of disk storage. The 6310 supports a TA79 tape drive and one Ethernet port. It shares a 600 line per minute printer with a MicroVAX 3300's.

Three MicroVAX 3300's are dedicated to supporting the Computer Science students and faculty in their computing applications. The 3300's are capable of processing 7.0 MIPS with VMS as its primary operating system. This system contains 60 megabytes of memory and 1.35 gigabytes of disk storage.

An IBM AS/400 minicomputer provides computing support to the students and faculty in the Technical Institute. This system has 12 megabytes of memory and 1.8 gigabytes of disk storage. The operating system is OS/400. It supports a magnetic tape drive, a 300 line per minute printer, 25 terminals, and 20 PS/2 microcomputers.

Early Childhood Development Center

Lamar University's Early Childhood Development Center is located at 950 East Florida. The Center provides high quality extended day-care services and certified kindergarten programs for children between the ages of 18 months and five years.

The Center is staffed with degreed teachers who create a stimulating environment and provide unlimited opportunities for learning. In addition to providing care for young children, the Center, under the administration of the College of Education and Human Development, provides a site for college students to observe and work with children as part of their course work and training. The Center is accredited by the National Academy of Early Childhood Programs.

The Early Childhood Development Center accepts children on a part-time or full-time basis with the fees based on the number of hours children are in attendance.

Assessment, Advising, & Research Center

Lamar University maintains an Assessment, Advising, & Research Center located in Room 116 of the Wimberly Student Services Building that offers a full range of services to students. In this central resource location, professional staff are available to provide educational, diagnostic and career testing; instruction for and access to individual computer-assisted career exploration; educational, personal, social, career counseling and assessment and referral to student development programs including those of Special Services and Learning Skills.

The center is staffed with a licensed psychologist and licensed and certified counselors to assist in the resolution of student problems and questions. The Assessment Center does not address problems of a long-term therapeutic nature. Students encountering difficulties are encouraged to consult the office on a no-charge basis. All contacts are confidential.
In order to assist students in making decisions concerning choices of majors and careers, the Assessment Center maintains two computerized career information systems, SIGI, and Discover, as well as a career library.

The Center coordinates testing required by Lamar University and provides individual testing services for students. These services include the administration and interpretation of career interest and personality tests.

The office also acts as a national test center for administration of Graduate Record Examination, Law School Admission Test, Graduate Management Admission Test, Scholastic Aptitude Test (SAT), American College Testing Program (ACT), College Level Examination Program (CLEP), General Educational Development Test (High School Equivalency Test), the Miller Analogies Test, and the Pre-Professional Skills Test. Information and application forms concerning these tests may be obtained from the Counseling Center.

**Career Development and Placement Center**

The Career Development and Placement Center is a centralized operation responsible for placement activities for all colleges of the university. The placement services are available free of cost to students, faculty, staff and all former students. The center keeps updated information in career fields and job areas, employers and the kind of employees being sought.

Interviews are scheduled regularly with companies, governmental agencies, schools and other employers.

The center also offers seminars pertaining to job search techniques, resume writing and job availability. The Placement Center is located in Room 102 of the Galloway Business Building.

**Health Center**

The University maintains a Health Center for use by Lamar students. Outpatient service is available for illness or injury that does not require constant supervision.

While it is not possible for the University to provide unlimited medical service, some routine laboratory tests are available at the clinic at a reasonable cost. More extensive laboratory tests and x-rays are available from private physicians if requested by the Health Center Director.

All drugs, splints, special bandages, as well as serums, vaccines and gamma globulin, which may be prescribed by the Health Center are dispensed at prices equal to the cost assessed the University. Pre-admission vaccinations are not given. Emergency Room or other outside medical care is not the responsibility of the University and is not offered by the Health Center. Any student who has a chronic illness or disability requiring continuing medical attention should make arrangements with a local private physician.

Student Health Center services are available during regular hours when the University is in session.

**Veterans Education**

Lamar is approved for educational training under all of the Veterans Educational Assistance programs.

Veterans and their dependents who are interested in attending Lamar under federal laws which provide educational assistance are directed to secure information by consulting the Office of Veterans’ Affairs, Wimberly Student Affairs Building.

This office advises veterans on program and training opportunities, academic assistance and counseling.
Loan Funds and Scholarships

Financial assistance in the form of loans, grants and scholarships is available for a number of qualified students. Details may be obtained on request from the Director of Student Aid.

Teaching Fellowships and Assistantships

A number of teaching fellowships and assistantships are available in the various departments of the College of Graduate Studies. Application forms and additional information may be obtained either from the department chair or from the Dean of the College of Graduate Studies.

Fellowships and assistantships are awarded only to those individuals who meet all requirements for admission to a graduate degree program, including satisfactory GRE/GMAT scores.

The stipend for a teaching fellow varies in accordance with the number of courses taught. Students must reduce their academic load in relation to their teaching assignment (the combined teaching and course load may not exceed 15 load units in the long term). The maximum teaching responsibilities for a teaching fellow or assistant is six load units.

Tuition and fees are not waived for teaching fellows or assistants, but nonresidents of Texas are not required to pay out-of-state tuition.

Applications should be received by February 1 for the following academic year.

Teacher Certification

Lamar University has been approved by the Texas Education Agency to offer professional certification programs in administration, counseling and guidance, elementary, secondary, special education, reading, supervision and visiting teacher. Specific information concerning certification may be found in the College of Education and Human Development section of this catalog or may be obtained from the Director of the Division of Professional Services in the College of Education and Human Development.
Fees and Expenses

Payment of Fees

Lamar University reserves the right to change fees in keeping with acts of the Texas Legislature and the University’s Board of Regents.

A student is not registered until all fees have been paid in full or the installment plan down payment has been paid and the installment agreement has been signed. Payment may be made by check, MasterCard/VISA, money order or currency. Checks and money orders not in excess of total fees should be made payable to Lamar University. Checks and drafts deposited with Federal Reserve banks cannot be handled through regular bank collection channels if received without the magnetic ink MICR transit number.

Installment Payment Agreement

Tuition and selected fees may be charged on an installment plan, for those students who are not on financial aid (scholarships, grants, etc.). This plan provides for payments to be made in 3 installments for courses taken during the fall and spring semesters.

Students are required to enter into a legally binding contract that obligates them to pay the full amount of the fees, regardless of whether they complete the semester. The student whose fees are to be paid in installments must sign the installment agreement. Tuition refunds for students using the installment payment plan are calculated as a percentage of the total fees assessed, not as a percentage of any partial payments.

A non-refundable service charge of $20 is assessed for the 3 payment plan. A late fee of $15 is assessed beginning the first day after an installment due date for each delinquent installment payment.

Students who are delinquent on installment will be prohibited from registering for class until the installment debt is paid in full. A single delinquent installment results in the entire remaining balance being immediately due and payable. Continued delinquency may result in withdrawal from the University. Also, holds are placed on academic records so that students cannot obtain transcripts until all installments are paid.

All delinquent installment accounts will be forwarded to a collection agency/Credit Bureau which results in additional fees of approximately one-third of the unpaid balance being added. (Delinquent accounts must be paid at the collection agency; payment will not be accepted at the Lamar Cashier’s Office.) All costs of collecting delinquent installments are payable by the student.

Tuition and Fees

Tuition is based upon the number of hours for which the student registers, and is determined by the student’s classification as a Texas resident; a nonresident U.S. citizen; or a citizen of another country.*

* Determination of legal residence for tuition purposes is made on the basis of statutes of the State of Texas. Refer to the Coordinating Board, Texas College and University System “Rules and Regulations for Determining Residence Status” as revised, July 15, 1991, available in the Office of the Director of Admission Services.

Student Responsibility for Residence Classification

The responsibility of registering under the proper residence classification is that of the student. If there is any possible question of the student’s right to classification as a resident of Texas, it is his/her obligation, prior to or at the time of registration, to raise the question with the Director of Admissions and have his/her status officially determined.
Every student who is classified as a resident student but who becomes a nonresident at any time by virtue of a change of legal residence by his/her own action or by the person controlling the student's domicile, is required to notify the Dean of Records and Registrar.

Publication of Thesis/Field Study Abstracts

The Graduate Council requires that thesis and field study abstracts be published by University Microfilms. Fees for this service are $35 for a master's thesis and $45 for a doctoral field study. If copyrighting is desired, an additional fee of $20 is charged.

Refund of Tuition and/or Fees

Students requesting a refund of tuition and/or fees resulting from dropped courses or from withdrawing from the University should direct questions to the Finance Office. Refunds are calculated as a percentage of total fees assessed, not as a percentage of partial payments on installments. Refunds are generally processed at the end of the second week past the 12th class day for Fall or Spring (2 weeks after the 4th class day for summer session).

Dropped Courses

Students who drop courses during the drop period will receive a refund on tuition and fees, based on the following:

Fall or Spring Semester
1. Through the twelfth class day, 100 percent.
2. After the twelfth class day, no refund.

Summer Session
1. Through the fourth class day, 100 percent.
2. After the fourth class day, no refund.

Withdrawal from the University

Any student officially withdrawing during the first part of the semester will receive a refund on tuition, Setzer Center, student service, laboratory, building and general use and private lesson fees according to the following schedule:

Fall or Spring Semester
1. Prior to the first class day, 100 percent.
2. During the first five class days, 80 percent.
3. During the second week of the semester, 70 percent.
4. During the third week of the semester, 50 percent.
5. During the fourth week of the semester, 25 percent.
6. After the fourth week of the semester, none.

Summer Session
1. Prior to the first class day, 100 percent.
2. During the first, second or third class day, 80 percent.
3. During the fourth, fifth or sixth class day, 50 percent.
4. Seventh class day and after, none.

The $10 Property Deposit is refundable upon written request by the student to the Finance Office.

Withdrawing from the University does not relieve the student of any financial obligations under the Installment Payment Agreement or for any student loans as these are the student's legal financial commitments.

NOTE: Students withdrawing from the University are required to surrender their Student Identification Card and their Parking Permit. Also, withdrawal from the University precludes the student from receiving a refund for dropped courses.
Summaries of Fees

Additional fees and charges which are applied on a selective basis are listed following the Summary of Fees.

*Non-Texas Resident tuition will be revised each January for the following academic year (Sept.-Aug.)

**Not included is a one-time property deposit fee which will be refunded upon application by the student upon graduation or formal withdrawal if not used for replacement of property.

### Laboratory Fees

A laboratory fee of $2 is charged each semester for courses with a combined lecture and laboratory credit of from one to three semester hours. The laboratory fee is $4 per semester for courses of four or more semester hours credit.

### Computer Use Fee

A $3 computer use fee is charged per semester credit hour with a maximum of $30.

### Private Lessons in Voice and Instrumental Music

Graduate applied music courses (per semester hour): \$18.00
Late Registration Fee
A charge of $5 is made during the first day of late registration. This fee increases to $10 for the second day and $15 for the third and subsequent days.

Parking Fee
Each student who pays the necessary fee is issued a card that permits parking on the campus. This card is numbered and is to be displayed as instructed in official parking and traffic regulations, which are issued when automobiles are registered. Strict observance of traffic and parking regulations is necessary for the safe, orderly flow of vehicles in the campus area.

Charges for parking on campus are made at registration. Automobile registration fees are as follows: Fall Semester, $15; Spring Semester, $10; Summer Session I, $6; Summer Session II, $4. Only one registration is required during an academic year, and a student’s parking fee is honored until the end of Summer Session II.

Property Deposit
Each student will be required to pay a $10 property deposit. Any unused portion of the $10 will be refunded upon request after the student graduates or withdraws from the University.

Health and Accident Insurance
Health and accident insurance coverage is available at registration for students carrying nine or more semester hours. Insurance fees are as follows: Fall Semester, $99; Spring and Summer Semesters, $158; yearly fee, $250. This or similar insurance is required of all international students. Additional information may be obtained from the Student Affairs Office.

Miscellaneous Fees
Thesis binding (each copy) .......................................................... $ 13.65
Microfilming (Master’s) ............................................................. 35.00
Microfilming (Doctor’s) .............................................................. 45.00
Diploma Fee ........................................................................... 12.00
Cap, Gown and Hood Rental (Master’s) ..................................... 25.50
Cap, Gown and Hood Rental (Doctor’s) ..................................... 27.50
Returned Check ....................................................................... 15.00
Transcript Fee .......................................................................... 2.00
Photo Identification ................................................................... 2.00

Returned Check Fees
Checks written in payment of registration fees and returned to the University due to insufficient funds will result in a $10 check charge plus a $15 late registration fee.

A student already enrolled in the University is automatically suspended from the University if a check is returned unpaid. The student may re-enter upon redemption of the check plus payment of the returned check fee of $10.

Students who write insufficient funds checks will be placed on a “cash only” basis for the remainder of the academic year.

Fine and Breakage Loss
All library fines, charges for breakage or loss of equipment or other charges must be paid before a transcript of credit or a permit to re-enter the University will be issued.
Matriculation Fee

A matriculation fee of $15 will be incurred by students who withdraw prior to the first day of class. This $15 fee will be deducted from refunds.

Housing

The student housing program at Lamar is designed to supplement the academic program by providing opportunities for social and intellectual development and recreation in a pleasant living environment. The University recently completed a multi-million dollar renovation program, making its residence halls among the most modern in Texas. A variety of living styles is available and includes modern furniture, semi-private rooms, carpet, central heating and air conditioning and various color schemes in the dormitories. Apartment accommodations in newly remodeled buildings also are available.

Students who do not feel the residence hall program meets their personal needs may elect to find living accommodations off campus.

Questions concerning the housing system, its policies, room and board rates, should be directed to the Student Housing Office, Lamar University Station, Box 10041, Beaumont, Texas 77710.
STUDENTS STUDY in a semi-tropical environment near the Texas Gulf Coast at Lamar University-Beaumont.
Academic Information

Course Numbering
Semesters of a course are numbered separately and each number contains three or more figures. Master's level courses are numbered 400G and 500. Doctoral level courses are numbered 500D and 600. Students who receive graduate credit for 400 (also 400G) level courses are expected to complete extra assignments in the courses over and above what is required for undergraduate credit.

The second figure indicates the number of semester hours credit. The third figure or figures indicate the order in which the course normally is taken. The letter "A" or "B" following course numbers indicates partial credit in each course; full credit for such numbered courses will be granted only when the series has been completed.

In this bulletin, each course title will be followed by three digits separated by colons such as (3:3:1). This code provides the following information. The first number is the semester hours of credit for the course. The second number is the class hours of lecture, recitation or seminar meetings per week. The third number is the required laboratory hours per week. The letter "A" indicates that the hours are arranged, usually, with the instructor of the course.

Changing Schedules
All section changes, adds and drops must be approved by the department chair of the student's major field. All such changes are initiated by the completion of the proper form available in the department chair's office. Usually, a course may not be added after the first two days of a regular or summer session.

Dropping Courses
After consultation with their advisor and/or department chair, students may drop a course and receive a grade of "Q" during the first six weeks (two weeks in the summer session) of the semester. For drops after this penalty-free period, grades are recorded as "Q" or "F" indicating that the student was passing or failing at the time of the drop. A grade of "Q" may not be assigned unless an official drop has been processed through the Office of Records. A student may not drop a course within 15 class days of the beginning of the final examinations or five class days before the end of a summer term.

Students should check published schedule for specific dates. A written petition to the Dean of the College in which the course is offered is required of students wishing to drop after the official drop date.

Withdrawals
Students who wish to withdraw during a semester or summer term should fill out a Withdrawal Petition in triplicate in the office of their department chair. Students must clear all financial obligations and return all uniforms, books, laboratory equipment and other materials to the point of original issue. However, if the student is unable at the time of withdrawal to clear his or her financial obligation to the University and files with the Office of Records an affidavit of inability to pay, the student will be permitted to withdraw with the acknowledgement that the student will not be allowed a copy of his or her transcript or re-enter Lamar University as a student until all financial obligations are cleared. Copies of the withdrawal form signed by the department chair and the Director of Library Services are presented to the Office of Records by the student.

The Finance Office, on application before the end of the semester or Summer Session, will return such fees as are returnable according to the schedule shown under the "fees" section of the catalog. If a withdrawal is made before the end of the sixth week (second
week of a summer term) or if the student is passing at the time of withdrawal after the sixth week, a grade of “W” is issued for each course affected. A grade of “F” is issued for all courses not being passed at the time of withdrawal after the penalty-free period.

A student may not withdraw within 15 class days of the beginning of final examinations or five days before the end of a summer term. A student who leaves without withdrawing officially will receive a grade of “F” in all courses and forfeit all refundable fees. Students wishing to withdraw after the official withdrawal date may review the issue with the Dean of the student’s major.

**Enforced Withdrawal Due to Illness**

The Director of the Health Center and the Associate Vice President and Dean of Students, on the advice of competent medical personnel, may require withdrawal of or deny admission to a student for health reasons (mental or physical).

**Academic Records**

Academic records are in the permanent custody of the Records Office. Transcripts of academic records may be secured by an individual personally or will be released on the student’s written authorization.

Students who owe debts to the University may have their official transcripts withheld until the debt is paid.

Chapter 675, Acts of the 61st Legislature, 1969 Regular Session, provides that “no person may buy, sell, create, duplicate, alter, give or obtain a diploma, certificate, academic record, certificate of enrollment or other instrument which purports to signify merit or achievement conferred by an institution of education in this state with the intent to use fraudulently such document or to allow the fraudulent use of such document.”

“A person who violates this Act or who aids another in violating this Act is guilty of a misdemeanor and upon conviction, is punishable by a fine of not more than $1,000 and/or confinement in the county jail for a period not to exceed one year.”

**Educational Records and Student Rights**

The following information concerning student records maintained by Lamar University is published in compliance with the Family Education Rights and Privacy Act of 1974, PL 93-380.

Access to educational records directly related to a student will be granted to him or her unless the type of record is exempted from the provision of the law.

The types, locations and names of custodians of educational records maintained by the University are available from the Dean of Records and Registrar.

Access to records by persons other than the student will be limited to those persons and agencies specified in the statute. Records will be maintained of persons granted such access and the legitimate interest in each case.

The release of information to the public without the consent of the student will be limited to the categories of information which have been designated by the University as directory information and which will be routinely released. The student may request that any or all of this information be withheld from the public by making written request to the Dean of Records and Registrar. The request must be made by the last official day to register for a given session and applies to that session only. Directory information includes name, current and permanent address, telephone listing, date and place of birth, marital status, country of citizenship, major and minor, semester hours load, classification, eligibility for and participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, with dates, and the last educational agency or institution attended.
A student has the right to challenge records and information directly related to him or her if they are considered to be inaccurate, misleading or otherwise inappropriate. Issues may be resolved either through an informal hearing with the official immediately responsible or by requesting a formal hearing. The procedure to be followed in a formal hearing is available in the Office of Records.

The right of parental access to student records may be established by either of two methods; first, by the student filing a written consent statement or, second, by the parent validating the student's dependency as defined by IRS.

**Summons**

An official summons takes precedence over other university activities of the student and should be answered promptly on the day and hour designated.

**Student Conduct**

In order to meet its educational objectives, an institution of higher learning must expect rational, mature behavior from its constituency. To accept anything less is to invite the destruction of not only academic freedom but the system of higher education itself.

Disciplinary procedures, specific University rules and regulations and statements of student rights and responsibilities are published each year in the *Student Handbook*. Copies of the *Student Handbook* are available in the office of the Dean of Students.

**Penalty**

A student who makes a false statement to any university official or office or on any official form submitted to the University is subject to immediate dismissal.

**Student Debts**

The University is not responsible for debts contracted by individual students or student organizations and will not act as a collection agency for organizations, firms or individuals to whom students may owe bills.

Students and student organizations are expected to honor contractual obligations promptly.

Penalty for failure to clear up these obligations may be (a) no readmission, (b) withholding of grades and transcripts, (c) withholding of degree.

**Parking**

At registration, each student who pays the necessary fee is issued a permit which allows parking on the campus. This permit is numbered and is to be attached to the back of the rear-view mirror of the car.

**Change of Address or Name**

Students are responsible for all communications addressed to them at the address on file in the Office of Student Development, in the Office of the College of Graduate Studies and in the Office of Records. Any student who moves during a semester must immediately register the change of address in the above offices. Change of address forms are available in the Office of Records.

Change of name due to marriage, or correction of name because of spelling errors, may be made by completing a name change card at the Office of Records. All name changes must be accompanied by a copy of the legal document making the name change official. This document will be kept on file in the student's confidential folder.
Class Attendance

Regular class attendance is important to the attainment of the educational objectives of the University. Especially in lower division courses and in large classes at any level, the instructor should keep attendance records and should formulate an attendance policy consistent with departmental policies but suited to the needs of the particular course. The instructor’s policy is to be explained in detail to the class at the beginning of the semester.

Policy on Student Absences on Religious Holy Days

In accordance with the Texas Education Code 51.911, a student who is absent from classes in observance of a religious holy day will be permitted to take an examination or complete an assignment scheduled for that day at a time specified by the instructor if, not later than the 15th day after the first day of the semester, the student notifies the instructor of each class the student had scheduled on that date that the student would be absent for a religious holy day.

“Religious holy day” means a holy day observed by a religion whose place of worship is exempt from property taxation under Section 11.20, Tax Code.

Notifications of planned absences must be in writing and must be delivered by the student either (a) personally to the instructor of each class, with receipt of the notification acknowledged and dated by the instructor, or (b) by certified mail, return receipt requested, addressed to the instructor of each class. A form, Notification of Planned Absence for Religious Holy Days, may be obtained from the Office of Records and Registrar, Wimberly Building, for the purpose of notification. The completed form must be delivered by the student to the instructor of each class affected by the absence. Upon review of the notification form, instructors will sign and date the receipt of the notice, retaining a copy for the instructor and returning one copy to the student.

Instructors may refer any questions regarding the qualification of the absence to the Associate Vice President and Dean of Students. Students may be required to present to the Associate Vice President and Dean of Students a written statement documenting that such absence qualifies under the terms of a religious holy day.
GRADUATE STUDENTS can work in one of 26 different programs.
College of Graduate Studies

History
The College of Graduate Studies was instituted in the Fall 1960, with the offering of the Master of Arts degree in the fields of history and English.

In 1962, master's degrees were begun in mathematics, engineering and elementary education; in 1965, in business administration, chemistry, special education and secondary education; in 1968, in health and physical education, political science, speech, guidance and counseling; in 1969, in biology, and in 1970, in educational supervision. Also in 1970, a doctor's degree in engineering was authorized. In 1972, a master's degree in school administration was approved. Master's degrees in public administration and in psychology were authorized for 1974. In 1975, master's degrees in music, music education and home economics were initiated, and the Master of Engineering Management degree was begun in 1983. A Master of Science in Computer Science was added in 1984.

Objectives
The objectives of the College of Graduate Studies are as follows:
1. Advancement of knowledge through research.
2. Intensification within a student's chosen field of specialization and allied areas.
3. Development of the student's skill in the methodology of research.
4. Promotion of the power of independent thought by making students responsible for their own scholarship.

Degrees Offered
Master of Arts
   Master of Arts in English
   Master of Arts in History
   Master of Arts in Political Science
   Master of Arts in Visual Art

Master of Business Administration

Master of Education
   Master of Education in Elementary Education
   Master of Education in Counseling and Development
   Master of Education in Secondary Education
   Master of Education in Special Education
   Master of Education in Supervision
   Master of Education in Administration

Master of Engineering

Master of Engineering Management

Master of Engineering Science

Master of Music

Master of Music Education

Master of Public Administration

Master of Science
   Master of Science in Biology
   Master of Science in Chemistry
   Master of Science in Computer Science
   Master of Science in Deaf Education
   Master of Science in Environmental Engineering
   Master of Science in Environmental Studies
   Master of Science in Kinesiology
Master of Science in Home Economics
Master of Science in Mathematics
Master of Science in Psychology
Master of Science in Speech (Theater, Speech Pathology/Audiology, Public
Address)
Doctor of Engineering

Enrollment

Admission to a Degree Program

1. Applicants for admission to the Graduate College must submit the following ma-
terials to the Graduate Admissions Coordinator at least 30 days before registration.
   A. An application for admission to the Graduate College.
   B. An official transcript from each college or university attended.
   C. Official scores on the aptitude section of the Graduate Record Examination
      (GRE) sent directly to Lamar University by the Educational Testing Service.
      (Applicants for the Master of Business Administration degree are not required
      to take the GRE, but must submit scores on the Graduate Management Ad-
      mission Test, GMAT. See the College of Business section of this Bulletin for
      specific requirements.)
      GRE AND GMAT SCORES MORE THAN FIVE YEARS OLD WILL BE AC-
     cepted ONLY BY SPECIAL PERMISSION OF THE DEAN/DIRECTOR OF
THE GRADUATE COLLEGE.

2. Applicants must meet the following requirements:
   A. A prospective student must have a bachelor's degree from an institution ap-
      proved by a recognized accrediting agency.
   B. All students whose native language is not English must make a minimum
      score of 500 on the Test of English as a Foreign Language (TOEFL). Individual
      departments may require higher scores.
   C. An applicant must meet ONE of the following additional criteria.
      (1) A minimum combined score of 950 on the Verbal plus Quantitative sec-
          tions of the Graduate Record Examination.
      (2) A minimum combined score of 900 on the Verbal plus Quantitative sec-
          tions of the GRE with a minimum of 350 on the Verbal section.
      (3) Minimum scores of 400 on the Verbal section and 400 on the Quantitative
          section of the GRE with a minimum total of 900 on these two sections.
   D. The following departments have established minimum grade point average
      requirements for admission to their degree programs.
      (1) 2.5/4.0 overall or on the last 60 hours of undergraduate work.
            Biology                  Health, Physical Education and Dance
            English                 Political Science
            History                 Psychology
            Home Economics           Public Administration
      (2) 2.0/4.0 overall or on the last 60 hours of undergraduate work
            Chemistry
      (3) 3.0/4.0 on the last 60 hours of undergraduate work.
            Computer Science

3. International students must provide the following additional items.
   A. Complete official and certified translations of any transcripts which are not
      written in English.
   B. A minimum score of 500 on the Test of English as a Foreign Language
      (TOEFL).
C. Proof of sufficient financial resources to meet the cost of attending Lamar University. International students must also present proof of adequate health insurance; those who plan to drive an automobile in the State of Texas must have liability insurance. All application materials, scores, transcripts, etc., must be on file at Lamar University by May 15 for Fall admission, by October 1 for Spring admission, and by February 15 for Summer admission.

4. International students who are assigned to English as a Second Language must enroll in ESL courses every semester or term such courses are offered until they receive a grade of “S.” Students will not be admitted to candidacy or allowed to graduate until this requirement has been completed.

5. Applicants for the Master of Business Administration degree should consult the College of Business section in this Catalog for specific entrance requirements to that program.

6. Prospective Doctor of Engineering students must send a letter to the Dean, College of Engineering (Box 10057) giving information on the applicant’s engineering experience, current employment and major research interests. Additional information regarding admission to the program will be found on page 86.

7. Students who wish to pursue graduate work in an area for which they have not had the prerequisites will be required to make up deficiencies as required by the major department. In general, the student is required to have a minimum of 24 semester hours (12 on the Junior-Senior level) of undergraduate work in the subject chosen as the graduate major. For a graduate minor, 12 semester hours of undergraduate work are required.

8. Admission to the College of Graduate Studies does not imply admission to a degree program or admission to candidacy for a graduate degree.

9. The Director of Admissions Services will notify the applicant of admission to the College of Graduate Studies and to a specific degree program. All transcripts, certificates, etc. become the property of Lamar University and are not returnable.

10. The admission requirements stated above are minimum requirements for admission to the College of Graduate Studies. Applicants must also have the approval of the department in which the degree program is offered, and must meet the specific requirements of that department. Prospective students should consult the appropriate college/department section of this Catalog for those requirements.

Post Baccalaureate Admission

1. Students who wish to take graduate courses but do not intend to work toward a particular graduate degree or who have not met all requirements for admission to the College of Graduate Studies may be classified Post Baccalaureate students in one of the undergraduate colleges under the following conditions:
   A. The applicant must hold a bachelor’s degree.
   B. The applicant must submit an application for admission to the Post Baccalaureate program.
   C. The applicant must submit an official transcript from each college previously attended.
   D. The applicant must be approved for admission by the Director of Admissions Services.

2. International students will not be admitted to the Post Baccalaureate Program.

3. If application for admission to a graduate degree program is received in a subsequent semester and requirements for admission to the College of Graduate Studies are completed, a maximum of six semester hours completed at Lamar before full admission is gained may be counted for degree credit if approved by the department and the Graduate Dean.
4. Post Baccalaureate students who have successfully completed six or more hours of graduate course work and who do not meet the minimum admission requirements for the College of Graduate Studies may petition for admission following the procedure given below. If admission is then granted by the College of Graduate Studies, the student may receive degree credit for six hours or for the number of hours completed at the end of the semester in which the student exceeds six hours. The Chair of the graduate major department shall determine the applicability of all prior hours and other courses to the student's degree and shall notify the Graduate Dean of such decisions.

5. Post Baccalaureate students are not permitted to enroll in business courses for graduate credit without the prior consent of the Associate Dean, College of Business.

**Graduate Admissions Appeals Committee Procedure**

**I. Purpose and Composition:**

A. The Graduate Admissions Appeals Committee shall consider appeals by students who have been denied admission to the College of Graduate Studies by the Office of Graduate Admissions.

B. The committee is composed of seven members of the graduate faculty appointed by the Dean of the College of Graduate Studies in September of each academic year. Each academic college having graduate programs shall have one representative, except that Arts and Sciences shall have one from the Arts division and one from the Sciences division. Five members, not including the chairman, shall constitute a quorum.

C. The committee shall meet on the second Wednesday in October and on the first Wednesday in March; special meetings may be called by the Graduate Dean if necessary.

**II. Appeals Procedure:**

A. Before filing an appeal, the student shall consult with the Dean of the College of Graduate Studies.

B. The student must request a hearing in writing from the Dean of the College of Graduate Studies at least two weeks before the committee's scheduled meeting date. This request shall state the grounds upon which the appeal is based. The student may also furnish other pertinent material (letters, statements, etc.) for inclusion in the appeals file. Such material must be provided at least one week prior to the scheduled meeting.

C. The dean will notify the committee chair of the pending appeal and the chair will arrange a time and place for the meeting. The dean will then inform the student.

D. The dean will forward copies of the appellant's academic records and all other documentation to the chair who will distribute the material to the committee members at least 3 working days before the scheduled meeting.

E. The appellant may appear before the committee to make a statement and to answer such questions as may be posed by the committee members. The appellant may be accompanied by counsel or by witnesses who may speak in the appellant's behalf. However, the appellant shall notify the dean of such participation at least 24 hours before the meeting.

F. The hearing shall be open to any interested parties. Following a full hearing, the committee will meet in closed session to formulate its recommendations. Recommendations will be by majority vote with the chair voting only in case of a tie. The appellant shall be immediately informed of the committee's recommendation.
C. A written recommendation and the reasons of such recommendation on each case will be forwarded to the dean of the college within two working days. The dean will make the final decision on the disposition of each case and will inform the student in writing one week after the hearing.

H. All relevant materials will be available to the appellant through the Dean of the College of Graduate Studies, and will be maintained in the Graduate Office for one year. These materials will not be available for public inspection except with the written permission of the student involved.

I. Copies of the Admissions Appeal Committee procedures and policies will be available in the Office of the Dean of the Graduate College and the office of each academic dean.

**Registration**

1. A student who has been admitted to the College of Graduate Studies may register in August or January for the long sessions, or in June or July for the summer terms.

2. Graduate students who have completed all course work, but are working on their thesis, must register for 669A or 669B (Thesis) if they wish to obtain professional assistance from a faculty member.

**College of Graduate Studies Regulations**

**NOTE:** All graduate students are expected to be familiar with the rules and requirements of the College of Graduate Studies and of their particular graduate program.

1. All course work applied toward a given degree, except the Doctor of Engineering, must be completed within a period of six years. This time limit applies to all work on the graduate level, including work transferred from another institution. Time spent on active military service will not be included in the six-year limit.

2. No graduate student is permitted to take more than 15 semester hours of class work during one semester of the long term or more than six semester hours of class work during the summer term of five weeks. A graduate student is permitted to take seven semester hours in a summer term if one course has a lab. A full-time graduate student is defined as a student taking nine semester hours of graduate work, or enrolled in both 669A and 669B thesis during the same semester, or enrolled in Egr 662. Students taking four to five hours of graduate work per semester will be considered half-time graduate students; students taking six to eight hours of graduate work will be considered three-quarter time graduate students.

3. With the approval of the chair of the proposed graduate's major department and the graduate dean, an undergraduate student within 12 semester hours of graduation may take a maximum of six semester hours of graduate courses to be applied toward the master's degree, provided the total academic load does not exceed 15 semester hours.

4. With the approval of the chair of the major department and the graduate dean, a student may transfer up to six semester hours of graduate work completed at another institution. The student must have received grades of "A", "B", or "S". "S" is defined as equivalent to an "A" or "B", and acceptable for graduate credit at the institution where the work was taken.

5. Over 50 percent of the total credit hours required for a degree must be taken on the Beaumont campus of Lamar University.

6. A maximum of six semester hours of work done in institutes may be approved for graduate credit on a degree program.

7. A maximum of six semester hours taken for one master's degree may be counted toward a second master's degree with the approval of the department in which the second master's degree is sought.
6. A student may be required to drop a course or to withdraw from the University temporarily or permanently for any of the following reasons:
   A. Academic work below the standard specified by the Graduate Council.
   B. Academic dishonesty or misconduct on the part of the student.

9. The grading system for graduate students is "A", "B", "C", "D", "F", "T", "S", "U". Drop and Withdrawal. Graduate credit is allowed only for grades "A", "B", "C", and "S". Failing grades for graduate students are "D", "F", and "U". An overall grade point average of "B" (3.0) on all graduate work attempted is required for graduation; however, a thesis grade may not be averaged with course grades to provide the required 3.0 average. Incomplete work must be finished during the next long semester, or the Office of Records will change the grade of "I" to the grade of "F". Under unusual circumstances, the student may apply for an extension through the instructor. The extension may be granted by the Dean of the College of Graduate Studies.

10. A department may impose academic requirements for its majors in addition to the minimum university grade point standard with the approval of the Dean of the College of Graduate Studies.

11. Faculty members above the rank of Instructor will not be permitted to work toward a graduate degree at Lamar University.

12. Resignation from the College of Graduate Studies should be made in writing to the Dean of the College of Graduate Studies.

13. The University reserves the right to change any of its rules, regulations or course requirements without notice.

Probation/Suspension Regulations

1. Grade point averages for graduate students are computed using all graduate level work taken during the previous eight years except 699 thesis courses. With the approval of the student's current graduate advisor and department chair, graduate course work taken before this time may be disregarded in determining a student's grade point average for purposes of establishing probationary status and/or eligibility for graduation.

2. A. When a graduate student with regular admission status falls below a 3.0 (B) average, the student is placed on academic probation. The student will be removed from probation only when all grade point deficiencies are removed.

   B. Graduate work taken at another institution will be included in computing grade point averages only when that work is applied toward a degree in progress at Lamar University.

   C. No student who has any grade point deficiency (i.e., has less than a 3.0 average on all graduate work taken) may apply for graduation.

   D. Students with a grade point deficiency of more than six grade points at the end of the Fall or Spring semester will be suspended for the following semester. Suspension for the Fall semester may be removed if the student reduces the deficiency to six or less during the summer program.

   E. The first academic suspension shall be for one long semester and the second suspension for two long semesters. Readmission will not be permitted after the third suspension.

   F. Students suspended under this provision may be admitted to another department after they have completed their suspension, provided that they meet the prescribed standards and are accepted through the normal admission procedure.

   G. A department may require its majors to meet additional standards with regard to probation, suspension, and dismissal from its program. These may be found in the appropriate departmental section of this catalog.
3. A. Post baccalaureate students taking graduate course work are not subject to these regulations until they have been fully admitted to the College of Graduate Studies and to a degree program.
   B. Students with a grade point deficiency of six grade points or less may be admitted to a degree program upon the recommendation of the department to which they are applying, but will be placed on probation by the Graduate College until the deficiency is completely removed.
   C. Students with deficiency of more than six grade points may be admitted to a degree program, but will be suspended for the next long semester if the deficiency is not reduced to six or less at the end of the semester during which they were admitted.

General Degree Requirements

1. Students must earn the number of semester hours of graduate credit specified by their major departments. Specific details may be found in the departmental section of this Bulletin.
2. A minimum of 18 semester hours of the required hours must be courses numbered 500 or above.
3. Any student who writes a thesis must defend it orally before his/her committee. Students who do not write theses must pass a comprehensive examination, which may be oral, written, or a combination of both. Please consult the departmental section of this catalog for specific details.
4. The student must meet the specific requirements as set forth in this catalog for a particular degree program.

Master of Arts

1. Meet all general degree requirements.
2. Complete 30 semester hours of graduate work: 18 in the major field, six in thesis, six in an approved minor or six additional hours in the major.
3. Present evidence of a reading knowledge of at least one foreign language. This requirement may be satisfied by examination or by submitting college credit equivalent to that required for the degree of Bachelor of Arts in this institution.
4. For the Master of Arts in Political Science, successful completion of nine hours of quantitative skills courses (Pols 3319, Pols 4319, and Pols 530) may be substituted for the foreign language requirement.

Master of Business Administration

1. Meet all general degree requirements.
2. Complete 30 hours of second year MBA courses specified under College of Business degree requirements if a thesis is written, plus any first year MBA courses required.
3. If a thesis is not written, complete 36 hours of second year MBA courses as specified under College of Business degree requirements, plus any first year MBA courses required.

Master of Education

1. Meet all general degree requirements.
2. Complete 30 semester hours of graduate work if a thesis is written or 36 semester hours if a nontesis program is selected.
3. Meet the specific requirements listed in the College of Education section of this catalog for each degree program.
Master of Engineering
1. Meet all general degree requirements.
2. Complete 36 semester hours of graduate work or complete 30 hours of graduate work plus a three-hour design project.

Master of Engineering Science
1. Meet all general degree requirements.
2. Complete 30 semester hours of graduate work as follows: a minimum of 18 semester hours in 500 level engineering courses, including six semester hours in thesis; a minimum of nine semester hours in a combination of science and mathematics and three additional semester hours.

Master of Music (Performance)
1. Meet all general degree requirements.
2. Complete 30 semester hours of graduate work: 12 hours in the Applied Major, six in Music Literature, six in Music Theory and six in Music Education.
3. Special requirements in addition to the above: a formal public recital and a research paper OR a lecture recital.

Master of Music Education
1. Meet all general degree requirements.
3. Exceptions: six additional hours in Music Education may be substituted for the Thesis, and six hours in Applied Music may be substituted for Music Education courses.

Master of Public Administration
1. Meet all general degree requirements.
2. Complete 36 semester hours of graduate work as specified for the degree in the Department of Political Science section of this catalog.
3. Pass both oral and written comprehensive final examinations.

Master of Science
1. Meet all general degree requirements.
2. Complete 30 semester hours of graduate work: 15 to 18 semester hours in the major field, six in thesis and six to nine semester hours in the minor field. With the approval of the head of the major department, a student may elect to take all work in the major field.
3. If a thesis is not required, complete 36 hours of approved course work.
4. The graduate degree in psychology requires 36 hours in approved course work and six hours in thesis.
5. Students applying to the Computer Science program must satisfy the depth and breadth requirements as defined by the Graduate Faculty of the Computer Science Department.

Doctor of Engineering
1. Obtain credit for all courses required by the student's doctoral committee. The number and extent of these courses will depend upon the student's diagnostic examination, engineering experience and educational objectives. In general a minimum of 30 semester hours of 500 and 600 level course work, excluding Egr 632 and Egr 652, beyond the equivalent of a master's degree will be required.
2. The student shall complete a residency of one year.
3. Satisfactorily pass candidacy examinations as required by the student’s doctoral committee.
4. Complete a field study, normally 30 semester hours, involving some technological innovation.
5. Submit and defend a formal engineering report on the field study.

**Admission to Candidacy**

**Master’s Degree**

1. Prior to the time a graduate student is admitted to candidacy, the Chair of the major department or a person designated by the Chair acts as the student’s adviser.
2. A student must be admitted to candidacy after removing all undergraduate, graduate and ESL deficiencies and after completing 12 semester hours of course work in the major department. Students must have a B (3.0) average on all graduate work taken in order to be admitted.
3. The individual student is responsible for applying for Admission to Candidacy in the office of the Chair of the major department or college graduate coordinator.
4. The department Chair shall submit a recommended degree plan and suggested graduate committee to the Graduate Dean. If approved, the student is admitted to candidacy.
5. The graduate advisory committee will include a member of the graduate faculty designated as the supervising professor, chairman, or major professor, and two other members of the graduate faculty. The graduate advisory committee will assist in planning the remainder of the student’s program, including revision of the degree plan or program of study, thesis title and thesis approval, type of research problem, and administration and evaluation of the final comprehensive examination. The Graduate Dean has the option of appointing additional members to an advisory committee.
6. Students must be admitted to candidacy before beginning their last nine hours of coursework, and will not be allowed to graduate at the end of the semester or term in which they are admitted to candidacy.
7. Advanced Graduate Record Examination scores may be required by individual departments.
8. Candidacy examinations are required by the Departments of Psychology and Biology.

**Doctor of Engineering**

A student will be admitted to candidacy for the Doctor of Engineering degree only upon the recommendations of his/her doctoral committee. In general this committee will require the following:

1. Satisfactory progress in all course work.
2. Continuous pursuit of the degree by earning at least three semester hours credit in a two consecutive semester period. Any student who does not do so must apply to the graduate engineering faculty for permission to continue in the program.
3. Prepare a proposal for a field study involving a technological innovation and defend this proposal to a doctoral committee as part of the candidacy examinations.
4. Satisfactorily pass other examinations designed to determine whether the student is ready to do the field study.

A student who fails to be admitted to candidacy on the first attempt may take additional courses or otherwise prepare for an additional attempt as may be recommended by the doctoral committee. Any student who does not meet the minimum requirements
as established by the student's doctoral committee may be required to withdraw from the doctoral program.

Advisory Committees

Members of a student's advisory committee are appointed by the Graduate Dean upon recommendation by the Chair of the student's major department at the time the student is admitted to candidacy. After admission to candidacy, but before the date of the final examination, the student may request a change in the committee composition with the approval of the student's department chair. If the department Chair does not approve a request for a committee change, the student may request the Graduate Dean to appoint a three member Review Committee. In the event the Review Committee fails to effect an agreement between the student and the original committee, a new committee may be selected for the student by the Graduate Dean, the Dean of the student's academic college and two members of the graduate faculty of the student's academic college chosen by the Graduate Dean. The time period should not exceed 10 class days from the date of receipt by the Graduate Dean of a written request for review and arbitration by the student and the appointment of a new committee, should one be necessary.

Thesis Requirements

A thesis is required for the Master of Science degrees in biology, chemistry, and psychology, and for the Master of Engineering Science degree. It is not available in programs leading to the Master of Public Administration and Master of Music degrees, or the Master of Education degrees in Guidance and Counseling or in School Administration. A thesis is optional in all other degree programs. Students who write theses are expected to follow the procedure below.

1. Register for the departmental thesis course with the approval of the student's graduate advisor. The first registration is for Thesis 669A; all subsequent registrations are for Thesis 669B. All students are expected to register for Thesis 669B until the thesis has been completed. NOTE: No academic credit is given for thesis courses until the thesis has been approved by the major department and accepted by the College of Graduate Studies. At that time, six semester hours credit will be awarded.

2. Write a thesis under the direction of the supervising professor. The form and style of the thesis must follow the Thesis Information Manual which is available from the College of Graduate Studies.

3. Submit a single, unbound copy of the thesis in final form to the Dean of the College of Graduate Studies at least two weeks before the oral defense and at least 30 days before the date of graduation.

4. Defend the thesis orally at least 10 days before the date of graduation at a time and place specified by the supervising professor. The defense must be scheduled in the Graduate College at least 10 days before the defense is to be held. The supervising professor will report the results of the defense to the College of Graduate Studies within two working days.

5. Submit three official final copies of the thesis on rag content paper to the Graduate College at least 10 days before graduation. Additional copies may be turned in for binding at the same time if desired or if required by the student's major department. All copies must be signed by the student's supervising professor and committee members, department head, and academic dean.

6. Submit two extra copies of the thesis abstract and a completed University Microfilms form at least 10 days before graduation.

7. Pay all binding and abstract publication fees in the University Bookstore at least 10 days before graduation.
Non-Thesis Requirements

1. All candidates for graduate degrees who do not write theses must pass a comprehensive final examination which must be taken during the last semester of attendance and at least 10 days before the conferral of the degree. The form of this examination is determined by the student's major department, and may be oral, written, or a combination of both.

2. A student registers for the comprehensive examination by applying for graduation in the Graduate College. Applications must be filed before the deadline established by the Graduate College. Those deadlines are:
   - For December graduation: First Monday in October
   - For May graduation: First Monday in March
   - For August graduation: First Monday of Summer Term I

   Specific dates will be found in the calendar at the front of this Bulletin.

3. If all requirements for graduation except the comprehensive examination have been completed, the student may take the examination during a later semester without being enrolled in the College of Graduate Studies.

4. All oral examinations must be scheduled in the Office of the Graduate Dean at least 10 days prior to the date of the examination. The Dean may attend or may send a representative to attend.

5. All oral examinations will be scheduled as follows:
   - Fall Term: First Monday in November until 10 days before the date of graduation
   - Spring Term: First Monday in April until 10 days before the date of graduation
   - Summer Term: Last Monday in June until 10 days before the date of graduation

6. Written comprehensive examinations will be administered in accordance with the following schedule:
   - Fall Term: First Thursday in November
   - Spring Term: First Thursday in April

   NOTE: Written comprehensive examinations will be given only once during the summer on the last Monday of the first summer term. If this date conflicts with the July 4 holiday, the examinations will be given on the last Monday in June. For specific dates, please consult the official calendar in the front of this Bulletin or call the Graduate College for details.

7. Failure to pass a comprehensive examination in three attempts will result in a student being permanently suspended from that degree program. The examination may be taken only once each term. Students suspended under this provision may be admitted to another degree program if they meet the required standards and are accepted by the new degree program.

   A department may prescribe additional academic requirements for its majors with the approval of the Dean of the College of Graduate Studies.

Graduation Procedure

Students who intend to graduate at the end of a particular semester must apply for graduation in the office of the Graduate Dean on or before the official deadline for application as established by The College of Graduate Studies.

Degree candidates must be present at the commencement exercises unless they have been excused by the Graduate Dean. Written requests to graduate in absentia must be approved by the Graduate Dean for at least four weeks before the scheduled date of graduation.
VISITING PROFESSORS bring an international view to classrooms in the College of Arts and Sciences.
College of Arts and Sciences

The College of Arts and Sciences offers programs of study leading to the Master of Arts degree in the fields of English, political science and history; to the Master of Science degree in the fields of biology and chemistry; and to the Master of Public Administration degree. In addition, graduate study is available in geology, physics and sociology as areas of support or specialization in other advanced degree programs.

Persons seeking admission to these programs must meet the requirements specified by the College of Graduate Studies and the individual department. Admission to a degree program is not an admission to candidacy.

Department of Biology

The Department of Biology offers a program of study leading to the Master of Science in biology degree. It is designed to enhance the professional competence of graduates in biology or closely related disciplines who are presently engaged in or planning to enter secondary school or college teaching, or who expect to be employed by private or governmental agencies in biologically oriented fields.

Applicants must 1) have completed a minimum of 24 semester hours in the biological sciences, 2) have completed a minimum of one semester of organic chemistry and one semester of statistics, 3) remove any deficiencies as provided in the section on admission, 4) score a total of 950 (Verbal plus Quantitative Sections) on the Graduate Record Examination, or if V + Q score falls between the Graduate College minimum score and 949, receive a majority vote of the biology graduate faculty, 5) have an undergraduate grade point average of at least 2.5/4.0 overall or on the last 60 hours of undergraduate work.

Degree Requirements

The candidate for the M.S. in biology must meet all the College of Graduate Studies general requirements as listed in this catalog. Additional specific requirements are

1. Take a preliminary written examination covering all major aspects of biology. The exam will be used in assessing a student's level of preparation and may result in remedial work as appropriate. Details of the exam format are available in the office of the Department of Biology.
2. Submit a written proposal for the thesis. After the thesis proposal is written, pass an oral examination before the biology graduate faculty on the experimental design of the proposed thesis and related disciplines. Note: This requirement should be completed during the first year of enrollment and must be completed by the end of the second year of the program.
3. For their professional development, students will enroll in Bio 511 Graduate Seminar each Fall and Spring semester. A maximum of two semesters credit will be counted toward the Master's degree; subsequent enrollments will be for a grade but will not count toward the degree. Exceptions must be approved by the biology graduate faculty.
4. Thirty-three hours of graduate credit which may include a maximum of 16 hours in approved 400 level courses with augmented requirements. All course work will be in biology. Exceptions must be approved by major advisor and by the Chair, Department of Biology.
Graduate Faculty

Associate Professor David L. Bechler
Animal behavior, ichthyology

Assistant Professor Thomas S. Bianchi
Estuarine, marine and evolutionary ecology, biochemistry

Associate Professor Wayne W. Carley
Physiology

Associate Professor Michael W. Haiduk
Genetics, mammalogy

Professor Richard C. Harrel
Limnology, ecology, invertebrate zoology

Associate Professor Madelyn D. Hunt
Medical microbiology, epidemiology

Associate Professor William C. Runnels
Algology, marine biology

Associate Professor John T. Sullivan
Parasitology, immunology

Professor Michael E. Warren
Entomology, mosquito biology

Biology Courses

510 Materials and Techniques of Research
Survey of laboratory and library research techniques, instrumentation and materials requisite to scientific investigation. Required of all entering graduate students.

511 Graduate Seminar
Current topics in biological research. See requirement 3 under Degree Requirements.

540 Ornithology
Natural history, taxonomy and ecology of birds. Prerequisite: Bio 440.

541 Animal Behavior
An analysis of the development and significance of various behavior patterns in animals from an evolutionary point of view.

542 Toxicology
Toxicological principles and responses of the major organ systems. Pesticides, metals, and solvents and their effects on the environment will be considered. Prerequisite: Organic chemistry

543 Ichthyology
Natural history, taxonomy and ecology of freshwater and marine fishes. Required field trip.

544 Herpetology
Natural history, taxonomy and ecology of amphibians and reptiles. Required field trip.

545 Mammalogy
Natural history, taxonomy and ecology of amphibians and reptiles. Required field trip.

546 Marine Invertebrate Zoology
Field study and identification of area species; current research. Required field trips. Prerequisite: Bio 345 or 443.

547 Ecology of Polluted Waters
Analysis of effects of water pollutants on aquatic ecosystems. Prerequisite: Bio 443.

548 Aquatic Entomology
Biological classification of aquatic insects. Field trips and paranormal collection required.

549 Comparative Physiology
Fundamental physiological processes in animals from the phylogenetic viewpoint. Prerequisite: Bio 344, Chem 342.

558 Molecular Genetics
Detailed treatment of molecular aspects of nucleic acids and genetic systems of pro-and eucaryotic organisms. Laboratory emphasis on isolation, purification, restriction digests, Southern blotting and recombinant DNA techniques. Prerequisite: genetics, organic chemistry, and/or biochemistry recommended.

5101, 5301, 5401 Special Topics
Research in areas other than thesis. Prerequisite: Approval of graduate advisor. May be repeated when topic changes.
## 4302 Cellular Physiology
Basic processes in physiology, metabolism, transport, energetics, molecular and cellular mechanisms. (Offered Spring semester)
*Prerequisite: Junior standing, credit for organic chemistry.*

## 440 Ornithology
Natural history, taxonomy and ecology of birds.

## 4402 Taxonomy of Vascular Plants
The classification of vascular plants; family characteristics, specific identification of the local flora and dominant plants of floristically different areas of Texas.

## 4404 Estuarine Ecology
Physical, chemical, and biological aspects of the zone interfacing freshwater and marine environments. Laboratory includes field trips for collecting data and specimens.

## 4405 Immunology
Organs, tissues, cells, and molecules of the immune response and their interactions.
*Prerequisite: Bio 263*

## 4406 Epidemiology
A study of the distribution and determinants of diseases and injuries in human populations. Laboratory utilizes a case history approach.
*Prerequisite: microbiology; statistics recommended.*

## 4407 Systematic and Evolutionary Biology
A survey of evolutionary mechanisms from molecular to population levels. Consideration of speciation, adaptation and historical geology. Laboratory includes selective/adaptive change exercises and techniques such as electrophoresis and cladistic analysis.

## 441 Parasitology
A study of the morphology, life history and host-parasite relationships of parasites of man and other animals.
*Prerequisite: Bio 141-142.*

## 442 Entomology
Physiology, morphology, life history, collection, classification and control of insects.
*Prerequisite: Bio 141-142.*

## 443 Limnology
Plants, flora, ecology and productivity of fresh water.
*Prerequisite: Bio 141-142.*

## 444 Vertebrate Natural History
Collection, identification and natural history of areas fish, amphibians, reptiles, birds and mammals. (Offered Spring semester)
*Prerequisite: Bio 141-142.*

## 445 Marine Biology
Habitats and community relationships of marine plants and animals.
*Prerequisite: Bio 141-142.*

## 448 Ecology
Quantitative approach to both field and experimental studies. Interrelationships of organisms and their environment.
*Prerequisite: Bio 141-142.*

## 447 Cellular Biology
Structure and functions of the cell and its organelles.
*Prerequisite: Bio 141-142.*
Department of Chemistry

The Department of Chemistry offers a program of study leading to the Master of Science degree in Chemistry. Those seeking admission to this program must meet the general requirements as set forth in this catalog for admission to the College of Graduate Studies and must have a minimum grade point average of 2.0/4.0 overall or on the last 60 hours of undergraduate work. In addition, the applicant must offer the substantial equivalent of the course in general chemistry, inorganic chemistry, analytical chemistry, organic chemistry and physical chemistry required of undergraduate students in the chemistry curriculum. The applicant also must have completed one year of college physics and mathematics through integral calculus.

Students working toward the graduate degree in chemistry will take a set of four proficiency examinations, one in each of the fields of chemistry; analytical, inorganic, organic and physical. These examinations are taken on entrance and are offered in the fall and again during the beginning of the Spring semester. The results of these examinations are used for orientation and guidance.

Degree Requirements

The candidate for the M.S. degree in Chemistry must meet all the College of Graduate Studies general degree requirements as listed in the catalog. Additional specific degree requirements are as follows:

1. Fifteen to 18 semester hours of course work in Chemistry which must include Chm 531, 533, 535, 537 and at least one 500 level Selected Topics course in Chemistry with a grade point average of "B" (3.0) in these courses.
2. Presentation of a thesis.
3. Six to nine additional semester hours of 400G or 500 level courses in an approved field of study.
4. Competence in computer science.
5. Examination results on the chemistry section of the GRE must be submitted before graduation.

539, 569 Graduate Problems in Chemistry 3 or 6:0
May be repeated for credit. Techniques of research under close supervision of instructor; individual consultations; reports. May not be substituted for required courses.
Pre requisite: Graduate standing and consent of instructor and department head.

25101, 5201, 5301, 5401, 5501, 5610 Special Topics 1:0;1:0;1:0;1:0;1:0
The course is designed to meet special needs of students. Each topic is offered on an irregular schedule as the demand requires.
Pre requisite: Departmental approval.

5311 Selected Topics in Analytical Chemistry 3:0
May be repeated for credit when topic varies. Description of courses content will appear in schedule of classes.
Pre requisite: Chm 531 or consent of instructor.

5331 Selected Topics in Inorganic Chemistry 2:0
May be repeated for credit when topic varies. Description of course content will appear in schedule of classes.
Pre requisite: Chm 535 or consent of instructor.

5352 Modern Synthetic Organic 3:0
Selected topics in modern synthetic organic chemistry.
Pre requisite: Graduate standing.

5371 Selected Topics in Physical Chemistry 3:0
May be repeated for credit when topic varies. Description of course content will appear in schedule of classes.
Pre requisite: Chm 537 or consent of instructor.

569A-660B Thesis 6:0;0
Pre requisite: Approval of graduate advisor.

The following courses may be taken for graduate credit with augmented requirements, subject to approval by the departmental graduate advisor.

412 Senior Seminar 1:1
Reports and assigned reading.
Pre requisite: Senior standing in chemistry.

430 Organic Polymers 3:3
Chemistry of industrial polymerization of organic compounds, petro-chemistry of organic monomer preparation and chemical characteristics of organic polymers, industrial field trip(s).
Pre requisite: Chm 342, Chm 431 or CHE 441 or parallel.

436 Inorganic 3:3
Study of the quantized atom, valency and the chemical bond, and coordination chemistry with applications to biological systems.
Pre requisite: Chm 431.

441 Biochemistry I 4:3
Structure chemistry and functions of biological compounds. A survey of the detailed structures, chemistry and functions of the various classes of biologically important compounds.
Pre requisite: Chm 342.

442 Biochemistry II 4:3
A detailed survey of metabolic pathways and processes.
Pre requisite: Chm 441.

444 Qualitative Organic Analysis 4:2
A study of systematic methods for the identification of organic compounds and mixtures of organic compounds.
Pre requisite: Chm 241 and 342.

446 Instrumental Chemical Analysis 4:3
Instrumental techniques of chemistry. Theory and practice in optical, electrometric and chromatographic methods.
Pre requisite: Chm 241, 342, 431.

Department of English and Foreign Languages

The graduate program of the Department of English and Foreign Languages offers opportunity for intensive study of languages and literature. Scholarly interests of members of the department include old and middle English, the Renaissance, Shakespeare, eighteenth century studies, English and American romanticism, the Victorian age, modern English and American literature, and comparative literature. In addition to the study
of literature through courses organized by genre, period and individual author, the student may explore the history and structure of language and the crafts of both creative and technical writing.

**Degree Requirements**

The degree of Master of Arts in English requires the completion of 30 semester hours of graduate work: 24 in English, (or 18 with an approved six-hour minor) and six in thesis. With the approval of the department chair, 12 semester hours of coursework may be substituted for the thesis. The creative thesis, as well as the traditional critical thesis, is an option.

All students must have a minimum undergraduate grade point average of 2.5/4.0 overall or on the last 60 hours of undergraduate courses. In addition, international students must score at least 550 on the TOEFL before admission.

**Professional Certification Requirements (Texas) in English**

The plan for the Professional Certificate—Secondary requires the completion of 36 semester hours of graduate work: 18 in English, six in resource areas and 12 in approved teacher education. At least 12 semester hours must be in English courses numbered 500 or above. The courses in the resource areas must be approved by the Chair of the Department of English and Foreign Languages; such approval will be given on the basis of the support they can give to the major and on the specific needs of the graduate student. The 12 semester hours of teacher education must be taken in courses specifically approved for the Professional Certificate—Secondary.

Depending on the student's undergraduate course work, the graduate program in English will ordinarily include English 4327G, 533, 539, and one course from either 535, 536, 537, 538, or 5311.

**Graduate Faculty**

Professor Christopher P. Baker  
English Renaissance  
Associate Professor Lloyd M. Daigrepont  
American literature before 1900  
Assistant Professor Edwin W. Duncan  
Old and Middle English, linguistics  
Professor Marilyn D. Georgas  
Renaissance and Victorian literature  
Associate Professor R.S. Gwynn  
Creative writing and post-modernism  
Professor Kirkland C. Jones  
Medieval and Renaissance literature  
African-American literature  
Assistant Professor Joseph E. Nordgren  
Modern British Literature  
Professor R. Victoria Price  
English as a second language, Modern American and British literature  
Assistant Professor Dale G. Priest  
English Renaissance, Eighteenth century  
Associate Professor Sallye J. Sheppeard  
Medieval and Renaissance literature and rhetoric  
Professor Charles T. Summerlin  
American literature, literary criticism  
Assistant Professor Stephenie Yearwood  
Writing, English education, seventeenth century

**English Courses**

511 Composition Practicum  
1:0:0  
Practicum in the teaching of writing. Involves classroom experience, peer discussion and mentor consultation.  
Graded on S-U basis.  
**Prerequisite:** Graduate teaching fellow standing.

533 Special Topics in Old and Middle English Languages and Literature  
3:0:0  
Intensive study of the languages necessary for reading literature of the period. Course may be repeated for a maximum of six semester hours credit when the topic varies.  
**Prerequisite:** Graduate standing and Eng 450.
535 Special Topics in Renaissance and Seventeenth Century English Literature 3:3:0
An intensive study of an author or related authors selected from the period. Course may be repeated for a maximum of six semester hours credit when the topic varies.
Prerequisite: Graduate standing.

536 Special Topics in Restoration and Eighteenth Century English Literature 3:3:0
An intensive study of an author or related authors selected from the period. Course may be repeated for a maximum of six semester hours credit when the topic varies.
Prerequisite: Graduate standing.

537 Special Topics in Nineteenth Century English Literature 3:3:0
An intensive study of an author or related authors selected from the period. Course may be repeated for a maximum of six semester hours credit when the topic varies.
Prerequisite: Graduate standing.

538 Special Topics in Twentieth Century Literature 3:3:0
An intensive study of an author or related authors selected from the period. Course may be repeated for a maximum of six semester hours credit when the topic varies.
Prerequisite: Graduate standing.

539 Special Topics in American Literature 3:3:0
An intensive study of an author or related authors selected from the period. Course may be repeated for a maximum of six semester hours credit when the topic varies.
Prerequisite: Graduate standing.

5311 Special Topics in Comparative Literature 3:3:0
Intensive study of an author or authors, genre or period selected from the range of world literature. Emphasis on analysis and literary method. Course may be repeated for a maximum of six semester hours credit when the topic varies.

5311A & B Special Topics in English Instruction 3:3:0
Intensive study of theory and pedagogy of language (A) or literature (B) for secondary teachers.

5312 Special Topics in Language and Linguistics 3:3:0
Intensive study of special problems in linguistics, such as the history of American English, regional dialects, and grammars. May be repeated for a maximum of six semester hours credit when the topic varies.

590A-590H Thesis 6:0:0
Prerequisite: Approval of graduate advisor.

The following courses may be taken for graduate credit with augmented requirements, subject to approval of the departmental graduate advisor.

430 History of the English Language 3:3:0

432 Studies in 18th Century Literature 3:3:0
Critical studies in the poetry, prose and drama of the age. May be repeated for credit when the topic varies.

434 Shakespeare 3:3:0
Intensive study of selected major plays. May be repeated for credit when the topic varies.

435 Survey of 19th Century Literature 3:3:0
Critical studies in the poetry, prose and drama of the period 1800-1860. May be repeated for credit when the topic varies.

438 Studies in 18th Century Literature 3:3:0
Critical studies in the poetry, prose and drama of the period 1660-1800. May be repeated for credit when the topic varies.

439 Studies in Romantic Literature 3:3:0
Critical studies in the poetry, prose and drama of the Romantic period. May be repeated for credit when the topic varies.

4511 Studies in Victorian Literature 3:3:0
Critical studies in the poetry and prose of the Victorian period. May be repeated for credit when the topic varies.

4312 Studies in Language and Linguistics 3:3:0
Special problems in linguistics, such as the history of American English, regional dialects, new grammars. May be repeated for credit when the topic varies.

4314 Studies in Women's Literature 3:3:0
Critical studies in poetry, prose and/or drama by women from classical times to the present. May be repeated for credit when the topic varies.
Modern Drama
A study of dramatic trends and representative plays from Ibsen to the present.

Modern Poetry
A study of poetry developments in England and America with emphasis on representative poets from Hardy to the present.

Modern Fiction
A study of prose fiction representative of modern ideas and trends, with emphasis on English and Continental authors.

Studies in Rhetoric
A writing-intensive course focusing on a variety of concerns, including principles of classical rhetoric, matters of style and fundamentals of research. A unit on writing the critical paper is included.

Early American Literature
A survey of all significant writers from the beginning of Colonial America to 1828.

Modern American Literature
A critical survey of major American writers of the 20th century.

Studies in a Particular Author
Intensive critical study of a major writer such as Chaucer, Milton, Hawthorne, Faulkner. May be repeated for credit when the topic varies.

Critical Studies in Literature
Intensive critical study of a particular genre or theme in comparative literature of criticism. May be repeated for credit when the topic varies.

Directed Studies in American Literature
Study in American literature in an area of mutual interest. May be repeated for credit when the topic varies. Prerequisite: Junior standing.

Directed Studies in British Literature
Study in British literature in an area of mutual interest. May be repeated for credit when the topic varies. Prerequisite: Junior standing.

Writing Seminar
Intensive study in writing, focusing on specific topics, with either a technical or creative emphasis. May be repeated for credit when the topic varies. Prerequisite: English 335 or permission of the instructor (for any creative writing seminar).

Editing Technical Communications
Editing technical communications for quality, conciseness, and form. Emphasis on effective communications within and between organizations and organizational levels including reports, proposals, manuals, memoranda, and news releases. Prerequisite: Either English 331, 4326, or 4345 (when technically oriented) or permission of the instructor.

English as a Second Language
The following 400 level English courses are applicable to the ESL endorsement program. They may be taken with augmented requirements for graduate credit with the approval of the appropriate graduate advisor.

The Teaching of English as a Second Language
The course deals with techniques for teaching basic English skills and literature to non-native speakers. Socio-cultural aspects of second language learning.

Foundations in Teaching ESL
A general methodology course that focuses on both linguistic and cultural foundations of ESL and examines trends in ESL and strategies for teaching ESL.

Psycholinguistics
Examines the current research and theory of first and second language acquisition and development as a base for teaching English to non-native speakers.

Introduction to Linguistics
Provides background in the nature of language and linguistic changes as a basis for describing and comparing language systems; focuses on a description of the phonological, morphological, and syntactic features of English in contrast to features of other languages.
Department of Geology

The Department of Geology offers the following graduate courses to be used primarily as a support to other advanced degree programs.

Graduate Faculty

Assistant Professor James W. Westgate
Vertebrate paleontology, paleoecology

332 Environmental Geology 3:3:0
The geological aspects of the environment. The environmental significance of man's use of natural resources. Field and laboratory studies of the local environment. Field trip required. Term paper based on laboratory, library or field studies.

334 Fossils and Earth History 3:3:0
The evolution and history of life as recorded by fossils. Laboratory identification of common fossils. Demonstration of "hands-on" approach to the use of materials that illustrate the fossil record. Field trip required. Term paper based on laboratory, library or field studies.

5601 Institute in Earth Science 6:6:6
Summer, in-service or other institute for earth science teachers patterned after the inquiry-oriented Earth Science Curriculum Project approach to earth science. The course includes laboratory and field investigations in astrophysics, geology, meteorology and oceanography and "hands-on" experience with rocks, minerals, fossils, maps and other earth science materials and techniques. Field trips required.

Department of History

It is the purpose of the Department of History to impart a knowledge and understanding of the past to the students enrolled in the University. This objective is based upon the belief that such knowledge and understanding improves the quality of life for individuals and contributes to the welfare of our society. The Department seeks to accomplish this objective through a program of continued study and research by its members and students. Research interests of the Department focus on both American and European history.

Degree Requirements

Applicants for the Master of Arts in History must meet all Graduate College requirements for admission and must have an undergraduate grade point average of 2.5/4.0 overall or on the last 60 hours of undergraduate work.

The degree of Master of Arts in History required the completion of 30 semester hours of graduate work; 18 in history, six in thesis and six in an approved minor. At least 12 semester hours, exclusive of thesis, must be in history courses numbered 500 or above, and six of these must be in seminar courses. With the approval of the chair of the Department of History, 12 semester hours of course work may be substituted for the thesis. In this latter program, at least 21 semester hours of course work must be in courses numbered 500 or above, and nine of these must be in seminar courses. The minor must be approved by the chair of the Department of History; such approval will be given on the basis of the support the minor can give to the major. With the approval of the chair of the Department of History, six additional hours in history may be substituted for the minor.
Graduate Faculty

Professor Adrian N. Anderson
United States history, revolution, early national
Professor John M. Carroll
United States history, diplomatic, the South
Associate Professor Ronald H. Fritze
Tudor-Stuart England
Professor Howell H. Gwin, Jr.
European history, ancient, classical, medieval

Professor Paul E. Isaac
United States history, recent, the West
Professor John W. Storay
United States history, urban, social intellectual
Professor Walter A. Sutton
United States history, diplomatic
Professor Ralph A. Wooster
United States history, Civil War, the South

History Courses

532 Readings in American History
Course may be repeated for a maximum of six semester hours credit when topic varies.
Prerequisite: Graduate standing.

534 Readings in European History Since 1815
Course may be repeated for a maximum of six semester hours credit when the topic varies.
Prerequisite: Graduate standing.

535 Seminar in Texas History
Course may be repeated for a maximum of six semester hours credit when the topic varies.
Prerequisite: Graduate standing.

537 Seminar in United States History
Course may be repeated for a maximum of six semester hours credit when the topic varies.
Prerequisite: Graduate standing.

539 Seminar in the American West
Course may be repeated for a maximum of six semester hours credit when the topic varies.
Prerequisite: Graduate standing.

5311 Seminar in European History
Course may be repeated for a maximum of six semester hours credit when the topic varies.
Prerequisite: Graduate standing.

5312 Directed Readings in History
Directed readings arranged with instructor in area of mutual interest. Will not apply to 500 level course requirement in program. Under limited and special circumstances, course may be repeated but only with specific approval of History Graduate Committee.

669A-669B Thesis
Prerequisite: Approval of graduate advisor.

The following courses may be taken for graduate credit with augmented requirements, subject to approval by the departmental graduate advisor.

430 Era of the Renaissance and Reformation
Western Europe from 1453 to 1610.

431 The Old Regime
Western Europe from 1610 to 1783.

432 The French Revolution and Napoleon
Western Europe from 1783 to 1815.

434 19th Century Europe
Europe from 1815 to 1914.

435 20th Century Europe
Europe since 1914.

436 The American West
The American West from colonial times to the present.
Department of Physics

The Department of Physics offers the following graduate courses to provide an area of specialization for the Master of Education degree in Secondary Education and as support to other advanced degree programs. For the M.S. degree in Mathematics, a nine semester-hour minor in Physics is accepted; in addition, the subject of the thesis may be a mathematical problem in physics.

Physics Courses

5101, 5201, 5301, 5401 and 5601 Institute in Physics
1:6:1:6:2:4
Designed to provide credit for participation in summer, in-service or other institutes. Credit varies with duration. The description of the area of study of each institute will appear on the printed schedule. May be repeated for credit when nature of institute differs sufficiently from those taken previously.

530 Seminar in Physical Science
3:3:0
Designed for non-science majors. Measurement, light, the solar system and stars, force and motion, work and energy, heat, weather, lightning, electric charge and current, magnetism, batteries, atoms and molecules. Credit in this course may be applied toward a degree in science, engineering or mathematics.

531 Theoretical Physics
3:3:0
The application of typical mathematical techniques, with emphasis on field and potential concepts.

532 Relativity
3:3:0
Brief introduction to the special and general theory followed by detailed study of a particular topic.

533 Seminar
3:3:0
Selected topics pertaining to the research reported in contemporary publications. Course may be repeated for credit when the topic varies, but only six semester hours credit in this seminar may be applied toward a degree.
The following courses may be taken for graduate credit with augmented requirements subject to approval by the student's graduate advisor.

431 Classical Mechanics
Variational principles and Lagrange's equations; the kinematics of rigid body motion; the Hamilton equations of motion; small oscillations.
Prerequisite: Differential Equations and Phy 343.

432 Introductory Quantum Mechanics
Basic concepts of quantum mechanics. Schrödinger's equation: wave functions.
Prerequisite: Phy 333 or 421, Phy 335 and Mth 331 or 4301.

433 Solid State Physics
Crystal structure; binding forces; mechanical and thermal properties; electrical conductivity; semiconductors; dielectric properties; magnetic properties; surface effects, phosphors and photoconductivity.
Prerequisite: Phy 335.

436 Applied Nuclear Physics
Nuclear structure, decay processes, nuclear forces, scattering; spectroscopy and health effects.
Prerequisite: Phy 345 or Phy 346.

440 Optics
Physical and Quantum Optics. Propagation of light; interference; diffraction; optics of solids; thermal radiation and light quanta; optical spectra; lasers.
Prerequisite: Phy 248 or Phy 141-142 and Math 241.

Department of Political Science

The Department of Political Science offers programs of study leading to the Master of Public Administration degree and the Master of Arts in Political Science degree. Persons seeking admission to either program must meet the general requirements for admission as outlined in the graduate catalog and must present an undergraduate grade point average of 2.5/4.0 overall or on the last 60 hours of undergraduate work.

Degree Requirements

The degree of Master of Public Administration requires the completion of 36 semester hours of graduate work: 21 in the core curriculum (POLs 535, 5351, 5352, 5353, 5354, 5355, and 5359) and 15 from an approved list of courses. Applicants must have completed the following undergraduate courses or their equivalents: Introduction to Public Administration (three semester hours); urban politics (three semester hours), and statistics for social scientists (three semester hours). Students must pass both written and oral comprehensive final examinations.

The degree of Master of Arts in Political Science requires the completion of 30 semester hours of graduate work with a thesis or 36 hours without a thesis. At least 18 semester hours must be in political science courses numbered 500 or above, and Political Science 530 is required for the degree. Applicants for the Master of Arts in Political Science must have completed a bachelor's degree in Political Science or a related field and earned credit in 12 undergraduate semester hours in political science on the junior or senior level.

Successful completion of nine hours of quantitative skills courses (Pols 3319, Pols 4319, and Pols 530) may be substituted for the foreign language.
Graduate Faculty

Associate Professor David S. Castle
American Politics, methodology
Professor Bruce R. Drury
Comparative politics, Latin American politics
Associate Professor Elbert T. Dubose, Jr.
Public administration
Assistant Professor Michael J. Laslovich
Comparative politics, federalism
Professor William M. Pearson
Public administration, state politics
Professor Ronald Stidham
Constitutional law, judicial process
Professor Glenn H. Utter
Political philosophy, American political thought
Assistant Professor James M. Vanderleeuw
Urban politics, public policy

Political Science Courses

530 Scope and Methods of Political Science 3:00
The study in depth of selected topics concerning the theoretical foundations underlying a scientific approach to the study of political phenomena and analytical techniques to be applied to a study of political behavior.
Prerequisite: Graduate standing.

531 Seminar in Political Theory 3:00
Selected issues in political thought with emphasis on the classical thinkers and their relationship to contemporary political, economic and social problems.
Prerequisite: Graduate standing.

532 Directed Reading 3:00
Graduate students may study individually with an instructor in an area of mutual interest to the student and the instructor.
Prerequisite: Graduate standing and approval of Chair, Department of Political Science.

534 Seminar in American Government and Politics 3:00
A survey of the literature in the field of American government and politics. Classical and contemporary works are examined, with emphasis on the modern approaches to the study of American government and politics.
Prerequisite: Graduate standing.

535 Seminar in Administrative Theory 3:00
An examination of major theories dealing with organizations and their characteristics, scope and effect on public administration and executive behavior. Emphasis will be placed on the relationships between theories and supporting empirical research.
Prerequisite: Graduate standing.

5351 Seminar in Personnel Administration 3:00
Personnel theory and practice in the public setting. The basic methods and functions of personnel administration in the context of public organizations, employee motivation, employee relations and collective bargaining will be emphasized.
Prerequisite: Graduate standing.

5352 Seminar in Fiscal Administration 3:00
The study of formulation and administration of government budgeting, including the role of the budget in the policy process, approaches to budget formulation and analysis, the development of government finance and other basic concepts and practices in government budget and finance administration.
Prerequisite: Graduate standing.

5353 Seminar in Public Policy Formulation 3:00
The process of policy making within governmental agencies and within the total political process. Emphasis will be placed on decision-making, public policy analysis and policy implementation.
Prerequisite: Graduate standing.

5354 Seminar in Special Studies in Public Administration 3:00
Analysis of selected problems in public administration: urban and regional planning and management, administrative reorganization, the environment and related problems.
Prerequisite: Graduate standing.
Department of Sociology, Social Work, and Criminal Justice

The Department of Sociology, Social Work, and Criminal Justice offers Soc 532, Sociology of Education in support of the Master of Education degree program.

Graduate Faculty

Professor Wayne C. Seelbach
Gerontology, the family
Associate Professor Stuart A. Wright
Religion, social groups

Associate Professor Kevin B. Smith
Social inequality, sociology of education

Sociology Courses

532 Sociology of Education
A study of the multicultural influences on the institutions of education. Included will be a sociological analysis of educational problems in Texas.
A LOW RATIO OF students to professors is maintained in the College of Business.
College of Business

The College of Business offers a program of study leading to the Master of Business Administration degree (MBA). The MBA program is fully accredited by the American Assembly of Collegiate Schools of Business (AACSB). The objective of the MBA Program at Lamar University is to provide intensive, rigorous training to produce managerial professionals with a thorough conceptual understanding of the economic, legal, and ethical environment of public and private sector organizations and the capability of applying analytical, problem solving skills to a broad range of decision situations that may arise within one or a combination of functional areas within the organization.

Students with degrees in non-business fields as well as business undergraduates are encouraged to earn the Master of Business Administration degree. Students are encouraged to make an appointment with the Associate Dean a minimum of 60-90 days in advance of the semester in which they wish to enroll.

Admission

Persons seeking admission to this program must meet the general requirements for admission outlined elsewhere in this Bulletin, with the following exceptions:

1. The student is required to take the Graduate Management Admission Test, GMAT.
2. The applicant’s undergraduate grade point average and GMAT scores must equal or exceed the minimum standards. The student must meet at least one of the following standards:
   A. A total of at least 950 points based on the formula: 200 times the overall undergraduate GPA (4.0 system) plus the GMAT score. (See Note below)
   B. A total of at least 1,000 points based on the formula: 200 times the GPA (4.0 system) of the last 60 hours of undergraduate work, plus the GMAT score. (See Note below).
   Note: Students must make a minimum score of 450 on the GMAT for unconditional acceptance regardless of GPA. Students who make 400-450 and meet either standard “A” or “B” above will be admitted conditionally pending satisfactory completion of nine hours with a “B” (3.0) average. A student who makes less than 400 on the GMAT will not be admitted regardless of GPA.
3. A student whose native language is not English is expected to score over 500 on the TOEFL.
4. Post Baccalaureate students are not permitted to enroll in Business courses for graduate credit without the prior consent of the Associate Dean.

Degree Requirements

First Year Courses (Designed primarily for students whose undergraduate degree is not Business):
Acc 530 Financial Accounting: Concepts and Procedures
Eco 530 Foundations of Economics
Bls 530 Legal Environment of Business
BAc 530 Statistical Analysis for Decision Making
Mgt 530 Foundations of Organization Behavior
Mgt 531 Operations Management and Information Systems
Mgt 532 Administrative Policy and Strategy
OAS 530 Administrative Communications
Mkt 530 Marketing Concepts
Fin 530 Foundations of Finance
Note:
1. Please see course descriptions for prerequisites for each course.
2. Students with previously approved academic training may have some or all of the first year courses waived. (See the Associate Dean, College of Business, prior to enrollment.)
3. Students must have met the entrance requirements for the MBA Program to enroll in first year courses. All exceptions must have the prior approval of the Associate Dean, College of Business.
4. First year courses may not be taken as second year course electives.

Second Year Courses

Note:
1. All first year courses must be completed before beginning the second year courses.
2. The candidate for the MBA degree may follow either of the two plans described below.

Plan I: Thesis Route
Acc 537 Managerial Accounting
Mgt 533 Seminar in Management
Eco 531 Seminar in Monetary and Fiscal Policy
Fin 531 Financial Management
Mkt 531 Seminar in Marketing
BAc 531 Advanced Statistical Theory and Analysis for Business
Eco 538 Environment of Business
Three semester hours of approved electives
BA 669A Thesis
BA 669B Thesis

Note: Once enrolled in thesis, a student must be continually enrolled in the thesis course each Fall, Spring, and once in the summer, until the thesis is completed.

Plan II: Non-Thesis Route
Acc 537 Managerial Accounting
Mgt 533 Seminar in Management
Eco 531 Seminar in Monetary and Fiscal Policy
Fin 531 Financial Management
Mkt 531 Seminar in Marketing
BAc 531 Advanced Statistical Theory and Analysis for Business
Eco 538 Environment of Business
Mgt 538 Business Research
Twelve semester hours of approved electives
A written comprehensive exam will follow the completion of course work.

Business Courses

Accounting courses must be selected from the following list:

530 Financial Accounting: Concepts and Procedures  
3.0
Intensive examination of financial accounting. A conceptual study of the Generally Accepted Accounting Principles (GAAP) that impact financial reporting to persons and institutions outside the reporting entity. Attention is given to the three primary financial statements required: balance sheet, income statement and statement of cash flows. Special emphasis is given to intercorporate investments and business combinations, leases, pensions, inflation, foreign operations and financial statement analysis.  
Prerequisite: Graduate standing.

534 Taxation for Graduate Students  
3.0
Provisions of the income tax code as applied to individuals and business in the measurement of income, deductions, gains and losses, and other impacts of the law on business decisions.  
Prerequisite: Graduate standing, Acc 530.

537 Managerial Accounting  
3.0
Application of accounting data in decision making: cost analysis as applied in the development of budgets and standards; accounting as a tool for cost control and pricing; case problems, using the micro-computer as a decision-making tool, which require students to interpret and discuss their analysis in the context of managerial decision-making.  
Prerequisite: Graduate standing, Acc 530.

Economics courses must be selected from the following list:

530 Foundations of Economics  
3.0
This is a fast-paced course which discusses both macro and micro economic theory and international economic issues. Macroeconomic topics covered include: inflation, unemployment, fiscal and monetary policy. Microeconomic topics include: demand theory, production and cost theory, price and output determination in markets, demand for and pricing of society's scarce resources.  
Prerequisite: Graduate standing.
Money and Capital Markets
Survey of the functions and performances of financial institutions; analysis of the sources and uses of funds in financial markets, market structures of interest rates; and flow of funds analysis.
Prerequisite: Graduate standing, Eco 520.

Seminar in Monetary and Fiscal Policy
Lecture and group discussions. Topics include the public sector budget and the supply of money as instruments of economic stabilization; the role of expectations, theories of economic fluctuations, and approaches to the problems of inflation and unemployment.
Prerequisite: Graduate standing, Eco 520.

International Finance
Prerequisite: Graduate standing, Eco 520.

Collective Bargaining
Background ideologies, contract provisions, current legal and social developments, public employment and international labor practices.
Prerequisite: Graduate standing, Eco 520.

Economics of Entrepreneurship/Consulting
A study of business development or acquisition from the perspective of both personal ownership and outside consulting. This course is primarily a case-method study which provides the student with the methodology for analyzing business problems and finding solutions for those problems.
Prerequisite: Graduate standing, Eco 520.

Econometrics
Development and testing of hypotheses through the construction and operation of static and dynamic econometric models.
Prerequisite: Graduate standing, Eco 520.

Managerial Economics
A study in the depth of the principles and techniques of economic analysis applicable to the problems of business management.
Prerequisite: Graduate standing, Eco 530.

The Environment of Business
A study of business, government, and consumer interaction in the economy. Efficiency concepts for both the private and public sectors are discussed. Government activities in antitrust, traditional regulation, and new firms operating in foreign markets are reviewed.
Prerequisite: Graduate standing, Eco 520.

Finance courses must be selected from the following list:

Foundations of Finance
A survey of the financial management function in private business firms, with emphasis on major financial policy decision issues and the analytical techniques used to assist management in making those decisions.
Prerequisite: Acc 510, Eco 530.

Financial Management
A study of the financial policy of business firms along with the theory supporting that policy. Topics include capital budgeting, capital structure, cost of capital, dividend policy, and management of working capital, as well as the unique international dimensions of the financial policy of multinational firms.
Prerequisite: Graduate standing, Fin 530 or equivalent.

Seminar in Finance
Study of selected topics reflecting contemporary trends and problems in the field of Finance. The course may be repeated for a maximum of six semester hours when the topic varies.
Prerequisite: Graduate standing, Fin 531 or consent of instructor.

International Finance
Prerequisite: Graduate standing, Eco 530.
Management courses must be selected from the following list:

530 Foundations of Organization Behavior
3:0
A study of organizational behavior and management concepts. The course will examine the development of management thought, with special emphasis on motivation, leadership and organizational theories. Topics will include awareness of individual behavior, social interaction, the dynamics of group and intergroup behavior and the effects of the total system of behavior observed with the organization.
Prerequisite: Graduate standing, Acc 520, Eco 530.

531 Operations Management and Information Systems
3:3:0
Fundamentals of management information systems, including computer applications, mathematical modeling techniques and decision support systems will be examined with respect to production and information systems. Emphasis is given to the concepts, processes and institutions in the production of goods and services, and to the integrating role of information systems in the effective and efficient use of organizational resources.
Prerequisite: Graduate standing, Bac 530, Mgt 530.

532 Administrative Policy and Strategy
3:3:0
Socio-political change taking place in even remote areas of the globe are impacting on the strategic initiatives of business, small and large, international and domestic. This course will focus on the role of top management in welding functional areas such as marketing, management, and finance to fulfill strategic organizational aims. Economic and socio-political conditions existing in various world regions will be considered.
Prerequisite: Graduate standing, Mgt 530.

533 Seminar in Management
3:3:0
A course designed to give students an integrated approach to management through the application of theory to problem solving situations. Students perform in consulting roles applying management as both science and art. Emphasis is placed on national and international problems and a synergistic effort made to provide positive and applied solutions to actual managerial decisions making.
Prerequisite: Graduate standing, Mgt 532.

534 Seminar in Cross-Cultural Organization Behavior
3:3:0
In this course students will examine the basic theories of organization behavior. The implications of those theories will be considered in terms of cross-cultural situations evident in domestic and internationally based organizations. Theories in the areas of motivation and leadership will be surveyed.
Prerequisite: Graduate standing, Mgt 532.

535 Management of Technology Transfer
3:3:0
In contrast to diffusion of technology, which is a random process, technology transfer, in the context of this course, is the willful movement of technology from a source to recipient. Particularly the linkage between technology transfer and mechanisms joining government, higher education, and industry used to further the process and promote economic development will be at issue. Methods being used in U.S. and in the Third World will be stressed.
Prerequisite: Graduate standing, Mgt 530, 531.

538 Business Research
3:3:0
The student will design and carry out an individual research project under the supervision of a faculty member. Emphasis will be placed on research design and methodology, sources of business and economic data and the use of quantitative techniques to achieve substantive research results.
Prerequisite: Graduate standing, Mgt 512.

Marketing courses must be selected from the following list:

530 Marketing Concepts
3:3:0
Marketing orientation and concepts: marketing programs of domestic and global perspectives in the formulation and development of strategies with regard to price, product, channels of distribution, and promotion of goods and services within an ever-changing environment.
Prerequisite: Graduate standing, Acc 530, Eco 530.

531 Seminar in Marketing
3:3:0
An intensive study of specific marketing concepts and theories. Marketing strategies for the national and multinational firms are surveyed. Emphasis is placed on reading from current journals and other related publications.
Prerequisite: Graduate standing, Mgt 530.

532 Marketing Strategies and Problems
3:3:0
A survey of current literature and case studies involving marketing strategies in a dynamic environment. Development of analytical skills, critical thinking and communication skills are directed toward a set of simulated business scenarios.
Prerequisite: Graduate standing, Mgt 530.
533 Buyer Behavior and Strategies
An in-depth study of social and psychological influences on the ultimate and organizational buyer behavior and decision-making processes. Major concepts, models, and theories regarding buyer behavior will be emphasized with emphasis on marketing strategies and environmental changes.
Prerequisite: Graduate standing. Mkt 530.

534 International Marketing
Analysis and planning of marketing mix on an international scale. The course focuses on the aspects of international marketing such as the international market, the identification of global opportunities and threats, the formulation of international marketing strategy, and the organizations and control of global marketing.
Prerequisite: Graduate standing. Mkt 530.

Administrative Service courses must be selected from the following list:

AS 530 Managerial Decision Support Systems
The focus of the course is in an analysis of the functional information support systems which serve the manager. These systems provide quantitative-based information derived from one or more data bases within an organization and are used to help managers in the decision-making process. Theoretical concepts are applied to real-world applications.
Prerequisite: Graduate standing.

AS 531 Seminar in Information Systems Management
This seminar provides a broad overview of the information systems management function. The course emphasizes information systems management with particular attention to planning, organizing, and controlling user services and managing the computer information systems development process.
Prerequisite: Graduate standing. AS 530.

AS 535 Business Literature and Contemporary Thought
An intensive and critical study of several major works in business literature and contemporary thought in order to develop and enhance the student's appreciation for and understanding of the business environment with particular emphasis upon ethics, social responsibility, and competitive business practices.
Prerequisite: Graduate standing

AS 536 International Business Research
A seminar class featuring intensive investigation of topics in such as Admiralty, Comparative Law, the European Common Market, the European Economic Community, Immigration, International Energy Operations, International Entities and Transactions, International Financial Transactions, the International Monetary Fund, International Tax and/or International Technology Transfers or other areas of international relevance.
Prerequisite: Three hours graduate international business course.

BAC 530 Statistical Analysis for Decision Making
Theory and applications of presenting and utilizing data for decision making in business situations. Topics include methods of gathering, presenting, and analyzing quantitative data; probability theory; probability distributions; sampling theory; estimation and tests of hypotheses; simple linear regression/correlation analysis; classical time series; and other statistical procedures commonly used in business analysis.
Prerequisite: Graduate standing.

BAC 531 Advanced Statistical Theory and Analysis for Business
An advanced course in statistical theory and application of the quantitative techniques commonly used in business research and analysis. Advanced topics in sampling theory, statistical inferences, and regression/correlation analysis are presented. Specific topics include analysis of variance; multiple linear and non-linear regression/correlation analysis; classical time series and forecasting; decision theory; and other statistical models. Students will have the opportunity to use a standard statistical software package.
Prerequisite: Graduate standing. BAC 530 or equivalent.

BAC 533 Business Forecasting
A course designed to provide an integrated approach to developing a strategy for making business forecasts. Emphasis will be placed on the importance of the selection of an appropriate data set, various forecasting techniques, and the trends through autoregression models and Box-Jenkins techniques will be considered along with other regression and econometric models.
Prerequisite: BAC 531.

BLW 530 The Legal Environment of Business
A survey of the legal environment of business including concepts of legal rules, the legal framework to resolve disputes, a study of the concept of property rights, contracts, commercial paper, agency and employment laws, government regulations of business through administrative administrative agencies, and introduction to international law.
Prerequisite: Graduate standing.
BLW 531  The International Law of Business  
Origin, composition and application of international law to the multinational business environment. Topics include the International and Transcontinental Judicial Systems, International Treaties on the Regulation of Business, the Foreign Corrupt Practices Act, Import-Export Laws and the rights and responsibilities existing between foreign government and multinational business engaged in international business enterprise. 
Prerequisite: Graduate standing.

OAS 530  Administrative Communication  
Communication theory and practice with emphasis on variables affecting organizational communication. Interpersonal, organization, and technological dimensions of communications. Specific areas include cultural and international differences in communication; one-to-one, small group and large group communications; formal and informal networks; electronic transmission; business letters and memos; and research papers and formal reports. 
Prerequisite: Graduate standing.

OAS 531  Contemporary Problems in Business Education  
Problems and materials in teaching business subjects; analysis of various teaching techniques; examination of recent research and experimentation. When the course is offered in sufficiently different areas, students may repeat the course for credit with the approval of the department head. 
Prerequisite: Graduate standing and suitable background.

Thesis courses necessary for graduation under Plan I.

BA 699A-699B  Thesis  
Students must be continually enrolled in Thesis each Fall, Spring, and at least once in the Summer, until the thesis is completed. 
Prerequisite: Approval of Associate Dean, College of Business.

Courses numbered 400 with a G designation may be taken as electives in the MBA program. Courses taken at the 400G level must have the approval of the Associate Dean, College of Business and must be augmented by additional requirements. Course descriptions for 400-level courses are found in the undergraduate Bulletin of Lamar University.
THE LABORATORY SCHOOL is used by graduate students in the College of Education and Human Development to investigate effective teaching strategies.
College of Education and Human Development

The College of Education and Human Development offers graduate programs of study leading to the Master of Education degree in six different areas and to the Master of Science degree in Health and Physical Education and in Home Economics.

Persons seeking admission to these programs must meet the general admission requirements of the College of Graduate Studies and of the individual department in which they plan to enroll. Admission to a degree program does not imply admission to candidacy for a degree.

Degrees Offered
- Master of Education in Counseling and Development
- Master of Education in Educational Administration
- Master of Education in Elementary Education
- Master of Education in Secondary Education
- Master of Education in Special Education
- Master of Education in Supervision
- Master of Science in Kinesiology
- Master of Science in Home Economics

Professional Certificates Available
- Counselor
- Educational Diagnostician
- Elementary Education
- Mental Retardation
- Mid-Management Administrator (Principal)
- Reading Specialist
- School Superintendent
- Secondary Education
- Special Education Supervisor
- Supervisor
- Visiting Teacher

General Information Concerning Professional Certificates

The Professional Certificate is valid for life unless cancelled by lawful authority, and gives the holder legal authority to perform duties in the public schools of Texas in the specialized areas designated on the face of the certificate. Information about requirements for a particular certificate can be obtained from the department offering the certification program. Once all requirements for a certificate are completed it is the responsibility of the student to go to the Certification Office in the College of Education and Human Development and make application for the certificate to be awarded by the Texas Education Agency.

Early Childhood Development Center

The Lamar University Early Childhood Development Center is an educationally oriented model program for children between the ages of 18 months and five years. The Center, under the direction of The College of Education and Human Development, is an integral part of professional development for undergraduate and graduate students on the Lamar University-Beaumont campus.

The laboratory school is used extensively by the Department of Home Economics, the Department of Professional Pedagogy, the Department of Health, Physical Education...
and Dance, and the Department of Educational Leadership. The Center provides opportunities for University students to direct learning of young children who exhibit both typical and atypical development as well as to investigate effective teaching strategies for promoting optimal development among young children. Students have the opportunity to observe and interact with children which enhances understanding of child growth and development. In addition the students are able to relate understanding about the family, nutrition, prenatal care and community interaction to child behavior.

In addition, the Center provides interdisciplinary research opportunities for faculty and graduate students. The laboratory school is also used for strengthening leadership skills in the field of child development through seminars, workshops, and other educational events.

Department of Educational Leadership

Department Chair: Dr. Bob Thompson
Program Advisors:
Counseling and Development: Drs. Rita Stevens and Curtis Wills
Educational Administration: Dr. Bob Thompson
Supervision: Dr. Aileen Johnson

The Department of Educational Leadership offers graduate programs leading to the Master of Education (M.Ed.) degree in Educational Administration, Supervision, and Counseling and Development. For students already holding a master’s degree and teacher certification, the Department offers course work leading to certification as a Superintendent, Mid-management (principal), Supervisor, and School Counselor.

Course prerequisites for the state examination for Licensed Professional Counselor certification are also offered by this department.

Admission

Admission to a Master's Degree Program

To be admitted to a program leading to a Master's degree in Educational Administration, Counseling and Development, or Supervision, students must fulfill the general requirements for admission to the Graduate College as stated elsewhere in this bulletin plus the departmental requirements. The Educational Leadership Department requires a minimum score of 400 on the Verbal and Quantitative sections of the Graduate Record Exam with a minimum combined Verbal and Quantitative score of 900. Test of English as a Foreign Language (TOEFL) is not accepted as a substitute for minimum scores on the Graduate Record Exam. If a student has applied for admission to a degree program and has not received notification of acceptance (or non-acceptance) within 30 days after application the student should check with the Graduate Admissions Office.

Admission to Candidacy for Master's Degree

After completing at least 12 semester hours of course work on the master's degree with a minimum of 6 semester hours in his/her major field, the student should apply for Admission to Degree Candidacy. Forms for admission to candidacy should be obtained from the Educational Leadership Department Office and returned there upon completion. (NOTE: University regulations require the student be admitted to candidacy prior to beginning the last nine hours of course work). If a student does not have a letter certifying admission to candidacy within 30 days after making application the student should check with the department office.

Step by step procedure for admission to a Master's degree program

1. Apply for Admission to the Graduate College of Lamar University.
A. Obtain application packet from the Graduate Admissions Office in Room 208 of the Wimberly Building or call (409) 880-8350.
B. Successfully complete the Graduate Record Examination and have scores sent to Graduate Admissions, Lamar University, P.O. Box 10009, Beaumont, TX 77710.
C. Have all transcripts sent to Graduate Admissions as in B above.
2. Meet with program advisor to develop a degree plan. NOTE: No deviations from the degree plan will be permitted without prior written permission of advisor or department head.
3. In consultation with graduate advisor, select members of graduate committee. (The program advisor will chair this committee.)
4. Complete at least 12 hours of course work from their degree plan (at least six semester hours must be from courses in their major) and apply for Admission to Candidacy. NOTE: A Student must be admitted to candidacy prior to beginning the last nine hours of course work.
5. Complete remaining course work.
6. Complete requirements for graduation.
   A. Apply for graduation in the Graduate College office (101 Wimberly).
   B. Take and pass comprehensive examination during the last semester of attendance.
7. Graduate.
   NOTE: Completion of some Master's programs also includes completion of all course requirements for an additional certification. Student desiring the additional certificate must apply to take the appropriate ExCET Exam at the Certification Office. After successfully passing the exam, the student should apply at the Certification Office for the certificate.

Admission to a "Certification Only" (non-degree program)

The Educational Leadership Department offers post master's certification programs leading to certification as a Superintendent, Mid-Management (Principal), Supervisor and School Counselor. Students who hold a master's degree and teacher certification and seek an additional certification offered by this department should apply to the Educational Leadership department for admission to the appropriate certification program. Upon completion of the application and receipt of an official transcript, a program advisor will be assigned. The advisor will develop a certification plan for the student. After completion of the certification plan requirements the student must apply for and pass the ExCET examination and file for the certificate at the Certification Office. Students seeking a program leading to examination for certification as a Licensed Professional Counselor should follow the process designated above and then contact the State Board of Examiners for Professional Counselors in Austin, Texas to apply for licensure and take the licensure exam.

Master's Degree in Counseling and Development

The Master's Degree in Counseling and Development requires the successful completion of a comprehensive 45 semester hour program of study. Students interested in pursuing a degree in Counseling and Development can secure an up-to-date degree plan from the Department of Educational Leadership, in the Education Building or by writing to the Department of Educational Leadership, P.O. Box 10034, Lamar University, Beaumont, Texas 77710.

Certification In Counseling and Development

Professional School Counselor's Certificate

A student who completes requirements for a Master of Education degree in Counseling and Development will have fulfilled all curriculum requirements for a Professional School Counselor's Certificate.
Students already holding a Master’s degree from an accredited university may enter the “Certification Only” program by making application in the office of the Department of Educational Leadership and providing an official transcript of all applicable graduate work. These students will be assigned an advisor who will develop a certification plan for the student. After completion of the certification plan the student must take and pass the ExCET examination and apply for the certificate at the Certification Office in the Education Building. Prerequisites for the certificate include Texas teacher certification and three years of acceptable classroom teaching experience.

**Licensed Professional Counselor’s Certificate**

The Texas State Board of Examiners of Professional Counselors regulates licensing requirements for counselors to render services in the state of Texas through private practice, group practice, institutions, organizations and similar types of arrangements. Students who need additional information or wish to complete academic work toward licensure as a Licensed Professional Counselor (LPC) should see the Counseling and Development faculty in the Department of Educational Leadership or contact the Texas State Board of Examiners of Professional Counselors in Austin, Texas.

**Master’s Degree in Educational Administration**

Students wishing a master’s degree with an emphasis in school business administration should meet with their advisor to get a degree plan tailored to their specific needs.

**Certification in Educational Administration**

**Professional Mid-Management Administrator Certification**

A student who completes requirements for a Master of Education degree in Educational Administration will have fulfilled the first 36 semester hours of the 45 semester hours required for a Mid-Management certificate. An additional nine semester hours are required for the Mid-Management certificate. The student’s degree plan will include the additional courses required for certification.

Students already holding a Master’s Degree from an accredited university may enter the “Certification Only” program for Mid-Management certification by making application in the office of the Department of Educational Leadership and providing an official transcript of all applicable graduate work. These students will be assigned an advisor who will develop a certification plan for the student.

To receive the Mid-Management certificate a student must complete all requirements for Master’s Degree in Educational Administration, complete the additional nine to twelve semester hours of course work, hold a valid Texas Teacher certificate, have 2 years of classroom teaching experience, take and pass the ExCET examination, and apply for the certificate at the Certification Office in the Education Building.

**Professional Superintendent Certificate**

Prerequisites for the Professional Superintendent Certificate include a Master’s degree and Professional Mid-Management Administrator certification. Students who meet these prerequisites and wish to seek certification as a school superintendent should apply to the Department of Educational Leadership. Upon completion of the application and receipt of an official transcript of graduate work an advisor will be assigned to develop a certification plan for the student. Students meeting the prerequisites can usually obtain certification as a superintendent by completing nine to twelve additional semester hours plus a year-long internship. After completion of the certification plan the student must take and pass the ExCET examination and apply for the certificate at the Certification Office in the Education Building.
Master's Degree in Supervision

As this catalog was being prepared the Supervision program was undergoing revision. Students interested in pursuing a degree in Supervision can secure an up-to-date degree plan from the Department of Educational Leadership in the Education Building or request a copy by writing to the Department of Educational Leadership, P.O. Box 10034, Lamar University, Beaumont, Texas 77710.

Certification in Supervision

A student who completes requirements for a Master's degree in Supervision will have fulfilled all curriculum requirements for a Professional Supervisor Certificate. Students already holding a Master's degree from an accredited university may enter the "Certification Only" program for Mid-Management certification by making application in the office of the Department of Educational Leadership and providing an official transcript of all applicable graduate work. These students will be assigned an advisor who will develop a certification plan for the student.

To receive the certificate a student must complete all requirements for a master's degree in Supervision, hold a valid Texas teacher certificate, have 3 years of acceptable classroom teaching experience, take and pass the ExCET examination, and apply for the certificate at the Certification Office in the Educational Building.

Counseling and Development Courses (C&D)

5301 Psychological Growth of Man  
A psychological study of human development and personality stages of man. Emphasis on recent psychological theories and experiments relating to human growth and development.

5310 Individual and Group Facilitation Skills  
An introduction of facilitation skills and theory. In-depth analysis of various facilitation techniques for use with both individuals and groups.

5311 Individual Counseling Theories and Techniques  
Opportunities are provided for the student to enrich his/her background and experience in interviewing and developing responses to human relations problems.

5312 Group Counseling Theories  
Processes of individual study, Counseling procedures and techniques for individuals and groups.  
Prerequisites: C&D 5311

5320 Cross Cultural Counseling  
Studies delineating the personal and psychological characteristics and the affective domain of the culturally different. Identifies educational strategies applicable to the teaching process as well as other supportive pupil services.
Test Administration and Interpretation
Theoretical and practical study emphasizing the administration, scoring and basic interpretation and practice in the use of individual psychological tests. Students will be trained to administer the Wechsler tests, the Stanford-Binet or other subsequently developed individual intelligence scales.
Prerequisites: EDLD 5334

Program Development, Administration, Ethics and the Law
Essential components and function of the administration of a counseling program. Consideration will be directed toward ethical and legal behavior, issues, and practice.

Career Development
Concepts of career decisions and development.
Prerequisites: G&I 3322

Abnormal Human Development
A study of various symptom categories in psycho-pathology including theoretical conceptualizations of these symptoms. The course will include an analysis of the diagnostic categories as well as the research concerning etiology and treatment.
Prerequisite: Approval of Instructor

Consultation
This course has an emphasis upon developing consultation skills for the counselor. Methods and techniques to assist the counselor in implementing appropriate consultation skills in situations where the direct delivery of counseling services is not warranted.

Seminar in Counseling and Development
Designed to advance the professional competence of participants. For each seminar, a description of the particular area of study will be indicated. May be repeated for credit when nature of seminar differs sufficiently from one previously taken. A maximum of six hours in institutes may be applied toward a Master's degree.

Selected Instructional Topics
Significant topics in Counseling and Development. The description of the particular area of study will appear on the printed schedules of Lamar University each semester. Contact hours are the same as those required by a formal instructional course. With permission of advisor in the student's major field, course may be repeated when topic varies.

School Counseling Practicum
Supervised observation and practice of guidance and counseling in a school setting during the school day. Must be completed in consecutive semesters (Fall and Spring) in the same academic year.
Prerequisite: Must be within 6 semester hours (excluding practicum) of completing program requirements before beginning internship.

Community Counseling Practicum
Supervised observation and practice of guidance and counseling in an agency setting. Must be completed in consecutive semesters (Fall and Spring) in the same academic year.
Prerequisite: Must be within 6 semester hours (excluding practicum) of completing program requirements before beginning internship.

Educational Leadership Courses (EDLD)

Psychology of Pedagogy
History and systems of learning which have application to the classroom. Current theories and research in pedagogy.

Research Methods
Introduction to skills and techniques necessary for descriptive research in education problems. Emphasis on planning, designing, and methodology. One-third time in laboratory exercises and writing a research proposal and report.

Computer Applications for Administrators
Application of computers and selected computer software to information management, scheduling, and other functions of administration.
Prerequisites: EDLD 5311, EDLD 5380 and admission to the program.

Fundamentals of Administration
A study of the relationships between and among human behavior, belief systems and administrative style.

Foundations of Supervision
A study of models of supervision, the use of supervision as a means to improve productivity, and the effectiveness of various types of supervisory techniques.
Communications and Public Relations
Developing personal and mass media communication skills with emphasis on improving school-community relationships through effective communication techniques.
Prerequisites: EDLD 5311, EDLD 5339 and admission to the program.

School Services and Special Programs
Study of the organization and administration of vocational, exceptional learner, and adult education programs. Such services as attendance, food service, maintenance, and textbooks will be examined in detail.
Prerequisites: EDLD 5311, EDLD 5339 and admission to the program.

Organizational Behavior
Study of school as an organization and how individuals behave in organizations. Students will assess and compare their own personal competencies to the administrative needs of a selected school.
Prerequisite: EDLD 5311

School Finance for Principals
Analysis of principles of school finance to include problems of budgeting, accounting, and administration of funds.
Prerequisites: EDLD 5311, EDLD 5339 and admission to the program.

Educational Facilities Planning
Evaluation and administration of school facilities and the relationship of facilities to the achievement of educational objectives.
Prerequisites: EDLD 5311, EDLD 5339 and admission to the program.

School Law
Interpretation and implementation of school law including a study of the Texas Education Code and the Handbook for Public School Law.
Prerequisites: EDLD 5311, EDLD 5339 and admission to the program.

Personnel Administration
Fundamentals of human relations and organizational behavior in developing programs of recruitment, selection, assignment, evaluation, promotion and termination of personnel. Prerequisites: EDLD 5311, EDLD 5339 and admission to the program.

Instructional Leadership
Techniques of improving instruction through application of research on effective schools and models of instruction.
Prerequisites: EDLD 5311, EDLD 5339, and admission to the program.

Team Supervision
Role of peers in formative evaluation. Emphasis on team approach to the improvement of instruction.
Prerequisites: EDLD 5311, EDLD 5339, EDLD 5352 and admission to the program.

Teacher Appraisal
Techniques of summative evaluation with particular emphasis on Texas Teacher Appraisal System. All requirements of TTAS training are included in this course.
Prerequisites: EDLD 5311, EDLD 5339, EDLD 5352 and admission to the program.

Supervision of Student Teachers
Designed to assist instructional personnel who, directly or indirectly, supervise student teachers. Emphasis is given to the cooperative endeavor between the school and Lamar University and the supervisory responsibility of each party.
Note: This course has been recognized by the Lamar Teacher Center as meeting the in-service requirement of supervising teachers as specified by state statute.
Prerequisite: Permission of Instructor.

The School Superintendent
Role and responsibilities of the superintendent as chief administrative officer of the district.
Prerequisite: Certification in Mid-Management.

Independent Study
Supervised investigation into special areas of education under the direction of a graduate faculty member. May be repeated for credit when topic of investigation varies.
Prerequisite: Consent of department chair.

Seminar in School Administration
Study of basic concepts and principles of school administration as applied to selected topics. Special attention will be given to new and developing programs and to administrators' roles in these programs.
Prerequisites: EDLD 5311, EDLD 5339 and admission to the program.
5308/5588 Selected Instructional Topics

Study of significant topics related to administration and supervision of schools. The description of the particular area of study will appear on the printed schedule of Lamar University each semester. Contact hours are the same as those required by a formal instructional course. With permission of advisor in the student's major field, course may be repeated when topic varies.

Prerequisites: Admission to the program and permission of advisor.

5397 Internship for Supervision

Described to give the prospective supervisor job-related experience under the joint supervision of a school district supervisor and faculty of Lamar University.

Prerequisites: Must have completed all courses in the major and be within 3 semester hours (excluding internship) of completing certification requirements.

5388 Internship for Mid-Management

Described to give the prospective principal or middle level administrator job-related experience under the joint supervision of a school administrator and faculty of Lamar University.

Prerequisites: Master's Degree in Educational Administration and within 3 semester hours (excluding internship) of completing mid-management certification.

5399A/5399B Internship for School Superintendent

Designed to give the prospective superintendent job-related experience under the joint supervision of a school superintendent and faculty of Lamar University. Must be completed in consecutive semesters (Fall & Spring) in the same academic year.

Prerequisites: Certification in Mid-Management and within 3 semester hours (excluding internship) of completing superintendent certification.

Department of Professional Pedagogy

Department Chair: Dr. Doyle Watts

Director of Admissions and Advisement:

202 Education Building
Phone: 880-8675
Dr. Charles Burke
Phone: 880-8673

The Department of Professional Pedagogy offers programs leading to the Master of Education (M.Ed.) degree in Elementary Education, Secondary Education, and Special Education. In addition, the Department offers course work leading to six different Professional Certificates. It is the goal of the Master of Education and the Professional Certificate programs to provide the academic climate and practical experience necessary to produce teachers and other specialists of superior competence in their chosen areas of specialization.

Students who wish to pursue a Master of Education and/or a Professional Certificate should contact the Director of Admissions and Advisement well before the beginning of the semester in which they plan to enroll.

The Texas College Coordinating Board and the Texas Education Agency are now in the process of reviewing and revising all state-wide education programs. Students are therefore urged to contact the Director of Admissions and Advisement to obtain the latest information regarding these programs.

Master of Education (M.Ed.)

General Requirements

To be accepted into a program leading to a Master’s Degree in Education the student must:

1. Fulfill the general requirements for admission and the general degree requirements as stated elsewhere in this bulletin. A minimum score of 400 on the Verbal and on the Quantitative sections of the Graduate Record Examination and a combined Verbal plus Quantitative total of 600 are required.

2. Meet the undergraduate prerequisites appropriate to the chosen program of study. These requirements include:
A. The applicant in elementary education must have completed 18 semester hours in education, including 6 semester hours in elementary education methods and materials courses.

B. The applicant in secondary education must have completed a minimum of 18 semester hours in education. At least 12 of the 18 hours must be at the 300 level or higher.

3. The student may elect to write a thesis. If so, the student is required to complete a minimum of 30 hours plus the thesis.

4. The student who does not write a thesis must earn a minimum of 36 hours of graduate credit and is required to pass a written comprehensive examination administered during the last semester of attendance.

**Step by Step Procedure**

1. Apply for Admission to the Graduate College of Lamar University.
   A. Obtain application packet from the Graduate Admissions Office in Room 208 of the Wimberly Building or call (409) 880-8350.
   B. Take the Graduate Record Examination and have scores sent to: Graduate Admissions, Lamar University, P.O. Box 10009, Beaumont, Texas 77710.
   C. Have all transcripts sent to Graduate Admissions as in B above.

2. Meet with program advisor to develop a degree plan. **NOTE:** No deviations from the degree plan will be permitted without written permission of the Director of Admissions and Advisement.

3. In consultation with the Director of Admissions and Advisement, select members of graduate committee. (The program advisor will chair this committee.)

4. Complete at least 12 hours of graduate-level course work in the department and apply for Admission to Candidacy. **NOTE:** Students must be admitted to candidacy before beginning their last nine hours of course work.

5. Complete remaining course work.

6. Complete requirements for graduation
   A. Apply for graduation in the Graduate College office (101 Wimberly).
   B. Pass comprehensive examination

7. Graduate

**Degree Plan in Elementary Education**

To meet individual needs, considerable flexibility is allowed in planning the student’s program; however, the usual pattern of course work is as follows:

1. **Professional Development.** Six semester hours must be selected from the following courses:
   - Ped 531 Research for Teachers (Req)
   - Ped 534 Advanced Study in Human Development
   - Ped 535 Psychology of Pedagogy
   - Ped 537 Public School Curriculum

2. **Resource Area.** 12 semester hours must be selected from the following courses (nine semester hours if the student elects to write a thesis):
   - Ped 536 Problems in Teaching Science and Social Studies in the Elementary School
   - Ped 538 Modern Mathematics in the Elementary School
   - Ped 539 Teaching of Reading in the Elementary School
   - Ped 5393 Seminar in Language Arts
   - Ped 5395 Diagnostic/Prescriptive Procedures in Reading

3. **Specialization Area.** Six semester hours of courses must be taken for graduate credit from one or a combination of the following disciplines: history, English, foreign languages, mathematics, science, art, music, speech or health and physical education.
4. **Electives.** 12 semester hours (nine semester hours if student elects to write a thesis) from any of courses listed below or in a concentrated area.

   **A. Reading Specialist**
   - Ped 539 Teaching of Reading in the Elementary School
   - Ped 5385 Literature: Pre K-12
   - Ped 5395 Diagnostic/Prescriptive Procedures in Reading
   - Ped 5396 Clinical Practicum in Reading

   **B. Early Childhood Education**
   - Ped 5351 Advanced Study in Early Childhood Curriculum
   - Ped 5352 Creative Activities in Early Childhood Education
   - Ped 5354 Trends and Issues in Early Childhood Education
   - Ped 5355 Analysis of Program Implementation in Early Education

   **C. Supervision**
   - Ped 5334 Tests Measurements & Evaluation
   - Ped 5352 Leadership and Evaluation of Instruction
   - Ped 5397 Practicum and Seminar
   - Ped 5354 Instructional Supervision

   **D. Special Education**
   - Ped 5361 Survey of Learning Potentials of Exceptional Children
   - Ped 5364 Behavior Modification and Contingency Management of Disabled Learners
   - Ped 5365 Instructional Processes With Exceptional Children
   - Ped 5366 Modification of Curriculum and Instruction for the Atypical Learner

   **E. Gifted/Talented Endorsement**
   - Ped 5356 The Gifted Learner
   - Ped 5367 Creativity and the Gifted Learner
   - Ped 5358 Identification and Assessment of Gifted/Talented Learner
   - Ped 5359 Gifted/Talented Curriculum
   - Ped 5360 Practicum

**NOTE:** To fulfill requirements concurrently for a Master’s degree and for a Professional Certificate, a student may complete 12 additional hours in an area of undergraduate specialization and substitute these hours for 12 hours in the elective area.

**Degree Plan in Elementary Education With Professional Certification in Reading**

1. To fulfill requirements concurrently for a Master’s degree and Professional Certification in Reading, the student:
   A. Must meet general requirements for a Master of Education degree.
   B. Must hold a valid Texas Provisional Elementary or Secondary Certificate.
   C. Must have completed a minimum of three years of creditable classroom teaching.

2. **A. Professional Development Area:** Six semester hours.
   - Ped 531 Research for Teachers (Req)
   - Ped 534 Normal Human Growth and Development
   - Ped 535 Psychology of Pedagogy
   - Ped 537 Public School Curriculum

   **B. Resource Area:** Six semester hours.
   - Eng 5312 Studies in Language and Linguistics
   - Ped 5367 Cross Cultural Counseling
   - or
   - Soc 532 Educational Sociology
C. Reading Specialization Requirements: Eighteen semester hours
   Ped 539 Teaching of Reading in the Elementary School (Req)
   Ped 5395 Diagnostic/Prescriptive Procedures in Reading (Req)
   Ped 5365 Literature: Pre K-12 (Req)
   Ped 5396 Clinical Practicum in Reading (Req)
   Ped 5393 Seminar in Language Arts
   Ped 536 Problems in Teaching Science and Social Studies in the Elementary School
   Ped 538 Modern Mathematics in the Elementary School

D. Professional Secondary: Six semester hours
   Ped 5319 Problems in Secondary School Instruction
   Ped 5320 Adolescent Development
   Ped 5321 Strategies for Individualizing Secondary Education
   Ped 5312 Research and Instruction in the Middle School

Professional Certificates in Elementary Education

The applicant should hold or be eligible for a Provisional Certificate before admission into a professional program and have three years of teaching experience before being recommended for the Professional Certificate.

Requirements for the Professional Certificate follow an outline prescribed by the Texas Education Agency, consequently, the format for the certificate and the format for the degree are not identical. By selecting a program and with careful planning, a student may fulfill concurrently requirements for the Master's degree and requirements for a Professional Certificate in Elementary Education or the Reading Specialist Certificate. Specific information concerning these certificates may be obtained from the director of Certification in the College of Education or the Director of Admissions and Advisement.

Other Certificates

It is possible for students to complete part or all of the requirements for a Provisional Teaching Certificate or an endorsement to such a certificate while working on a Master of Education degree in Elementary Education. Endorsements in areas such as mental retardation, physically handicapped/minimally brain injured, emotionally disturbed, learning disabilities, early childhood/exceptional children, gifted and talented may be adapted to such an arrangement. Specific information concerning these certificates may be obtained from the Director of Admissions and Advisement in the Department of Professional Pedagogy.

Degree Plan in Secondary Education

To meet individual needs, considerable flexibility is allowed in developing the student's plan for a nonthesis or a thesis program; however, the usual pattern of course work is as follows:

1. Professional Development. 18 semester hours must be taken as follows:
   Required: Six semester hours
   Ped 531 Research for Teachers (Req)
   Ped 5320 Adolescent Development
   Electives: 12 semester hours should be in one of the following areas:
   Classroom Specialist Reading Specialist
   Foundations Giftd/Talented Education Supervision

A list of specific courses required or recommended in each of the concentrations is available from the Director of Admissions and Advisement.

2. Specialization Area. For the nonthesis route to the degree, 12-18 semester hours of graduate work must be completed in one of the approved disciplines. A mini-
num of 12 hours must be taken at the 500 level for the 18-hour specialization. If the student elects to write a thesis or chooses the route leading to the Professional Teaching Certificate which requires a six-hour resource area exclusive of professional education and the specialization, the specialization requirement is reduced to 12 semester hours with at least six at the 500 level.

A plan listing the specific courses required to recommended is available through the Director of Admissions and Advisement. Specialization areas are available in the following disciplines:

- Biology
- Chemistry
- Earth Science
- Physics
- Speech
- Kinesiology
- History
- Mathematics
- English
- Political Science

**Degree in Secondary Education With Professional Certification in Reading**

With a valid junior high school or high school teaching certificate and three years of classroom teaching experience, a student, may fulfill requirements for a Professional Reading Specialist Certificate (all levels) by completing the program below in lieu of content specialization.

1. **Professional Development:** Nine semester hours.
   - Ped 531 Research for Teachers (Req)
   - Ped 535 Psychology of Pedagogy
   - Ped 534 Normal Human Growth and Development
   - Ped 537 Public School Curriculum

2. **Resource Area:** Six semester hours.
   - Eng 5312 Studies in Language and Linguistics
   - Ped 5367 Cross Cultural Counseling
   - or
   - Soc 532 Educational Sociology

3. **Reading Specialization Requirements:** Eighteen semester hours
   - Ped 539 Teaching of Reading in the Elementary School
   - Ped 5385 Literature: Pre K-12
   - Ped 5392 The Reading Process
   - Ped 5383 Seminar in Language Arts
   - Ped 5385 Diagnostic/Prescriptive Procedures in Reading
   - Ped 5386 Clinical Practicum in Reading

4. **Professional Secondary:** Three semester hours
   - Ped 5312 Research and Instruction in the Middle School
   - Ped 5319 Problems in Secondary School Instruction
   - Ped 5320 Adolescent Development
   - Ped 5321 Strategies for Individualizing Secondary Instruction

**Program Leading to Professional Teaching Certificate - Secondary**

The Texas Education Agency issues a Professional Teaching Certificate to the candidate recommended by the college when he/she has completed an approved 30 semester hour program of credit beyond the bachelor's degree. This program must include work in professional development, in a teaching specialization area and in a resource area. Requirements also indicate that the candidate must hold a Provisional Teaching Certificate and have three years of teaching experience. Specific requirements for the certificate may be obtained from the Director of Admissions and Advisement.
Degree Plans in Special Education

To meet individual needs, some flexibility is allowed in planning the student's program; however, the usual pattern of course work is indicated below. If a student desires, he/she may complete requirements for a Provisional Certificate as an Educational Diagnostician or in Mental Retardation or in Supervision. In addition, the student may complete requirements for a Provisional Certificate in Special Education-General as part of the degree plan. This degree, if the student is pursuing one of the described certifications, is planned as a 36 semester hour non-thesis program. A student not seeking a certificate within the degree hours may complete a degree with a minimum of 30 semester hours plus a thesis.

To fulfill requirements concurrently for a Master's degree and Professional Certification in Supervision, the student also must have or complete a special education endorsement. The student should secure information concerning requirements for certification from the Director of Admissions and Advisement. General information concerning Professional Certificates is presented in another portion of the College of Education and Human Development section of this bulletin.

A. M.Ed. in Special Education-General Certification

1. Professional Development Area: Nine semester hours required
   Ped 531 Research for Teachers (Req)
   Ped 534 Normal Human Growth and Development
   Ped 535 The Learning Process
   Ped 537 Public School Curriculum

2. Resource Area: (12 hours)
   Ped 5334 Tests, Measurements and Evaluation
   (required)
   Ped 5361 Survey of Learning Potentials of Exceptional Children
   (required)
   Ped 5698 A & B Practicum in Special Education

3. Specialization Area: (15 hours)
   Ped 5390 Reading and Language Arts for the Exceptional Child
   Ped 5362 Psychoeducational Evaluation of Exceptional Children
   Ped 5364 Behavior Modification and Contingency Management of Disabled Learners
   Ped 5385 Instructional Processes with Exceptional Children
   Ped 5386 Modifications of Curriculum and Instruction for the Atypical Learner

B. M.Ed. in Special Education-Mental Retardation Certification

1. Professional Development Area: Nine semester hours required
   Ped 531 Research for Teachers (Req)
   Ped 534 Normal Human Growth and Development
   Ped 535 The Learning Process
   Ped 537 Public School Curriculum

2. Resource Area: (12 hours)
   Ped 5334 Interpretation and Analysis of Tests and Measurements
   (required)
   Select three courses from those listed below:
   Ped 5340 Microcomputers for Educators
   Ped 5351 Advanced Study in Early Childhood Curriculum
   Ped 5387 Psycho-Social Foundations of Educating the Culturally Different
   Ped 5316 Administration and Supervision of Special Education Programs
   Ped 5698 Practicum II-Educating the Exceptional Child
Ped 5362 Psychoeducational Evaluation of Exceptional Children
Ped 5363 Practicum in Psychoeducational Procedures
Ped 5365 Instructional Processes with Exceptional Children
Ped 5366 Modifications of Curriculum and Instruction for the Atypical Learner

*Other selections must be approved by the chairperson of the student’s committee and by the Director of Admissions and Advisement

3. Specialization Area: (15 hours)
Must be selected from the following courses or in concentrated area when attaining a specific certification.
   Ped 5315 Problems and Issues in Special Education
   Ped 5361 Survey of Learning Potentials of Exceptional Children
   Ped 5364 Behavior Modification and Contingency Management of Disabled Learners

4. Student must select six additional hours from courses listed below:
   Ped 5362 Psychoeducational Evaluation of Exceptional Children
   Ped 5363 Practicum in Psychoeducational Procedures
   Ped 5365 Instructional Processes with Exceptional Children
   Ped 5366 Modifications of Curriculum and Instruction for the Atypical Learner

C. M.Ed. in Special Education-Educational Diagnostician Certification
1. Professional Development Area. Nine semester hours required
   Ped 531 Research for Teachers (Req)
   Ped 534 Normal Human Growth and Development (Req)
   Ped 535 The Learning Process
   Ped 537 Public School Curriculum

2. Resource Area. (12 hours)
   Ped 5334 Interpretation and Analysis of Tests and Measurements (required)
   Ped 5335 Individual Testing (required)
   Select two courses from those listed below:
   Ped 5340 Microcomputers for Educators
   Ped 5351 Advanced Study in Early Childhood Curriculum
   Ped 5367 Psycho-Social Foundations of Educating the Culturally Different
   Ped 5315 Problems and Issues in Special Education
   Ped 5316 Administration and Supervision of Special Education Programs

*Other selections must be approved by the chairperson of the student’s committee and by the Director of Admissions and Advisement

3. Specialization Area (15 hours)
   Ped 5362 Psychoeducational Evaluation of Exceptional Children
   Ped 5363 Practicum in Psychoeducational Procedures
   Ped 5364 Behavior Modification and Contingency Management of Disabled Learners
   Ped 5365 Instructional Processes with Exceptional Children
   Ped 5366 Modification of Curriculum and Instruction for the Atypical Learner

Professional Certification in Special Education
Educational Diagnostician
Mental Retardation
Special Education Supervisor
Special Education Counselor

Specific information concerning these certificates may be obtained from the Director of Admissions and Advisement.
Provisional Certificates in Special Education

Special Education
Generic

Students may obtain the provisional certificate in the above listed areas. A combination of graduate and undergraduate courses leading to the certificate is possible. Specific information concerning the certificate may be obtained from the Director of Admissions and Advisement.

General Information Concerning Professional Certificates

The Professional Certificate is valid for life unless cancelled by lawful authority, and gives the holder legal authority to perform duties in the public schools of Texas in the specialized areas designated on the face of the certificate. It is the responsibility of the student to initiate the process of applying for certification by contacting the certification officer in the College of Education and Human Development.

Requirements

1. Have completed the requirements for a Provisional Certificate.
2. Have at least three years of teaching experience.
3. Have completed an approved teacher education program.
4. Be of good moral character.
5. Be a citizen, or in the process of becoming a naturalized citizen of the United States.
7. Have completed, in a Texas institution of higher learning, a course or courses in which the Constitutions of the United States and the State of Texas have been given special emphasis.
8. Have completed at least six semester hours of American history or three semester hours in American history plus three semester hours in Texas history.

Graduate Faculty

Professor Kenneth R. Briggs

Professional Pedagogy Courses (PED)

531 Research for Teachers 3:3:0
Introduction to skills and techniques necessary for descriptive research as applied to teacher education, with an emphasis on planning, designing and methodology. Research proposal required.

532 Current Issues in Education 3:3:0
Current controversies and trends in public education.
534 Normal Human Growth and Development
A study of development and nature of the human personality. Emphasis on recent psychological and biological experiments.

536 Problems in Teaching Science and Social Studies in the Elementary School
A study of current developments, recent trends and innovative methods of teaching science and social studies in the elementary school, with emphasis upon individual teaching problems and research.

537 The Public School Curriculum
Analysis of the objectives, organization and content of the different areas of the public school curriculum in grades K-12. Emphasis is given to models of curriculum development and to techniques for curriculum improvement.

538 Modern Mathematics in the Elementary School
Problems, research and innovative methods in elementary mathematics. This course is designed for elementary teachers who wish to pursue individual problems. Research and recent methods and trends of teaching elementary mathematics.

539 Teaching of Reading in the Elementary School
Overview of reading techniques, methods, approaches, materials, classroom management and organization.

5160, 5240, 5300, 5400, 5500, 5600, 5381 Selected Instructional Topics
Significant topics in Elementary, Secondary, Special Education, Supervision, Counseling, and Educational Administration. The description of the particular area of study will appear on the printed schedules of Lamar University each semester. Contact hours must be the same as those required by a formal instructional course. With permission of advisor in the student’s major field, course may be repeated when topic varies.

5306 Institute in Education
Designed to advance the professional competence of participants. A description of the institute will be indicated. May be repeated for credit when nature of institute differs significantly from one previously taken. A maximum of six hours in institutes may be applied toward a Master’s degree.

5311 Individual Study in Education
Supervised investigation into special areas of education under the direction of a graduate faculty member. May be repeated for credit when topic of investigation differs. Prerequisite: Consent of department head.

5312 Middle School Teaching and Research
Presentation of alternate teaching strategies in middle school programs. Exemplary organizational designs are examined with existing impact of research on middle schools.

5315 Problems and Issues in Special Education
Appraisal of current problems, trends and practices in the education and care of exceptional children.

5316 Administration and Supervision of Special Education Programs
Analysis of the functions of special education in the administrative structure of the school; the principles and practices in administration and supervision in special education.

5319 Problems in Secondary School Instruction
Consideration of the instructional problems encountered by experienced teachers in the secondary schools. Prerequisite: One year of teaching experience.

5320 Adolescent Development
Physical, mental, social and emotional characteristics of the adolescent; Interests and problems; family and community relationships.

5321 Strategies for Individualizing Secondary Instruction
An analysis of the strategies for individualizing instruction, including the techniques of diagnosis and prescription for learning problems. Studies of the open classroom, team teaching, independent study, learning modules, non-graded programs and other organizations for instruction are included.

5324 Tests, Measurement and Evaluation
Analysis and evaluation types of tests and measurement devices will be conducted. Methods of determining the reliability and validity of tests are investigated. Designs for testing programs and selection of appropriate test will be included. Evaluation systems of individuals and programs will be discussed.

5335 Curriculum Management
Models of curriculum development and evaluation with particular emphasis on the management of these functions. Prerequisites: EDDL 5311, EDDL 5352 and admission to the program.

5340 Microcomputers for Educators
Designed to give teachers an awareness level of computer literacy and allow them to use the computer as an additional tool in the classroom.

</tbody>
</table>
5376 Instructional Supervision of Student Teachers
Designed to facilitate instructional personnel who, directly or indirectly, work with/supervise student teachers to better understand their roles of supervision as they relate to student teaching. Emphasis is given to the cooperative endeavor and special relationships as they exist between state regulatory bodies, the supervising teacher, and the University supervisor.
Note: This course has been recognized by the Lamar Teacher Center as meeting the in-service requirement of supervising teachers as specified by state statute.

5385 Literature: Pre K-12
Emphasis on the selection of literature for children and adolescents, and the development of methods for using literature to develop skills in reading. Provision of experiences which will enable teachers to locate and select age level appropriate literature and to incorporate literacy studies in the curriculum at all grade levels.

5386 Internship in the Coordination of Reading Programs
Field-based course in which students practice competencies and apply theories acquired as they assume responsibilities associated with the organization and administration of school reading programs. (May be repeated for credit as internship experience varies.)

5387 Reading Research Seminar
Focus on issues related to research, publication, grant-writing, and In-service/professional development and community issues.

5388 Organization of Reading Programs
Programs in the improvement of reading instruction; emphasis on approaches, accountability, content, integration and evaluation of materials, staff and programs organization.

5389 Assessment Procedures in Reading
Evaluation, administration, scoring and interpretation of clinical (diagnostic, standardized) instruments with particular emphasis on their application to reading and language arts instruction. Focus on selection and/or development of formative and summative evaluation designs at the campus/district level and report writing.

5392 The Reading Process
Psychological, cognitive and perceptual bases of reading comprehension with emphasis on readers, texts, and instruction.

5393 Seminar in Language Arts
Application of research findings and modern theory to teaching and organizing the language arts in the elementary school. Examination of the relationships between language and cognitive development.

5394 Content Area Reading Instruction
Relation of reading ability to academic achievement in the content areas, classroom diagnosis and correction of reading problems, study skills, developing flexibility and critical thinking and adolescent reading tastes.

5395 Diagnostic/Prescriptive Procedures in Reading
Study of the nature and causes of reading problems including observations, demonstrations, and supervised practice in the techniques of diagnostic attention is given to interview procedures, standard and informal diagnostic instruments, interpretation and utilization of standardized test data, and report writing.
Prerequisites: Edu 339, Edu 3392, Edu 5394.

5396 Clinical Practicum in Reading
Clinical course involving direct work with one or more students, diagnosis and teaching according to identified needs. A supervised practicum. (Involves the application of knowledge and acquired competencies in a clinical practicum.)

5397 Computer Applications: Reading and Language Arts
Instruction covering microcomputer applications in the language arts. Includes diagnostic, instructional, record-keeping, readability, and word-processing utilities. Evaluation and selection of software for classroom and tutorial use.

5398 Topics in Reading
In-depth analysis and synthesis of selected recent research and/or problem areas in reading education. May be repeated for credit as topic varies.

5601 Institute in Education
Designed to advance the professional competence of participants. For each institute, a description of the particular area of study will be indicated. May be repeated for credit when nature of institute differs sufficiently from one previously taken. A maximum of six hours in institutes may be applied toward a Master's degree.

669A-669B Thesis
Prerequisite: Approval of graduate advisor.
Special Education Courses (PED)

5680 Practicum in Special Education
A&B Supervised experience in Special Education. The practicum is offered by arrangement between the university and the public school.
Prerequisite: Must be within 6 semester hours of completing all certification requirements and permission of advisor.

669A-669B Thesis
Prerequisite: Approval of graduate advisor.

Graduate Resource Courses

These courses are not offered by the College of Education but are required or suggested for certain degree plans.

CS 5301 Computer Systems for Educational Applications 3:3:0
Functional units of computers including both hardware and firmware; software; analysis, design and evaluation of computing configurations for educational applications; cost estimation techniques for both academic and administrative applications.

Sec 530 Seminar in Sociology 3:3:0
Basic concepts and principles of sociology as applied to the study of selected topics. Designed for education majors or other non-sociology majors.

Sec 532 Sociology of Education 3:3:0
A study of the multi-cultural influences on the institutions of education. Included will be a sociological analysis of educational problems in Texas.

Eng 5312 Studies in Language and Linguistics 3:3:0
Special problems in linguistics, such as the history of American English, regional dialects, new grammars. May be taken for credit more than once if the topic varies.

Department of Health, Kinesiology and Dance

The Department of Health, Kinesiology and Dance offers a program of study leading to the Master of Science degree in Kinesiology. It is designed to prepare professional personnel for employment in school and community settings and to prepare students for further graduate study at the doctoral level. Candidates seeking admission to the program must meet the general catalog requirements for admission to the College of Graduate Studies. They must also have a 2.5/4.0 undergraduate grade point average (overall or on the last 60 hours of undergraduate course work). They must also satisfy the necessary undergraduate prerequisites as prescribed for a particular area of specialization.

The areas of specialization available include teaching and research and fitness program administration. A teaching and research specialization is offered for those graduate students who are interested in advanced preparation for teaching in school and university settings, research opportunities, doctoral-level work and administrative responsibilities. Fitness program administration involves a concentration in exercise technology and practical applications for those student seeking employment in public, private, or corporate fitness centers.

Degree Requirements

The candidates for the Master of Science degree in Kinesiology must meet all of the College of Graduate Studies general degree requirements as listed in the Graduate catalog. To be sure that requirements are met, students are encouraged to contact the graduate coordinator. Additional specific degree requirements are as follows:

1. Nine semester hours to include Kin 534 (Scientific Basis of Exercise), Kin 536 (Research Methods), and Kin 538 (Motor Learning).
2. The thesis is optional for specialization areas of teaching/research and fitness program administration.
3. Each specialization area requires additional core requirements contingent upon the option selected.

**Graduate Faculty**

Associate Professor Joel E. Barton III  
Health  
Professor Alice C. Bell  
Health  
Professor E. Harold Blackwell  
Kinesiology  
Associate Professor Douglas Boatwright  
Kinesiology, exercise physiology  
Professor Vernon R. Crowder  
Kinesiology, exercise physiology  
Professor V. Raye Holt  
Kinesiology, health  
Professor Mildred A. Lowrey  
Kinesiology, motor learning, sports psychology

**Kinesiology Courses (Kin)**

**5101, 5201, 5301 Workshop in Kinesiology**  
This course is designed to advance the professional competence of graduate students in Kinesiology. Topics will vary. A description of the particular area of study will be indicated. Course may be repeated for a maximum of six semester hours if topic varies. A maximum of six semester hours of workshop may be applied to a degree program.

**5311 Curriculum Development**  
Emphasis given to models of curriculum development and to techniques for curriculum improvement. Analysis of objectives, organization and content.
Department of Home Economics

The Master of Science degree in Home Economics allows students to choose courses from the areas of foods and nutrition, textiles and clothing, child development, family relationships, interior design, home management and home economics education. Workshops and travel/study tours along with regular daytime and evening classes make completion of a Home Economics Masters degree attainable and rewarding.

Persons seeking admission to this program must meet the general requirements for admission outlined elsewhere in this catalog and must have a 2.5/4.0 undergraduate grade point average (overall or on the last 60 hours of undergraduate work). A student must have completed a minimum of 3 undergraduate credit hours in each of the following subject matter areas: food and nutrition, clothing and textiles, housing and interior design, human development and family life and management and consumer economics. The requirement may be satisfied by completing the Home Economics undergraduate core courses or by substituting upper level courses approved by the department Chair. Requirements in a specific subject area may be satisfied by an undergraduate degree in a related discipline.

Degree Requirements

The Master of Science degree in Home Economics requires the completion of 30 semester hours of graduate work; 18 in home economics, six in thesis and six in an approved supporting field. With the approval of the student’s graduate committee 12 semester hours of course work may be substituted for the thesis.

The student’s graduate program must include HEC 530, Research Methods in Home Economics; HEC 5314, Statistical Theory and Analysis for Home Economics and HEC 537, Management Throughout the Life Cycle, which must be completed before or during the semester in which application for candidacy is submitted. No graduate student may submit a thesis proposal prior to completion of HEC 530 and HEC 5314.

A student must be enrolled in at least one graduate-level Home Economics course or in HEC 669B during the semester of graduation.

Graduate Faculty in Home Economics

Associate Professor Virginia Anderson
Family life education, housing

Associate Professor Jane O. Hincheny
Equipment, research, consumer science

Professor LeBlond McAdams
Clothing, fashion merchandising and retailing, education
Home Economics Courses

539 Research Methods in Home Economics
Introduction to skills and techniques necessary for conducting research in home economics subject matter areas. Emphasis on research strategies, data preparation and analysis and research reporting. Research proposal required.

531 Recent Advances in Foods and Nutrition
Readings in and discussion of selected studies and recent developments in the field of nutrition and foods. Implications for diestitians, nutritionists, teachers, extension workers and others.

532 Clothing Design and Merchandising
An application of couture costume design principles and techniques related to construction and merchandising.

533 Heritage of Dress
A study of costume history and customs which have affected garment styles. An analysis of historic costumes and its contribution of civilization.

534 Problems in Clothing and Textiles
Individual and group investigations and discussions of special problems in the various phases of clothing and textiles.

535 Cultural Foods
An overview of cultural influences on primitive and modern human dietary practices. Emphasis on how humans use culture to adapt to the physical, social and supernatural environments.

536 Adolescent Nutrition
A study of nutritional needs and concerns during adolescence.

537 Management Throughout the Life Cycle
Socio-economic changes, public policies and programs and management practices related to family well-being through the various life cycle periods.

538 Occupational Home Economics
Philosophy and development of vocational home economics education for secondary schools, colleges or universities with emphasis on occupational home economics careers and jobs, curriculum trends and developments. Credit for course applied to six hours required for teaching in occupational home economics programs.
Prerequisite: HEC 5208

539 Nutrition in Aging
Study of the effects of aging on the nutritional status of the individual. The role of nutrition in the aging process is addressed.

5101, 5201, 5301, 5401 Workshop in Home Economics
Workshops designed to strengthen professional competence needed for addressing societal issues related to home economics. May be repeated for credit when topic of interest varies. Credit: one to six hours.

5300 World of Work in Home Economics
A study of occupational home economics education within the secondary curriculum such as cooperative education, pre-employment education, coordinated vocational-technical education and vocational education for the handicapped. Attention will be given to essential elements such as leadership skills, employability skills, entrepreneurial opportunities and personal development for employability.

5310 Maternal and Infant Nutrition
A study of nutritional needs and concerns during pregnancy, lactation and infancy.

5311 Advanced Textiles
Analysis and comparison of recent scientific textile trends with reference to fiber content, yarn, fabrication, color and finish.

5312 Resources in Home Economics Education
Creative development, selection and evaluation of instructional materials including preparation, selection and use of visual materials.

5313 Current Topics in Home Economics
Intensive study of a current problem of professional interest in home economics. The description of the particular area of study will appear on the printed semester schedule. May be repeated for credit when topic of investigation varies. Credit: three hours.

5314 Statistical Theory and Analysis
A study of statistical theory with application of quantitative techniques commonly used in home economics research.
Independent Study in Home Economics 3:0
Independent study in an area of interest; review of current literature and research related to individual problems; selection and/or design of instruments used in collecting data. May be repeated for credit when topic of investigation varies. Credit: three hours.

Family Life Education 3:0
Principles and philosophy of family life education, program planning and implementation, educational techniques and materials development and evaluation.

Family Communication 3:0
Communication patterns and problems of husband-wife and parent-child, including stress and conflict management.

Parenting 3:0
Contemporary issues facing both parents and professionals who work with them; specific study of parenting skills, parenting in families with special needs and parent-school relationships.

Regional Market Centers 3:0
A study of the regional market center(s) with emphasis on apparel and/or home furnishings. Field experiences provide opportunities for students to see designed workrooms, buying offices and major retail facilities. Seminars, lectures, and presentations by professionals are also included. May be repeated for a maximum of six semester hours when area of study is different.

Thesis 6:0
Prerequisite: Approval of graduate advisor.
GRADUATE FACULTY in the College of Engineering include professors who are working on international solutions.
College of Engineering

Graduate degree programs are offered as follows:
- Master of Engineering Management (M.E.M.)
- Master of Engineering Science (M.E.S.)
- Master of Engineering (M.E.)
- Doctor of Engineering (D.E.)
- Master of Science in Computer Science (M.S.)
- Master of Science in Environmental Engineering (M.S.)
- Master of Science in Environmental Studies (M.S.)
- Master of Science in Mathematics (M.S.)

Master of Engineering Management (M.E.M.)

The Master of Engineering Management is a non-thesis degree program with all courses offered after 4 p.m. Course work is designed to build on the education received while completing an accredited bachelor's degree in engineering and the individual's professional experience. Hence, practicing engineers generally will not require undergraduate prerequisites.

A total of 36 credit hours are required at the graduate level. Included among these 36 credit hours are 15 hours of core courses required of all M.E.M. students. Course work in addition to the required core courses is tailored specifically to the needs of the student, but generally has approximately one-third of the courses in the general area of technical management, one-third in Business Administration, and one-third in the student's technical discipline such as Civil Engineering, Chemical Engineering, Electrical Engineering, Industrial Engineering or Mechanical Engineering.

Admission Requirements

Admission standards are designed to ensure that all enrolled students are qualified professionals serving in a leadership role in their engineering discipline. The four primary requirements are as follows:
1. B.S. in Engineering or Equivalent
2. Graduate Record Examination (GRE) Scores (Verbal + Quantitative) = 1000 or more.
3. Two-to-five years of engineering experience in a leadership role.
4. Letter of recommendation for the program from someone in direct supervision over the applicant in his/her primary employment.

Degree Requirements

1. All of the College of Graduate Studies general degree requirements.
2. Completion of a core program of 15 semester hours of specified courses.
3. Completion of a minimum of at least 36 semester from an approved list of courses.  
   (See typical programs)

Step by Step Procedure

1. Obtain a Bachelor of Science Degree in Engineering.
2. Complete two-to-five years of professional practice in a position of leadership.
3. Apply for Admission to the Graduate College of Lamar University
   a. Complete Graduate application, obtainable by calling (409) 880-8350
   b. Take GRE and have scores sent to: Graduate Admissions, Lamar University,  
      P.O. Box 10009, Beaumont, Texas 77710.
   c. Have all undergraduate transcripts sent to Graduate Admissions.
4. In consultation with Coordinator of Engineering Graduate Programs, select graduate committee.
5. Complete 12 hours of course work including all core courses and apply for admission to candidacy.
6. Complete remaining course work specified in candidacy application
   a. Apply for Graduation
   b. Pass Comprehensive Examination
7. Graduate

**Core Courses**

1. Egr 5369 Engineering Management
2. 432G Statistical Decision-Making for Engineers
3. Egr 5363 Administrative Control Systems
   or
   Egr 5321 Quality Control Systems
4. Egr 5366 Advanced Engineering Economics
5. Acc 530 Financial Accounting
   or
   Eco 530 Foundations of Economics

**Typical Program Options**

Each student in consultation with an advisor should design a program tailored to meet his or her own specific educational objectives. The following typical program options are suggested. Substitutions and/or modifications to these programs can be accomplished with the approval of the student's advisor.

**I. Manufacturing Management Concentration**

<table>
<thead>
<tr>

Master of Engineering Science (M.E.S.),
Master of Engineering (M.E.), and
Doctor of Engineering (D.E.)

The Master of Engineering Science, Master of Engineering and Doctor of Engineering programs are administered by the Graduate Steering Committee. Students entering these programs are responsible to this committee until a permanent graduate committee including a chairman is selected and approved. The student should select an advisor and a permanent graduate committee must be formed before the student has completed 15 semester hours of graduate work. No credit toward a graduate degree will be granted unless approved by either the Graduate Steering Committee or the student's permanent graduate committee.

Master of Engineering Science (M.E.S.)

The Master of Engineering Science Degree requires the completion of 30 semester hours of graduate course work, including thesis.

Admission Requirements

For admission to the program, the student must meet the following requirements:
1. The general requirements for admission to the College of Graduate Studies.
2. Hold a bachelor's degree in a field of engineering or related discipline with credit
substantially equivalent to that required for bachelor's degrees at Lamar University.
3. These are minimum admission requirements and may be more selective for individual departments.

Degree Requirements
1. All of the College of Graduate Studies general degree requirements.
2. A minimum of nine semester hours (three courses) from those courses listed above as core courses.
3. A minimum of 15 semester hours (five courses) of electives. Additional core courses may satisfy part of this requirement.

Master of Engineering (M.E.)

The Master of Engineering Degree is a non-thesis 36 semester hour* program designed to suit the needs of the practicing engineer.

Admission Requirements
For admission to the program, the student must meet the following requirements:
1. The general requirements for admission to the College of Graduate Studies.
2. Hold a bachelor's degree in a field of engineering or related discipline with credit substantially equivalent to that required for bachelor's degrees at Lamar University.
3. These are minimum admission requirements and may be more selective for individual departments.

Degree Requirements
1. All of the College of Graduate Studies general degree requirements.
2. A minimum of 21 semester hours (seven courses) from those listed above as core courses.
3. A minimum of 15 semester hours* (five courses) of electives. Additional core courses may satisfy part of this requirement.
4. Satisfactory completion of a final comprehensive examination.

* A graduate student holding an Engineer-in-Training (EIT) certificate or a graduate student who is a Professional Engineer registered in the State of Texas (or registered in another state where requirements do not conflict with the provisions of the Texas Engineering Practice Act and are of a standard not lower than those specified in Section 12 of that Act) may satisfy course requirements by completing 12 semester hours of electives provided EGR 631 (Design Project) is included.

Master of Science in Environmental Engineering

Until recently, environmental engineers were primarily concerned with municipal water systems and sewage treatment facilities. The bulk of the course work dealt with the application of engineering solutions to human health problems. Today, the field includes the study of water quality, air quality and methods for disposing of toxic/hazardous wastes. Overall, environmental engineers are engaged in solving the large and complex environmental problems threatening the natural ecosystem.

The Master of Science in Environmental Engineering program is designed to provide engineers with the highly specialized chemical/civil engineering background needed by industry and by regulatory agencies on the federal, state and municipal levels.

Admission Requirements
For admission to the program, the student must meet the following requirements:
1. The general requirements for admission to the College of Graduate Studies.
2. Hold a bachelor's degree in a field of engineering which is equivalent to a bachelor's degree at Lamar University.

3. Because of the diversity of the scientific disciplines which are admitted to the environmental studies program, some students may be lacking in certain fundamental subject areas, usually undergraduate level courses in engineering, microbiology, basic chemistry, geology, and/or mathematics. These courses must be taken in addition to the curriculum required for the master's degree program.

Degree Requirements
1. All of the College of Graduate Studies general degree requirements.
2. A minimum of 21 semester hours (seven core courses) from those listed below
   - Egr 5330 Biological Waste Water Treatment
   - Egr 5329 Water Supply and Treatment
   - Egr 5320 Air Pollution Control
   - Egr 5350 Unit Operations in Environmental Engineering
   - Egr 5387 Hydraulics of Environmental Systems* 
   - Egr 5344 Reactor Design for Environmental Systems
   - Pol 5353 Public Policy and Environmental Affairs

*with committee approval, Industrial Waste Treatment may be substituted

3. A minimum of 6 semester hours (2 courses) of designated electives from the list below.
   - Egr 5338 Solid Waste Management
   - Egr 6339 Hazardous Waste Management
   - Egr 5343 Industrial Waste Treatment
   - Egr 5334 Waste Minimization
   - Egr 5337 Incineration
   - Egr 5348 Advanced Air Pollution Control
   - Bio 5301 Microbiology
   - Chem 441 Biochemistry
   - Bio 443 Limnology
   - Bio 447 Ecology of Polluted Waters
   - Geol 4301 Hydrogeology
   - Chem 436 Inorganic Chemistry
   - Chem 535 Organic Chemistry
   - Egr 611 Research Seminar
   - Egr 5301 Seminar on Federal Programs for Environmental Management

4. Satisfactory completion and defense of thesis*

   with committee approval, 12 credit hours of Environmental Electives may be substituted.

Master of Science
In Environmental Studies

The environmental studies program is designed for students who wish to continue to work in their scientific specialty but as it relates to environmental affairs. The degree is especially intended for individuals who wish to work in the evaluation, operations and/or regulatory aspects of the field as opposed to the design or engineering areas. Consequently, the program will provide an understanding of environmental problems and processes from the point of view of the chemist, biologist or geologist and provide the interdisciplinary perspective needed to cope with various environmental issues.

Admission Requirements
For admission to the program, the student must meet the following requirements:
1. The general requirements for admission to the College of Graduate Studies.
2. Hold a bachelor's degree in chemistry, biology, geology, the subdivisions of those fields e.g. microbiology, organic chemistry, hydrogeology, etc. of other closely related field with credit substantially equivalent to that required for bachelors' degrees at Lamar University.

3. Some applicants to this program may be required to take undergraduate level courses in engineering, geology, microbiology, basic chemistry and/or mathematics. These courses must be taken in addition to those required for the masters program and will be selected in consultation with the advisor early in a student's graduate career.

Degree Requirements

1. All of the College of Graduate Studies general degree requirements.
2. A minimum of 6 semester hours (2 graduate courses) in the student's mathematics or science specialty.
3. A minimum of 12 semester hours (four core courses) from those listed below.

5. Satisfactory completion and defense of thesis*

*with committee approval, 12 credit hours of Environmental Electives may be substituted

Doctor of Engineering (D.E.)

The Doctor of Engineering Degree is designed to permit the practicing engineer to study practical engineering problems of a complex nature.

Admission Requirements

For admission to the program, the following requirements must be met:
1. The general requirements of the College of Graduate Studies.
2. The applicant must hold a Bachelor of Science degree in a field of engineering.
The applicant must have an overall GPA and quantitative section of the GRE score which meets the following criteria: \(50 \times \text{GPA} + \text{GRE}> 800\). International students must have a minimum TOEFL score of 530.

3. The applicant must hold a Master's degree or have completed at least 30 semester hours of course work at the graduate level in a field of engineering or a closely related discipline.

4. These are minimum admission requirements and may be more selective for individual departments.

**Degree Requirements**

1. All of the College of Graduate Studies general degree requirements.

2. The student shall complete a residency of one year.

3. The student shall register for EGR 611, Professional Seminar, each semester in which the student is registered for more than six hours or in which the student is registered for field study. A minimum of 4 hours is required.

4. Completion of 15 semester hours of core course work. The core courses are listed above.

5. Completion of the diagnostic examination. This examination has the objectives of determining the student's qualifications for a doctoral program and to provide guidance for the selection of a study program. This examination must be completed before the student has earned 15 semester hours of course credit after admission to the program.

6. Completion of a minimum of 15 credit hours of field study preparatory courses in a concentration designed to form a cohesive degree plan and must be approved by the student's advisory committee. The field study preparation includes completion of one semester of EGR 632, Justification of Engineering Project.

7. Completion of candidacy examination. The purposes of this examination are to test the ability of the student to comprehensively relate the subjects of the study program and to ascertain the student's qualifications to perform the field study.

8. Completion of the field study. After the student is admitted to candidacy a formal engineering proposal format must be presented to the doctoral committee. Upon committee approval of the proposed field study the work is initiated. Normally, 30 semester hours of field study is required.

9. Defense of field study. Upon completion of the field study a formal engineering report with a standard format shall be submitted to the committee and defended in an oral examination.

**Graduate Faculty**

Professor John R. Cannon  
Partial differential equations

Professor William A. Cawley  
Environmental engineering

Associate Professor Daniel H. Chen  
Process control, optimization, numerical methods

Associate Professor Hsing-wei Chu  
Operations research, statistical decision analysis, networks

Assistant Professor Paul Chiu  
Statistics, reliability theory

Associate Professor Paul Corder  
Mechanical systems design; stress analysis; finite element models

Professor Floyd M. Crum  
Solid state devices in electronic circuits

Associate Professor Saeed Daniali  
Structural analysis and design

Professor David C. Gates  
Decision-making processes; plant layout, human factors, engineering management

Associate Professor Leonard M. Gold  
Solid mechanics, mechanical systems, materials science engineering and task management

Associate Professor John B. Harvill  
Computer architecture, microcomputer systems, database systems, programming languages, computer science education

Associate Professor Tho-Ching Ho  
Fluidization, heat transfer, optimization
Engineering Courses

531 Materials Science
Principles underlying the behavior of materials existing in the solid, liquid and gaseous phases.

532 Instrumentation
Consideration is given to the design and analysis of instruments that are used to interface with analog, microprocessor and minicomputer applications that involve data acquisition and process control.

533 Computer Methods in Engineering Analysis
Computer techniques will be introduced and employed. Numerical methods for solving transcendental equations, polynomials, simultaneous linear algebraic equations and partial differential equations. Monte Carlo method, random numbers and simulation of engineering systems will be introduced.
*Note: Core Course. May be repeated one time for graduate credit with prior approval where course content varies.*

535 Advanced Process Control
Modern control theory concerning state-space formulation, multivariable control, optimal control, and discrete control for lumped/distributed parameter systems is addressed. Applications of control theory and the implementation of control strategies for the chemical processing industries are demonstrated.

536 Thermodynamics-Process Industry
Thermodynamic laws are derived and applied to physical chemical phenomena. Ideal and non-ideal gas, liquid and solid solution behavior are developed for physical and chemical equilibria. Course credit in chemistry is optional.
*Note: Core Course. May be repeated one time for graduate credit, with prior approval, where course content varies.*

537 Thermodynamics-Energy Conversion
The basic laws of thermodynamics are derived and applied in the analysis of power cycles, energy conversion and specific processes. Basic principles of irreversible thermodynamics and phenomenological relations are presented. An elementary statistical approach is presented with simple examples of the calculation of the transport properties of gases, liquids and solids.
*Note: Core Course. May be repeated one time for graduate credit, with prior approval, where course content varies.*
538 Discrete Control Systems
Prerequisite: EGR 5306.

539 CAD/CAG
The analysis and the utilization of state of the art computer hardware and software to solve the problems associated with the utilization of computers in both graphics and engineering design problems.
Prerequisite: Graduate standing in the College of Engineering and consent of the instructor.

5101, 5201, 5301 Special Topics
An investigation into specialized study in advanced areas of engineering under guidance of a faculty member. This course may be repeated for credit when topics of investigation differ.

5302 Regression Analysis
Review of regression analysis; theory of least squares; multivariate analysis; theory of the general linear hypothesis model.

5303 Reliability
Statistical theories pertinent to solution of engineering problems in reliability; distribution and failure theory including failure rate and mean time to failure for the exponential, log normal, gamma and Weibull distributions.

5306 Linear Systems Control Theory
Prerequisite: undergraduate course in control theory or consent of instructor.

5308 Cost and Optimization Engineering
Includes the mathematics of cost comparisons, profitability, productivity, and optimization with emphasis on processing or construction cost estimation and control. May be repeated for credit when the subject matter varies.

5309 Problems in Design and Finite Analysis
Advanced techniques and analysis involving microcomputers, finite elements, finite differences. May be repeated for credit when the subject matter varies.

5310 Advanced Concrete Design
Analysis and design of concrete members with consideration given to pre-stressing or post-stressing of beams and structural components. May be repeated for credit when the subject matter varies.

5311 Heat Transfer Analysis
Fundamental principles of heat transfer by conduction, convection and radiation. Emphasis will be given to the analysis of problems combining the various heat transfer mechanisms.

5312 Transport Mechanisms
This course will be concerned with individual mechanisms of heat transfer, mass transfer, or momentum transfer. May be repeated for credit as topics vary.

5313 Fluid Mechanics
Fluid statics, fundamentals of fluid motion, systems and control volumes, basic laws, irrotational flow, similarity and dimensional analysis, incompressible viscous flow, boundary layer theory and an introduction to compressible flows. Vector methods will be employed.

5314 Hydraulic Engineering
Design considerations of hydraulic systems including closed and open channel flow together with related hydraulic accessories. May be repeated for credit when the subject matter varies.

5315 Theory of Elasticity
General analysis of stress and strain, equations of equilibrium and compatibility, stress and strain relations. Two dimensional stress problems, elastic energy principles, thermoelastic problems. May be repeated for credit when the subject matter varies.

5316 Operations Research 1
The use of advanced mathematical models for optimizing engineering problems with emphasis on management decision. Includes special techniques based on systems analysis, design of experiment, linear programming, queuing, simulation and probabilistic analysis.

5318 Stress Analysis
Topics in advanced strength of materials including unsymmetrical loading of beams, shear center, curved beams, torsion of non-circular cross sections, strain energy, virtual work, plasticity, fatigue, and introduction to the theory of elasticity. May be repeated for credit when the subject matter varies.

</thead>
<tbody>
<tr>
<td>5319</td>
<td>Design Experiments</td>
<td>3:0:0</td>
<td>Experimental design and analysis of experiments are developed as tools of the manufacturing and process industries. Exploratory and evolutionary EVOP designs, analysis of variance ANOVA, error and regression are treated in some detail. Prerequisite: Course in statistics or equivalent.</td>
</tr>
<tr>
<td>5320</td>
<td>Fundamentals of Air Pollution</td>
<td>3:0:0</td>
<td>Pollutant sources, emissions and transport. Air pollution control methods. Particulate collection theory, gaseous pollutant removal theory. Atmospheric sampling and analysis methods. May be repeated for credit when the subject matter varies.</td>
</tr>
<tr>
<td>5321</td>
<td>Quality Control Systems</td>
<td>3:0:0</td>
<td>Application of statistical methods to industrial problems; regression and correlation theory; analysis of variance; use of control charts for control of manufacturing operations.</td>
</tr>
<tr>
<td>5322</td>
<td>Advanced Steel Design</td>
<td>3:0:0</td>
<td>Analysis and design of structural members using steel. Consideration is given to elastic and inelastic buckling in beams and columns due to local, flexural, torsional and torsional flexural action. May be repeated for credit when the subject matter varies.</td>
</tr>
<tr>
<td>5324</td>
<td>Wave Mechanics in Particulate Matter</td>
<td>3:0:0</td>
<td>Propagation of elastic waves in semi-infinite media. Surface waves and body waves. Behavior of particulate masses under the effect of dynamic loading, impact and transient phenomena. Effect on substructures of waves from industrial, seismic and nuclear sources. Mechanical and electronic recording. May be repeated for credit when the subject matter varies.</td>
</tr>
<tr>
<td>5326</td>
<td>Waves and Coastal Processes</td>
<td>3:0:0</td>
<td>Hydrodynamics of waves, wave generation, reflection, energy transmission and dissipation. Coastal phenomena, harbors and breakwaters, analysis of tides, and tidal currents. Salt water, fresh water interaction and diffusion in estuaries; erosion and shoaling in tidal waters. May be repeated for credit when the subject matter varies.</td>
</tr>
<tr>
<td>5327</td>
<td>Numerical Methods of Structural Analysis</td>
<td>3:0:0</td>
<td>Matrix methods applied to analysis of trusses, beams and frames. May be repeated for credit when the subject matter varies.</td>

</tbody>
</table>
Incorporation
An overall view of the incineration principles, equipment and facility design, basic concepts, stoichiometric and thermodynamic considerations for incinerators, air pollution control equipment and economic considerations.

Solid Waste Management
A study of solid waste collection, transfer and disposal systems. Investigation of the reclamation of resources by multiple use, reuse and improvement of existing sources to meet quality requirements.

Mass-Transfer Operations
The principles of diffusion and mass transfer are considered. The study of gas-liquid operations includes humidification and design of equipment. Solid-fluid studies include absorption, ion exchange, drying and leaching operations. Less conventional mass-transfer operations are also considered.

Industrial Waste Treatment
Procedures for analysis of the industrial waste problem, methods of collecting experimental data and process design for required treatment. Case studies and special laboratory problems for translating experimental data to prototype design. May be repeated for credit when the subject matter varies.

Reactor Design for Environmental Systems
Development of the fundamentals for the rate of chemical reactions and biological reactions in homogeneous and heterogeneous systems. Analysis of ideal chemical reactors and their design with application to environmental reactions in the air, water and soil.

Reactor Design I
Basic principles of reactor design are presented. The primary goal is the successful design of chemical reactors. Major reactor types are treated, giving particular attention to their performance capabilities.

Optimization Techniques
Analytical methods of constrained and unconstrained optimization. Geometric programming, linear programming, one-dimensional search techniques, multivariable search techniques, dynamic programming, variational methods.

Manufacturing Analysis
The course is designed to provide the background analysis required to understand manufacturing operations and to predict manufacturing behavior. It includes material behavior, metal cutting, metal forming, new and unconventional cutting and forming techniques, machine tool vibration and manufacturing cost optimization.

Advanced Air Pollution Control
Air pollution control and design principles; VOC incineration; gas adsorption; air pollution and atmospheric dispersion modeling; particulate matter; cyclones, electrostatic precipitators; fabric filters and scrubbers; control of nitrogen oxides and sulfur oxides.

Properties of Gases and Liquids

Unit Operations of Environmental Engineering
Theory of fluid and slurry movement under gravity and pressure systems, mixing processes, coagulation and flocculation of chemical treatment, separatory processes including flotation and sedimentation, and gas transfer and absorption of the biological systems. Selected laboratory assignments for model studies of these unit operations.

Electric Power Systems Analysis I
A three-semester sequence, selected from: symmetrical components, impedance and fault-current calculations, load-flow studies, economic operation, stability and control, system modeling, non-fossil fuel energy conversion. Both analytical and digital-computer methods may be employed as appropriate.

Administrative Control Systems
Problems affecting the engineer in design, analysis and control of information systems.

Digital Hardware Design
Problem formulation, dependency notation, programmable combinational circuits, designing for maintainability, algorithmic state machines. Prerequisite: Logical design, or consent of instructor.

Advanced Engineering Economy
Special economic analyses based on risk, uncertainty and other probabilistic considerations. Bayesian analysis, influence of perfect information, competitive decisions and decisions under pressure.

Engineering Management
Transition from engineering to management, decision making responsibilities - a comparison; planning, organizing and staffing in a technical environment, technical project management, team leadership, appraising engineers.
5380  Structural Timber Design
Characteristics of wood as a structural material. Use of standard specifications in the design of connections, beams, and columns. May be repeated for credit when the subject matter varies.
Prerequisite: CE 334

5381  Structural Masonry Design
The design of load-bearing masonry. Specifications for reinforced masonry construction. Building code requirements. May be repeated for credit when the subject matter varies.
Prerequisite: CE 334

5382  Structural Dynamics
Behavior of structures subjected to dynamic loads. Design of structures to resist earthquake and wind forces. May be repeated for credit when the subject matter varies.
Prerequisite: CE 334.

5387  Special Topics
The course is designed to meet special needs of students. Each topic is offered on an irregular schedule as the demand requires. Sample topics include: (1) Kinetic theory of gases; (2) Transients in compressible flow; (3) Non-linear vibrations; (4) Protective construction; (5) Transients in engineering systems; (6) Stagewise mass transfer; (7) Nuclear engineering; (8) Hybrid and analog computers; (9) Adaptive control; (10) Optimization techniques; (11) Sampling techniques.

5390  Special Topics
The course is designed to meet special needs of students. Each topic is offered on an irregular schedule as the demand requires. Sample topics include: (1) Kinetic theory of gases; (2) Transients in compressible flow; (3) Non-linear vibrations; (4) Protective construction; (5) Transients in engineering systems; (6) Stagewise mass transfer; (7) Nuclear engineering; (8) Hybrid and analog computers; (9) Adaptive control; (10) Optimization techniques; (11) Sampling techniques.

611  Professional Seminar
Advanced topics suitable for research along with research procedures will be discussed. Field study organization and content together with doctoral research problems and progress will be presented. Topics will vary each semester and course may be repeated for credit. Registration and completion for three semesters is required for all doctoral candidates.

631  Design Projects
May be repeated for credit when the subject matter varies.
Prerequisite: Admission to candidacy.

6311  Optimal Control of Power Systems
Addresses the issue of economic operation of power systems by application of control theory and the digital computers with emphasis on computer algorithms.
Prerequisite: Proficiency in computer programming, undergraduate power course.

6313  Digital Filters
Prerequisite: Proficiency in computer programming.

632  Justification of Engineering Projects
The preparation of proposals for advanced engineering work. The student will be given individual assistance in preparing a proposal for his field study.
Prerequisite: Approval of advisory committee.

6339  Hazardous Waste Management
The design, operation and applicability of standard destruction and detoxification technologies will be presented. The various types of incineration thermal biological and physical chemical methods will be included, as well as the technologies now in the later stages of research and development. Emphasis will be on applicability and functional design as opposed to detailed design.

6340  Distillation
Material and energy-balance relationships are reviewed for multicomponent fractionation equipment and for batch stills. Various plate designs are presented from the standpoint of two-phase hydraulics and mass-transfer efficiency.

6342  Design Principles of Equilibrium Stages
Thermodynamics of fluid-phase equilibria is reviewed with emphasis on the prediction and calculation of fluid-phase densities, enthalpies, fugacities and activities. Rigorous multicomponent-multistage methods are developed to design problems in mass transfer operations with emphasis on absorption, extraction, and distillation. Computer-aided design is emphasized.
6343 Reactor Design II
Emphasis is placed on complex reactor design. Attention is devoted to chemical kinetics and catalysis as well as to the engineering aspects of both homogeneous and heterogeneous reactors. Mixing problems are discussed in terms of residence time distribution. The importance of temperature effects is stressed. 
Prerequisite: Egr 5345 or equivalent.

6348 CAD Applications
Advanced studies in computer aided design. Discipline-specific applications are provided which use the drawing analysis interface, variational geometry and other applications software package.

6349 Engineering Applications of AI/Expert Systems
An in-depth study of the effective utilization of Artificial Intelligence/Expert Systems as applied to engineering problems. Projects assigned will involve the design and development of software systems to solve discipline-specific problems using available IE languages and expert system shells. 
Prerequisite: Egr 5347.

6359 Computer Methods in Statistical Quality Control
Methods of dealing with Statistical Quality Control problems such as control charts, test, tests of hypothesis, analysis of variance, regression analysis and design of experiments will be employed using one or more software packages. Emphasis will be placed on problem definition, model selection and interpretation of output for decision making and process improvements. 
Prerequisite: A course in probability and statistics

6361 Solar Energy I
Origin, nature and availability. Heat transfer considerations. Plate collectors, energy storage and thermal performance are discussed. Applications and experimentation are covered. 
Prerequisite: Egr 537 or equivalent.

6364 Microcomputer Based Design
Registers and data manipulation, computer organization, memory, input-output, algorithmic processes, Design Application. 
Prerequisite: Logical design, or consent of instructor.

6369 Computer Methods of Engineering Optimization
Formulation, solution and implementation of optimization models such as linear programming, dynamic programming, integer programming, quadratic programming, convex programming, geometric programming and unconstrained optimization for analyzing complex systems problems in industry. One or more software packages will be used to execute the algorithms presented throughout the course. 
Prerequisite: A graduate course in operations research.

6377 Hydraulics of Environmental Systems
Hydraulic design of municipal utilities including storm water and waste water collections systems, water distribution networks and treatment plant facilities.

6388 Computer Methods of Engineering Project Management
Principles governing the effective and efficient management of engineering projects including the application of comprehensive planning, scheduling and cost estimation procedures. Utilization of various computer methods and systems will be emphasized.

6359 Computer-Aided Engineering Software
Analysis and utilization of computer software to solve engineering design problems. Applications on the CAD/CAD and various other systems will be emphasized.

651 Engineering Practice
An internship period under personal supervision. Approval must be obtained from the student's graduate committee. Usually, a formal proposal will be required. May be taken for either six or 12 hours credit per semester. Must be repeated for credit until field study is completed. Total credit: six semester hours per section.

652 Engineering Practice
An internship period under personal supervision. Approval must be obtained from the student's graduate committee. Usually, a formal proposal will be required. May be taken for either six or 12 hours credit per semester. Must be repeated for credit until field study is completed. Total credit: six semester hours per section.

659A-660B Thesis
Prerequisite: Approval of graduate advisor.

The following courses may be taken for graduate credit with augmented requirements, subject to approval by the departmental graduate advisor.
Civil Engineering Courses (CE)

411 Seminar
Discussion of ethical, professional and technical topics related to the practice of civil engineering. Presentation of oral and written reports.
Prerequisite: Senior standing.

420 Photogrammetry and Mapping
Principles of aerial photography applied to map making, route locations and ground control. Introduction to use of photogrammetry equipment, including stereoscopes and plotters.
Prerequisite: CE 210

4212 Civil Engineering Systems Design Project
Planning, design, and analysis of a civil engineering system or project; an integrated and realistic group project is utilized which involves numerous major aspects of the civil engineering profession. Presentation of oral and written reports.
Prerequisite: CE 335
Corequisites: CE 438, CE 439.

4290 Civil Engineering Systems II
Principles of system analysis utilized for solving civil engineering problems. Application of probability and statistics, numerical methods, linear programming, dynamic programming, optimization, finite elements and finite differences to the engineering design process.
Prerequisite: CE 3290 or Statistics.
Corequisites: CE 334, CE 337, CE 339.

338 Indeterminate Structures
Basic principles of structural analysis and design based upon the requirements of equilibrium and continuity. Matrix methods and the application of strain energy, slope deflection and moment distribution procedures for the analysis of frames, trusses and beams. Digital computer methods utilized. Course title and description may vary when taught as a CE elective.
Prerequisite: CE 334.

431 Hydraulics II
Continuation of CE 335-Hydraulics I emphasizing practical applications of basic fluid mechanics principles in fluid measurement, machinery, closed conduit flow, open channel flow and hydraulic transients. Presentation of oral and written reports.
Prerequisite: CE 335.

4310 Soil-Structure Interaction
Analysis of the mechanical behavior of soil-structure systems under the effect of static and dynamic loading, impact and stress wave propagation. Applications to structures supported by shallow and deep substructures, and underground structures. Computer techniques are employed. Course title and description may vary when taught as a CE elective.
Prerequisite: CE 434.

432 Management, Planning, Scheduling, and Estimating
Principles governing the effective and efficient management of engineering projects including the application of comprehensive planning, scheduling, and cost estimation procedures.
Prerequisite: Senior Standing.

433 Environmental Health Engineering
Problems of public health in rural, urban and industrial centers with water, housing, heating, cooling, ventilation, milk, food, insects and rodents. Biostatistics and public health laws, ordinances and regulations.
Prerequisite: Bio 248 or CE 331.

434 Geotechnical Engineering II
Compressibility and strength characteristics. Stress distributions, Shallow and deep foundations, earth pressure theories, retaining walls, slope stability and application of design considerations.
Prerequisite: CE 335.
Corequisite: CE 438.

435 Hydraulic Design of Municipal Utilities
Hydraulic design of municipal utilities including storm water and waste water collection systems, water distribution networks, and treatment plant facilities. Course title and description may vary when taught as a CE elective.
Prerequisite: CE 337.
Transportation Engineering
Study of highway pavements. History and development of transportation facilities. Drainage requirements. Fundamentals of highway location, design, construction and maintenance. Course title and description may vary when taught as a CE elective.
Prerequisite: Senior standing.

Reinforced Concrete Design
The design of structural concrete members based upon working stress and strength design methods. Study of standard specifications. Introduction to prestressed concrete.
Prerequisite: CE 334.

Structural Steel Design
Introduction to the design of buildings and bridge components according to standard specifications. Application of load and resistance factor and allowable stress design methods. Introduction to plastic design of steel structures.
Prerequisite: CE 334.

Electrical Engineering Courses (EE)
Communication Theory
Principles of modulation, random signal theory and network analysis, basic information theory, analysis of noise, one hour design content.
Prerequisite: EE 332.

Advanced Topics
Topics are selected on the basis of the needs of an adequate number of students. May be repeated for credit when topics vary.
Prerequisite: EE 331, 431.

Microcomputers
Introduction to assembly language programming and small computer organization. 1-1/2 hours design content.
Prerequisite: ECES 3305.

Microprocessors
Microprocessor organization, peripheral devices, systems software for small computers. 1-1/2 hours design content.
Prerequisite: EE 4306 or CS 3302.

Electric Power Systems
An introduction to electric power system analysis. Transmission line calculations, system operation, short circuit calculations. One hour design content.
Prerequisite: EE 336, 337.

Electronics III
Analog systems with semiconductor elements. Frequency response, feedback and feedforward amplifier design, power electronic devices with regulated power supplies. Two hours design content.
Prerequisite: EE 421.

Control Engineering
Transfer functions; state variables; time response; frequency response and stability.
Prerequisite: EE 332, 3301.

Instrumentation
Unified methods for the design of signal conditioning circuits between sensors and computers. Accepted practice for sensor, based microprocessor and microcomputer data acquisition and processing systems. Instrumentation amplifier circuits. Two hours design content.
Prerequisite: EE 331, 305.

Computer Aided Design
An introduction to computer aided design and experience with design software. A realistic programming project concerning design will be assigned. Intensive programming efforts and fluency in Fortran, C, or Pascal will be required.
Prerequisite: Junior standing.

Industrial Engineering Courses (IE)
Computer Applications in Industrial Engineering
Computer Aided Manufacturing—Design problems in the areas of computer numerical control, robotics and computer vision are presented. Manufacturing Control Systems are discussed as they relate to a Computer Integrated Manufacturing (CIM) environment.
Prerequisite: BASIC programming, IE 222 or equivalent, and Senior standing.
4323G Financial Analysis and Design
Prerequisite: A course in Engineering Economy.

4315 Organization and Management
The theory of organization and management. How the executive functions to achieve the organization's goals.
Prerequisite: Junior standing.

4312 Statistical Decision Making for Engineers
Analysis of data to help the engineer/manager make decisions. Evaluation of performance claims.
Prerequisite: Mth 3370 or IE 332 and Mth 3301. Junior standing in engineering.

434 Materials Science and Manufacturing Processes
Basic principles underlying the behavior of engineering materials and methods of processing these materials.
Prerequisite: IE 222, Chm 141 or equivalent.

435 Production and Inventory Control
Techniques for planning and controlling production and inventories. Modern materials management principles.
Prerequisite: Mth 3370 or IE 332, IE 330.

4351 Production and Inventory Systems
The design and operation of systems for managing production and inventories.
Not open to students majoring in engineering.
Prerequisite: Mth 234, CH 131.

437 Operations Research
An introduction to the construction of mathematical models of organizational systems to aid executives in making decisions.
Prerequisite: Mth 3370, Egr 223 and IE 3303.

4321G Engineering Data Analysis
Application of probability and statistics to engineering problems, used collection and presentation of engineering data. Fundamentals of the most commonly used discrete and continuous probability density functions and their engineering applications.

Mathematics Courses (Mth)

4302 Partial Differential Equations
Fourier series. Solution of boundary value problems including the heat equation, the wave equation, and the potential equation.
Prerequisite: Mth 241, and Mth 3301 or Mth 331.

431 Complex Variables
Complex numbers, analytic functions, complex line integrals, Cauchy integral formula and applications.
Prerequisite: Mth 241

4315 Numerical Analysis
Prerequisite: Mth 241 or Mth 331, and CS 1411, or its equivalent.

4316 Linear Programming
Theory, development and computational aspects of the simplex method; convexity; degeneracy problems; revised simplex method; transportation problems, network flow problems; industrial applications.
Prerequisite: Mth 149, Mth 233 and CS 1411.

4321 Regression Analysis
The simple linear model and the principles of least squares. Inference about slope parameter, prediction of future values, model checking, polynomial regression, multiple regression analysis, regression using matrix algebra.
Prerequisite: Mth 3370 or 438, and Mth 233.

4322 Analysis of Variance
Single sample inference, two sample inference, single factor analysis of variance, multiple comparison in ANOVA, multi-factor analysis of variance, 2p factorial experiment.
Prerequisite: Mth 3370 or 438.
433 Linear Algebra II
Vector spaces, linear transformations, matrices, determinants, Eigenvalues, Eigenvectors, canonical forms, bilinear mappings and quadratic forms.
Prerequisite: MTH 149 and 233.

437 Mathematical Theory of Probability
Calculus-based introduction to formal probability theory. Basic probability theory, independence and dependence, mean and variance, random variables, expectation, sums of independent random variables, central limit theorem. 
Prerequisite: MTH 241 and 3370.

438 Theory of Statistical Inference
A formal introduction to statistical inference, sampling theory, general principles of statistical inference goodness of fit test, regression and correlation, analysis of variance.
Prerequisite: MTH 3370.

Mechanical Engineering Courses (ME)

4311 Controls Engineering
The theory of integrated automatic controls systems with application to combustion, temperature, pressure, flow and humidity control. Industrial control systems are considered.
Prerequisite: ME 331 and ME 334.

4312 Gas Dynamics
Fundamentals of one-dimensional compressible flow. An introduction to multidimensional wave phenomena with various applications.
Prerequisite: ME 4313 or concurrent.

4313 Thermal Systems Design
Heat transfer study with emphasis on heat exchanger design, optimization of energy exchange, economics and design feasibility.
Prerequisite: ME 331, 334, 338.

4315 Thermodynamics III
Topics in applied thermodynamics selected from any of the following: Psychrometrics, combustion, equilibrium reactions, compressible flow, thermodynamic machinery and optimization of power plant and utility systems using availability analysis and/or linear programming. May be repeated for credit with consent of instructor.
Prerequisite: ME 334, ME 338, ME 4313 or concurrent.

4316 Engineering Design Project
Student research projects are planned, scheduled, designed and evaluated. Experience is gained in the execution of an engineering project and a formal technical report is required.
Prerequisite: ME 421, 4313 or concurrent with either one.

4317 Engineering Analysis II
A continuation of ME 334 with some emphasis being placed on analog methods and computer techniques in solving engineering problems.
Prerequisite: ME 334.

432 Mechanical Vibrations
The theory of vibrating systems, including kinematics or vibrations, harmonic and non-harmonic, single and multiple degrees of freedom: free and forced vibrations, with and without damping. Applications to cranks and sliders, rotating machinery, balancing, vibration isolation and absorption, and instrumentation.
Prerequisite: ME 332, ME 334 and Senior standing.

434 Internal Combustion Engines
The principles of design and analysis of various types of internal combustion engines.
Prerequisite: ME 331 and ME 336.

435 Turbomachinery
Flow problems encountered in the design of water, gas and steam turbines, centrifugal and axial-flow pumps and compressors.
Prerequisite: ME 3311 and ME 338.

438 Environmental Systems Engineering
Design of refrigeration and air-conditioning systems including selection of mechanical equipment, controls, piping and duct layout.
Prerequisite: ME 331 and ME 338.
Department of Computer Science

The Department of Computer Science offers a program of study leading to the Master of Science degree in Computer Science. Both thesis and non-thesis options are available.

Admission

Students seeking admission to this program must meet all general requirements of the College of Graduate studies as listed in the Bulletin of the College. Additional requirements are as follows:

1. In most cases, a student must have a minimum combined score of 1000 on the Verbal and Quantitative sections of the GRE and a minimum grade point average of 3.0 on the last 60 hours of undergraduate course work.

2. Students with minor deficiencies may be admitted to the program if these deficiencies can be removed within approximately one long semester. However, major deficiencies must be removed before a student is admitted to the degree program.

Degree Requirements

A. Core Courses

Students in the masters program in Computer Science are required to establish competence in several areas considered basic to the field of Computer Science. The Core Requirement consists of the indicated number of courses in each field listed below.

<table>

8 Courses (24 semester hours)

B. Option I (Thesis)

1. Completion of the core requirements listed above with at least a “B” (3.0) average. One “C” is permitted in this area if it is balanced by an “A” in one other course.

2. Completion of three additional hours in graduate level courses* OR completion of an approved minor of nine hours with at least a “B” (3.0) average. One “C” is permitted in this area if it is balanced by an “A” in one other graduate level course.*

4. Successful oral defense of the thesis. If failure occurs, the defense may be repeated. A second failure will cause the student to be dropped from the degree program in Computer Science.

C. Option II (Non-thesis)

1. Satisfactory completion of the depth and breadth requirements.

2. Completion of the core requirements listed above with at least a “B” (3.0) average. One “C” is permitted in this area if it is balanced by an “A” in one other graduate level course.*

3. All non-thesis students must take and satisfactorily complete CS 5340. This course consists primarily of a significant research project and the submission of a written professional report.
4. Completion of an additional 9 hours in graduate level Computer Science courses OR the completion of an approved minor of nine hours, with additional hours of graduate level courses* in Computer Science. One "C" is permitted in this area if it is balanced by an "A" in one other graduate level course.*

5. Successful completion of an eight hour comprehensive examination, which may be written, oral, or a combination of both upon determination of the Computer Science Faculty. This comprehensive exam will cover the eight core courses the student actually takes. Failure to pass this examination in two attempts will result in the student being dropped from the degree program in Computer Science.

*NOTE: All courses for the Master of Science in Computer Science must be 500 level or above; 400 and 400C courses may not be applied toward degree requirements.

Students are expected to submit scores from the advanced Computer Science section of the Graduate Record Examination during their last semester of course work toward the degree.

Graduate Faculty

Associate Professor John B. Harvill
Computer architecture, microcomputer systems, database systems, programming languages, computer science education

Associate Professor Donald Jordan
Software engineering, database management systems, aerospace engineering, information systems

Professor Ronald S. King
Conceptual modeling, database design, knowledge representation, cluster/classification analysis, computer science education

Associate Professor Hikyoo Koh
Artificial intelligence, software testing, language translation, computational complexity analysis

Assistant Professor Lawrence Osborne
Parallel processing, operating systems, distributed systems

Assistant Professor Wen-Ran Zhang
Computer engineering, artificial intelligence

Computer Science Courses

5301 Computer Systems for Educational Application
Functional units of computers including both hardware and firmware; software analysis, design and evaluation of computing configurations for educational applications; cost estimation techniques for both academic and administrative applications. (Not for Computer Science majors) 
Prerequisite: Consent of Department Chair.

5310 Operating Systems and Computer Architecture II
Study of concurrent processes, support structures for modular programming, resource allocation and protection, pipelining and parallelism, telecommunications, networks and distributed processing. 
Prerequisite: CS 4302 or its equivalent.

5311 Database Management Systems Design
Advanced file structures, database concepts including relational, hierarchical and network logical models; data description and manipulation languages, relational data base design. 
Prerequisite: CS 3107, CS 4306

5312 Artificial Intelligence
Introduction to basic concepts and techniques of artificial intelligence and to insights into active research and application areas. Emphasis is placed on representation methods and strategies in both heuristic and algorithmic approaches. Students are expected to implement a small intelligent system of their design in LISP. 
Prerequisite: Consent of Department Chair.

5313 Algorithm
Topics on what can and cannot be proven about computational complexity including algorithm design methodologies. 
Prerequisite: Consent of Department Chair.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
<th>Prerequisite</th>
</tr>
</thead>
<tbody>
<tr>
<td>5314</td>
<td>Software Design and Development</td>
<td>Program development techniques with structured methodology, structured design, the Jackson method, top-down development, structured programming, programming style, program testing and debugging, and other current techniques.</td>
<td>Consent of Department Chair.</td>
</tr>
<tr>
<td>5315</td>
<td>Theory of Programming Languages</td>
<td>Theoretical aspects of parsing context-free languages, translation specifications, and machine-independent codes, finite state grammars, and regular expressions, push-down automata, recursive descent.</td>
<td>CS 4307 or its equivalent.</td>
</tr>
<tr>
<td>5319</td>
<td>Compiler Construction</td>
<td>An introduction to the major methods used in compiler implementation. The parsing methods of LL(k) and LR(k) are covered as well as finite state methods for lexical analysis, symbol table construction, internal forms for a program, run time storage management for block structured languages, and an introduction to code optimization.</td>
<td>CS 4307 or its equivalent.</td>
</tr>
<tr>
<td>5320</td>
<td>Formal Methods in Programming Languages</td>
<td>Data and control abstractions are considered. Advanced control constructs including backtracking and non-determinism are covered. The affects of formal methods for program description are explained. The major methods for proving programs correct are described.</td>
<td>Consent of Department Chair.</td>
</tr>
<tr>
<td>5324</td>
<td>Computer Communication Networks and Distributed Processing</td>
<td>A study of networks of interacting computers. The problems, rationales, and possible solutions for both distributed databases will be examined. Major national and international protocols including SNA, X.21, and X.25 will be presented.</td>
<td>Consent of Department Chair.</td>
</tr>
<tr>
<td>5328</td>
<td>Microcomputer Systems and Local Networks</td>
<td>A consideration of the uses and organization of microcomputers. Typical eight or 16 bit microprocessors will be described. Microcomputer software will be discussed and contrasted with that available for larger computers. Each student will gain hands-on experience with a microcomputer.</td>
<td>Consent of Department Chair.</td>
</tr>
<tr>
<td>5330</td>
<td>Theory of Computation</td>
<td>A survey of formal models for computation. Includes Turing Machines, partial recursive functions, recursive and recursively enumerable sets, the recursive theorem, abstract complexity theory, program schemes, and concrete complexity.</td>
<td>Consent of Department Chair.</td>
</tr>
<tr>
<td>5331</td>
<td>Information System Design</td>
<td>A practical guide to Information System Programming and Design. Theories relating to module design, module coupling, and module strength are discussed. Techniques for reducing a system's complexity are emphasized. The topics are oriented toward the experienced programmer or systems analyst.</td>
<td>Consent of Department Chair.</td>
</tr>
<tr>
<td>5332</td>
<td>Information Storage and Access</td>
<td>Advanced data structures, file structures, databases, and processing systems for access and maintenance. For explicitly structured data, interactions among these structures accessing patterns, and design of processing/access systems. Data Administration, processing system life cycle, system security.</td>
<td>CS 4305 and CS 4306 or other equivalents.</td>
</tr>
<tr>
<td>5333</td>
<td>Distribution System Analysis</td>
<td>A consideration of the problems and opportunities inherent in distributed databases on a network computer system. Includes file allocation, directory systems, deadlock detection and prevention, synchronization, query optimization, and fault tolerance.</td>
<td>Consent of Department Chair.</td>
</tr>
<tr>
<td>5335</td>
<td>Computer Graphics</td>
<td>An overview of the hardware, software, and techniques used in computer graphics. The three types of graphics hardware: refresh, storage, and raster scan are covered as well as two-dimensional transformations, clipping, windowing, display files, and input devices. If a raster scan device is available, solid area display, painting and shading will be covered. If time allows, three-dimensional graphics may be included.</td>
<td>Consent of Department Chair.</td>
</tr>
</tbody>
</table>
5336 Modeling and Simulations 3:3:0
A study of the construction of models which simulate real systems. The methodology of solution should include probability and distribution theory, statistical estimation and inference, the use of random variates, and validation procedures. A simulation language should be used for the solution of typical problems.
Prerequisite: Consent of Department Chair.

5339 Information System Analysis 3:3:0
Methods and considerations for planning, organizing, implementing, and evaluating information systems; current systems analysis tools and techniques are presented.
Prerequisite: Consent of Department Chair.

5340 Special Topics 3:3:0
Special topics in all areas of Computer Science with emphasis on topics not covered in other courses. May be repeated for credit when topics vary.
Prerequisite: Consent of Department Chair.

5402 Microcomputers I 4:3:3
Architecture, hardware components, languages, operating systems, software systems and utilization of microcomputers.
Prerequisite: Consent of Department Chair.

5403 Microcomputers II 4:3:3
Continuation of CS 5402.
Prerequisite: Consent of Department Chair.

569A-669B Thesis 3:3:0
Thesis.
Prerequisite: Consent of Department Chair.

Department of Mathematics

The Department of Mathematics offers a program of study leading to the Master of Science degree in Mathematics. It is designed to train students either for a professionally oriented career in industry or in government, for further graduate work in mathematics or to provide depth and breadth in Mathematics Education.

Opportunities in the areas listed above, for students with a Master of Science in Mathematics are numerous. Such opportunities exist in all areas of applied mathematics including computer science, statistics, operations research, numerical analysis, mathematical physics, administration/management science, engineering, secondary and elementary school teaching. These supporting areas are just a sample of excellent job opportunities for the graduate.

The department spends considerable time advising students in the Master's program. Once a student is admitted, the student's advisor will individually tailor the student's program to meet the needs of the supporting areas mentioned above or other areas of interest to the student. Consequently, students with a Bachelor's degree in Mathematics, Computer Science, Engineering, any of the sciences, or Secondary Education will find appropriate opportunities in this M.S. program. Students will find a wide variety of courses listed in the program to make the above supporting areas available to them.

Those seeking admission to this program must satisfy the requirements as indicated below.

Admission to the Program

In order to be admitted to the Graduate Degree Program, a student must:
1. Meet the general requirements as set forth in this catalog for admission to the College of Graduate Studies.
2. Successfully complete 27 semester hours of undergraduate mathematics including courses equivalent or comparable to the following: linear algebra, differential equations, advanced calculus, modern algebra and statistics.
Final approval as to what course work is acceptable toward admission to the graduate degree program lies with the graduate advisor and the department head. A student may be admitted conditionally to the graduate degree program, but is required to remove any deficiencies in undergraduate mathematics.

Admission to Candidacy
In order to be admitted to candidacy a student must:
1. Successfully complete 12 semester hours of approved graduate work in mathematics.
2. Remove all deficiencies in mathematics designated by the Graduate Advisor and the Department Chair.
3. Satisfy the general Admission to Candidacy requirements as set forth in this catalog.

Completion of the Program
In order to complete the M.S. program a student must:
1. Take the Advanced Mathematics section of the Graduate Record Examination and have the score reported to the Graduate Advisor.
2. Complete one of the two following programs:
   a. Complete at least 24 hours of graduate course work, write a thesis acceptable to the student's graduate committee, and satisfactorily defend the thesis orally before the graduate committee.
   b. Complete at least 36 hours of graduate course work and satisfactorily complete an examination over the course work before the student's graduate committee.
3. Include at least three courses from among the following:
   - Mth 531 Theory of Functions of Real Variables
   - Mth 532 Modern Algebra
   - Mth 534 Topology
   - Mth 5310 Numerical Analysis or Mth 4315G Numerical Analysis
   - Mth 5311 Complex Variables or 431G Complex Variables

Graduate Faculty

Assistant Professor B. Joanne Baker
Topology, analysis

Professor John R. Cannon
Partial differential equations, applied mathematics

Assistant Professor Paul Chiou
Statistics, reliability theory

Associate Professor Michael A. Laidacker
Topology, applied mathematics

Associate Professor Alec Matheson
Functional and numerical analysis

Assistant Professor Andreev V. Valentin
Complex analysis

Mathematics Courses (Mth)

531 Theory of Functions of Real Variables
Analytical functions, pathological functions, set functions, Riemann integral, measure theory, Lebesque integral, Riemann-Stieljes and Lebesque-Stieljes integral.
Prerequisite: Graduate standing and Mathematics 338.

532 Modern Algebra
Groups, rings and the theory of fields. The theory of fields includes the study of subfields, prime fields, algebraic fields extensions and Galois fields.
Prerequisite: Graduate standing and Mathematics 335 or its equivalent.

534 Topology
Topological spaces, metric spaces, compact spaces, embedding, Urysohn’s lemma and homotopy.
Prerequisite: Graduate standing and Mathematics 338.
535 Introduction to Advanced Analysis
The Riemann mapping theorem, prime number theorem, functions of finite order, Turan's proof of Fabry gap theorem, other topics as time permits.
Prerequisite: Graduate standing and Mathematics 431.

537 Methods of Applied Mathematics
The Dirichlet problem, solution of boundary value problems, the Bergman Kernel function, method of the minimum integral, applications of conformal mapping.
Prerequisite: Graduate standing and Mathematics 431.

538 Fourier Series
Expansion of functions in Fourier series, orthogonal sets of functions, orthonormality, Fourier integrals. Applications.
Prerequisite: Graduate standing and Mathematics 331 or 3301.

5391 Operational Mathematics
Ordinary differential equations, the Laplace Transform, elementary properties; inverse transforms, applications of the Laplace Transform to ordinary differential equations.
Prerequisite: Graduate standing and Mathematics 331 or 3301.

5393 Modeling Theory
Study of techniques of building and applying mathematical models. Applications in biology, ecology, economics and sociology.
Prerequisite: Graduate standing and Mathematics 331 or 3301.

5394 Functional Analysis
Prerequisite: Graduate standing and Mathematics 338.

5310 Numerical Analysis
Solutions of ordinary and partial differential equations, approximation of functions, quadrature, and splines.
Prerequisite: Graduate standing, Mathematics 4315 or its equivalent, and some knowledge of computer programming.

5311 Complex Variables
Conformal mapping and analytic continuation, calculus of residues, and applications.
Prerequisite: Graduate standing and Mathematics 431 or its equivalent.

5315 Finite Element Analysis
Application of the finite element method to steady-state and time-dependent problems and to the theory of elasticity, fluid and axisymmetric field problems. Higher-order elements.
Prerequisite: Graduate standing, Mathematics 331 or 3301, and some knowledge of computer programming.

5321 Numerical Linear Algebra
Numerical solution of linear systems; direct and iterative techniques including LU and Cholesky decompositions. Algebraic eigenvalue problems, Householder's reflections, Givens rotations and the QR method.
Prerequisite: Mathematics 233, Programming language.

5320 Topics in Probability and Statistics
Topics include Markov Chains, Stochastic processes, Stochastic Differential Equations, Sampling Theory.
Prerequisite: Graduate standing and consent of instructor.

5327 Computer-Assisted Mathematical Problem Solving III
Computers will be utilized to solve advanced numerical problems. Topics will be selected from finite elements analysis, numerical linear algebra, fluid and heat flow, shock waves, turbulence, strange attractors, solutions of PDE's, and models of chaos.
Prerequisite: Math 4345 or equivalent; consent of instructor.

5328 History of Mathematics
Historical origin and development of mathematical concepts. The lives and achievements of great mathematicians.
Prerequisite: Graduate standing and Mathematics 335 or 338.

5330 Enrichment Topics in Mathematics
A potpourri of important mathematical ideas not normally covered in other courses.
Prerequisite: Graduate standing and Mathematics 335 or 338.

5331 Special Topics
Advanced topics in mathematics to suit the needs of individual students. Course may be repeated for a maximum of six semester hours credit when the topic varies.
Prerequisite: Graduate standing and consent of instructor.
3332 Topics in Geometry
Topics include Differential Geometry, Algebraic Topology, Homotopy Theory, Non-Euclidean Geometry and Advanced Euclidean Geometry.
Prerequisite: Graduate standing and consent of instructor.

3333 Topics in Number Theory
Topics include Prime Number Theory, Irrational Number Theory, Analytic Number Theory, Diophantine Equations and Algebraic Number Theory.
Prerequisites: Graduate standing and consent of instructor.

3334 Seminar in Problem Solving
Methodology of problem solving, extreme cases, similarity, continuity, generalizations and transformations.
Prerequisite: Graduate standing and Mathematics 335 or 338.

3335 Topics in Mathematics
Topics include Mathematical Logic, Group Theory, Field Theory, Approximation and Interpolation, Game Theory and Calculus of Variations.
Prerequisite: Graduate standing and consent of instructor.

669A-699B Thesis
Prerequisite: Approval of graduate advisor.

The following 400 level mathematics courses may be taken for graduate credit when course requirements are augmented, subject to approval by the graduate advisor in the degree program.

4202 Partial Differential Equations
Fourier series, Solution of boundary value problems including the heat equation, the wave equation, and the potential equation.
Prerequisite: Mth 241, and Mth 3301 or Mth 331.

4203 Vector Analysis
Vector algebra, vector calculus of three dimensional vector fields (gradients, curl, divergence Laplacian) Green’s, Gauss’ and Stokes’ theorems.
Prerequisite: Mth 241

431 Complex Variables
Complex numbers, analytic functions, complex line integrals, Cauchy integral formula and applications.
Prerequisite: Mth 241.

4315 Numerical Analysis
Prerequisite: Mth 241 or Mth 331, and CS 1411, or its equivalent.

4316 Linear Programming
Theory, development and computational aspects of the simplex method; convexity; degeneracy problems; revised simplex method; transportation problems, network flow problems; industrial applications.
Prerequisite: Mth 149, Mth 238 and CS 1411.

433 Linear Algebra II
Vector spaces, linear transformation, matrices, determinants, Eigenvalues, Eigenvectors, canonical forms, bilinear mappings and quadratic forms.
Prerequisite: Mth 149 and 230.

438 Theory of Statistical Inference
A formal introduction to statistical inference, sampling theory, general principles of statistical inference, goodness of fit test, regression and correlation, analysis of variance.
Prerequisite: Mth 3370.

The following 500 level engineering courses are also applicable to the Master of Science degree in Mathematics when approved by the departmental graduate advisor.
Egr 5303 Regression Analysis
Egr 5304 Nonlinear Programming
Egr 5305 Reliability
Egr 5316 Operations Research
Egr 5319 Design of Experiments
WORKING WITH ARTISTS in the commercial field offers graduate students in the College of Fine Arts opportunities to combine academic studies with working experiences.
College of Fine Arts and Communication

The College of Fine Arts and Communication offers graduate programs of study leading to the Master of Science degree in Speech with majors in public address, speech-language-pathology or audiology; a Master of Science degree in Deaf Education and the Master of Music and Master of Music Education degrees. The college also supports some Master of Education degrees with courses from the Department of Art. Persons seeking admissions to these programs must meet the requirements specified by the College of Graduate Studies and the individual department. Admission to a degree program is not an admission to candidacy. Each master's degree program is designed to help students deepen and expand their knowledge and provide them with the opportunity to develop skills and concepts which may be applied to the professional objectives associated with their fields of study.

Department of Art

The Department of Art offers a Master of Arts in Visual Arts. Two tracks are available in either art history or one of eight studio art areas. Either track is a preparatory degree program designed to prepare students for admission to terminal degree plans in either Art History or Studio Art. Also, this degree will significantly strengthen the professional qualifications of art teachers already in schools and expand cultural/aesthetic appreciation of art.

Students seeking admission to the art program must meet the general requirements for admission outlined in this bulletin. Undergraduate course work may be required if applicant has not earned a Bachelor of Fine Arts degree and the entrance portfolio does not reflect a quality adequate for graduate study.

Special Requirements:

Candidates for the Master of Arts degree in Studio Art must submit a slide portfolio to the Department of Art which displays their competency in the media they intend to pursue for the degree. Students pursuing a degree in Art History must submit their undergraduate GPA, a term paper written while pursuing a Bachelor degree, or some other indication of writing ability. A graduate faculty committee will review applications and portfolios. Applicants will be accepted according to the quality and maturity of work. Applicants must also, submit three letters of recommendation from undergraduate professors and a letter of intent stating professional objectives.

Degree Requirements:

Track One:
The Master of Arts Degree in Studio requires 36 semester hours, including 15 hours in the area of specialization, 9 hours of core courses, 6 hours of electives, and 6 hours in thesis. Specialization may be in Ceramics, Drawing, Painting, Photography, Printmaking, Sculpture or Visual Media. A core program for studio arts will be comprised of 3 hours of Art History, 3 hours of Fine Arts Seminar and 3 hours of Current Issues and Trends.

Track Two:
The Master of Arts Degree in Art History requires 36 semester hours, including 15 hours in art history, 9 hours of core courses, 6 hours of electives and 6 hours in thesis. The specialization in art history will require alternative curriculum studies. Methodology of Art History (Art 5308), a foreign language readings exam and three hours of survey of the literature of a foreign language will be required. Also, electives in the art history curriculum may be in literature, philosophy or history at 400 level and above.
Graduate Faculty
Associate Professor James K. Hill  
Studio  
Associate Professor Lynne Lokensgard  
Art History  
Associate Professor Phil Fitzpatrick

Studio  
Wallace Chair/Professor Keith Carter  
Visual and Performing Arts

Art Courses
The Department of Art offers the following graduate courses in support of the Master of Education degree programs in Elementary Education and Supervision.

5301 Issues and Trends of Contemporary Art  
A paradigm study of current values, practices and beliefs of the art profession.  
3:3:0

5305 Problems in Photography  
Advanced research in photographic technique and photography as an art medium. May be repeated for credit.  
3:3:0

5308 Methodology in Art History  
Introduction to methods of art historical research. Special research projects will be required.  
3:3:0

5318 Seminar in Art History, Art Criticism and Aesthetics  
Topical research in a variety of subjects from the areas of Art History, Criticism and Aesthetics. May be repeated for credit.  
3:3:0

5323 Problems in Visual Media  
Experimental research in the uses of computers as image making tools. Development of personal imagery through electronic media. May be repeated for credit.  
3:3:0

5325 Problems in Drawing  
Independent directed study of drawing. May be repeated for credit.  
3:3:0

5326 Problems in Painting  
Directed independent research leading to the development of a personal direction and statement within painting. May be repeated for credit.  
3:3:0

5328 Study in Late 19th Century Art in France  
Emphasis will be placed on Symbolism and related styles. A special research project or paper will be required.  
3:3:0

5338 Study in Renaissance Art History  
A study of 15th and 16th century art in the western world. A special research project or paper will be required.  
3:3:0

5348 Study in 18th and 20th Century Art  
The foundations of abstraction in European art from Neoclassicism through Surrealism. A special research project or paper will be required.  
3:3:0

5350 Graduate Study in American Art  
The development of painting, sculpture and architecture in the United States from colonial times to the present. A special research project or paper will be required.  
3:3:0

5355 Problems in Printmaking  
Independent research and experiment in methods of printmaking. May be repeated for credit.  
3:3:0

5358 Study in Contemporary Art  
A historical and critical analysis of painting, sculpture and architecture in Europe and the Americas from 1900 to the present. A special research project or paper will be required.  
3:3:0

5378 Study in Primitive Art  
A study of the development and nature of primitive art. A special research project or paper will be required.  
3:3:0
5385 Problems in Sculpture
Independent research and experimentation towards the development of a personal direction and statement in sculpture. May be repeated for credit.

5386 Problems in Ceramics
Independent research and experimentation with technical and aesthetic issues in ceramics. May be repeated for credit.

5388 Study in Modern Architecture and Sculpture
The development and evolution of modern architecture and sculpture from the late 19th century to the present. A special research project or paper will be required.

5395 Graduate Studio Art
Individual study at the graduate level of a specific area within the visual arts field. May be repeated for credit when the subject varies.

5398 Study in the History of Photography
The development and evolution of photography from its invention in 1839 to the present. A special research project or paper will be required.

Department of Communication

The Department of Communication offers Master of Science degrees in Speech and in Deaf Education. The Master of Science degree in Speech encompasses the major field of public address, theatre, audiology or speech pathology. Students seeking admission to the public address program must meet the general requirements for admission outlined in this catalog. If a student desires entrance to graduate study in audiology, deaf education or speech pathology they must obtain a GRE verbal/quantitative minimum score total of 650 with neither verbal nor quantitative scores being less than 425. An exception to the existing GRE requirements as outlined in this bulletin is available for congenitally or prelingually deaf individuals who wish to major in Deaf Education if they have at least a severe hearing loss across the speech frequencies for their better ear and if they must rely primarily upon a visual-verbal system of communication. An undergraduate cumulative grade point average of 2.5 on a four-point scale and an IQ equivalent score of 120 on the Raven Progressive Matrices Test may be accepted in lieu of the GRE requirement for those individuals.

Specializations in Public Address or Theatre

The programs of public address and theatre offer the benefits of a small program during graduate study. Small student faculty ratios allow a maximum of personal involvement and individual guidance. Small classes allow a maximum of flexibility in program design for greater specialization and expertise during degree training. For information regarding either program, contact, Dr. Olen T. Pederson, Box 10050 Lamar Station, Beaumont, TX 77710.

Specializations in Speech Pathology/Audiology/Deaf Education

The graduate program in Deaf Education is accredited by the Council on Education of the Deaf and the Speech Pathology and Audiology programs are accredited by the American Speech, Language and Hearing Association. These programs and Lamar's Speech and Hearing Center have been designated as comprising one of several strategic areas in the University designed to become a center of national prominence.

The candidate for the Master of Science degree in any one of the above areas of specialization must meet all the the college of Graduate Studies general degree requirements as listed in this catalog. The candidate must complete a minimum of 36 semester hours, which may include six semester hours of electives, and obtain a minimum of 250 supervised clock hours of clinical experience. Majors in Speech Language Pathology or Audiology must obtain a total of at least 375 clock hours of clinical experience combining
graduate and undergraduate work. A thesis program is available with approval of the Communication Disorders faculty which may be substituted for the six hours of electives.

Students who have completed their Bachelor's degree at Lamar in one of the above areas will have completed the undergraduate core curriculum and are prepared to initiate the graduate program if they meet the minimum entrance requirements of the Department and College of Graduate Studies. Other student's undergraduate preparation will be reviewed by a committee of the graduate faculty of the Communication Disorders Program. Students admitted to the graduate program with specific curricular deficiencies will be expected to remove the deficiencies before being admitted to candidacy. The criteria for student/faculty ratios as established by the American Speech, Language and Hearing Association limit the graduate admissions available but individual decisions for admission will be made based on: (1) student's appointment available; (2) the student's undergraduate GPA; (3) the student's GRE scores; (4) the student's undergraduate curricular preparation; and (5) the student's letters of recommendation.

Students completing the graduate programs in Speech Pathology or Audiology will be eligible for membership in the American Speech, Language and Hearing Association and will have completed the academic and supervised clinical practicum requirements for the Certificate of Clinical Competence (CCC). These students also will have completed the academic and clinical requirements for licensure in Audiology or Speech Pathology in Texas and for other states requiring licensure. A student wishing to practice Audiology or Speech Pathology in the public schools does not have to complete additional requirements as the Texas Education Agency in 1984 determined professional licensure to be the credential of choice.

Students completing the Deaf Education graduate program will be eligible for national certification in Deaf Education (CED) but certification by the Texas Education Agency to teach as a deaf educator in the public schools may require additional curricular preparation. Student teaching (a requirement for teacher certification in Texas) may be completed during the period of study but may not be taken for graduate credit or counted as part of the master's degree curriculum.

Students who wish to pursue professional credentials in two of the three professional areas to develop dual-certification credentials may do so with the approval of the Head of the Communications Department and the Director of Communication Disorders. This combined program of study will lead either to dual ASHA CCC credentials and state licensure in Speech Pathology and Audiology or will lead to ASHA certification and state licensure in either speech pathology or audiology and CED certification and Texas Education Agency certification in Deaf Education. Completion of these programs requires an extended amount of graduate study in order to meet both the academic and clinical training requirements. Students frequently complete two Master's degrees as they pursue dual certification.

Students interested in obtaining information about the Communication Disorders programs should contact Dr. Randolph Deal, Box 10050 Lamar Station, Beaumont, TX 77710 (409) 880-8170.

**Professional Certification Requirements of the American Speech, Language and Hearing Association (including Undergraduate Work)**

The Certificate of Clinical Competence in Speech Pathology or Audiology requires the completion of 60 semester hours of academics including 18 hours in professional basics and 42 hours in the management of disorders of communication. Of these 42 hours, 24 hours must be in courses in either Speech Pathology or Audiology and six hours must be in courses acceptable toward a graduate degree. Thesis hours may not be included. Certification also requires 300 hours of clinical practicum verified by a CCC supervisor.
Beginning Jan. 1, 1994, all graduate coursework and clinical practica must be obtained from an ASHA ESB accredited institution in the professional area of specialization. Academic requirements for ASHA certification also will be increased, as of Jan. 1, 1993, to include 15 more academic hours than currently are required. Six of these must be within the specialization bringing the specialization total to 21 hours. Thirty of the 36 hours in professional academia that will be required must be graduate hours. Undergraduate preparation will be increasingly important to the developing professional as a result of these changes. The audiology or speech-language pathology graduate student at Lamar University should consider that it may be necessary after 1993 to complete academic hours beyond the usual total of hours for the Master's degree to complete their ASHA certification requirements.

### Graduate Faculty

- **Associate Professor Joan Andrews**
  - Deaf education
- **Associate Professor Mary Alice Baker**
  - Speech communications
- **Assistant Professor James Bethel**
  - Mass communication
- **Associate Professor Randolph Deal**
  - Deaf education
  - Speech pathology
- **Clinical Instructor Mary Dobson**
  - Speech pathology
- **Instructor Ramon Gonzales**
  - Deaf education
- **Assistant Professor Adele D. Gunnarson**
  - Audiology
- **Assistant Professor Gabriel Martin**
  - Deaf education
- **Professor Robert D. Moulton**
  - Deaf education; speech pathology
- **Professor Olen T. Pederson**
  - Audiology, speech pathology
- **Clinical Instructor Annette Powell**
  - Speech pathology and rural communication disorders program
- **Associate Professor Sharaf Rehman**
  - Mass communication
- **Associate Professor Lane Roth**
  - Communication
- **Assistant Professor Marshall M. Smith**
  - Audiology
- **Associate Professor Howard F. Wilson**
  - Speech pathology

Anatomy, physiology and neurobiology of the human nervous system.
Theory and treatment for organic speech disorders of neurologic origin.
Nature, evaluation and treatment of fluency disorders.
Functional and organic voice disorders, diagnosis and treatment.
Nature, evaluation and treatment of speech and language disorders of the severely impaired.
Evaluation and counseling procedures in communication disorders.
Assessment and intervention procedures for preschool and school age children with language disorders.
The normal process of aging and the associated problems including speech, hearing and language disorders.
Advanced diagnostics and therapy. May be repeated for credit, and must be taken each semester.
531 Advanced Public Relations
Theory, research and contemporary problems in corporate or institutional communication relations.

5311 Instructional Methods in Education of Deaf Children

5312 Sign Language IV
Advanced sign language including American Sign Language (ASL) and interpreting.

5313 Speech Development in the Hearing Impaired
Speech for the young hearing handicapped, home training and therapy plans.

5315 Language for the Deaf
Language development theory applied to the hearing impaired.

5316 Advanced Language for the Deaf
Language development and correction in the older deaf child and adult.

5318 Special Audiometric Tests
Test batteries for peripheral vs. central site of lesion, non-organicity, electrophysiological assessment.

5319 Bone Conduction and Masking
Test procedures for determining individual ear status, includes impedance audiometry.

5320 Pediatric Audiology
Hearing evaluation in the young patient, method and theory.

5322 Small Group Processes
Theory, research, and analysis of contemporary problems in group relations, structure, and communication.

5322 Medical Audiology
Study of otologic pathology and influence upon auditory/vestibular systems.

5323 Electrophysiological Assessment of Hearing
Current electrophysiological audiometric assessment; includes theory, instrument, techniques and procedures.

5324 Advanced Hearing Aids
Pros and cons of amplification theory and practice.

5325 Advanced Directing
Theory and problems in directing plays of different periods and styles including musical comedy.
Prerequisite: The 333 or equivalent.

5326 Psychology of Deafness
Psychological, personal and social impact of deafness.

5327 Advanced Auditory Rehabilitation
Speech reading, auditory training, amplification and counseling for the visually impaired.

5328 The Multi-handicapped With Hearing Disorders
Prevalence, demographics and etiologies of hearing disorders with other handicaps (blindness, motor, emotional, mental or orthopedic). Includes methods, curricula and materials for assistance.

5329 Law and The Hearing Handicapped
Legislative and judicial decisions that influence educational programs for the hearing impaired/deaf.

533 Organizational Communication
Theory, research, and problems in the application of communication processes and systems in organizations.

5331 Organizational Communication
Application of theory through field analysis of communication processes and systems.

5340 Studies in Modern Theater
Trends in theater production, theory, practice and techniques from Adolph Appia to the present.
Prerequisite: The 233 or equivalent.

534 Message Analysis
Analysis, interpretation, and design of individual and group messages particularly in business settings.

5341 Seminar in Oral Interpretation
History and contributions of oral interpretation to the field of communication, literary analysis, rhetorical principles and performance skills.

5346 Dramatic Criticism
Theories and criteria of dramatics from Classical Greek period to the present.

535 Individual Study
Independent study of special problems in disorders of communication. May be repeated once for credit.
Communication Courses (Com)

430 Communication Problems and Projects 3:3:3
Problems analyzed and evaluated under individual guidance of faculty. Course may be repeated for credit two times. Consent of faculty member required prior to registration.

431 Laws and Ethics of the Mass Media 3:3:0
A study of the responsibilities of the media, including ethical responsibilities to news sources, persons in the news, readers and employers and legal rights and restrictions.
Prerequisite: Com 131, 221 and 234 with a grade of "C" or higher.

432 History and Principles of American Journalism 3:3:0
The growth of modern newspapers, with emphasis on important persons in American journalism and the influence of their publications on the history of the United States.

433 Mass Communication and Society 3:3:0
Analysis of impact of mass communication on society.

435 Broadcast News 3:2:3
Study and practice in developing news for broadcasting. Various types of news material, including the documentary, its procurement and presentation.
Prerequisite: Com 133, 338, and 339 with a grade of "C" or higher.

4381 Print Advertising 3:2:3
A study of advertising, including copy writing, type selection, layout and design for print media.
Prerequisite: Com 131 and 133 with a grade of "C" or higher.

4381 Advanced Television Production 3:2:3
Seeks to develop professional competence in television production of news, commercials, documentaries and special programs.
Prerequisite: Com 338 and 339 with a grade of "C" or higher.

Speech Courses (Spc)

439 Problems and Projects in Communication Disorders 3:4:0
These problems are discussed and analyzed through discussion and research. Each student elects a project or problem on which he/she does extensive research and presents a report to the department faculty.

4391 Fluency, Voice, and Organic Disorders 3:3:0
Advanced speech pathology: introduction to specific communication disorders, diagnostic procedures and therapy programs.

4392 Advanced Audiology 3:3:0
Hearing evaluation procedures, clinical evaluation techniques and instrumentation.

4393 Clinical Practicum 3:3:0
Introduction to clinical practice in speech pathology, audiology and deaf education. This course may be repeated for clinical clock hour accumulation.

4395 Manual Communication III 3:3:0
Expanded American Sign Language for the Deaf.

4396 Literacy and Deafness 3:3:0
The deaf person as a reader and a writer.
432  Public Relations
   Theory, principles, and practice of public relations.
   Prerequisite: Com 133, 234 and 338 or permission of instructor.

4324  Non Verbal Communication
   Theory, research, analysis and practice in non verbal communication.

4326  Cognition/Socialization and Deafness
   Cognitive, linguistic and social development of deaf individuals from infancy to adulthood.

433  Organizational Communication
   Theory, principles, and practice of communication within organizations.
   Prerequisite: SPC 232 and 334 or instructor's permission.

434  Persuasion
   The psychological and emotional principles involved in influencing individuals and groups. An analysis and practice
   with the speech devices and techniques in effectively motivating audience reaction.
   Prerequisite: SPC 131 and 238 or instructor's permission.

4341  Advanced Interviewing
   Study of modern communication and related research as applied in business and professional interviews.

4381  Rhetoric of Social Movements
   Analysis of the rhetoric of selected social movements in American history.

439  Rhetoric and Public Address
   A study and analysis of some of the world's great speeches with application of the principles to original speeches
   of special types.

Theater Courses (The)

430  Creative Communication
   This is a process oriented approach to creative learning through creative communications. It is of special value to
   the communication of information in or out of the classroom at any age level.

431  Problems and Projects in Theater
   Students will perform activities in one of the following areas: acting, directing, producing, designing and con-
   structing costumes and stage settings for the school theater.

432  Advanced Scene Design
   Advanced study of the history and development of scene design.
   Prerequisite: Theatre 332

433  Theatre Management and Public Relations

434  Contemporary Dramatic Literature
   Study and analysis of dramatic literature and playwrights from their to the present.
   Prerequisite: Theatre 334

435  Costume Design
   Advanced study of principles and practices of costume design. Emphasis on drafting and historical accuracy.
   Prerequisite: Theatre 332

436  History of Theater II
   A survey of theater from the Restoration to the present day.
   Prerequisite: Theatre 336

4360  Musical Comedy
   A laboratory course providing background study and practical work in the field of musical comedy, including
   participation in the production of a full production. Open by audition or by consent of the instructor to students
   from all departments who are interested in acting or technical work in the theater, especially as applied to musical
   comedy. May be repeated for credit up to six hours.

437  Acting IV
   Detailed study of period styles and techniques for acting.
   Prerequisite: Theatre 337

4371  Directing Secondary School Dramatic Activities
   Principles involved in directing activities in secondary schools. Practical experience with workshops constitutes
   part of this course.

438  Advanced Directing
   Principles and practices of play directing.
Department of Music

The Department of Music offers the following graduate degrees: the Master of Music in Performance and the Master of Music Education. These degrees are designed to help performers and music educators improve skills and develop new concepts which may be applied to their particular fields of endeavor. Persons seeking admission to these degree programs must meet the general requirements for admission which are outlined elsewhere in this catalog. Generally, an applicant must also hold a bachelor's degree in music.

Students who did not graduate from Lamar University must take a music theory placement examination. Applicants for the graduate degree in performance must audition for the major professor.

Degree Requirements

Candidates for master's degrees in music must meet all general degree requirements of the College of Graduate Studies as listed elsewhere in this catalog. The Master of Music in Performance requires 30 semester hours, including 12 hours in the applied major, six in music literature, six in music theory, and six in music education. In addition, a public recital and research paper or lecture recital are required. Voice majors must show proficiency (to be determined by the Department of Music) in German, French and Italian diction prior to entering this degree program.

The Master of Music Education degree requires 36 semester hours, including 18 in music education, six in music literature, six in music theory, and six in thesis. Two additional courses in music education may be substituted for the thesis, and six hours of applied music may replace two music education courses.

All degree candidates must take MEd 532 (Seminar in Special Problems) and pass a final oral examination before a degree can be granted. The director of graduate music studies will serve as the general advisor of all graduate students in music. A committee of three graduate faculty members will also serve in an advisory capacity and administer the final oral examination.

Graduate Faculty

Associate Professor L. Randolph Babin
Choral music education

Assistant Professor Bob Culbertson
Brass and music education

Associate Professor Wayne Dyess
Brass and music education

Associate Professor Barry W. Johnson
Brass, music education

Professor John R. LeBlanc
Voice, choral

Assistant Professor Barbara Mathis
Voice

Associate Professor Raul S. Ornelas
Brass, music education

Professor James M. Simmons
Woodwinds, music education

Applied Music (AM)

521, 522, 523, 524, 525 Graduate Applied Music 2:2:0
For music education majors only. Graduate applied music in any instrument category, including composition. No more than six hours may be applied toward graduation in the music education degree.

541, 542, 543, 544, 545 Graduate Applied Music 4:4:0
Graduate applied music in any instrument category, including composition. No more than 12 hours may be applied toward graduation in the Master of Music degree.
Music Education (MEd)

521 Seminar in Music Education 2:15:20
Research dealing with special problems related to field work for professional music teachers. Course may be repeated for credit. Class: 15 clock hours. Laboratory: 20 clock hours.

530 Advanced Instrumental Organization and Administration 3:30
Organization and administration of public school bands and orchestras, with emphasis on rehearsal methods and techniques, library systems, program building, publicity procedures, contest preparation, techniques of class instruction and budget.

531 Advanced Choral Organization and Administration 3:30
Philosophy, organization and administration of vocal music programs at the public school level; emphasis similar to MEd 530.

532 Seminar in Special Problems 3:30
Research problems of special interest to students whose major emphasis is on the graduate field of music. Research paper required.

533 Basic Concepts in Music Education 3:30
The historical, philosophical and psychological bases of music education.

534 Supervision of Music 3:30
Supervision of public school music programs, with emphasis on leadership, instruction, public relations and problems in scheduling and finance.

535 Advanced Materials and Methods in Elementary Music 3:30
Study of current trends, methods and materials in teaching elementary school music, with emphasis on individual study and presentations.

536 Advanced Choral Conducting 3:30
Development of technical facility in conducting choral music, with emphasis on complex interpretive elements and problems of the choral conductor.

537 Advanced Instrumental Conducting 3:30
Advanced interpretive problems and reheasal techniques related to the conducting of various types of band and orchestral music.

538 Advanced Instrumental Methods 3:30
The principles and techniques of teaching instrumental music.

539 Advanced Vocal Methods 3:30
The principles and techniques of teaching vocal music.

540 Microcomputer Applications in Music 3:30
A study of microcomputers and music-related software, especially in the area of computer-assisted marching band training and administrative duties.

Music Literature (MLt)

531 Instrumental Literature 3:30
Survey of music for large instrumental ensembles, chamber music and music for solo instruments. Emphasis on the concerto and symphony, the string quartet and sonata literature, with special attention to the needs and interests of students enrolled.

532 Keyboard Literature 3:30
Survey of keyboard literature from the pre-piano period to the present, including study of the piano sonata and other characteristic forms. Emphasis on performing, listening and analysis.

533 Choral Literature 3:30
The literature, performance practices and history of choral music, including a study of representative works from various countries.

536 Survey of the Baroque Era 3:30
Comprehensive study of the period, beginning with the transition to Baroque, c. 1580, and ending c. 1750. Emphasis on advances in musical form, stylistic developments and performance practices.

537 Survey of the Classic Era 3:30
Comprehensive study of the period, beginning with the transition to classicism, c. 1730, and ending c. 1827. Emphasis on advances in the musical form, stylistic developments and performance practices.
530 Survey of the Romantic Era
   Comprehensive study of the period, beginning with the transition to Romanticism, c. 1815, and ending c. 1910.
   Emphasis on advances in musical form, stylistic developments and performance practices.

539 Twentieth Century Music
   A survey of major composers and schools of composition from Debussy to the present.

**Music Theory (MTy)**

532 Advanced Band Arranging
   Advanced techniques in arranging music for various types of bands, and study of models by masters of band arranging.

533 Advanced Counterpoint
   Application, through analysis and creative writing, of contrapuntal techniques in larger forms such as canon and fugue.

534 Advanced Orchestration
   Techniques of scoring for various types of orchestras, and study of models by masters of orchestration.

535 Twentieth Century Harmony
   The analysis and writing of music based on twentieth century harmonic techniques and devices.

536 Pedagogy of Theory
   The principles and techniques of teaching the various branches of music theory, including principles of learning, history of theory, critical study of appropriate texts and supervised teaching of music theory classes.

537 Analytical Techniques
   Traditional and contemporary approaches to the visual and aural analyses of music from all periods.

**Music (Mus)**

530 Special Projects in Music Education
   Individual projects for students with specialized needs in the music education area.
   **Prerequisite:** Consent of Department Chair.

531 Special Projects in Music Literature
   Individual projects for students with specialized needs in the music literature area.
   **Prerequisite:** Consent of Department Chair.

532 Special Projects in Music Theory
   Individual projects for students with specialized needs in the music theory area.
   **Prerequisite:** Consent of Department Chair.

669A-669H Thesis
   **Prerequisite:** Approval of graduate advisor.
THE COLLEGE OF HEALTH and Behavioral Sciences offers study under the practiced eye of the professional.
College of Health and Behavioral Sciences

Department of Psychology

The Department of Psychology offers a program of study leading to the Master of Science degree in Applied Psychology. It is designed to prepare professional personnel for employment in business, industry or community mental health. Students may elect to take their primary coursework in industrial/organizational psychology or in community/counseling psychology. Those seeking admission to this program must meet the general requirements as set forth in the catalog for admission to the College of Graduate Studies and must offer the substantial equivalent of a bachelor’s degree in psychology (24 semester hours) including courses in statistics and experimental psychology. The department has flexible admission criteria which will allow the faculty to review applicants individually. However, students with GRE scores less than 1000 (V + Q) are not usually accepted. International students must present a minimum GRE verbal score of 400. All students must also have a 2.5/4.0 undergraduate grade point average overall or on the last 50 hours of undergraduate course work.

Degree Requirements

The candidate for the Master of Science degree in Psychology must meet all of the College of Graduate Studies general degree requirements. Additional specific degree requirements are as follows:

1. Forty-two semester hours of course work in psychology which must include 23 semester hours in Psychology 439C (Multivariate Statistics), 530, 531, 5311, 532, 5320, 5323 and two semester hours in Psychology 512. For the Community Psychology Program, an additional 9 semester hours in Psychology 5310, 5312 and 5313 is required. In the Industrial Psychology Program, an additional 6 semester hours is required in Psychology 5321 and 5322.

2. Candidacy examinations as devised by the Psychology Department graduate faculty. A student may petition to be administered the candidacy (qualifying) examination during the semester in which the appropriate course work listed in No. 1 above is to be completed provided the student is in good academic standing. Dates to sit for the examination will be announced each semester. A student must have satisfactorily passed candidacy examinations prior to enrolling in Psychology 5330, 669A, 5310 or 5313.

3. One to three additional semester hours of 400G and/or 500 level courses in an approved field of study.

4. Practicum: Six semester hours in Psychology 5330 and 5331 for I/O students; three semester hours in Psychology 5330 for community students.

5. Thesis: Submission of an acceptable thesis and satisfactory performance on a final written comprehensive and/or oral examination with a minimum of six semester hours in Psychology 669.

Departmental Policies

Special attention is called to the following departmental policies:

1. Graduate studies are prohibited from providing psychological services except when supervised by a faculty member as part of a course requirement or when regularly employed by an exempt agency as defined by the Psychologist’s Certification and Licensing Act. Students in training are expected to be aware of and abide by the Psychologist’s Certification and Licensing Act and the Ethical Principles of Psychologists. A violation of this policy will result in the student’s dismissal from the program.
2. More than six hours of "C" level work will result in the student's dismissal from the program.
3. Students may not enroll in the same course more than twice.
4. Qualifying and/or final examinations may be repeated once if failure occurs. In general, a student repeating any portion of the examinations must do so at the next administration of the examination.
5. After admission to candidacy, a student must be enrolled in a thesis course each regular semester until requirements for the degree are completed. In addition a student must be registered for a thesis course each session of the summer term if the student is to receive the degree in August or is involved in research or writing.

Under unusual circumstances and with the approval of the department chair and the student's supervising professor, a student may postpone registration for the thesis course for one or more semesters. Unless special permission has been granted, a student who is not continuously enrolled in a thesis course must repeat the candidacy examinations and apply for re-admission to candidacy.

**Graduate Faculty**

Professor James K. Esser  
Social, industrial-organizational psychology
Assistant Professor Rolf F. Holtz  
Social, industrial-organizational psychology, personality
Assistant Professor Joanne S. Lindoerfer  
Clinical psychology, community psychology
Professor Richard G. Marriott  
Physiological psychology, learning, psychopharmacology, methodology
Assistant Professor Edward H. Matthei  
Language development, developmental psychology, psycholinguistics
Assistant Professor Donald E. Trahan  
Neuropsychology, assessment
Professor James L. Walker, Jr.  
Psychological measurement, statistics, instrumentation and methodology.

**Psychology Courses**

512 Research Practicum  
Individualized research activities in industrial-organizational psychology and community-counseling psychology. Assignments are designed to supplement the more formal course work by a variety of pre-professional activities such as assisting in research, teaching and working on field projects under staff supervision. Required of all graduate students prior to eligibility for Psy 5330 with a maximum of three semester hours allowed.

Prerequisite: Consent of Instructor.

530 Advanced General Psychology I  
A comprehensive overview of the history of psychology, systems of psychological thought, and the areas of physiological psychology, sensation and perception, learning, motivation, and cognition. Emphasis will be placed on both background material and current research. May be taken out of sequence.

Prerequisite: Consent of Instructor.

531 Advanced General Psychology II  
A comprehensive overview of the following areas of psychology: personality, developmental, social, and abnormal. Emphasis will be placed on both background material and current research. May be taken out of sequence.

Prerequisite: Consent of Instructor.

532 Experimental Design  
A study of the research procedures and techniques commonly used by the applied and theoretical psychologist in the design, execution, control and evaluation of experiments.

Prerequisite: Consent of Instructor.

533 Individual Study  
Independent study of special topics or problems in industrial/organizational or community psychology. May be repeated for credit.

Prerequisite: Consent of Instructor.
534 Special Topics in Psychology 3:2:0
Topics in developmental, physiological, social, differential, experimental, quantitative, cognitive or clinical psychology. Includes coursework, library and/or laboratory work and conferences with a staff member. A description of the particular area of study will be indicated. A student may repeat the course for credit when the area of study varies.
Prerequisite: Consent of instructor.

5310 Introduction to Psychological Assessment 3:3:0
An introduction to intellectual assessment. Includes principles of psychological testing, test statistics, and critical evaluation of a variety of intellectual and achievement measures. Practicum in administration, scoring, interpretation, and formal psychological report writing for all Wechsler measures and the Stanford-Binet.
Prerequisite: Admission to candidacy.

5311 Community Psychology: Introduction to Psychotherapy 3:3:0
Psychotherapy skills are introduced using didactic techniques. Emphasis is placed upon each student developing awareness of psychopathology while being exposed to psychotherapeutic techniques by the instructor.
Prerequisite: Consent of instructor.

5312 Advanced Psychological Assessment 3:3:0
An introduction to the broad area of personality assessment including DSM III diagnostic classifications. Practicum in administration, scoring, interpretation, and formal psychological report writing with the MMPI, Rorschach, TAT, and other objective and projective assessment devices.
Prerequisite: Psy 5310.

5313 Community Psychology: Advanced Psychotherapy 3:3:0
An in-depth study of psychotherapeutic theories and intervention strategies.
Prerequisite: Psy 5311 and admission to candidacy

5320 Theory and Techniques of Psychological Measurement 3:3:0
A study of procedures used in the development, evaluation, and application of psychological measuring instruments. Topics include variate linear correlation, nonlinear correlation, multiple and partial correlation, classical true score theory, validation techniques, and test construction techniques.
Prerequisite: Consent of instructor.

5321 Advanced Industrial Psychology I 3:3:0
A critical examination of the social and organizational factors in the work situation. Primary emphasis on human relations, leadership and organizational influences on behavior.
Prerequisite: Consent of instructor.

5322 Advanced Industrial Psychology II 3:3:0
Psychological principles and techniques applied to job analysis, selection and placement of workers, training and organizational efficiency.
Prerequisite: Psy 5320.

5323 Advanced Experimental Psychology 3:3:0
Theory and application of experimental design in psychological research. Students will have an opportunity to design and conduct an original research study.
Prerequisite: Psy 532.

5330 Practicum I 3:2:0
Supervised training and experience in a local, state or regional agency, institution or employment setting. The specific nature of the practicum depends on the professional background and goals of the candidate and will be determined by the candidate, his/her faculty advisor and a member of the cooperating agency/organization. Under unusual circumstances, this course may be waived by the graduate faculty of the Psychology Department for students in the Industrial Program if they elect three additional hours from the approved program courses.
Prerequisite: Admission to candidacy.

5331 Practicum II 3:2:0
Supervised work in an area of particular interest to the student. The practicum includes both a close relationship with a faculty member of the cooperating agency/organization. Under unusual circumstances, this course may be waived by the graduate faculty of the Psychology Department for students in the Industrial Psychology program if they elect three additional hours from the approved program courses.
Prerequisite: Psy 5330.

609A-609B Thesis 6:4:0
Prerequisite: Admission to candidacy.
The following course may be taken for graduate credit with augmented requirements, subject to approval by the department chair.

439 Contemporary Problems in Psychology 3:0:0
A critical and comprehensive examination of current problems in selected areas of psychology. Topics will vary from semester to semester.
Prerequisite: Nine hours in psychology or permission of instructor. May be repeated for credit when topics vary.
GRADUATION IS A TIME of excitement for all students.

Administration
McLaughlin, George E., Ed.D., Chancellor
Leonard, W.S., M.S., Vice Chancellor for Development
Nylin, William C., Ph.D., Vice Chancellor for Academic and Financial Affairs
Franklin, Billy J., Ph.D., President, Lamar University-Beaumont
Idou, John P., Ph.D., Executive Vice President for Academic and Student Affairs
Desbhol, Joseph D., J.D., Vice President for Administration and Counsel
Brickhouse, J. Earl, B.S., Executive Director for Public Affairs
Wooster, Ralph A., Ph.D., Associate Vice President and Dean of Faculties
Kavanaugh, Joseph, Ph.D., Associate Vice President and Dean of Students
Seelbach, Wayne, Ph.D., Executive Assistant to the President for Coordination and Planning
Maradian, Steve, Ed. D., President, Lamar University-Orange
Monroe, W. Sam, L.L.D., President, Lamar University-Fort Arthur
Wells, John Calhoun, Ph.D., President, John Gray Institute

Council of Deans/Academic Administration
Bell, Myrtle L., Ed.D., Dean, College of Health and Behavioral Sciences
Brentlinger, W. Brock, Ph.D., Dean, College of Fine Arts and Communication
Ensign, Gary, Ph.D., Director of Public Service and Continuing Education
Hodge, Charles M., Ed.D., Dean, College of Education and Human Development
McCord, S. Joe, Ph.D., Library Director
Moulton, Robert D., PhD, Associate Vice President for Research and Dean of Graduate Studies
Rode, Elmer G., Jr., M.Ed., Dean of Records and Registrar
Rush, James, M.Ed., Director of Academic Services
Seelbach, Wayne, Ph.D., Interim Dean of the College of Arts and Sciences
Sethna, Beheruz N., Ph.D., Dean, College of Business
Shipper, Kenneth E., Ph.D., Executive Director and Dean, Lamar University Institute of Technology
Young, Fred M., Ph.D., Dean, College of Engineering

The Graduate Council
Moulton, Robert D., Professor of Communication Disorders and Associate Vice President for Research and Dean of Graduate Studies
Marriott, Richard G., Professor of Psychology and Chair, Department of Psychology
Sheppeard, Sally J., Associate Professor of English
Simmons, James M., Professor of Music and Chair, Department of Music
Swerdlow, Robert A., Professor of Marketing and Associate Dean, College of Business
Thompson, Bob, Professor of Educational Administration and Supervision and Chair, Department of Educational Leadership
Hopper, Jack R., Professor of Chemical Engineering and Chair, Department of Chemical Engineering.

The Graduate Faculty 1990-91

The following list reflects the status of the graduate faculty of Lamar University as of Fall, 1990. The date following each name is the academic year of first service to the University and does not necessarily imply continuous service since that time.

Akers, Hugh A. 1977, Professor of Chemistry
B.S., University of California at Riverside; Ph.D., University of California at Berkeley

Allen, Charles L. 1979, Associate Professor of Economics
B.A., East Texas State University; M.A., Ph.D., University of Arkansas

Anderson, Adrian N. 1987, Professor of History and Chair, Department of History
B.S., M.A., Ph.D., Texas Tech University

Anderson, Virginia 1980, Associate Professor of Home Economics
B.S., Georgia State College for Women; M.Ed., Trinity University

Andrews, Jean 1988, Associate Professor of Dead Education
B.A., Catholic University; M.Ed., Western Maryland College; PhD., University of Illinois

Babin, L. Randolph 1968, Assistant Professor of Music
B.M.Ed., M.M.Ed., Ph.D., Louisiana State University

Baker, B. Joanne 1981, Assistant Professor of Mathematics
B.A., Lamar University; M.A., Ph.D., University of Texas

Baker, Christopher 1976, Professor of English and Director of Freshman English
B.A., St. Lawrence University; M.A., Ph.D., University of North Carolina

Baker, Mary Alice 1969, Associate Professor of Communication
B.S., M.A., University of Oklahoma; Ph.D., Purdue University

Barnes, Cynthia 1982, Associate Professor of Office Administration
B.S., Howard Payne University; M.Ed., Texas Tech University; Ed.D., North Texas State University

Barton, Joel E. III 1987, Associate Professor of Health, Kinesiology and Dance
B.S., M.Ed., Ph.D., Texas A&M University

Bechler, David L. 1981, Associate Professor of Biology
B.A., Indiana University; M.S., Northeast Louisiana University; Ph.D., Saint Louis University

Bell, Alice C. 1971, Professor of Health, Kinesiology and Dance
B.S., M.A., Ph.D., Texas Woman's University

Bethel, James 1987, Associate Professor of Communication
B.A., University of Tulsa; M.A., Ph.D., University of Oklahoma

Bianchi, Thomas S. 1990, Assistant Professor of Biology
B.A., Dowling College; M.A., State University of New York - Stony Brook; Ph.D., University of Maryland

Blackwell, E. Harold. 1990, Professor of Kinesiology and Chair, Department of Health, Kinesiology and Dance
B.S.E., Delta State University; M.Ed., Memphis State University; Ed.D., University of Southern Mississippi
Boatwright, Douglas 1986, Associate Professor of Health, Kinesiology and Dance and Director of Graduate Programs
B.S., University of Alabama at Birmingham; M.S., Ph.D., Louisiana State University

Bost, David L. 1949, Professor of Educational Foundations
B.A., Hardin-Simmons University; M.J., University of Texas; Ph.D., East Texas State University; Licensed Psychologist

Briggs, Kenneth R. 1966, Regents' Professor of Education Psychology
B.S., M.Ed., Ed.D., North Texas State University

Brust, Melvin F. 1978, Professor of Management and Finance
B.S.E.E., M.S.E.E., University of Texas; Ph.D., North Texas State University; Registered Professional Engineer.

Buonora, Paul 1990, Assistant Professor of Chemistry
B.S., M.S., Indiana University of Pennsylvania; Ph.D., University of Virginia

Burke, Charles M. 1970, Professor of School Curriculum; Director of Admissions and Advising, Department of Professional Pedagogy
B.A., Southeastern Louisiana University; M.Ed., Louisiana State University; Ed.D., University of Southern Mississippi

Cannon, John R. 1988, Professor of Mathematics and Chair, Department of Mathematics
B.A., Lamar State College of Technology; M.A., Ph.D., Rice University

Carley, Wayne W. 1993, Associate Professor of Biology
B.S., M.A., Ph.D., University of California

Carroll, John M. 1972, Professor of History
A.B., Brown University; M.A., Providence College; Ph.D., University of Kentucky

Castle, David S., 1985, Associate Professor of Political Science
B.A., M.A., Marshall University; Ph.D., University of Rochester

Cavaliere, Frank 1985, Associate Professor of Business Law
B.A., Brooklyn College; B.B.A., Lamar University; J.D., University of Texas-Austin

Cawley, William A. 1988, Professor of Environmental Engineering and Director of Gulf Coast Hazardous Substance Research Center
B.A., Harvard University; B.S., Tufts University; M.S., Massachusetts Institute of Technology

Chen, Daniel H. 1982, Associate Professor of Chemical Engineering
B.S., National Cheng-Kung University; M.S., National Taiwan University; Ph.D., Oklahoma State University

Cherry, Richard T. 1966, Regents' Professor of Finance
B.A., Texas A&M University; M.A., Ph.D., University of Texas

Chiu, Paul 1988, Assistant Professor of Mathematics
B.Sc., National Chung Hsing University; M.A., Ph.D., University of Texas at Arlington

Choi, Jai-Young 1982, Associate Professor of Economics
B.A., Yonsei University; M.A., University of Kansas; Ph.D., University of Oklahoma

Chu, Hsing Wei 1979, Associate Professor in the Department of Industrial Engineering
B.D. Tunghai University; M.S., Asian Institute of Technology; Ph.D., University of Texas

Cocke, David L. 1989, Jack M. Gill Professor of Chemistry in the Department of Chemistry
B.S., University of Texas; M.S., Lamar University; Ph.D., Texas A&M University

Cooper, Mark J. 1984, Department of Professional Pedagogy, Associate Professor of Early Childhood
B.S.E., M.S.E., Henderson State University; Ph.D., Georgia State University

Corder, Paul Ray 1987, Associate Professor of Mechanical Engineering
B.S., M.S., Ph.D., Texas A&M University

Crowder, Vernon Roy 1967, Professor of Health, Kinesiology and Dance
B.S., Lamar University; M.S., Ph.D., Louisiana State University
Crum, Floyd M. 1955, Regents' Professor of Electrical Engineering and Acting Chair, Department of Electrical Engineering
B.S., M.S., Louisiana State University; Registered Professional Engineer

Culbertson, Robert 1974, Assistant Professor of Music
B.M., M.M., Northern Illinois University; D.M.A. University of Texas at Austin

Daigrepont, Lloyd M. 1981, Associate Professor of English
B.A., M.A., Ph.D., Louisiana State University

Danieli, Saeed 1981, Associate Professor of Civil Engineering
B.S., Tehran Polytechnique; M.S. School of Engineering of Strasbourg; Ph.D., University of Lille; Registered Professional Engineer

Darley, Nancy S. 1955, Professor of Office Administration and Chair, Department of Administrative Services
B.B.A., M.B.A., Texas Tech University; Ph.D., Louisiana State University

Deal, Randolph E. 1990, Associate Professor of Communication and Director of Speech and Hearing Clinic
B.A., Oklahoma State University; M.C.D., Ph.D., University of Oklahoma

Dobson, Mary E. 1990, Instructor
B.S., Northeastern State University; M.S. University of Oklahoma

Draper, Richard A. 1983, Associate Professor of Business Statistics
B.S., Arizona State University; M.B.A., Lamar University Ph.D., Texas A&M University

Drury, Bruce R. 1971, Professor of Political Science
B.A., M.A., University of Nebraska; Ph.D., University of Florida

Dubose, Elbert T., Jr. 1974, Associate Professor of Political Science
B.A., Southwest Texas State University; M.A., Texas Tech University; Ph.D., University of Oklahoma

Duncan, Edwin 1986, Assistant Professor of English
B.A., Texas Tech University; M.A., Ph.D., University of Texas

Dyess, Wayne 1977, Associate Professor of Music
B.M., Stephen F. Austin University; M.M. Catholic University of America; Ed.D University of Houston

Esser, James K. 1976, Professor of Psychology
B.S., University of Iowa; Ph.D., Indiana University

Fitzpatrick, Phil 1977, Associate Professor of Art
B.F.A., M.F.A., Auburn University

Freiden, Jon B. 1990, Professor Management and Marketing and Chair, Department of Management and Marketing
B.S., University of Missouri; M.A., University of Missouri; Ph.D., University of Oklahoma

Fritze, Ronald H. 1984, Associate Professor of History
B.A., Concordia College; M.A., M.L.S., Louisiana State University; Ph.D., University of Cambridge

Gates, David G. 1963, Professor of Industrial Engineering
B.S., M.S., University of Arkansas; Ph.D., Oklahoma State University; Registered Professional Engineer

Georgas, Marilyn D. 1962, Professor of English
B.A., Sam Houston State University; M.A., Lamar University; Ph.D., University of Texas

Godkin, Roy Lynn 1981, Associate Professor of Management
A.B., Bethany Nazarene College; M.B.E., Nazarene Theological Seminary; M.A., Sangamon State University; Ph.D., North Texas State University

Gold, Leonard 1988, Associate Professor of Mechanical Engineering
B.S.M.E., M.S.M.E., Ph.D., Drexel Institute of Technology
Gonzales, Ramon 1988, Instructor of Deaf Education
B.S., M.S., Lamar University

Gouls, Fara M. 1975, Assistant Professor of Special Education and Reading
B.A., Lamar University; M.A., University of Colorado; Ed.D., McNeese State University

Gunnarson, Adele D. 1987, Assistant Professor of Audiology
B.S., University of Texas; M.S., Ph.D., University of Texas-Dallas; A.S.H.A Certification and Licensure in Audiology

Gwin, Howell H., Jr 1962, Professor of History
B.A., M.A., Ph.D., Mississippi State University

Gwynn, Robert S. 1976, Associate Professor of English
A.B., Davidson College; M.A., M.F.A., University of Arkansas

Haiduk, Michael W. 1983, Associate Professor of Biology
B.S., M.S., Texas A&M University; Ph.D., Texas Tech University

Hansen, Keith C. 1967, Professor of Chemistry and Chair, Department of Chemistry
B.S., Lamar University; Ph.D., Tulane University

Hargrove, W. Richard 1964, Professor of Educational Psychology
B.S., M.Ed., North Texas State University; Ed.D., George Peabody College for Teachers

Harrell, Richard C. 1966, Professor of Biology
B.S., East Central State College; M.S. Ed., University of Georgia; Ph.D., Oklahoma State University

Harvill, John B. 1984, Associate Professor of Computer Science
B.A., M.A., North Texas State University; Ph.D., Southern Methodist University

Haven, Sandra L. 1973, Associate Professor of Educational Foundations
B.S., Lamar University; M.A., Central Michigan University; Ed.D., University of Houston

Hawkins, Charles F. 1966, Regents' Professor of Economics; and Chair, Department of Economics and Finance
B.A., Lamar University; M.A., Ph.D., Louisiana State University

Henry, Lula J. 1987, Associate Professor of Reading
B.S.Ed., Paul Quinn College; M.S.Ed., Arkansas State University; Ed.D., University of Missouri-Columbia

Hill, James K. 1968, Associate Professor and Chair, Department of Art
B.F.A., M.A., University of New Mexico; Ed.D.C.T.A., Teachers College, Columbia University

 Hinchevy, Jane C. 1969, Associate Professor of Home Economics
B.S., Winthrop College; M.S. University of Tennessee; Ph.D., Texas Woman's University

Ho, Tho-Ching 1982, Associate Professor of Chemical Engineering
B.S., National Taiwan University; M.S., Ph.D., Kansas State University

Hodge, Charles M. 1969, Professor of Educational Administration and Supervision and Dean, College of Education and Human Development
B.A., University of Arkansas at Pine Bluff; M.Ed., Ed.D., University of North Texas

Holt, V. Raye 1975, Professor of Health, Kinesiology and Dance
B.S., Georgia State College for Women; M.S., Baylor University; Ed.D., University of Tennessee

Holtz, Rolf F. 1989, Assistant Professor of Psychology
B.A., University of Washington; M.S.Ed., Ph.D., University of Southern California

Hopper, Jack R. 1969, Professor of Chemical Engineering and Chair, Department of Chemical Engineering
B.S., Texas A&M University; M.Ch.E., University of Delaware; Ph.D., Louisiana State University; Registered Professional Engineer

Hunt, Madelyn D. 1984, Associate Professor of Biology
B.S., Lamar University; M.P.H., Dr.P.H., University of Texas School of Public Health; Registered Medical Technologist (A.S.C.P.)
Idoux, John P. 1963, Professor of Chemistry and Executive Vice President for Academic and Student Affairs
B.A., University of St. Thomas; M.S., Ph.D., Texas A&M University

Isaac, Paul E. 1980, Regents' Professor of History
B.A., Pepperdine College; M.A., Ph.D., University of Texas

Jack, Meredith M. 1977, Associate Professor of Art
B.F.A., University of Kansas; M.F.A., Temple University

Johnson, Aileen S. 1986, Associate Professor of Educational Administration and Supervision
B.A., Western Michigan University; M.A., Ph.D., Arizona State University

Johnson, Barry W. 1983, Associate Professor of Music
B.M.E., M.A., Sam Houston State University; Ed.D., University of Houston

Jones, Kirkland C. 1973, Professor of English
B.A., University of Washington; M.A., Texas Southern University; Ph.D., University of Wisconsin; M.Div., Austin Presbyterian Seminary

Jones, Richard W. 1975, Professor of Accounting and Chair, Department of Accounting
B.S.C., Texas Christian University; M.A., University of Alabama; Ph.D., University of Arkansas; Certified Public Accountant

Jordan, Donald L. 1979, Associate Professor of Computer Science
B.S., East Texas Baptist College; B.S., Lamar University; M.S., Air Force Institute of Technology; Ph.D., University of Houston

Keel, Andrea 1981, Associate Professor of Reading
B.A., Hunter College; M.A., Ph.D., University of New Mexico

King, Ronald 1989, Professor of Computer Science and Chair, Department of Computer Science
B.S., Lamar University; M.S., University of North Texas; Ph.D., University of Northern Colorado

Koon, Enno 1984, Professor of Civil Engineering and Chair, Department of Civil Engineering
B.C.E., City University of New York; M.S., Columbia University; Ph.D., Wayne State University; Registered Professional Engineer

Koh, Hikyoo 1981, Assistant Professor of Computer Science
B.A., Young-Nam; M.S., University of Hawaii; Ph.D., University of Pittsburgh

Laudecker, Michael A. 1967, Associate Professor of Mathematics
B.S., M.S., Lamar University; Ph.D., University of Houston

Lane, James E. 1967, Associate Professor of Special Education; Director, Professional Services
B.A., Abilene Christian University; M.Ed., Lamar University; Ed.D., North Texas State University

Laslovich, Michael J. 1988, Assistant Professor of Political Science
B.A., M.A., University of Montana; Ph.D., Carleton University

LeBlanc, John R. 1971, Professor of Music and Department Director of Graduate Studies
B.M.Ed., McNeese State University; M.S.M., Southwestern Baptist Theological Seminary; M.M., Louisiana State University; Ph.D., University of Southern Mississippi

Li, Ku-Yen 1978, Professor of Chemical Engineering
B.S., M.S., Cheng Kung University; Ph.D., Mississippi State University; Registered Professional Engineer

Lindorfer, Joanne 1980, Assistant Professor of Psychology
B.S., Loyola University, Chicago; M.S., Ph.D., University of Texas

Lokeneggard, Lynne 1973, Associate Professor of Art
B.A., M.A., University of Minnesota; Ph.D., University of Kansas

Lowrey, Mildred A. 1974, Professor of Health, Kinesiology and Dance and Academic Director
B.S., Howard College; M.S., Alabama College; Ph.D., Florida State University
Mantz, Peter A. 1983, Associate Professor of Civil Engineering
B.Sc., Newcastle University; M.Sc., Southampton University; Ph.D., London University;
Chartered Engineer (U.K.)

Marriott, Richard G. 1976, Professor of Psychology and Chair, Department of Psychology
B.S., Weber State College; M.A., Ph.D., University of New Mexico

Martin, Gabriel A. 1989, Assistant Professor of Communication
B.S., M.S., Lamar University; Ed.D., University of Southern Mississippi

Matheson, Alec L. 1983, Associate Professor of Mathematics
B.S., University of Washington; Ph.D., University of Illinois

Mathis, Barbara Thomas 1990, Assistant Professor of Music
B.M., M.M., North Texas State University; Ph.D., University of North Texas

Matthei, Edward H. 1989, Assistant Professor of Psychology
B.A., University of Chicago; Ph.D., University of Massachusetts

McAdams, LeBlanc 1967, Professor of Home Economics and Chair, Department of Home Economics
B.S., Sam Houston State University; M.Ed., University of Houston; Ph.D., Texas Woman's University

McCaskill, Ed 1987, Associate Professor of Science Education
B.S., M.Ed., Sam Houston State University; Ed.D., East Texas State University

Mei, Harry T. 1960, Professor of Mechanical Engineering
B.S., National Taiwan University; M.S., Ph.D., University of Texas; Registered Professional Engineer

Montano, Carl B. 1981, Associate Professor of Economics
B.S., M.S., University of the Philippines; Ph.D., Michigan State University

Morgan, William E. 1972, Professor of Civil Engineering
B.S., U.S. Naval Academy; B.S., U.S. Naval Post Graduate School; M.S., University of Alaska; Ph.D., University of Texas; Registered Professional Engineer

Moss, Jimmy D. 1986, Associate Professor of Finance
B.S., M.B.A., D.B.A., Mississippi State University

Moulton, Robert D. 1974, Regents' Professor of Communication Disorders and Associate Vice President for Research and Dean of Graduate Studies
B.S., M.S., University of Utah; Ph.D., Michigan State University

Newman, Jerry A. 1982, Regents' Professor of Art
B.F.A., University of Texas; M.F.A., University of Southern California

Nordgren, Joseph E. 1990, Assistant Professor of English
B.A., University of Minnesota; M.A., Ph.D., Florida State University

O'Neill, Robert G. 1962, Associate Professor of Art
B.F.A., University of Nebraska; M.F.A., University of Colorado at Boulder

Ornelas, Raul Sosa 1972, Associate Professor of Music
B.M., University of Texas; M.M.Ed., McNeese State University; D.M.A., University of Southern Mississippi

Osborne, Lawrence 1990 Assistant Professor of Computer Science
B.S., Southeast Missouri State University; M.A., M.S., Ph.D., University of Missouri - Rolla

Ortego, James Dale 1968, Regents' Professor of Chemistry
B.S., University of Southwestern Louisiana; Ph.D., Louisiana State University

Pearson, William M. 1969, Professor of Political Science and Chair, Department of Political Science
B.S., Sam Houston State University; M.A., Texas A&M University; Ph.D., Louisiana State University
Pederson, Olen T. 1975, Professor of Audiology and Chair, Department of Communication
B.S., University of Houston; M.S., East Texas State University; Ph.D., University of Oklahoma

Price, Donald I. 1983, Associate Professor of Economics
B.A., Hendrix College; M.A., Ph.D., University of Arkansas

Price, R. Victoria 1972, Professor of Modern Languages
B.A., Tift College; M.A., M.Ed., Lamar University; M.A., Ph.D., Rice University

Priest, Dale G. 1986, Assistant Professor of English
B.A., Lamar University; M.A., Ph.D., Rice University

Powell, Annette 1990, Instructor of Speech and Hearing
B.S., M.S., Lamar University

Reddy, G. N., 1990, Assistant Professor of Electrical Engineering
B.E., NS Eng College; M.Sc.Eng., PSG Tech.; M.S., Ph.D., IIT

Rehman, Shafiq N. 1988, Associate Professor of Communication
M.Sc., Uppsala University; M.F.A., Royal University; M.Ed., Bowling Green State University;
Ed.S., University of Toledo; M.B.A., West Texas State University; Ph.D., Bowling Green State University

Rice, Desmond V. 1987, Associate Professor of Reading and Educational Technology
B.A., Avondale College, N.S.W., Australia; M.A., San Francisco State University; Ed.D.,
University of Southern California

Rogers, Bruce G. 1981, Professor of Civil Engineering
B.S., University of Houston; M.S., Ph.D., University of Illinois; Registered Professional Engineer

Roth, Lane, 1978, Associate Professor of Communication
B.A., New York University; M.A., Ph.D., Florida State University

Seelbach, Wayne C. 1976, Professor of Sociology and Gerontology, and Executive Assistant to the
President for Coordination and Planning
B.A., Lamar University; M.A., Stephen F. Austin State University; Ph.D., Pennsylvania State University

Sethna, Behera N. 1989, Professor of Marketing and Information Systems Management and
Dean, College of Business
Bachelor of Technology (honors); Indian Institute of Technology, Bombay; M.B.A., Indian
Institute of Management, Ahmedabad; Master of Philosophy, Ph.D., Columbia University

Sheppard, Sallye J. 1980, Associate Professor of English
B.A., M.A., Texas Christian University; M.R.E., Brite Divinity School; Ph.D., Texas Woman's
University

Shukla, Shyam S. 1985, Associate Professor of Chemistry
M.Sc., University of Saskatchewan; Ph.D., Clarkson College of Technology

Simmons, James M. 1970, Professor of Music and Chair, Department of Music
B.S., Memphis State University; M.M., University of Houston; Ed.D., McNeese State University

Simon, William 1990, Professor of Mechanical Engineering and Chair, Department of Mechanical
Engineering
B.S., University of Southwestern Louisiana; M.S., University of Houston; Ph.D, University of Houston

Smith, Kevin B. 1981, Associate Professor of Sociology and Chair, Department of Sociology,
Social Work and Criminal Justice
B.S., Texas A&M University; M.A., Ph.D., Louisiana State University

Smith, Marshall M. 1989, Assistant Professor of Audiology
B.S., Auburn University; M.S., Pennsylvania State University; Ph.D., Florida State University
Sontag, Monty L. 1972. Professor of Special Education
B.A., University of Denver; M.A., Ed.D., Columbia University

Spradley, Larry W. 1972. Professor of Business Statistics
B.A., Stephen F. Austin State University; M.Th., Southern Methodist University; M.S., Lamar University; Ph.D., Texas A&M University

Stanley, William H. 1973. Professor of Educational Administration and Supervision
B.S., North Texas State University; M.Ed., Hardin-Simmons University; Ed.D., North Texas State University

Stevens, Rita L. 1985. Assistant Professor of Counseling and Development
B.A., Glassboro State College; M.Ed., West Georgia College; Ph.D., Mississippi State University

Stidham, Ronald 1970. Professor of Political Science
B.S., M.A., East Tennessee State Regents University; Ph.D., University of Houston

Storey, John W. 1966. Regents' Professor of History
B.A., Lamar University; M.A., Baylor University; Ph.D., University of Kentucky

Sullivan, John T. 1984. Associate Professor of Biology
A.B., Dartmouth College; Ph.D., Lehigh University

Summerlin, Charles T. 1973. Professor of English and Chair, Department of English and Foreign Languages
B.A., Abilene Christian University; M.Ph., Ph.D., Yale University

Sutton, Walter A. 1963. Professor of History
B.A., William Marsh Rice University; M.A., Ph.D., University of Texas

Swordlow, Robert A. 1978. Professor of Marketing and Associate Dean, College of Business
B.B.A., M.B.A., Lamar University; Ph.D., University of Arkansas

Thomas, James L. 1983. Associate Professor of Industrial and Mechanical Engineering and Director, CAD/CAM
B.S.I.E., Oklahoma State University; M.S.I.E., Texas Technological College; Ph.D., Texas Tech University

Thompson, Bob 1985. Professor of Educational Administration and Supervision and Chair, Department of Educational Leadership
B.S., Abilene Christian University; M.Ed., Ph.D., East Texas State University

Trahon, Donald E. 1990. Assistant Professor of Psychology
B.S., Lamar University; M.S., Ph.D., North Texas State University

Tucker, Jerry R. 1971. Associate Professor of Educational Administration and Supervision
B.S., The University of Texas; M.Ed., Trinity University; Ph.D., Texas A&M University

Utter, Glenn H. 1972. Professor of Political Science
B.A., State University of New York at Binghamton; M.A., Ph.D., State University of New York at Buffalo

Valentin, Andrei V. 1990. Assistant Professor of Mathematics
B.S., M.S., Sofia University; Ph.D., University of Michigan

Vanderleew, James M. 1988. Assistant Professor of Political Science
B.A., Ramapo College; M.A., University of Nevada-Reno; Ph.D., University of New Orleans

Veuleman, Malcolm W. 1970. Professor of Accounting
B.S., McNeese State University; M.B.A., Ph.D., University of Arkansas; Certified Public Accountant

Walker, James L., Jr. 1969. Professor of Psychology
B.A., Baylor University; Ph.D., Texas Tech University

Walker, Richard E. 1963. Professor of Chemical Engineering
B.S., Purdue University; M.S., Bucknell University; Ph.D., Iowa State University of Science and Technology; Registered Professional Engineer
Warren, Michael E. 1966, Professor of Biology and Chair, Department of Biology  
B.A., M.A., Ph.D., University of Texas

Watt, Joseph T., Jr. 1965, Professor of Electrical Engineering  
B.A., B.S., William Marsh Rice University; M.S., Ph.D., University of Texas; Registered  
Professional Engineer

Watts, Doyle 1985, Professor of Educational Psychology, and Chair, Department of Professional  
Pedagogy  
B.S., Abilene Christian University; M.S., Ed.D., Texas Tech University

Wellan, Doris M. 1968, Assistant Professor of Marketing  
B.S., M.S., Louisiana State University; Ph.D., London School of Business, University of  
London

Westgate, James W. 1989, Assistant Professor of Geology  
B.S., College of William and Mary; M.S., University of Nebraska-Lincoln; M.S., Southwest  
Missouri State University; Ph.D., University of Texas-Austin

White, William F. 1992, Professor of Professional Pedagogy  
A.B., St. Bernard's College; Ed.M., University of Buffalo; Ph.D., SUNY

Whittle, John A. 1969, Professor of Chemistry  
B.S., University of Glasgow; Ph.D., Imperial College, University of London

Wills, Curtis E. 1971, Associate Professor of Counseling and Development  
B.S., M.Ed., Sam Houston State University; Ed.D., North Texas State University; Licensed  
Psychologist

Wilson, Howard F. 1987, Associate Professor of Speech Pathology  
B.S., M.S., Florida State University; Ph.D., Ohio University

Wooster, Ralph A. 1955, Regents' Professor of History, Dean of Faculties and Associate Vice  
President for Academic and Student Affairs  
B.A., M.A., University of Houston; Ph.D., University of Texas

Wooten, Bob E. 1975, Professor of Management  
B.B.A., M.B.A., Lamar University; Ph.D., Louisiana State University; Accredited Personnel  
Specialist (APS)

Wright, Stuart A. 1985, Associate Professor of Sociology  
M.A., M.A., University of Houston; Ph.D., University of Connecticut

Yaws, Carl L. 1975, Professor of Chemical Engineering  
B.S., Texas A&I University; M.S., Ph.D., University of Houston; Registered Professional  
Engineer

Yearwood, Stephanie 1988, Assistant Professor of English  
B.A., Tulane University; M.A., Ph.D., University of Texas-Austin

Young, Fred M. 1978, Professor of Mechanical Engineering and Dean, College of Engineering  
B.S.M.E., M.S.M.E., Ph.D., Southern Methodist University; Registered Professional Engineer

Zaloom, Victor A. 1981, Professor of Industrial Engineering and Chair, Department of Industrial  
Engineering  
B.S.I.E., M.S.E., University of Florida; Ph.D. University of Houston; Registered Professional  
Engineer

Zhang, Wen-Ran 1990, Assistant Professor of Computer Science  
B.S., Shanxi Mining Institute; M.S., Ph.D., University of South Carolina
