# FSSE-NSSE Combined Report 2013

## Interpreting Your Report

The display below highlights details in the *FSSE-NSSE Combined* report that are important to keep in mind when interpreting your results. For more information about the survey, please visit our Web site ([fsse.iub.edu](http://fsse.iub.edu)) or contact a member of the FSSE team.

1. **Sample:** The *FSSE-NSSE Combined* report shows responses from both students and faculty at your institution who completed NSSE and FSSE. This report contains responses from faculty who responded to the survey based on their experiences teaching either a lower- or upper-division course. Data from faculty who responded based on another type of course or who did not report a course level are not included in this report. All student responses are based on information from all randomly selected or census-administered students for your institution, the same as those included in the *NSSE Frequencies and Statistical Comparisons* report.
2. **Class level:** Frequency distributions are reported separately for faculty who report teaching lower-division (LD) or upper-division courses (UD). Student responses are reported separately for first-year students (FY) and seniors (SR) as reported by your institution.
3. **Item numbers:** Item numbering corresponds to the survey facsimiles included in your *Institutional Report* and available on the NSSE and FSSE Web sites.
4. **Item wording and variable names:** Results from the FSSE survey appear in the columns on the left and items from the NSSE survey appear in columns on the right. Survey items are worded as they appear on the instrument. Variable names are included for easy reference to your data file, codebook, and *FSSE Frequencies* report.
5. **Faculty responses:** The percentage of faculty who responded at or above the indicated response category. To match the response categories provided on the FSSE instrument, the heading of this column varies throughout the report.
6. **Student responses:** The percentage of students who selected the corresponding response option. Response categories are listed just as they appear on the NSSE instrument. The distribution of student responses match those in your *NSSE Frequencies and Statistical Comparisons* report.
