GEOGRAPHY

in South Africa & Swaziland

March 7 - 18, 2018
GEOL 2376 - World Regional Geography
GEOL 4301 - Geography of Tourism
Activities

Geography of Tourism covers a different form of tourism each week and we’ll focus specifically on how each type pertains to Africa. For example, when we discuss nature-based tourism, we’ll specifically talk about safaris. We’ll also discuss dark tourism, food tourism, medical tourism and sex tourism. World Regional geography provides students with and overview of many of the world’s regions including Sub-Saharan Africa. During your time in South African and Swaziland you’ll hike up Cape Town’s Table Mountain, shop at local markets, and visit Robben Island, where Nelson Mandela was imprisoned for 27 years. You’ll also meet with the US Ambassador to Swaziland, the manager of a game reserve, and a doctor who works with HIV/AIDS patients. Finally, you’ll go on two game drives in Kruger National Park where, if you’re lucky, you’ll spot Africa’s Big Five – lions, elephants, leopards, rhinos and Cape buffalo.

Program Fee

$3,250 + Tuition and Fees
Includes: Airfare, accommodations, breakfasts, ground transportation, all activities and excursions, and international health insurance.
